# واژگان دو زبانه مرجع مدیریت بحران

ضابطه شماره 715

سازمان مدیریت بحران کشور  
معاونت پیش بینی و پیشگیری  
[ndmo.ir](http://ndmo.ir)

معاونت فنی، امور زیربنایی و تولیدی  
امور نظام فنی و اجرایی  
[nezamfanni.ir](http://nezamfanni.ir)

شماره:	۹۶/۱۶۵۵۲۵۹	بخشنامه به دستگاه‌های اجرایی، مهندسان مشاور و پیمانکاران
تاریخ:	۱۳۹۶/۱۱/۰۴	
موضوع: واژگان دو زبانه مرجع مدیریت بحران		
<p>در چارچوب نظام فنی و اجرایی یکپارچه کشور موضوع ماده (۳۴) قانون احکام دائمی برنامه‌های توسعه کشور و ماده (۲۳) قانون برنامه و بودجه و مواد (۶) و (۷) آیین‌نامه استانداردهای اجرایی طرح‌های عمرانی - مصوب سال ۱۳۵۲، به پیوست ضابطه شماره ۷۱۵ امور نظام فنی و اجرایی، با عنوان «<b>واژگان دو زبانه مرجع مدیریت بحران</b>» از نوع گروه سوم ابلاغ می‌شود.</p> <p>رعایت مفاد این ضابطه در صورت نداشتن ضوابط بهتر، از تاریخ ۱۳۹۷/۰۴/۰۱ الزامی است.</p> <p>امور نظام فنی و اجرایی این سازمان دریافت‌کننده نظرات و پیشنهادهای اصلاحی در مورد مفاد این ضابطه بوده و اصلاحات لازم را اعلام خواهد کرد.</p>		
<p>محمد باقر نوبخت</p> 		
		

## اصلاح مدارک فنی

### خواننده گرامی:

امور نظام فنی و اجرایی معاونت فنی، امور زیربنایی و تولیدی سازمان برنامه و بودجه کشور، با استفاده از نظر کارشناسان برجسته مبادرت به تهیه این ضابطه کرده و آن را برای استفاده به جامعه‌ی مهندسی کشور عرضه نموده است. با وجود تلاش فراوان، این اثر مصون از ایرادهایی نظیر غلط‌های مفهومی، فنی، ابهام، ابهام و اشکالات موضوعی نیست.

از این‌رو، از شما خواننده‌ی گرامی صمیمانه تقاضا دارد در صورت مشاهده هر گونه ایراد و اشکال فنی، مراتب را بصورت زیر گزارش فرمایید:

1- در سامانه مدیریت دانش اسناد فنی و اجرایی (سما) ثبت‌نام فرمایید: [sama.nezamfanni.ir](http://sama.nezamfanni.ir)

2- پس از ورود به سامانه سما و برای تماس احتمالی، نشانی خود را در بخش پروفایل کاربری تکمیل فرمایید.

3- به بخش نظرخواهی این ضابطه مراجعه فرمایید.

4- شماره بند و صفحه موضوع مورد نظر را مشخص کنید.

5- ایراد مورد نظر را بصورت خلاصه بیان دارید.

6- در صورت امکان متن اصلاح شده را برای جایگزینی ارسال کنید.

کارشناسان این امور نظرهای دریافتی را به دقت مطالعه نموده و اقدام مقتضی را معمول خواهند داشت. پیشاپیش از همکاری و دقت نظر جنابعالی قدردانی می‌شود.

نشانی برای مکاتبه: تهران، میدان بهارستان، خیابان صفی علی‌شاه - مرکز تلفن 33271

## باسمه تعالی

### پیشگفتار

کشور ایران به لحاظ احتمال رویداد مخاطرات طبیعی یا حوادث غیرمترقبه جزء 10 کشور بلاخیز جهان به شمار می‌رود به گونه‌ای که در گزارش دفتر سازمان ملل متحد مورخ 13 نوامبر 2017 آمده است، از 41 عنوان حوادث طبیعی غیر مترقبه شناخته شده در جهان، بیش از 34 نوع آن در ایران رخ می‌دهد. در حالی که ایران 1 درصد جمعیت دنیا را دارد، حدود 6 درصد تلفات ناشی از بلایای طبیعی را به خود اختصاص داده است. به منظور همسان فهمی از واژه‌های گوناگون که در ادبیات فنی مدیریت بحران‌ها و مخاطرات طبیعی با معانی و کاربردهای متنوع به کار رفته است، لازم دیده شد با تدوین فرهنگ واژگان دو زبانه در این حوزه تخصصی اقدام گردد. این موضوع ضمن حفظ وحدت استفاده از واژگان تخصصی در کشور می‌تواند زمینه ساز توسعه واژگان در ادبیات فنی سایر کشورهای فارسی زبان هم قرار گیرد. در تدوین فرهنگ واژگان عمدتاً مخاطرات طبیعی نظیر زلزله، سیل، خشکسالی، رانش یا لغزش زمینی، طوفان، آتشفشان، بهمن ... مورد توجه قرار گرفته و معادل آنها در زبان انگلیسی درج گردیده است.

بنا بر مفاد ماده 34 قانون احکام دائمی برنامه‌های توسعه، سازمان برنامه و بودجه متولی نظام فنی و اجرایی یکپارچه کشور است. همچنین طبق ماده 23 قانون برنامه و بودجه، سازمان برنامه و بودجه کشور موظف به تهیه و ابلاغ ضوابط، مشخصات فنی، آئین‌نامه‌ها و استانداردهای مورد نیاز طرح‌های عمرانی کشور می‌باشد. در این راستا و نظر به اهمیت مبحث فوق، تهیه و ابلاغ «واژگان دو زبانه مرجع مدیریت بحران» در دستور کار این امور قرار گرفت. در تهیه و تدوین این فرهنگ واژگان سعی شده است واژگان مورد استفاده نهادهای معتبر بین‌المللی در حوزه مدیریت بحران مخاطرات طبیعی مورد استفاده قرار گیرد، در ضمن آوانگاری واژگان به منظور تلفظ صحیح واژه ارائه شده است. مفهوم هر واژه نیز به همراه مثال در قالب یک بند یا عبارت برگرفته از منابع معتبر برای کمک به درک بهتر واژه، در اختیار استفاده کنندگان قرار گرفته است.

ضابطه حاضر توسط آقای مهندس محمدرضا طلاکوب تهیه و تدوین شده است و از حمایت‌ها و مساعدت‌های جناب آقای مهندس غلامحسین حمزه مصطفوی رییس محترم امور نظام فنی و اجرایی، آقای دکتر بهنام سعیدی معاون محترم پیش‌بینی و پیش‌گیری سازمان مدیریت بحران کشور، آقای مهندس علیرضا توتونچی معاون بخش تدوین ضوابط، سرکار خانم مهندس فرزانه آقارمضانعلی رییس گروه امور نظام فنی و اجرایی و آقای مهندس سید وحیدالدین رضوانی، کارشناس این امور برخوردار بوده است.

از بارگاه پروردگار سبحان توفیق روزافزون همه این بزرگواران را آرزومند است. امید است متخصصان و کارشناسان با ابراز نظرات خود درخصوص این ضابطه ما را در به روزآوری و ارتقای آن یاری فرمایند.

حمیدرضا عدل

معاون فنی، امور زیربنایی و تولیدی

زمستان 1396

# الف

initiative /i'nishiyetive /n

ESCAP welcomes Joint initiatives to set up targets for minimizing loss of lives or damage to guide regional efforts on disaster risk management.

ابتکار، ابتکارعمل، قوه ابتکار

innovative /'inovetiv/ adj

alluvial/a'looviyâl/adj

alluvium/a'looviyem/ n

The region has considerable area close to river basins and deltas that are characterized by Holocene alluvium deposits, which are likely to soften and hence are susceptible to liquefaction during an earthquake.

ابتکاری، ابداعی، نوآورانه، نو، مبتکر، خلاق

ابرفتی، رسوبی

آبرفت، ته نشین، رسوب

methodological tools/metho'dâlâjikâl toolz/n

It also involves knowledge of the human resources, legal frameworks, material resources and methodological tools available to support implementation of disaster risk management policies.

ابزار باقاعده، ابزار روشمند

complementary tool/ kâmpili'mentri tool/ n

In ealy warning system (EWS) for sovereign default provides a complementary tool to the analysis of decision – makers by facilitating objective measures of vulnerability.

ابزار تکمیلی

monitoring tools/mânitering toolz/n

As an internal tool for use by the health sector, it will aid in determining priorities for a national health sector risk reduction or disaster management program( or set of initiatives) and, if used regularly, as a monitoring tool for measuring changes ( or lack thereof) over time.

ابزار نظارتی

instrument / 'instrument /n

Instrumental / instru'mentâl /adj

impact dimensions/ 'impakt di'menshenz/ n

Risk management involves measures to avoid disasters, prevention, as well as measures to limit the impact dimensions of disasters (preparedness and mitigation).

ابزار، وسیله، سند، دستگاه

ابزاری، موثر

ابعاد تاثیر، دامنه اثر

dimensional /di'menshenâl /adj

Gender diminsions in Disarter Management aims to address the dearth of specific information on the

ابعادی، بعدی

subject of gender issues in disasters', particularly in the South Asian countries.

unanimity/ yoonanimiti / n

contingency/kân'tinjensi/adj,n

contingent/kân'tinjent/n

District will be covered under the massive village based disaster preparedness program including development of village contingency plan.

contingent/kân'tinjent/adj

obligatory/âb'ligetri/adj

aggregation/ agri'geyshen/ n

Natural hazards are likely to (a) contribute to poverty by affecting human development indicators and assets directly, as well as indirectly through affecting their attributes of value and productivity; and (b) exacerbate the household's in ability to avoid or recover from poverty due to their aggregate nature, in combination with the absence or inadequate application of coping mechanisms.

societal/so'sâyetâl/adj

NSF research activities also address the impact of seismic events on the physical infrastructure systems that serve the public and societal institutions.

inevitable/ in'evitebel/ adj

inevitability/ ineviti'bility/ n

enforcement/in'forsment/ n

Implementation of new design standards is done through the adoption and enforcement of building codes.

ignition/ig'nishen/n

By using a strategic risk assessment framework enables evaluation of how reducing home ignition potential and reducing fuel loads, among other strategic options, can affect various risk factors, which can in turn guide cost-effective investments in risk mitigation efforts.

residual risk/ri'zidyuwâl risk/n

ANSI B11. TR3 defines the term residual risk as "risk that remains after protective measures have been taken". The presence of residual risk implies a continuing need to develop and support effective capacities for emergency services, preparedness, response and recovery together with socio-economic policies such as safety nets and risk transfer mechanisms.

revitalize/ rii'vâytalayz/ vt

The recovery reconstruction phase is marked by large-

اتفاق، اتفاق آرا، وحدت نظر  
اتفاق، پیش آمد، حادثه، تصادف، احتمال  
اتفاق، گروه، هیات نمایندگی

اتفاقی، تصادفی، مشروط به، مokol به  
اجباری، الزام آور، ضروری  
اجتماع، تجمع، مجموعه، گروه، توده

اجتماعی

اجتناب ناپذیر، گریز ناپذیر، جدانشدنی، حتمی  
اجتناب ناپذیری، گریز ناپذیری، حتمیت  
اجرا، اعمال

احتراق، اشتعال، گیرش، افروزش

احتمال وقوع خطرپذیری، احتمال خطر ابتلا، خطرپذیری  
باقی مانده، خطر باقی مانده

احیا کردن، رونق بخشیدن، تقویت کردن

scale efforts to replace buildings and infrastructures, which have been destroyed by the disaster, revitalize economies and restoring agricultural systems to their normal production capacity.

revitalization/riivâytalay'zeyshen/ n

احیا، رونق بخشی، بهبود و تقویت

revegetation/rii'veji'teyshen/n

احیای زندگی گیاهی، تجدید گیاه کاری

To determine revegetation potential the application applies a “cost distance” paradigm where a relative “cost” surface is developed from key features such as major rivers, water bodies, wetlands and areas of high roadside conservation value. The resultant cost surface is then used in conjunction with identified core areas to generate a revegetation potential index over the study area.

empower/im'pawer/vt

اختیار دادن، صلاحیت دادن، توانمند کردن

forewarning / for'woring /n

اخطار قبلی، هشدار قبلی

Fundamentally, when people are given sufficient forewarning, the chances of people coming to harm or death is dramatically reduced.

forewarn/for'worn/vt

اخطار کردن، هشدار دادن، از پیش خبر دادن

govern/'gâvern/vt,vi

اداره کردن، حکومت کردن، تاثیر گذاشتن، مهار کردن

pursue/per'syoo/vt

ادامه دادن، دنبال کردن، انجام دادن

perceptivity / per'septiviti/n

ادراکی

perceptual/per'sepchoowâl/adj

No doubt that a long term visionary approach has a breakthrough in the current levels of perception of disaster risk is required to mitigate the long term disaster risk challenges the mega cities face.

claim / kleym /n

ادعا، ادعای خسارت، استحقاق، حق، مورد ادعا

intermittent/inter'mittent/adj

ادواری، متناوب

marginal lands/ 'mârjinâl landz / n

اراضی پست، زمین های فاقد ارزش کشاورزی

On the other hand insecure, inequitable and opaque land tenure systems lead many to live in marginal, hazard – prone areas without infrastructure required to withstand the natural threats dictated by geography and climate. The marginal lands typically settled by low- income communities are rarely surveyed and integrated in disaster risk assessment.

diliver/ di'liver/vt

ارائه کردن، تسلیم کردن، تحویل دادن، رساندن

table/'teybel/ vt

ارائه کردن، مطرح کردن، به بحث گذاشتن، [طرح یا لایحه]

The National Council of Provinces called a disaster management conference to consider risk management issues on a regional basis in may 2000, and following that the bill was finally tabled.

از دستور خارج کردن

cross linking/'krâs linking/n

ارتباط متقابل

It is the most powerful and efficient way of

communicating with all major players at the same time. Linking of databases ensures rapid flow of information and data. It facilitates cross-linking of information thereby giving a big boost to the decision making process under uncertain premises.

value added/ valyoo 'adid / n

ارزش افزوده

In business, the difference between the sale price and the production cost of a product is the unit profit. In economics, the sum of the unit profit, the unit depreciation cost, and the unit labor cost is the unit value added. Summing value added per unit over all units sold is total value added. Total value added is equivalent to revenue less outside purchases (of materials and services). Value added is a higher portion of revenue for integrated companies, e.g., manufacturing companies, and a lower portion of revenue for less integrated companies, e.g., retail companies. Total value added is very closely approximated by total labor expense (including wages, salaries, and benefits) plus "cash" operating profit (defined as operating profit plus depreciation expense, i.e., operating profit before depreciation).

dignity/'digniti/n

ارزش، اعتبار، شان، عزت

Disasters remain a major threat to the survival, dignity, livelihood and security of peoples and communities in particular the poor. Therefore, there is an urgent need to enhance the capacity of disaster-prone developing countries in particular, the least developed countries and small island developing states, to reduce the impact of disasters.

take stock/teyk sâtk/ vt

ارزیابی شرایط خاص، برآورد شرایط خاص

The UNCRD Disaster Management Planning Unit will formulate and implement projects in line with the "Hyogo Framework for Action (HFA)," adopted in 2005 at the UN World Conference on Disaster Reduction (WCDR) in Kobe, Hyogo, Japan, and support the efforts of the target countries to further implement the HFA and to achieve the Millenium Development Goals (MDGs). In the formulation of the projects, UNCRD will take stock of the experiences gained and lessons learned from recent major natural disasters.

stocktaking /'stâktheyking/ n

ارزیابی شرایط موجود، بازنگری [مجازی] صورت برداری از موجودی، گرفتن موجودی انبار

The president, acting under the authority delegated by the Board, has approved the provision of technical assistance not exceeding the equivalent of \$ 400,000 on a grant basis for Regional Stocktaking and Mapping of Disaster Risk Reduction Interventions for Asia and the Pacific, and hereby reports this action to the Board.

satisfying / 'satisfâying /adj

ارضاکننده، قانع کننده، کافی

Managers were asked to express their perception of the satisfaction of a number of disaster management

factors in their archive/library/ museum. Managers were asked to select from the following options: not satisfied, low satisfaction, neither high nor low satisfaction, fairly satisfied and very satisfied.

top down/'tâp daon/adj

Indonesia has also altered its top-down approach in viewing disaster management which overlooked the capacity of the local people to disasters risks. New risk management and reduction framework has therefore been focused on the community to allow greater involvement of the locals in the planning, implementation and evaluation.

dissipate / 'disipeyt / vt, vi

including/ in'klooding / prep

loss of business opportunities/ lâs âv 'biznis âpor'tyoonitiz/ n

A post – disaster community development plan may use disaster recovery funds to redevelop the area in a way that improves or reduces loss of business opportunities in the disaster area.

lose/looZ/ vt,vi

mindfully/'mâyndfuli/adv

International communities are mindful of the importance of international cooperation, solidarity and partnership, as well as good governance at all levels.

go off / go âf/ vi

If you must leave a building after the shaking stops, use the stairs, not the elevator, and look for falling debris. Earthquakes can cause fire alarms and fire sprinklers to go off. You will not be able to rule out whether there is a real threat of fire, and the elevators may have been compromised. Always use the stairs.

empirically /im'pirikli/adv

thematically/ thi'matikli/ adv

reliably/ ri'lâyebli/ adj

climatically/ klay'matikali/ adv

substantially/sâb'stanshâli/adv

substantive/sâb'stantiv/adj,n

In the absence of any consistent requirement or approach, we found substantial variation in the maturity of, and participation in, natural disaster planning forums at ports.

province/'prâvins/n

از بالادست به زیردست، از بالا به پایین {تصمیم‌گیری}

از بین بردن، برطرف کردن، رفع کردن، از بین رفتن، رفع شدن، پخش کردن، پخش شدن، متفرق کردن، متفرق شدن، تلف کردن، تلف شدن

از جمله، شامل، با محاسبه

از دست دادن فرصت‌های کاری، از دست دادن فرصت‌های شغلی

از دست دادن، باختن، شکست خوردن، زیان کردن

از روی توجه، از روی فکر

از کارافتادن، از مدار خارج شدن

از لحاظ تجربی، به روش تجربی

از لحاظ موضوع، از نظر مضمون

از منبع موثقی، به طور موثقی، با اعتماد، باطمینان

از نقطه نظر اقلیمی، به لحاظ اقلیمی

اساساً، به مقدار زیاد، به طور قابل توجهی

اساسی، بنیادی، واقعی، جدی

استان، ایالت

consolidation/kânsali'deysheh/n

Through the above mentioned business lines, the objective of the Programmatic Approach is to support the Government of Colombia to consolidate the country's disaster risk management framework and increase its resilience to natural hazards.

استحکام، تحکیم، تثبیت، تقویت، ادغام

robustness/ro'bastnis/n

Particularly exciting has been the improvement in techniques of continuous or near "real time" monitoring of precursory seismic, geodetic, and geochemical phenomena, holding the promise of increased availability in the 21st century of robust and reliable early warning systems (EWS) to mitigate hazards at high – risk volcanoes.

استحکام، قدرت، قوت

rest area/'rest eryâ/n

A rest area, travel plaza, rest stop, or service area is a public facility, located next to a large thoroughfare such as a highway, expressway, or freeway at which drivers and passengers can rest, eat, or refuel without exiting on to secondary roads. Other names include motorway service area, service station, rest and service area (RSA), resto, service plaza, and service centre. Facilities may include park-like areas, fuel station, restrooms, and restaurants. A rest area or rest stop with limited or no public facility is a parking area or scenic area. Along some highways and roads are rest stops known as a wayside parks, roadside parks, or picnic areas. Rest areas are common in the United States, Canada, Australia, and parts of Europe and Asia.

استراحتگاه کنار جاده، محل استراحت کنار جاده

afford/e'ford/vt

Since the Indian Ocean tsunami catastrophe on 26 December 2004, it has become ever clearer that such technical supporting services should be more available to all countries, and joint efforts by international communities should be initiated to make such services affordable to least developed countries.

استطاعت داشتن، توانایی داشتن، از عهده بر آمدن

proneness/'proneness/n

An integrated multi-hazard approach to disaster risk reduction should be factored into policies and recovery activities in post-disaster and post conflict situations in disaster prone countries.

استعداد، آمادگی

facilities/ fa'silitiz/ n

facility/ fa'siliti/ n

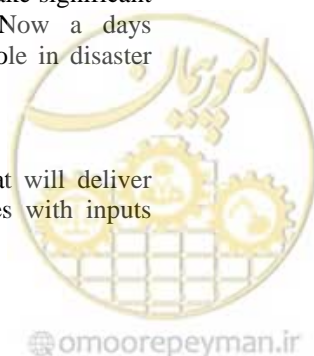

The use of satellite, computers, electronics, better communication facilities are going to make significant difference in disaster management. Now a days satellite communication play a major role in disaster management communication.

استعداد، آمادگی، قابلیت، توانایی، سهولت، آسانی، راحتی، وسیله، امکان مزیت

autonomy/o'tâ'hemi/n

The project is developing a system that will deliver alert to disaster management authorities with inputs

استقلال، آزادی عمل، خودگردانی

from a range of autonomous sensors, agencies and citizens.

wear – and – tear/ wer n'ter/n

استهلاک، فرسایش

At water treatment plants, ash may cause wear and tear on equipment and also may short circuit electrical equipment. Another problem regarding ash and water apply, is that an increased demand for water resources may occur as water is used to clean up after the volcanic eruption.

accommodate/ e'kâmodeyt/vt

اسکان دادن، جا دادن، همراهی کردن، مساعدت کردن

temporary housing/ 'tempri 'haozing /n

اسکان موقت

In addition to standard mobile offices and classrooms, Mod Space also has an inventory of barracks and “bunk houses” that can be utilized for temporary housing when disaster strikes.

diarrhea/dâyâ'riyâ/n

اسهال، شکم روش

Extreme events such as storms, floods, landslides, earthquakes and heavy rains are followed by a ‘second wave’ disaster of epidemics and infectious disease, such as cholera, diarrhea and malaria, when the lack of adequate water and sanitation systems spread diseases.

obstructiveness/ âbs'trâktivnis/ n

اشکال تراشی، کارشکنی، سنگاندازی

It shall be a misdemeanor, punishable by a fine not to exceed one thousand dollars (\$ 1000, 00), or by imprisonment not to exceed six month, or by both, for any person during an emergency to willfully obstruct, hinder or delay any member of the emergency organization in the enforcement of any lawful rule or regulation issued pursuant to this chapter, or in the performance of any duty imposed upon him by virtue of this chapter.

amend/ a'mend/vt,vi

اصلاح کردن، ماده یا قانونی را اصلاح و تجدید نظر کردن

keynote /'kiinote/n

اصلی، عمده، موضوع اصلی، مطلب عمده

The keynote presentation addressed the critical issues associated with business continuity in the face of major disasters and featured a panel of IT experts discussing the impact of the World Trade Center attacks on their organizations, as well as first – hand experience and lessons learnd.

normative/'normetiv/adj

اصولی، معیاری، دستوری، تجویزی، فرمایشی، هنجاری

The main challenges for disaster preparedness development of normative and legal base, establishment of research institutes, emergency management upgrade, additional and technical reserves, institutional strengthening of control and local authorities, professional training and community training

notification/ notifi'keyshen/ n

اطلاع، گزارش، اطلاعیه، اختاریه

## اطلاعات حیاتی

vital information/vâytâl infor'meyshen/n

While older people are highly vulnerable to disasters and other shocks and stresses, it is important to recognize their capacities and contribution they can make to disaster risk reduction. Older people's life experience, traditional, or indigenous knowledge can provide vital information on past climatic events, hazard and disaster impacts.

reliance /ri'lâyens/ n

اعتماد، اطمینان، وابستگی، اتکا

endow/ in'dao/vt

اعطا کردن، بخشیدن، هزینه چیزی را تقبل کردن

endowment / in'daoment/ n

اعطا، اهدا، وقف، موقوفه، درآمد موقوفه، استعداد، موهبت،

endowment policy / in'daoment pâlisi/ n

بهره‌مندی، برخورداری

Therefore, we refer to the regional or district level of analysis while thinking of the implications that low asset endowments and the poor management can have for the susceptibility to experience larger hazard impacts, as well as for the implications that hazards can have on poverty.

declared/di'klerd/adj

اعلام شده، اظهار شده، اقرار شده، آشکار، علنی

The Sharm El Sheikh declaration on Disaster Risk Reduction reflects the Arab disaster risk reduction challenges and puts commitments by the Arab States on the post-2015 framework for disaster risk reduction. New stakeholder recommendations for the post-2015 framework for disaster risk reduction from civil society and youth/children are also included.

declar/di'kler/vi,vt

اعلام کردن، بیان کردن، تصریح کردن، اذعان کردن

evacuees /ivakyu'iiz/n

افزایش دمای زمین  
افزایش، ازدیاد، فزونی، افزوده، اضافه

Emergency evacuation is the immediate and rapid movement of people away from the threat or actual occurrence of a hazard.

Examples range from the small scale evacuation of a building due to a bomb threat or fire to the large scale evacuation of a district because of a flood, bombardment or approaching hurricane.

augment /og'ment/vi,vt

افزودن، بهبود بخشیدن، بهتر کردن

global warming/ globâl 'worming/ n

افزایش دمای زمین

augmentation /ogmen'teyshen /n

افزودن، ازدیاد، فزونی، افزوده، اضافه

augmented /og'mentid /adj

افزوده [موسیقی]

There is a need for substantial augmentation of the present network by using emergency technologies such as Advanced Multi Parametric Satellite Systems from Geo-stationary as well as Polar Platforms, Automatic Weather Stations, GPS Sonde, Wind Profiler, Rain Radar, Doppler Weather Rdars, Meteorological Towers, Agromet towers etc.

mental distress/'mentâl dis'tres /n

افسردگی، افسردگی روحی

The consequences of mismanagement of the dead include mental distress and legal problems for relatives of the victims.

unsafe – dwellings/ân'seyf dwelingz/ n

Immigrants of poor households seeking to escape poverty in rural areas often arrive into or from urban squatter settlements, where land values are lowest and where the pressing need to acquire housing and basic services translate into sub – standard urbanization, characterized by unsafe- dwellings.

اقدامتگاه‌های نا امن، اقدامتگاه‌های خطرناک

measure/'mezher/n

اقدام، کار، مقیاس، مقدار

disciplinary measures/disiplineri mezhez/n

اقدامات انضباطی

Ministry of Environment is to monitor the response activities of responsible parties and, when warranted, to initial disciplinary measures or to intervene or preempt response measures in order to protect the interests of the public and the Ministry.

preventive measures/ pri'ventive mezherz/ n

اقدامات پیش‌گیرانه

Training is an integral part of capacity building as trained personnel respond much better to different disasters and appreciate the need for prompt preventive measures.

countermeasures/'kaontermezherz/n

اقدامات پیش‌گیرانه، اقدامات موثر، اقدامات متقابل

In the 1940s and 50s Japan was repeatedly ravaged by typhoons and earthquakes. Almost every year, thousands of lives were lost. In 1959; Ise-wan Typhoon hit the third largest metropolitan area of Nagoya and killed more than 5000 people. This heavy damage triggered a big debate in the Japan government on how to cope with natural disasters. After two years of debate, the Disaster Countermeasure Basic Act was legislated in 1961. This Act has three major characteristics.

structural measures/'strâkcherâl 'mezherz/n

اقدامات ساختاری

Structural measures are any physical construction to reduce or avoid possible impacts of hazards, or application of engineering techniques to achieve hazard-resistance and resilience in structures or systems. Common structural measures for disaster risk reduction include dams, flood levies, ocean wave barriers, earthquake-resistant construction, and evacuation shelters.

non- structural measures/nân-'strâkcherâl 'mezherz/n

اقدامات غیرسازهای

Non-structural measures are any measure not involving physical construction that uses knowledge, practice or agreement to reduce risks and impacts, in particular through policies and laws, public awareness raising, training and education. Common non-structural measures include building codes, land use planning laws and their enforcement, research and assessment, information resources, and public

awareness programs.

vulnerable groups /'vânerebel groups/ n

In disaster, context inclusion means that vulnerable groups are presented and included in all the phases of disaster management, from disaster risk reduction, relief, recovery and development activities. Their participation in the planning of disaster management and risk reduction activities throughout the decision – making process helps to ensure an equitable and effective program that is responsive to their needs and maximizes their capacities.

اقتشار آسیب پذیر، گروه‌های آسیب پذیر

climatologist/klâyme'tâlâjist/n

اقلیم شناس

climatology/klây'me'tâlâji/ n

اقلیم شناسی

Then strategy includes components of early warning system, risk and vulnerability assessment, research in meteorology, climatology, and engineering, household and community shelter, public awareness and education, finance and community planning, and governance and policy making.

ElNiño/é l'nino/n

ال نینو

ElNiño is characterized by unusually warm ocean temperature in Equatorial Pacific, as opposed to La Niña, which characterized by unusually cold ocean temperature in the Equatorial Pacific. ElNiño is an oscillation of the ocean atmosphere system in the Tropical Pacific having important consequences for weather around the globe.

incorporation/ in'korporeyshen/ n

الحاق، یکی سازی، دربرگیری، مشمول

The discussion considers how sustainability considerations are currently incorporated into the use of these tools, and how sustainability could be incorporated to a greater extent with additional research and development. Our discussion of particular tools should not be interpreted to mean those tools are most appropriate, or that tools not discussed are inappropriate.

constraint/kâns'treynt/n

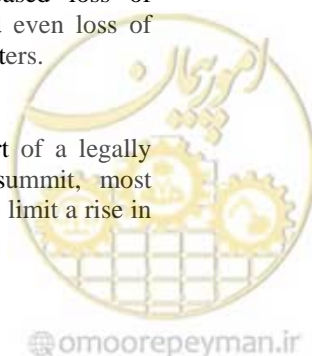

الزام، اجبار، ناچاری، محدودیت، قید و بند

Disasters affect men and women, and boys and girls, differently. In many contexts gender inequalities constrain the influence and control of women and girls over decisions governing their lives as well as their access to resources. Due to existing socio-economic conditions, cultural beliefs and traditional practices, women are more likely to be disproportionately affected by disasters, including increased loss of livelihoods, gender-based violence, and even loss of life during, and in the aftermath of, disasters.

binding (on/upon sb.)/ 'bâynding/adj

الزام آور، تعهد آور، قابل اجرا، معتبر

The UN Copenhagen Summit fell short of a legally binding deal in December. At the summit, most nations signed up for an accord meant to limit a rise in

temperatures to below 2 degree Celsius (3.6 Fahrenheit). But it didn't spell how.

rescue and relief /'reskyoo and ri'liif /n

امداد و نجات

The National Disaster Response Force (NDRF) has been proved its importance in achieving this vision by highly skilled rescue and relief operations, regular and intensive training and re-training, familiarization exercises within the area of responsibility of respective NDRF Bns, carrying out mock drills and joint exercises with the various stakeholders.

inevitable, the/ in'evitebel/ n

inevitably/ in'evitebli/adv

امر گریزناپذیر، امر محتوم، سرنوشت، تقدیر  
به طور اجتناب ناپذیری، الزاماً، ناگزیر، ناچار

Natural disasters are inevitable, and it is almost impossible to fully recoup the damage caused by the disasters. But it is possible to minimize the potential risk by developing disaster early warning strategies, preparing and implementing developmental plans to provide resilience to such disasters, and helping in rehabilitation and post disaster reduction.

Livelihood/layvlihud/n

امرار معاش، معیشت، معاش

The effects of persistent drought conditions have had visible implications on livelihood options.

signature /'signicher/ n

امضا

There are over 140 signatories to Regional Disaster Plan, with the commitment to help one another when disaster hits the region.

sign/sâyn/vt,vi

امضا کردن

signatory /'signetri/ n

امضا کننده

cosignatory/ ko'signeteri/adj,n

امضا کننده (یکی از دو یا چند امضا کنندگان یک قرارداد)،  
هم امضا

feasibility/ fiizi'biliti/ n

امکان، احتمال

feasibility study/fiizbiliti 'stâdi / n

امکان سنجی، بررسی توجیهی، مطالعه توجیهی

Containment as defined in section 3.4 of this plan should be feasible for releases of hazardous material and pollutants in their liquid or solid state, and will not likely feasible for substances in their gaseous state.

energy security/ 'enerji sikyuriti/n

امنیت انرژی

Energy security is the association between national security and the availability of natural resources for energy consumption. Access to cheap energy has become essential to the functioning of modern economies. However, the uneven distribution of energy supplies among countries has led to significant vulnerabilities. In earthquake – prone Japan, 55 nuclear- power plants produce 30 percent of the country's electricity, and nuclear – power generation is important in the fight against global warming and for

the nation's energy security.

security/ si'kyuriti/ n

Promote food security as an important factor in ensuring the resilience of communities to hazard, particularly in areas prone to drought, flood, cyclone and other hazards that can weaken agriculture – base livelihoods.

امنیت، ایمنی، وثیقه، [به طور جمع] اوراق بهادار

trivia/ 'triviya/ n

promulgation/prâmâl'geyshen/n

The need for strong institutional and policy arrangements has been fulfilled with the promulgation of National Disaster Management Ordinance, 2006. Under the Ordinance the National Disaster Management Commission (NDMC) has been established under the Chairmanship of the Prime Minister as the highest policy making body in the field of disaster management.

امور جزئی، جزییات بی‌اهمیت، مسایل پیش پافتاده  
انتشار رسمی، اعلام، اعلان

diffusion / difyoozhen / n

The Committee recommended that the secretariat make further efforts in inter – agency cooperation and in building regional cooperation on ICT for development and make greater efforts in promoting public – private partnerships, where appropriate, while recognizing that the private sector is a main drive of ICT adoption and diffusion.

انتشار، اشاعه، پخش، نشت، نفوذ، اختلاط

measure/'mezher/vi,vt

measurement/'mezherment/n

minimally/'minimâli/adv

isolation /âyso'leyshen /n

isolationist /âyso'leyshenist /n,adj

The city of Baton Rouge absorbed the highest percentage of people displaced internally within the state of Louisiana. The delay or inability of government agencies to address ongoing problems of displacement and isolation among evacuees in Baton Rouge and other transitional housing sites continues to extend the physical health and mental health impact of this disaster.

انسجام، نظم منطقی، پیوستگی، یکپارچگی، وحدت

انطباق، سازگاری، تغییر

انطباق‌پذیر، انعطاف‌پذیر، قابل تغییر

انطباق‌پذیری، انعطاف‌پذیری، سازگاری

انعطاف‌پذیری، تغییرپذیری، قابلیت تغییر، نرمش

flexible/'fleksiblel/adj

انعطاف پذیر، تغییرپذیر، متغیر، قابل انعطاف،

population explosion/pâpyu'leyshen iks'plozhen / n

انفجار جمعیت

peak acceleration / piik aksele'reyshen / n

اوج شتاب، حداکثر شتاب

During an earthquake when the ground is shaking, it also experiences acceleration. The peak acceleration is the largest acceleration recorded by a particular station during an earthquake

culmination/'kâlmineyshen / n

اوج، نقطه اوج، منتهای درجه، نتیجه نهایی، حاصل

Every day hazards and vulnerability from patterns of accumulating risk that can culminate in disaster triggered by an extreme natural hazard event.

notability/note'biliti/n

اهمیت، شخصیت برجسته

provincial/pro'vinshâl/n

ایالتی، استانی، شهرستانی

anthropogenic/anthro'pogeniik/adj

ایجاد شده توسط انسان، انسان آورد، مردمزاد

Major natural disasters include occasional landslides and sand storms; magnified by on going anthropogenic processes of deforestation and desertification.

carve/kârv/vt,vi

ایجاد کردن، ساختن، به زحمت به دست آوردن

For Indonesia, both the Indian Ocean tsunami and the HFA have directed it toward developing its capacity in undertaking disaster management and disaster risk reduction. Indonesia has carved out some major achievements, such as the inception of the Disaster Management Law in 2007, establishment of the National Agency for Disaster Management (BNPB) and its provincial and regional chapters, formation of the National Platform for Disaster Risk Reduction and the launch of the Indonesian Tsunami Early Warning System (Ina-TEWS), all in 2008.

pose/poz/vt,vi

ایجاد کردن، مطرح کردن، به وجود آوردن

Structural and non-structural measures undertaken to limit the adverse impact of natural hazards; for example, planting mangroves to reduce the risk posed by tidal surges or raising awareness of natural hazards through school-based education projects.

coalition/ko-a'lishen/n,adj

ائتلاف، ائتلافی

The coalition is an open group of organizations and individuals actively engaged in core working groups to advance(1)Disaster resistant school infrastructure,(2)Disaster prevention education in schools,(3)School based disaster management, and(4) Community based disaster awareness and reduction education.

Tsunami /soo'nâmi/n

آب تاز، سونامی، آبلرزه، موج بسیار بزرگی که در دریا به علت

A tsunami is a huge ocean wave that can travel at speed up to 965km/hr (600mi/hr), hundreds of miles over open sea before it hits lands. Sometimes incorrectly called a tidal wave, a tsunami is usually

زمین لرزه به وجود می آید

caused by an earthquake, volcanic eruption or coastal landslide.

A Megatsunami, which is an informal term to describe a tsunami that has initial wave heights that are much larger than normal tsunamis.

climate/'klâymit/ n

آب و هوا، اقلیم، شرایط اقلیمی

climatic/klây'matik/ adj

آب و هوا، اقلیمی {مربوط به}

watershed / wotershed / n

آبخیز، حوضه آبخیز، آب پخشا، منطقه‌ای که آب رودخانه یا دریا را تقسیم می‌کند.

The basic cause of watershed degradation is a combination of ignorance and economic backwardness of people, outdated social systems, overpopulation and overgrazing. When a typhoon, forest fire, or earthquake occurs in the watershed, a damage assessment report has to be provided within, one week in case a cloud – free satellite image is required. Since the geographic distribution of the damaged areas is crucial for decision making, the damage assessment report must include the location, area, and terrain slope of these areas.

tidal wave/'tâydâl weyv/adj

آبلرزه، ابرخیزاب، خیزاب کشندی، موج جزر و مدتی، موج کشندی

Tidal wave is a large, sudden, and disastrous wave of water caused by a tremendous disturbance in the ocean. When an earthquake occurs, tidal wave information will be broadcast on both TV and radio. If a tidal wave warning is issued, Osaka City, Japan, will announce it by radio broadcast. The term tidal wave may refer to one of the following:

a gigantic wave caused by the force of the moon and sun;

a tidal bore, which is a large movement of water formed by the funneling of the incoming tide into a river or narrow bay;

A storm surge, or tidal surge, which can cause waves that breach flood defences.

ignite/ig'nâyvt/vi

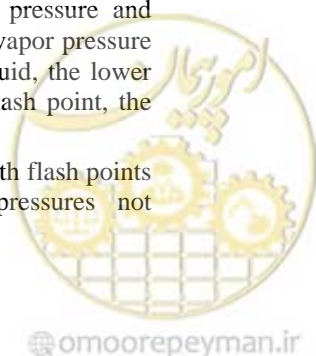

آتش زدن، آتش گرفتن

flammable/'flamebel/adj

آتش‌زا، قابل اشتعال، اشتعال پذیر

Flammable and combustible chemicals include liquids such as organic solvents, oils, greases, tars, oil base paints, and lacquers, as well as flammable gases. Flammable and combustible liquids are defined by their flash points. The flash point of a liquid is the minimum temperature at which it gives off sufficient vapor to form an ignitable mixture with the air near its surface or within its containment vessel. A liquid's flash point is a function of its vapor pressure and boiling point. Generally, the higher the vapor pressure and the lower the boiling point of a liquid, the lower its flash point will be. The lower the flash point, the greater the fire and explosion hazard.

Flammable Liquids (Class I): Liquids with flash points below 100°F (37.8°C) and vapor pressures not

exceeding 40 pounds per square inch (absolute) at 100°F (37.8°C). Flammable Class I liquids are subdivided as follows:

Class IA: Liquids having flash points below 73°F (22.8°C) and boiling points below 100°F (37.8°C). Flammable aerosols (spray cans) are included in Class IA.

Class IB: Liquids having flash points below 73°F (22.8°C) and having boiling points at or above 100°F (37.8°C).

Class IC: Liquids having flash points at or above 73°F (22.8°C) and below 100°F (37.8°C). The boiling point is not considered.

Combustible Liquids (Classes II and III): Liquids having flash points at or above 100°F (37.8°C). Combustible liquids in Classes II and III are subdivided as follows:

Class II: Liquids having flash points at or above 100°F (37.8°C) and below 140°F (60.0°C).

Class IIIA: Liquids having flash points at or above 140°F (60.0°C) and below 200°F (93.4°C).

Class IIIB: Liquids having flash points at or above 200°F (93.4°C).

volcano/ vâl'keyno/ n

Volcanoes, though infrequent in their eruptions, pose serious risks to human society. Perhaps the most famous evidence for why people should take disaster management of volcanoes seriously can still be seen at the ruins of Pompeii in Italy, under the shadow of Mt. Vesuvius.

volcanic/ vâl'kanik/ adj

alarmist /e'lârmist/n,adj

In light of the alarming global trend of rising disaster losses, disaster and climate risk management (DRM) is increasingly at the core of World Bank business. Investments are helping to protect millions of lives and livelihoods and safeguard growth in key socio-economic sectors. The World Bank, with the UN and some bilateral donors, founded the Global Facility for Disaster Reduction and Recovery (GFDRR) in 2006 to leverage new investment, generate knowledge and expertise, and build a global partnership for mainstreaming DRM.

sophisticate/sâ'fistikeyt/n

latitudinarian/latityoodi'neriyen/ n, daj

In order to permit field decision makers adequate latitude to make interpretations in the process of resolving the myriad of problems that could arise while dealing with environmental agencies.

آتشفشان

آتشفشانی، بسیار شدید، انفجاری

آدم اضطراب برانگیز، جنجالی، جنجال برانگیز، ترس آفرین، رعب آفرین

آدم آگاه، آگاه {گاہ به طعنه}

آزاد اندیش، خالی از تعصب

latitude/'latitood/n

آزادی عمل، عرض جغرافیایی

mock/mâk/vt,vh,adj

آزمایشی، تمرینی

Activities under PSO II include development of school primers on disaster management, training of teachers in curricula, preparedness and response activities, mock drills in school, etc.

alarm/e'lârm/n,vt

آژیر، اعلام خطر، هشدار، از خطر (چیزی) آگاهانیدن

bottleneck /'bâtelnek /n

آستانه، گلوگاه، تنگنا، تنگی، مزیغه، تنگ راه

Communication is a major bottleneck in case of any major disaster particularly when the traditional network system already in force brakes down. In order to strengthen communications, it has been decided that police network (POLNET) will also be used for disaster management.

property damage/ 'prâperti damij/ n

آسیب اموال، خسارت مستغلات، خسارت مالی

General disaster plans usually do not address the type of environmental emergencies or pollution events, which by themselves; do not result in death, immediate injuries or property damage.

trauma /'troma /n

آسیب، ضایعه، ضربه، ضربه عاطفی، شوک روحی

seismic vulnerability/'sâyzmik vâlnere'biliti/ n

آسیب پذیری لرزه‌ای

The evaluation of the seismic vulnerability of the existent building stock in the perspective of seismic risk mitigation should not be placed only in relation to the isolated buildings of relevant historical and cultural importance, but also, in relation to residential buildings within old urban centers. When assessing the seismic vulnerability of buildings it is essential to first establish the project objectives, before subsequently choosing the most appropriate strategy and tools necessary for building assessment and fulfillment of these objectives. The evaluation of the seismic vulnerability of the existent building stock in the perspective of seismic risk mitigation should not be placed only in relation to the isolated buildings of relevant historical and cultural importance, but also, in relation to residential buildings within old urban centers. When assessing the seismic vulnerability of buildings it is essential to first establish the project objectives, before subsequently choosing the most appropriate strategy and tools necessary for building assessment and fulfillment of these objectives.

social pathology/ 'soshâl pa'thâlâji/n

آسیب‌شناسی اجتماعی

Social pathology is a term used to describe social factors, such as poverty, old age or crime that bolster social disorganization. At the same time, the term refers to the study of these factors and the social problems they may lead to.

manifest /'manifest/adj,n,vt

آشکار، روشن، هویدا، نشان دادن، آشکار کردن

explicitly/iksplisitly/adv

آشکارا، صراحتاً، با صراحت، بی‌پرده

chaos/'keyâs/n

آشوب، اغتشاش، هرج و مرج، آشفتگی

launch/ lonch/vt,vi,n

آغاز کردن، راه اندازی، (به کاری) دست زدن، به راه انداختن، برپا کردن

The United Nations Development Programme (UNDP) and Damascus University have Lannched a Master of Science degree program in Risk & Disaster Management.

onset /ânset / n

آغاز، شروع، حمله، هجوم

The continuation or quick rehabilitation of effective environmental health services is of primary importance in emergency health management after the onest of a natural disaster.

embarkation/ embâr'keyshen/ n

آغاز، شروع، مبادرت

The Los Angeles Unified School District among others, embarked on a project of non-structural mitigation of school, classrooms, fastening furnishings to prevent both injuries and to preserve school assets. This effort continues today and is the responsibility of each school and school maintenance personnel.

public awareness/ pâblik e'wernis /n

آگاهی عمومی، آگاهی همگانی

The extend of common knowledge about disaster risks, the factors that lead to disasters and the actions that can be taken, individually and collectively, to reduce exposure and vulnerability to hazards;therefore, increased public awareness about hazards is a vital element in any comprehensive strategy for disaster risk reduction. Public awareness campaigns can be conducted in schools, through the media and official, public, professional and commercial channels.

awareness/e'wernis/n

آگاهی، اطلاع، توجه

Public awareness on Disaster Management is important as simple Do's and Don'ts of disaster can save many lives during disaster. It is important that the content of awareness messages should be consistent, lucid and context specific and it should be conducted at regular intervals so that the knowledge is kept alive in the community to pass on from generation to generation and ensure that the disaster risk reduction become an integral part of the culture and everyday life of the community.

polluter/po'looter/n

آلاینده، آلوده‌کننده، آلوده‌ساز

contamination/kân'tami'neyshen/n

آلودگی، آلودگی به مواد رادیواکتیو، عامل آلودگی

In any water supply and arsenic mitigation project, water resources management with involvement of local community would play an important role in the remediation of ground water arsenic contamination.

pollution/po'lloshen /n

آلودگی، مواد آلوده‌کننده

The high volume of wastes from disasters, from

households and debris from forests and rivers, also constitute a major concern for proper disposal. A study conducted by Japan's Ministry of Environment also showed that air pollution from urban and industrial sources has led to increased acid rain by hurricanes and typhoons.

polluted/ po'lootid/adj

آلوده

contaminate/kân'tamineyt/ vt

آلوده کردن، فاسد کردن، خراب کردن

pollute/ po'loot/vt

آلوده کردن، فاسد کردن، خراب کردن

contaminated / kân'tamineytid/adj

آلوده، آلوده به مواد رادیواکتیو

deployment/ de'ployment / n

آمادگی

Designing an easy to deploy disaster management plan takes three parts common sense to one part premonition. Of course, there are scenarios which are more likely to occur within certain areas, and specialized plans can be centred on these but generic plans designed to cover most emergency situations can offer greater flexibility and make more economic sense.

preparedness/pre'perdnis/ n

آمادگی

An in-depth Guide to Citizen preparedness, provides a step-by-step approach to disaster preparedness by walking the reader through how to get informed about local emergency plan, how to identify hazards that affect their local area, and how to develop and maintain an emergency communications plan and disaster supplies kit.

community preparedness/ kâ'myooniti pri'perdnis/n

آمادگی محله

Individuals can make a difference in their own community but not everyone has bought into preparedness. Research on personal preparedness indicates that individuals who believe they are prepared for disasters often are not as prepared as they think. In addition, some admit they do not plan to prepare at all.

The challenge: Maximizing awareness and encouraging participation in disaster preparedness activities to affect change at the community level.

preparation/ prepe'reyshen/ n

آمادگی، تهیه، تدارک

deploy /di'ploy /vt,vi

آماده کردن، به کار گرفتن، موضع گرفتن، مستقر شدن

prepare/pri'per/vt,vi

آماده کردن، حاضر کردن، حاضر شدن

deployable / di'ployebel / adj

آماده کردنی، به کار گرفتنی، قابل استقرار

spatial/'speyshâl/adj

آمایشی، فضایی

The analyse of the interrelation between environmental catastrophes and regional development will enable to point out strategies and instruments of spatial planning and land management to support the prevention hazards.

rubble/'râbel/n

Earthquake strikes without warning, leaving cities in rubble and killing tens of hundreds of thousands of people.

building code/ bilding kod/ n

Ordinances and regulations controlling the design, construction materials, alteration and occupancy of any structure to insure human safety and welfare. Building codes include both technical and functional standards.

آوار، مواد بازمانده از تخریب ساختمان

آیین‌نامه ساختمان، ضوابط ساختمان‌سازی

demonstratively/di'mânstretivli/adv

It will demonstrate a sustainable model for mainstreaming of disaster risk management at all levels with focus on disaster and community level activities.

با احساسات، به گرمی

flexibly/fleksibli/adv

These features ensure system –wide redundancy, extreme flexibility and scalability, fast deployment and extended mobility significantly and further strengthen the ability of disaster relief organizations to respond to any emergency situation throughout all phases of disaster recovery management.

با انعطاف، بانرمش

viciously/ 'vishesli / adv

scrutinize/ 'skrootinâyz/ vt

tandem/'tandem/n,adv

Disaster risk management is essentially a development problem and thus any preparedness and mitigation planning will have to be taken up in tandem with environmental concerns that the country is facing today.

با بی‌رحمی، بی‌رحمانه، با سنگدلی

با دقت کامل بررسی کردن، با وسواس بررسی کردن

با هم، هم‌زمان، پا به پای هم  
به طور هماهنگ، به طور مشترک

collaborator/ko'laboreyter/n

Government's responsibility as first-hand respondent in disaster management has underpinned the close relationship between local government and communities which also affect the effectiveness in disaster response. However, the difficulty in collaboration always occurs, such as different perceptions, willingness, political will and expectation that undermine the effort of collaborative disaster management. Based on the concept of professionalism in disaster management, this research argued that it had the level of professionalism in disaster management.

با همکاری، مشترکا

aware/e'wer/adj

rigorously / 'rigreresli/adv

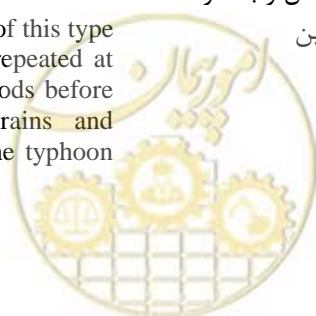

monsoon/ mân'soon/ n

It must be emphasized that any programme of this type is not a one – off operation but must be repeated at regular intervals and especially during periods before disasters frequently occur (i.e. heavy rains and flooding during the southwest monsoon, the typhoon season or other adverse weather periods).

باخبر، آگاه، مطلع، متوجه

بادقت تمام، به طور جدی، باجدیت

بادهای موسمی که در اقیانوس هند به سمت شمال و به طرف  
قاره آسیا می‌وزد، موسم بارندگی، بارندگی سنگین

perceptively/per'septivli/adv

بازکاوت، هوشمندانه

burden /'berden /n, vt

بار، فشار، سنگین، مسوولیت سنگین، تحمیل کردن بر

predominant / pri'dâminent / adj

بازرترین، برجسته‌ترین، مهم، عمده، اساسی، اصلی

market oriented/ mârket 'oriyentid /n

بازار محور

The post-World War II era has seen an enormous output of scientific research on the mitigation and behavioral response to disasters, both natural and otherwise. Over this same period, world gross economic product has surged, sparked by the performance of market-oriented economies in the West and Far East.

reimbursement /rii-im'bersment /n

بازپرداخت، پرداخت، جبران

When a major disaster strikes, community resources are often overwhelmed. While Federal and State governments play a major role in the recovery process through reimbursement of eligible costs related to declared disaster, it is critical that management of disaster remains at the local level.

deterrence / di'terens / n

بازدارندگی

suppressor/sâ'preses/n

بازدارنده

Forest resource protection strives to prevent, mitigate and suppress wildfires and other natural disasters that endanger lives, property and the state's natural resources.

obstructive / âbs'trâktive/ adj

بازدارنده، ناشی از کار شکنی

prohibitory/pro'hibitri/adj

بازدارنده، نهی‌کننده، منع‌کننده

Dynamic testing of full scale structures subjected to strong shaking is both logistically different and prohibitively costly.

reconstruct/ riikâns'trâkt/ vt

بازسازی کردن، تغییر دادن، ترمیم کردن نوسازی شده،

reconstructed/ riikâns'trâktid/ adj

بازسازی شده، ترمیم شده بازسازی، ترمیم

reconstruction/riikâns'trâkshen /n

UNESCO suggests that for every \$100 spend by the international community on risks and disasters, \$96 go to emergency relief and reconstruction, and only \$4 on prevention.

loser/ 'loozer / n

بازنده

retrieval/ri'triival/n

بازیابی، اصلاح، جبران

cost recovery/ kâst ri'kâveri/ n

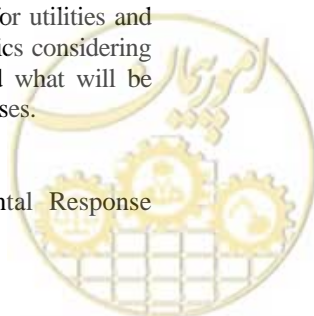

بازیافت بهای تمام شده، بازگیری هزینه

Disaster management and cost recovery for utilities and energy companies will examine these topics considering what hasn't worked previously, why and what will be done in the future to avoid catastrophic losses.

expeditiously/ eksp'i'dishesli/adv

باسرعت، باعجله

It is responsibility of the Environmental Response

Team (ERT) to select, as expeditiously as possible, nominees to the National Operations Group (NOG) with expertise and experiences to be of direct assistance to the OSC for the type of pollution incident the OSC has to deal with.

residuary/ ri'zidyu – eri/ = residual

باقی مانده، بقیه، مانده، پس مانده

residue / 'rezidyoo / n

Where practical, it will include the removal of hazardous material and pollutants, including residue and contaminated debris, from land, structures, water shoreline, as the case maybe, using available resources.

residual / rezidyuwâl /adj

باقی مانده، مانده، پس مانده، ته مانده

credible / 'kredibel/ adj

باور کردنی، قابل قبول، پذیرفتنی، موثق، معتبر

do's and don'ts/dooz an 'donts/n

بایدها و نبایدها، دستورالعمل

Non-structural measures include preparation of school disaster management plan training and capacity building of teachers and students on disaster management, awareness generation on Do's and Don'ts of various disasters, organizing mock drills to check preparedness and identify areas of improvement.

crisis/'krâysis/n,adj

بحران، بحرانی

Crisis is any event that is, or is expected to lead to, an unstable and dangerous situation affecting an individual, group, community, or whole society. Crises are deemed to be negative changes in the security, economic, political, societal, or environmental affairs, especially when they occur abruptly, with little or no warning. More loosely, it is a term meaning "a testing time" or an "emergency event".

subsequent disasters/'sâbsikwent di'zâsterz/n

بحران های بعدی

Temporary shelter is rarely temporary and must be built solidly enough to withstand predictable subsequent disasters.

health sector /'helth'sekter /n

بخش سلامت

WHO supports countries in building national capacity in risk reduction and emergency preparedness, and to assist the health sector in Member States in reducing the adverse public health consequences for communities in terms of mortality, morbidity, disability and damage to health care delivery services resulting from emergencies, disasters and other and other crises.

emergency ward/i'merjensi word/ n

بخش سوانح، بخش فوریت های پزشکی، بخش اورژانس

aggravate / 'agreveyt/ vt

بدتر کردن، وخیم تر کردن، تشدید کردن

unambiguous / ânam'bigyuwes / adj

بدون ابهام، صریح، روشن

unambiguously/ânam'bigyuwesly/adv

به طور صریح، با صراحت، به روشنی، بدون ابهام

The recently adopted laws, polices and plans designed

for citizens' protection and safety are comprehensive and are largely consistent with the HFA priorities. However, the success of these is dependent on the State maintaining an unambiguous focus on the centrality of communities at risk and particularly poor and excluded people living people – women, older people, people with disabilities, and people living with HIV, Human Immunodeficiency Virus, and AIDS, Acquired Immunodeficiency Syndrome, – whose lives and livelihoods are most susceptible to the impact of disaster.

purchasing power parity/ 'perchising 'power 'partiti/n

برابری قدرت خرید

It is noteworthy to mention that the worldwide total affected population in the year 2007 was about 3.0 % of the world population (an increase of 43 % over 2006) and the total worldwide economic damage in the year 2007 exceeded the GDP (purchasing power parity) of certain developing countries in the Asia – Pacific and Africa, understanding the importance of natural disaster, mitigation strategies in these regions.

vulnerability assessment/ valnerebiliti 'asesment/ n

برآورد آسیب پذیری، ارزیابی آسیب پذیری

A vulnerability assessment is the process of identifying, quantifying, and prioritizing (or ranking) the vulnerabilities in a system. Examples of systems for which vulnerability assessments are performed include, but are not limited to, information technology systems, energy supply systems, water supply systems, transportation systems, and communication systems. Such assessments may be conducted on behalf of a range of different organizations, from small businesses up to large regional infrastructures. Vulnerability from the perspective of disaster management means assessing the threats from potential hazards to the population and to infrastructure. It may be conducted in the political, social, economic or environmental fields.

predominate / pri'dâmineyt / vi

برتری داشتن، برجسته تر بودن، بارزتر بودن

toe tag/to tag /n

برچسب جنازه {که به شصت پا بسته می شود}

A toe tag is a piece of cardboard normally attached with string to the big toe of a dead person in a morgue. It is used for identification purposes, allowing the mortician, coroner, law enforcement and others involved in the death process to correctly identify the corpse.

It usually bears the decedent's name, a case number if law enforcement is involved, and some descriptors like hair and eye color. However, in many places, actual toe tags are no longer used but have been replaced by wrist and/or ankle bands which serve the same purpose.

online and offline/ân 'lâyn and âf 'lâyn/adj

برخط و برون خط

For more than a decade, NCDP has been a professional training ground for more than 100,000

online and face-to-face learners. Our web-based learning management system provides an efficient means for training and “just-in-time” resources, and has been designed to accommodate a robust evaluation and certification process. More than 40 free online courses are available to help public health workers master the skills and knowledge—and demonstrate the competencies—that they will need in a public health emergency.

perception / per'sepshen/ n

برداشت، تلقی، استنباط، درک، تعبیر

reconnaissance investigation / ri'kânisens  
investi'geyshen/n

بررسی شناسایی، بررسی اکتشافی، تحقیقات اکتشافی،  
تحقیقات شناسایی

USGS also has primary responsibility for monitoring earthquake activity in the US and coordinating post-earthquake reconnaissance investigations.

Survey/ser'vey/vt

بررسی کردن، مرور کردن، سنجیدن، ارزیابی کردن، مساحی  
کردن، نقشه برداری کردن

Survey/'servey/ n

مساحی، نقشه برداری، نقشه

scrutiny / 'skrootini / n

بررسی، موشکافی، رسیدگی، مشاهده

The Federal Emergency Management Agency (FEMA), the lead federal agency for disaster management, responds to many smaller natural disasters every year without extensive public scrutiny.

lighten / lâytan / vt

برق زدن

convener/kân'viiner/n

برگزار کننده، دعوت کننده [جلسه و غیره]

United Nations Secretary-General Ban Ki-moon is convening a Summit on Climate Change – on 22 September 2009 – to focus Heads of State and Government on the need for urgent action, and to mobilize the highest level political will needed to reach a fair, effective, and scientifically ambitious global climate deal at the United Nations Climate Change Conference in Copenhagen this December.

drought contingency plan/ draot kân'tinjensi plan/ n

برنامه احتمالی خشکسالی

A document that identifies specific actions that can be taken before, during and after a drought to mitigate some of the impacts and conflicts that results.

emergency operation plan(EOP)/i'merjensi âpe'reyshen  
plan/n

برنامه عملیات اضطراری

A document that describes how people and property will be protected in disaster and disaster threat situations; details who is responsible for carrying out specific actions; identifies the personnel, equipment, facilities, supplies, and other resources available for use in the disaster; and outlines how all actions will be coordinated.

resilience action plan/ ri'ziliyens akshen plan/n

The action plan shows how we might start creating a more localised, vibrant and resilient local economy which can not only help us to cope with the major challenges which lie ahead but which, we believe, can create significant opportunities –for meaningful work, to develop new skills, to strengthen community networks and working to enhance the local environment.

برنامه عملیاتی تاب‌آوری، برنامه عملیاتی برگشت‌پذیری

platform/ 'platform/ n

The global platform provides the main global forum for representatives of governments and other stakeholders-UN agencies, regional bodies, international financial institutions, civil society, the private sector and the scientific and academic communities-to:

برنامه، طرح، بیانیه سیاست کلی

1. Assess programme made in implementation of the Hyogo Framework for Action.
2. Enhance global awareness of disaster risk reduction.
3. Share experiences among countries and learn from good practice.
4. Identify remaining gaps and actions needed to accelerate national and local implementation of the Hyogo Framework.

land use planning/'land yooos 'planning/n

Land use planning is the term used for a branch of public policy which encompasses various disciplines which seek to order and regulate the use of land in an efficient and ethical way, thus preventing land use conflicts.

برنامه‌ریزی استفاده از زمین

contingency planning/kân'tinjensi 'planning/n

A firm with a contingency plan is more likely to respond rationally to an unplanned situation than a firm without a backup plan. Firms that have played through possible crisis and their reactions to those events avoid panic and damage to the firm and its operations when the real time comes.

برنامه‌ریزی برای رویدادهای احتمالی، برنامه‌ریزی احتیاطی

spatial planning / 'speyshâl 'planing / n

In the last 40 years, there was evolution on how disaster risks reduction efforts have been studied or implemented specifically related to land use and spatial planning. Hazard zoning and land use control to protect people from hurricane has been implemented in the USA since 1977.

برنامه‌ریزی آمایشی، برنامه‌ریزی فضایی

peri-urban/peri 'erben/adj

The survey also confirms peri-urban areas are more vulnerable to natural hazard and climate change risk. A large proportion of people residing in peri-urban areas are floating population (people living in irregular zones), in unauthorized development (wrt urban planning regulations), in informal /squatter

برون شهری

settlements, and in locations highly vulnerable to natural disasters.

demonstrative/di'mânstretiv/adj,n

برون‌گرا، نشانگر، نشان‌دهنده، گرم، احساساتی

enormous/i'normes/sdj

بزرگ، عظیم، کلان، مفصل، فوق‌العاده

hinge (hinj)vi,vt

بستگی داشتن به، منوط بودن به

The success of a state wide warning system hinges on the density of early warning capable seismic stations.

بستن، قفل کردن، محفوظ داشتن، به دست آوردن

secure/ si'kyur/ vt

بسته‌های کمک‌های مردمی

aid packages / eyd pakijiz / n

Many Indian Ocean Tsunami aid packages supplied by various organizations in Tamil Nadu excluded culturally appropriate chudhidar sets that are worn by girls. Similarly, burkas were underprovided in areas with Muslim communities.

بسیار حساس، با کیفیت بالا [دستگاه‌های صوتی]

high fidelity/hây fidelity/adj

Government investments in high-fidelity digital seismograph networks and community development of standards have created a global infrastructure for earthquake monitoring with few technical impediments to data sharing and real-time information exchange.

بسیار متفاوت، مختلف، ناهمخوان، غیرقابل مقایسه

disparate / 'disparit / adj

بسیار، بسیار زیاد، فوق‌العاده

enormously/i'normesli/adv

The scale of the devastation presented enormous challenges for disaster response in the context of evolving concept of disaster management

بسیار، بی‌اندازه، بی‌حد و حصر

immeasurably / i'mezherebli / adv

The Asia – Pacific region is facing enormous and unavoidable challenges which, aggravated by the trends in global climate change, may cause immeasurable harm to the people of the region.

بسیار دقیق، جدی، شدید، سخت، طاقت فرسا

rigorous / 'rigeres/adj

بعد از بحران

post disaster/post di'zastâr/n, adj

A comprehensive post disaster needs assessment exercise, launched simultaneously with response and relief efforts at the request of the Government of Nepal, with the objective to estimate damages and losses caused by the earthquake and to help identify recovery needs as well as strategy required for its implementation. The assessment exercise was led by the National Planning Commission (NPC) with assistance of more than 250 national and international experts who worked round the clock to produce this assessment covering 23 sectors in less than one month.

بعد، اندازه، وسعت، ابعاد [به صورت جمع] بزرگی

dimension /di'menshen /n

تجدد، جنبه، وجه، سطح

facet/fasit/n

The objective was to generate awareness on the different facets of disaster management amongst community members. The strategy was to involve them in decision making and disaster management structures and processes.

natural disaster /nachrâl di'zâster/n

سازحه طبیعی، بلای طبیعی

Natural disasters are events that we have no control over that can lead to environmental destruction, financial loss and/or loss of human life. They can be linked back to the four elements of earth, air, fire and water in the form of geological disasters, meteorological disasters, fire disasters and hydrological disasters. Sometimes one natural disaster can lead to another, such as an earthquake leading to a tsunami, or a flood causing a mud slide.

technological disasters/tekno'lâjikâl di'zâsterz/ n

سوانح تکنولوژیکی، بلاای فناوری زاد

Many technological disasters have marked the xxth century. Minamoceta in Japan (1953), Three Mile Island in the USA (1979), Bhopal in India (1984) and Chernobyl in Belarus (1986) permanently disrupted the lives of populations and changed their environment. Each disaster reminds us of our industrial systems' possible failures because zero risk is impossible in any sector.

consequently/kânsi'kwentli/adv

بنابراین، در نتیجه، از این رو

There is evidence of greater official and public understanding that the threat of combined political, economic and environmental consequences of disaster demands more effective means to address vulnerability to current and emerging risks.

jam/jam/n,vi,vt

بند آمدگی، گیر کردگی، گیر

If a major earthquake occurs during the school day, parents' first instincts are to call and run to their children at school, jamming roads and telephone lines needed for emergency response.

گیر کردن، گیرافتادن، راه بند آوردن، روی ترمز زدن، پارازیت انداختن

blizzard/ 'blizerd / n

بوران، کولاک

A blizzard is a severe snowstorm characterized by strong winds. By definition, the difference between blizzard and a snowstorms is the strength of the wind. To be a blizzard, a snowstorm must have winds in excess of 56km/h(35 mph) with blowing or drifting snow which reduces visibility to 400 meters or ¼ mile or less and must last for a prolonged period of time – typically three hours or more.

foghorn /'fâg -horn /n

بوق مه [دریانوردی]

ecosystem / 'iikosistem/ n

بوم سامانه، اکوسیستم

A complex set of relationships of living organisms functioning as a unit and interacting with their physical environment. The extent of an ecosystem may range from very small spatial scales to, ultimately, the entire Earth.

indigenous/in'dijines/adj

بومی، ذاتی، فطری، طبیعی

Empowering local community to recognize valuable Indigenous Knowledge for Disaster Risks Reduction can improve the future of Human Security.

vernacular/ver'nakyuler/n

بومی، محلی، زبان بومی، زبان محلی

Once upon a time in Indonesia, probably back to mid 1990s, most pilot projects that adopted 'community based' approach to disaster risk reduction in Indonesia, were actually supported by international organizations such as INGOs and United Nations (UN) agencies. Just quite recently, vernacular approach to disaster risk management lately adopted intentionally by local universities and disaster management experts.

unanimously/ yoo'nanimeli/ adv

به اتفاق آرا

The Disaster Management Bill was unanimously adopted by both houses of Parliament and the Disaster Management Act 2005 demonstrated the national vision of a paradigm shift from post – disaster response to improving the pre – disaster preparedness, initiating disaster mitigation projects and strengthening emergency response capacities in the country.

deplete / di'pliit /vt

به اتمام رساندن، مصرف کردن، کاهش دادن

enforce/in'fors/vt

به اجرا درآوردن، اجرا کردن، اعمال کردن

incur/in'ker/vt

به بار آوردن، متحمل شدن، ایجاد کردن، موجب شدن

undermine/ânder'mâyn /vt-Development and reconstruction may provide some short – term benefits, but over the long term they may result in the degradation of ecosystems and natural resources, leading to hazardous conditions that undermine humanitarian assistance and long – term community development and threaten the health, safety and livelihoods of many people.

به تدریج ضعیف کردن، تحلیل بردن، نقب زدن

prejudice/ 'prejudis /vt

به تعصب کشاندن، تحت تاثیر قراردادن، تضعیف کردن

minimize/'minimâyz/vt

به حداقل رساندن، دست کم گرفتن

jeopardize/'jeperdâtz /vt

به خطر انداختن، به مخاطره انداختن

unanimous/ yoo'nanimeli/ adj

به رای، هم عقیده، هم داستان، متفق

current / kârent /adj

به روز

Keep your training current, training will help you to keep calm and know what to do when an earthquake occurs.

devastatingly /'devesteytingly/adv

به سختی، به شدت، به طور کوبنده

acute/a'kyootli/adv

به شدت، عمیقاً، سخت، بسیار

The response to disasters is usually characterized by the urgent need for rapid decision accomplished by acute shortages of trained personnel, material, and time to carry out decisions effectively.

detrimentally/detri'mentâli/adv

Disasters have a tremendous detrimental impact or effect or efforts at significant challenge to sustainable development.

به شکل زیان آوری، به طور زیان بخشی

urbanize/'erbenâyz/vt

fictionalize/'fikshenâlâyz/vt

fictitious/fik'tishes/ adj

It is important to note that we did not use the identities or addresses of real people to submit these applications. The identities were developed in coordination with federal agencies and credit-reporting agencies in order to simulate what an identity thief would do in a similar situation. Addresses were fictitious or non residential addresses.

به شهر تبدیل کردن، شهری کردن

به صورت داستان بیان کردن

تخیلی، تصویری، غیرواقعی، ساختگی، خیالی

sequentially / si'kwenshâli /adv

A procedure of group decision-making in emergency response consists of several stages. Each stage finishes a round of group decision-making for a specific emergency scenario, and implements specific actions. The emergency will then respond to the actions, thus the current emergency will evolve into a new emergency and the next round of a group decision-making begins. The continuation of such a procedure from a sequential group decision process.

به صورت متوالی، زنجیروار، به ترتیب

disruptively/dis'râptivli/adv

A disaster is a serious disruption of the functioning of a society, causing widespread human, material, or environmental losses which exceed the ability of (the) affected society to cope using only its own resources. Disasters are often classified according to their cause (natural, or complex).

به طرز اختلال برانگیزی، به صورت مختل کننده‌ای

disruptively/dis'râptivli/adv

Access to and delivery of basic services as healthcare, education and other social services have been severely disrupted.

inexorably/ in'eksorebli/adv

Over the past decade, the number of natural and man made disasters has claimed inexorably. From 1998, reported disasters average was 428 per year showing an increase of about 60 percent over the previous years.

به طور اجتناب ناپذیر، به طور مهار نشدنی

intermittently/inter'mitentli/adv

Technical inputs to drought and flood risk management have been provided intermittently with focused support for assessment.

به طور ادواری، به طور متناوب

cumulatively/'kyoomyuletivly/adv

In particular, earthquakes, floods, and droughts are hazards that have cumulatively affected Iran's coping capacities.

به طور افزاینده، به طور فزاینده

chaotically/key'âtikli/adv

به طور آشفته

Chaos theory is an important issue in disaster management because a kind of chaotic condition is experienced especially within the first 72 hours of a disaster (Pine, 2006; Koehler, 1966). When the previous disaster experiences are examined, it is seen that authorized people might not be disposed to take initiative and crisis management would become inefficient under these conditions.

prominently /'prâminently/ adv

به طور بارزی، به طور چشمگیری

Most rural households depend on agriculture as their source of food and income. Agriculture thus plays a prominent role in the stability of rural communities. When drought strikes, these communities are often left without their livelihoods and their investment in agriculture.

unprecedentedly /ân'presidentidly/adv

به طور بی‌سابقه‌ای

The unprecedented earthquake and tsunami in Japan as well as the Mississippi flood and devastating Southeast and Joplin tornadoes in the United States underscore the importance of disaster management.

threateningly/'threningli/adv

به طور تهدیدآمیزی، با حالت تهاجمی

Rape, sexual violence, human trafficking and abduction and conflict are common threats to human security in post – disaster situation.

measurably/'mezherebli/adv

به طور چشمگیری، به صورت قابل ملاحظه‌ای

notably/'notebli/adv

به طور چشمگیری، مخصوصاً، به ویژه

The next notable era in the evolution of emergency management took place during the 1950's. The Cold War years presented as the principal disaster risk the potential for nuclear war and its subsequent radioactive fallout. Civil Defense programs proliferated across communities during this time.

bilaterally/bây'laterâli/adv

به طور دوطرفه، از هر سو، از دو طرف

Bilateral cooperation between the US and India on disaster management is supported by a \$2.7 million, five year effort of the US Agency for International Development (USAID) and Ministry of Home Affairs (MHA).

satisfactorily/ sasti'fakterili/ adv

به طور رضایت‌بخشی، به نحو شایسته، به طور کامل،

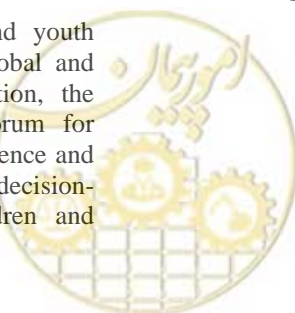

prohibitively/pro'hibitivli/adj

به طور سرسام‌آوری، به طور کمرشکنی

duly/'dyooli/adv

به طور شایسته‌ای، به نحو مطلوبی، طبق مقررات

As a follow-up to the global children and youth mobilization process on the occasion of global and regional platforms for disaster risk reduction, the highly successful Children and Youth Forum for Disaster Risk Reduction at the World Conference and their effective reach out to Governments, decision-makers and private sectors' CEOs, children and

youth's capability to shape and design their future, to convey their views and opinions and to influence the decision-making process was duly recognized and acknowledged as part of the Sendai Framework.

staggeringly/'stageringli/adv

Disaster imposes staggering human and economic costs. In 2010 alone, disaster affected some 430 million people in China, killing nearly 8000 people and destroying three million homes. Direct economic losses exceeded 500 billion Yuan (\$77 billion) and nearly 40 million hectares of crops were damaged.

به طور شگفت‌انگیزی، به نحو اعجاب‌آوری

normally/'normali / adv

Recovery is the fourth phase of disaster and is the restoration of all aspects of the disaster's impact on a community and the return of the local economy to some sense of normalcy. By this time, the impacted region has achieved a degree of physical, environmental, economic and social stability.

به طور عادی، در حال طبیعی، طبیعی، معمولاً

tragically/'trajikli/ adv

legitimately/li'jitimitli/adv

Perceptibly / perseptibli /adv

Nevertheless, "response", being the most perceptible and most visible among all the elements of the disaster management cycle, the efficacy of the government's role in disaster management is going to be judged largely, most of the times, by the quality of "response" and its effectiveness in minimizing the loss of lives and property of the affected people, when a calamity actually takes place.

به طور غم‌انگیزی، به طرز فجیعی، به طور اسفانگیزی

به طور قانونی، به طور مشروع

به طور محسوس، به طور قابل ملاحظه‌ای

credibly /' kredibli/ adv

Overall, the TDRM, Total Disaster Risk Management, approach presents as its added value quality and credible disaster management, enhanced efficiency in disaster reduction and response, and cost effectiveness through sound allocation of limited resources

به طور موثق، به طور مطمئن

alarmingly/e'lârmingli/adv

disastrously/ di'zâstresli / adv

The World Health Organisation defines a disaster as any occurrence that causes damage, ecological disruption, loss of human life, deterioration of health and health services on a scale sufficient to warrant an extraordinary response from outside the affected community. A disaster can be either natural (rain, flood, cyclone, storm, land slides, earthquake and volcanoes) or man-made (war, riots, accident (train, air and ship), industrial accidents, fires, bomb explosions, nuclear explosions and ecological disasters).

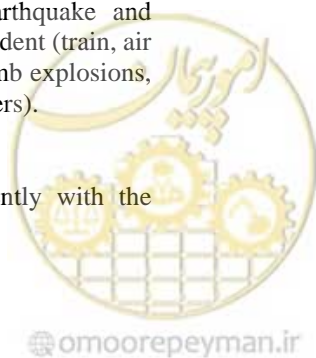

به طور نگران‌کننده‌ای، به طرز وحشتناکی

به طور وحشتناکی، به طور فجیعی

concurrently/kân'kârentli/ adv

The conference will be held concurrently with the

به طور هم زمان، هم زمان باهم

Disaster Management India trade show that features search and rescue and emergency response equipment, shelter and tenting, Emergency medical Services (EMS), and all kinds of fire fighting, communication, detection, geographical information system (GIS) and global positioning systems (GPS).

elaborately/i'laboritli/ adv

به طور استنادانه، ماهرانه، مفصلاً، مفصل

sporadically/ spo'radikli/ adv

به طور پراکنده، به طور نامنظم، به طور گه گاهی

In many countries targeted investments in preparedness of high risk communities remain sporadic, dependent upon external aid and insufficiently harmonized with each other.

sparsely/ 'spârsli/ adv

به طور پراکنده‌ای، به طور نامتراکمی

tirelessly/tâyerlisli/ adv

به طور خستگی ناپذیری، باشور و شوق فراوان

The secretariat had been a tireless advocate of the distributive role of Governments in promoting access to ICT by all citizens, regardless of where they live or what their economic situation was.

به طور مختصری

distinctively/dis'tinktivli/adv

به طور مشخص، به طور بارزی

shoulder/'sholder/vt,n

به عهده گرفتن، به دوش کشیدن، به گردن گرفتن، پذیرفتن،  
شانه، دوش

They shoulder the obligation of political responsiveness in disaster and emergency events. Appointed officials, like city managers, have important political and managerial duties in the disaster management realm as well. These officials are responsible for hazards and emergency management policy formulation and oversight.

undertake/ânder'teyk/vt

به عهده گرفتن، تعهد کردن، قبول کردن

undertaken/ânder'teyken/adj

به عهده گرفته شده، تعهد شده، قبول شده

utilize/'yootilâyz/vt

به کار بردن، استفاده کردن از، بهره‌برداری کردن از

Integrating agriculture, livelihoods and environmental issues into disaster response efforts and risk reduction strategies is particularly important for poor communities, often resident on marginal lands, which are at greatest risk of natural disasters. That is the reason why this study is focused on the awareness and utilization of strategies for disaster management in agriculture.

climatologically/ klây'metâlâjizkali/adv

به لحاظ اقلیم‌شناسی

expedient / iks'piidiyent / adj

به مصلحت، به صلاح، مصلحت، مصلحت‌آمیز

with a view to/width a vyoo tu/ Idioms

به منظور، با هدف، برای، از لحاظ

The main objective of the Office is to promote and develop collaborative activities with international agencies, with a view to expand support to international efforts for disaster risk reduction in

support of the implementation of the HYGO Framework.

timely/ tāmli/ adj

The effectiveness of emergency plans or disaster plans depends on a number of factors, most of which are associated with or rely on the willingness of response partners to facilitate an effective and timely response while making use of all possible resources.

به موقع، به هنگام، بجا، به وقت

timely fashion/ 'tāmli 'fashen/ idioms

Through a coordinated approach, and working with its partners, WMO addresses the information needs and requirements of the disaster risk management community, effectively and in a timely fashion.

به موقع، سروقت، بجا، به هنگام

distinctly/dis'tinktli/adv

The emergency management and business continuity community comprises many different entities including the government at distinct levels (e.g.) federal, state/ provincial, territorial, tribal, indigenous, and local levels); business and industry; nongovernmental organizations; and individual citizens. Each of these entities has its own focus, unique missions and responsibilities, varied resources and capabilities, and operating principles and procedures.

interlinked/inter'linkt/adj

به هم پیوسته، به هم بسته، مربوط به هم

interlinking/inter'linking/adj,n

به هم پیوسته، مربوط به هم، پیوند، همبستگی، ارتباط

The term Disaster Management includes two different yet interlinked phases of disaster and is called Disaster Response and Disaster Preparedness.

disrupt/dis'râpt/vt

به هم زدن، وقفه ایجاد کردن، متلاشی کردن

best management practice / best 'manijment 'praktis/ n

Best management practice (BMP) is a common name for a variety of non-structural and low cost structural measures in mitigating the flooding and pollution effects in urban settings.

بهترین شیوه مدیریتی

best available technology /best e'veylebel tek'nâlâji / n

Best available technology (BAT) is a process that determines the criteria upon which BMSs will be proposed in conjunction with theoretical assessment and common sense.

بهترین فن آوری موجود

utilization/yootilây'zeyshen/n

بهره‌برداری، بهره‌گیری، به کارگیری

slum-upgrading/slâm âp'greyding/n,adj

The issue of informal or non-permanent housing should be addressed as priorities, including the framework of urban poverty reduction and slum-upgrading program.

بهسازی زاغه‌ها، بهسازی محله‌های فقیرنشین

avalanche/ 'avalânc/ n

An avalanche is a sudden rapid flow down a slope, occurring when either natural triggers or human activity causes a critical escalating transition from the slow equilibrium evolution of the snow pack.

Healthy ecosystems, such as intact forests, wetlands, mangroves, and coral reefs are beneficial to local populations for the many livelihood benefits and products that they provide: firewood, clean water, fibers, medicine and food, while acting as natural buffers to hazard events for flood abatement, slope stabilization, coastal protection and avalanche protection, in addition to other structural and disaster preparedness measures.

squat/ skwât/ vi, n, adj

squatting/ 'skwâting /n

It might be useful to identify potential disaster areas, enforce building codes, in these areas and the laws against squatting and mining of mountains and rivers generally, seeing to the insurance of the country's assets, ensuring that roads, bridges and gullies are built and maintained according to the standards of disaster management.

wording / 'werding/ n

word / werd/ vt, n

articulation/ârtikyu'leyshen/ n

Ensure support to national platforms for disaster reduction including through the clear articulation of their role and value added, as well as regional coordination to support the different advocacy and policy needs.

Voice/voyes/n,vt

This event is intended to provide an opportunity for grassroots people to voice their concern and achievements in DRR. Sharing various disaster risk reduction initiatives by women's groups from different states and regions will be a valuable learning opportunity for the participants.

declaration/dekle'ryshen/n

manifesto /mani'festo /n

The paradigm shift in poverty reduction programs-from income poverty to human poverty-has almost been matched in the disaster management sector. Disasters are no longer seen as extreme events, created entirely by natural forces, but as manifestations of unsolved problems of development.

بی طرفی، خنثی سازی، خنثی شدگی

بیماری همه گیر، شیوع، همه گیری

water – borne disease/ woter born di'ziiz/ n

Waterborne diseases are caused by pathogenic microorganisms that most commonly are transmitted in contaminated fresh water. Infection commonly results during bathing, washing, drinking, in the preparation of food, or the consumption of food thus infected. Various forms of waterborne diarrheal disease probably are the most prominent examples, and affect mainly children in developing countries; according to the World Health Organization, such diseases account for an estimated 4.1% of the total DALY global burden of disease , and cause about 1.8 million human deaths annually. The World Health Organization estimates that 88% of that burden is attributable to unsafe water supply, sanitation and hygiene.

بیماری های آب برد، بیماری های موجود در آب، بیماری های منتقله از راه آب

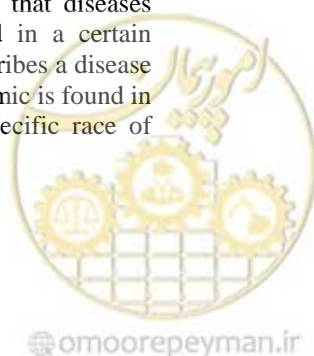

endemic diseases/en'demic di'ziizez/n

Endemic and epidemic are both words that describe diseases, but something endemic is found in a certain place and is ongoing, and epidemic describes a disease that's widespread. A disease that is endemic is found in a certain geographic region or in a specific race of people.

بیماری های بومی

insight/'insâyt/n

بینش، بصیرت، شناخت، فهم، درک

From the 'preparedness saves lives' approach came the insight that economics played a significant role and a recognition that a longer term approach was required to reduce disaster risk and build resilience.

chaotic/key'atik/adj

inexorable/in'eksorebel/adj

utmost/atmost/adj,n

Non-structural measures are of utmost importance, and include vulnerability mapping, risk assessment analysis, hazard zoning inventory of resources to meet the emergency, etc.

paradigm/'paradâym/n

With the significant advancement in the understanding of the natural processes that underlie the hazardous events, a more technocratic paradigm came into existence which conceded that the only way to deal with disasters was by the public policy application of geophysical and engineering knowledge and the associated interventions.

پارادایم، الگوواره، نمونه

nonlinear soil response/nân'liniyer soyl ris'pâns/n

Geotechnical models consistently indicate that the stress-strain relationship of soils is nonlinear and hysteretic, especially at shear strains larger than  $\sim 10^{-5}$  to  $10^{-4}$ . Nonlinear effects, such as an increase in damping and reduction in shear-wave velocity as excitation strength increases, are commonly recognized in the dynamic loading of soils. On the other hand, these effects are usually ignored in seismological models of ground-motion prediction because of the lack of compelling corroborative evidence from strong-motion observations.

baseline/'beyslâyne/n

پایه، مبنا، معیار

This document provides a baseline on which a strategy for Comprehensive Disaster Management (CDM) within the Caribbean will be designed. CDM has been defined under the DERMS project as including integrated management of all natural and human-induced hazards and involving management through all phases of the Disaster Management Cycle viz. Prevention and Mitigation, Preparedness, Response, Recovery, and Restoration. CDM engages the public and private sectors, civil society, urban and rural

communities, and the general population in hazard prone areas. CDM is therefore multi-hazard, and multi-sectoral in its application and is concerned primarily with integrating vulnerability assessment and risk reduction into development planning and management.

diffuse / di'fyoos / vt, vi

پخش کردن، پراکنده کردن، پخش شدن، پراکنده شدن، منتشر کردن، منتشر شدن، اشاعه یافتن، اشاعه کردن  
پدافند غیرعامل، دفاع غیرنظامی

civil defence/sivil di'fens/n

Civil defense, civil defence, or civil protection is an effort to protect the citizens of a state (generally non-combatants) from military attack. It uses the principles of emergency operations: prevention, mitigation, preparation, response, or emergency evacuation and recovery. Programs of this sort were initially discussed at least as early as the 1920s and were implemented in some countries during the 1930s as the threat of war and aerial bombardment grew. It became widespread after the threat of nuclear weapons was realized. Since the end of the Cold War, the focus of civil defense has largely shifted from military attack to emergencies and disasters in general. The new concept is described by a number of terms, each of which has its own specific shade of meaning, such as crisis management, emergency management, emergency preparedness, contingency planning, emergency services, and civil protection.

Civil defence will play a major role in assisting the District Disaster Management Authority in different phases of disaster particularly Pre-Disaster (Public Awareness, Community Capacity Building and Preparedness), and in Mid-Disaster (Response & Relief) phases.

emerge/i'merj/vi

پدیدار شدن، نمایان شدن، به وجود آمدن

receptive/ ri'septiv / adj

پذیرا

cope/kop/vi

پذیرفتن، تحمل کردن، از پس (کار یا چیزی) برآمدن

Strengthen and when necessary ensure rapid and effective disaster response in situations that exceed national coping capacity.

sparseness/ 'spârsnis / n

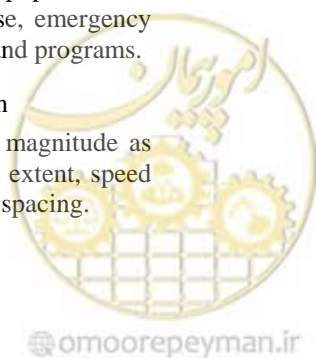

پراکندگی

Waldo County is a small rural mid – coast region located in the State of Maine. The majority of public services in this county are executed at the municipal level of government. Thus far, the majority of this county's communities are too sparse in population to have comprehensive emergency response, emergency management and public health services and programs.

spatial dispersion/ speyshâl dis'persen /n

پراکندگی مکانی، پراکندگی آمایشی

The hazardous events vary in terms of magnitude as well as in frequency, duration, and area extent, speed of onset, spatial dispersion and temporal spacing.

diffused/ di'fyoozd/ adj

پراکنده، پخش شده، پخش

sporadic / spo'radik/ adj

پراکنده، گه‌گاهی، متفرق

sparse/ spârs/ adj

پراکنده، متفرق، نامتراکم

populous /'pâpyules /adj

پرجمعیت

Several delegations noted that the Asia – Pacific region was the most disaster – prone region of the world, with the largest annual loss of human life and property, and the most populous, with a large poor population and poor infrastructure that were vulnerable to disasters.

populated /'pâpyuleytid/adj

پرجمعیت، پرازدحام، شلوغ

defrayal/di'freyâl/ n

پرداخت، پرداخت هزینه

Funds allocated by the UN and by the co – sponsor (ESA) wrere used to defray the costs of air travel and daily subsistence allowance of 16 participants and 2 representatives of the Office for Outer Space Affairs.

reimburse /rii-im'bers /vt

پرداختن، بازپرداختن، زیان کسی را جبران کردن

sturdiness/'sterdinis/n

پرطاقت، سخت

profound/pro'faond/adj

پرمحتوا، عمیق، ژرف، بنیادی، کامل، سنگین، شدید

telemedicine/'telimedsin /n

پزشکی از راه دور، درمان از راه دور

Telemedicine has two basic functions. In the preparedness phase, telemedicine applications can be used in continuing medical education, knowledge based expert systems and resource databases. During relief operations, it includes tele- monitored procedures/ surgery, telediagnosics and second opinion; and in rehabilitation phase, teleconsultations, complex problem interpretation, and epidemiological surveillance.

aftershock/'âfter'shâke/ n

پس لرزه

Aftershocks usually occur within the next two days, but have also been recorded to happen for years. Their size, strength, and frequency usually diminish with time.

fogbound /'fâgbound /adj

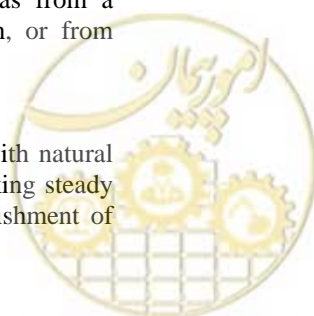

پشت‌مه مانده، گرفتار مه شده

Fog is a collection of water droplets or ice crystals suspended in the air at or near the Earth's surface. While fog is a type of a cloud, the term “fog” is typically distinguished from the more generic term “cloud” in that fog is low-lying, and the moisture in the fog is often generated locally (such as from a nearby of water, like a lake or the ocean, or from nearby moist ground or marshes).

endorsement/in'dorsment/ n

پشت‌نویسی، ظهورنویسی، تایید، حمایت

Reducing the risk of disasters associated with natural hazards in Central Asia has also been making steady progress, thereby preparing for the establishment of

Central Asian Center for Disaster Response and Risk Reduction with the endorsement from donors and international organizations including the ADRC.

fire escape/'fâyer iskeyp/n

A fire escape is a special kind of emergency exit, usually mounted to the outside of a building or occasionally inside but separate from the main areas of the building. It provides a method of escape in the event of a fire or other emergency that makes the stairwells inside a building inaccessible. Fire escapes are most often found on multiple-story residential buildings, such as apartment buildings. At one time, they were a very important aspect of fire safety for all new construction in urban areas; more recently, however, they have fallen out of common use.

A fire escape consists of a number of horizontal platforms, one at each story of a building, with ladders or stairs connecting them.

staircase / 'sterkeys/ n

stairway/'sterwey / n

stair/'ster/ n,adj

temporary shelter/'tempreri 'shelter/n

A political or environmental crisis can be devastating to populations and families – forcing people from their homes and property. To lessen the human damage and provide a measure of safety and comfort for victims, temporary shelters are an invaluable asset. These designs, however, go above and beyond the standard stock emergency shelters in providing more efficient, affordable and all around more interesting living quarters.

encrust / in'krâst / vt, vi

encrusted/ in'krâstid/ adj

In the case of rural areas, these shortages can be compounded by a high incidence of hazards as a result of being encrusted hazard – prone areas, deepening the susceptibility of households to suffer hazard losses.

hazard mapping/'hazerd 'maping/n

A hazard map is a map that highlights areas that are affected or vulnerable to a particular hazard. They are typically created for natural hazards, such as earthquakes, volcanoes, landslides, flooding and tsunamis. Hazard maps help prevent serious damage and deaths.

decipher/di'sâyfer /vt

Information on disaster risk, which is reliable, accessible, timely and appropriately packaged, is a prerequisite to any disaster reduction effort. Iran has significant scientific and technical capacities on

bolt/bolt/n,vi,vt

پیچ، جفت، پیچ شدن، پیچ کردن، قفل شدن

Ceiling lights and fans should be additionally supported with a cable bolted to the ceiling joist. The cable should have enough slack to allow it to sway. Framed pictures, especially glass-covered, should be hung from closed hooks so that they can't bounce off. Only soft art such as tapestries should be placed over beds and sofas.

poison ivy/ 'poyzen 'âyvi/n

پیچک سمی [گیاه]

emergence/ i'merjens/ n

پیدایش، پیدایی، ظهور، بروز، پدیداری

paramedics/para'medics/n

پیراپزشک، اعضا تیم اورژانس پیش بیمارستانی

The paramedic is a healthcare professional who works in emergency medical situations. A paramedic may be more formally defined as a medical professional who provides medical care at an advanced life support level in the pre-hospital environment, usually in an emergency, at the point of illness or injury. This includes an initial assessment of the patient after a particular health crisis. Treatment can also be continued en route to a hospital if more definitive care for the patient is required. Paramedics provide advanced levels of care for medical emergencies and trauma.

prefabricated/prii'fabrikeytid/adj

پیش ساخته

UNDP will support the province's strategy of "using prefabricated and light constructions", as its five year program strategy for construction of permanent schools.

foreshock/'forshâk/ n

پیش لرزه

In general big earthquakes begin with light vibrations (foreshocks). These are the initial fractures in the rocks. As the time period between a foreshock and a main shock may be short, earthquake warning must be communicated instantly.

precursor/prii'kenser/n

پیش نشانگر

The multidisciplinary program includes five major components aiming at identifying potential seismological, geomagnetic, geodetic and ionospheric

precursors, respectively and to perform statistical tests on any identified precursors.

sophistication/sâfisti'keyshen/ n

In the past 10 years, concepts associated with disaster risk reduction have advanced in both scop and sophistication.

sophisticated/sâ'fistikeytid/adj

state of the art/steyt âv dhi 'ârt/adj

The contributors, professionals from the science and disaster management communities around the world, represent state of the art knowledge, practices, and perspectives on the topic. It is intended to serve as a basis to encourage and further develop discussion among scientists, practitioners, policy makers, and development planners.

encroach/in'kroch/vi

encroachment/in'krochment/n

These factors include flood plain encroachment, followed by deforestation, extensive gravel mining, and improper design of infrastructure along riversides and lack of public awareness on disaster risk mitigation.

cutting – edge / 'kâting 'ej / n

Several delegations noted that keeping up with the rapid development of information and communication technology and other cutting – edge technologies was of particular importance to the Asia – pacific region, where agriculture remained dominant.

pre – emption/ prii'emptive/ adj

fire prevention/'fâyer pri'venshen /n

Understanding the “fire triangle” is the most basic concept in fire prevention and control. In order for any fire to occur, three critical elements must be present: A fuel combustible material, an ignition or heat source, and oxygen in sufficient quantities to support combustion.

pre- emption/ prii'empshen/ n

Effective Emergency Management training is more than managing the response. You also want your team trained on how to be pre-emptive and prevent emergencies.

draft/dràft/ vt

draft/dràft/ n

prerequisite/ prii'rekwizit/ n, adj

The most important prerequisite for any successful flood assessment is the systematic, comprehensive and

resilient /ri'ziliyent /adj

Emergency management is a data-intensive activity which requires evaluation of many forms of data, and often consideration of combination of data which have not been combined before. By definition, disasters involve local emergency response capacity being exceeded and relief and resilience processes called on to provide short – and long – term aid.

تاب آور، سازگار، واگشت پذیر، برگشت پذیر

urban resiliency/urban ri'ziliyensi/n

Urban resilience is defined as the “capability to prepare for, respond to, and recover from significant multi-hazard threats with minimum damage to public safety and health, the economy, and security” of a given urban area. More recently, there has also been an increasing attention to the capability to adapt to changing conditions. Contemporary academic discussion of urban resilience focuses on three distinct threats; climate change, natural disasters and terrorism.

تاب آوری شهری، برگشت پذیری شهری

resilience /ri'ziliyens /n

تاب آوری، سازگاری، واگشت پذیری، برگشت پذیری

impinge/im'pinj/vi

تاثیر گذاشتن، اثر گذاشتن، تاثیر سو گذاشتن

adverse effects/'advers i'fekets/n

Tropical cyclones and tornadoes uproot trees, telephone, telegraph and electricity line, destroy bridges, culverts, and houses, kill people and domestic animals, leaving serious and adverse effects on the economy as well as on the whole environment.

تاثیرات نامطلوب، تاثیرات مضر

impinging/im'pinjing/adj

تاثیرگذار، اثرگذار

The country has also witnessed a rise in annual mean temperature due to an impinging process of climate change.

institution/ insti'tyooshen/ n

تاسیس، پایه گذاری، موسسه، نهاد، سازمان، انجمن

critical facilities/criticâl fa'silitiz/n

تاسیسات حیاتی

“Critical facilities” are defined as those structures from which essential services and functions for victim survival, continuation of public safety actions, and disaster recovery are performed or provided. Shelters, emergency operation centers, public health, public drinking water, sewer and waste water facilities are examples of critical facilities.

critical public facilities/'kritikâl pâblik fa'silitiz/n

تاسیسات عمومی حیاتی

Protect and strengthen critical public facilities and physical infrastructures particularly schools, clinics, hospitals, water and power plants, communications and transport lifelines through proper design, retrofitting and rebuilding.

wetlands/ wet landz/ n

A wetland is a land area that is saturated with water, either permanently or seasonally, such that it takes on the characteristics of a distinct ecosystem. The primary factor that distinguishes wetlands from other land forms or water bodies is the characteristic vegetation of aquatic plants, adapted to the unique hydric soil. Wetlands play a number of roles in the environment, principally water purification, flood control, carbon sink and shoreline stability. Wetlands are also considered the most biologically diverse of all ecosystems, serving as home to a wide range of plant and animal life. Wetlands occur naturally on every continent except Antarctica, the largest including the Amazon River basin, the West Siberian Plain, and the Pantanal in South America.

Many wetlands are subject to more than one hazard such as flooding, erosion, and subsidence which make them poor sites for development apart from their ecological functions and values. Even highly degraded wetlands in urban settings with limited ecological functions and values may also be important for food storage, flood conveyance, and stormwater storage and purification.

endorse/in'dorse/ vt

lost/ lâst/adj

Promotional/ pro'moshenâl/ adj

The key elements include strategic planning (political will and participation of all stakeholders; knowledge management), community – based disaster risk management, promulgating good practices, including those based on space technology applications, promotion of subregional networking and mechanisms and public – private partnership for disaster reduction.

amendment/a'mendment/n

empiricist /im'pirisist/n,adj

Specific predictions of liquefaction and ground deformation for engineering projects use more detailed geological and geotechnical information and mostly empirical or semi-empirical prediction methods based on compilations of case histories in past earthquakes.

empiricism /im'pirisizem/n

empirical /im'pirikâl/adj

disruption/dis'râpshen/n

تجهیز کردن، بسیج کردن

Cuba has effectively implemented a system of popular mobilization and education to prepare people for such natural disasters as hurricanes. Compliance with evacuation orders is impressive. Top priority is attached to saving lives.

mobilization/mobilây'zeyshen/n

تجهیز، بسیج

Handheld Amateur Radio (HAM) equipment/n

تجهیزات رادیو آماتوری، تجهیزات بی‌سیم آماتوری

Necessary support will be provided in terms of equipment like advanced communication equipment such as computer with internet facilities, HAM equipment, fax etc. to the district and state control rooms.

capital equipment/kapitâl i'kwipment/n

تجهیزات سرمایه‌ای

These guidelines are not specifically for use in disaster response situations and indeed note that 'The general rule of thumb is that capital equipment should not be donated in emergency situations, unless it is established that the emergency will be continued over a long period.' The donation process, flowcharts and checklists may be applicable across many settings and situations, but involvement of the recipient in decision making is paramount.

emergency equipment/i'merjensi i'kwipment/n

تجهیزات و وسایل اضطراری

Emergency equipment must be maintained, inspected and tested to maintain proper working order as part of preparation and planning for an emergency. In the event of an emergency, properly functioning emergency equipment can help minimize both personal injury and property damage. Types of emergency equipment found in laboratories include eyewash stations, safety showers and fire extinguishers.

under the umbrella/ânder dhi âm'brelâ /n

تحت حمایت، تحت پوشش

A broad range of disaster risk evaluation tools, including indicators and indexes fall under the umbrella of risk assessment tools, which the ISDR define as those tools which seeks to: 'determine the nature and extent of risk by analyzing potential hazards and evaluating existing conditions of vulnerability that could pose a potential threat or harm to people, property, livelihoods and the environmental on which they depend.

burdened /'berdend /adj

تحت فشار، زیر بار

overlay/over'ley/vt

تحت الشعاع قرار دادن، پوشاندن

commendation / kâ'men'deyshen/ n

تحسین، تشویق، ستایش، توصیه، معرفی

The committee commended the important role played by the Regional Coordination Mechanism and

encouraged the secretariat to continue to play a leading role in the Regional Coordination Mechanism in the area of disaster risk management.

fruition/froo'ishen/n

fruitless/'frootlis/adj

drain away/dreyn 'ewey / vt,vi

This invariably results in a lack of synergy which drains away the possibility of building effective disaster preparedness and response.

hazard analysis/'hazerd e'nalis/n

Hazard analysis is the process of recognizing hazards that may arise from a system or its environment, documenting their unwanted consequences and analyzing their potential causes. It is used as the first step in a process used to assess risk. The result of a hazard analysis is the identification of different type of hazards. A hazard is a potential condition and exists or not (probability is 1 or 0). It may in single existence or in combination with other hazards sometimes called events) and conditions become an actual Functional Failure or Accident (Mishap). The way this exactly happens in one particular sequence is called a scenario. This scenario has a probability (between 1 and 0) of occurrence. Often a system has many potential failure scenarios. It also is assigned a classification, based on the worst case severity of the end condition. Risk is the combination of probability and severity. Preliminary risk levels can be provided in the hazard analysis. The validation, more precise prediction (verification) and acceptance of risk is determined in the Risk assessment (analysis). The main goal of both is to provide the best selection of means of controlling or eliminating the risk. The term is used in several engineering specialties, including avionics, chemical process safety, safety engineering, reliability engineering and food safety.

risk assessment/ risk a'sesment/ n

The process of risk assessment is a sociopolitical process that involves bringing together available information about risks and hazards from experts and lay sources for the purpose of making a policy decision about appropriate response. What complicates this process is that not only are the scientific assessments used to estimate risk, but laws, customs, ethics, values, attitudes, and preferences are factors that must be woven into the total risk estimate.

risk analysis/risk e'nalis/n

The process of identifying and understanding the relevant components associated with a risk as well as the evaluation of alternative strategies to manage that risk.

evolve/i'vâlv/vi,vt

تحول یافتن، رشد کردن، شکل گرفتن، درست شدن

The disaster management community has been evolving. Until the 1990's disaster management was primarily focused on the response of governments, communities, and international organization after disasters. This included the humanitarian aspects of relief, such as providing medical care, food and water, search and rescue, and containing the secondary disasters (e.g. fires that occur following an earthquake).

deliverer/ di'liverer/n

تحويل دهنده، ارائه دهنده، آورنده، رساننده، رهاننده

delivery/di'liveri/n

تحويل، بيان، طرز بيان، تسليم، واگذاری

Some departments deliver their programmes without jeopardizing the deliverability of the emergency services envisaged by the plan.

environmental degradation/invâyren'mentâl degre'deyshen/n

تخریب زیست محیطی

Environmental degradation is the process by which our environment i.e., air, water and land, is progressively contaminated, over – exploited and destroyed. When the environment becomes less valuable or damaged, environment degradation is said to occur. In specific term, environmental degradation is the deterioration of the environment through depletion of resources such as air, water, soil and forest; the destruction of eco-systems and the extinction of wildlife.

earmark/'iyermârk/vt

تخصیص دادن، کنار گذاشتن، در نظر گرفتن

earmarked/'iyermârkt/adj

تخصیص داده شده، در نظر گرفته شده، کنار گذاشته شده

Many national institutions dealing with disaster response can not divert funds earmarked for disaster management to finance preventive initiatives.

allocation of resources/alo'keyshen âv risorsiz/ n

تخصیص منابع

To ensure emergency physicians and nurses play a primary role in disaster planning and are considered in any national allocation of resources and protective measures, Congress should continue to include them in any definition regarding first responders to disasters.

mitigate/ 'mitigeyt/ vt

تخفیف دادن، تعدیل کردن، جبران کردن

This state of affairs makes it more crucial for FEMA to better define and delineates its disaster response roles and responsibilities.

pursuer/ per'syoo-er/ n

تعقیب کننده، دنبال کننده

pursuit/ per'syoot/ n

تعقیب، دنبال، جستجو

Many home policies which cover flood exclude cover for confiscation or damage caused by the police or government authorities. However where the police or government authority are acting pursuant to the Disaster Management Act 2003 such exclusions won't apply.

committal/ k â'mitâl/ n

تعهد

commitment/ kâ'mitment/ n

تعهد، عهد، پیمان، قول

undertaking/ ânder'teyking/ n

تعهد، وظیفه، تکلیف، کار

Structural and non-structural measures undertaken to limit the adverse impact of natural hazards; for example, planting mangroves to reduce the risk posed

by tidal surges or raising awareness of natural hazards through school-based education projects.

commit/ k â'mit/vt

determinative/di'terminetiv/adj, n

determination/ ditermi'neyshen/ n

climate change/klây'mit cheynj/n

The need for finding synergies between climate change adaptation and disaster risk reduction agenda and for integrating the two approaches as a means of increasing effectiveness of resource use in achieving vulnerability reduction is also addressed.

crustal deformation/krâstâl diifor'meyshen/n

The theory of plate tectonics states that the Earth's crust is made up of rigid plates that "float" on top of the mantle and move relative to one another. As the plates move, the crust deforms dominantly along the plate margins. Intraplate deformation differs from that respect by the observation that deformation can occur anywhere the crust is weak and not just at plate margins. Deformation is the folding, breaking, or flow of rocks. There are many different types of crustal deformation depending on whether the rocks are brittle or ductile. The aspects that determine these properties are due to certain temperatures and pressures that rocks experience within the Earth. Therefore, temperature and pressure control deformation processes.

modulated/'mâdyuleytid/adj

disparity / dis'pariti / n

Some delegations noted that regional cooperative mechanisms must take into account the overall capacity and the economic and social disparities among countries in the Asia – pacific region.

protect the most vulnerable groups is one. Second, by strengthening agricultural and agribusiness systems by improving farmers' access to drought-resistant varieties of crops, improved rainwater-harvesting technologies and information from weather-forecasting systems, while continuing to increase investment in irrigation development is the other.

recurrent/ri'kârent/adj

تکراری، مکرر، همیشگی

fragment/'fragment/ n

تکه، پاره، قطعه، جزء، بخش

asperity/as'perity/n

تکه‌های پایدار گسل

An asperity is an area on a fault that is stuck or locked. In the Earth, tectonic earthquakes are caused by slip along a fault plane, where two rock bodies are in rigid contact. Asperities are the crustal volumes from where a maximum of seismic energy is radiated during an earthquake and from where the rupture often initiates. These are the highly stressed volumes along a fault zone and the recurrence time in them is the lowest. Therefore, it is important to identify asperities.

loss of human life/âls âv 'hyooman lâyf/ n

تلفات انسانی

On August 6, 2010, in the dark of the midnight, there were flash floods due to cloud burst in Leh in Ladakh region of North India. It rained 14 inches in 2 hours, causing loss of human life and destruction. The civil hospital of Leh was badly damaged and rendered dysfunctional. Search and rescue operations were launched by the Indian Army immediately after the disaster.

toll/ tol / n

تلفات، مقدار خسارت یا تعداد کشته شدگان

By 24 January, at least 52 aftershocks measuring 4.5 or greater had been recorded. An estimated three million people were affected by the quake. Death toll estimates range from 100,000 to about 160,000 to Haitian government figures from 220,000 to 316,000 that have been widely characterized as deliberately inflated by the Haitian government. The government of Haiti estimated that 250,000 residences and 30,000 commercial buildings had collapsed or were severely damaged.

shatter – proof/ 'shater proof / adj

تلقی [شیشه اتومبیل]، نشکن [لیوان و غیره]

Clearly protection against window breakage and the ravages of shattered glass belongs in any building safety audit, with security (fragment retention) films having an important role in today's risk manager's portfolio.

fire drill/fâyer dril/n

تمرین فرار از حریق

Fire drill is a method of practicing the evacuation of a building for a fire or other emergency. Usually, the emergency system (usually the fire alarm/smoke detector) sounds and the building is evacuated as though a real fire had occurred. Usually, the time it takes to evacuate is measured to ensure that it occurs within a reasonable length of time, and problems with the emergency system or evacuation procedures are identified to be remedied.

wind gust/wind gâst/n-Wind gust is the maximum wind speed measured during a specified time period. The American Meteorological Society defines a wind gust as a sudden brief increase in the speed of the wind. More specifically, the National Digital Forecast Database defines a wind gust as the maximum 3-second wind speed (in knots) forecast to occur within a 2-minute interval at a height of 10 meters.

تندباد

thunder/thânder/n

تندر، رعد، آسمان غرش

Thunder is the sound caused by lightning. Depending on the distance and nature of the lightning, thunder can range from a sharp, loud crack to a long, low rumble (brontide). The sudden increase in pressure and temperature from lightning produces rapid expansion of the air surrounding and within a bolt of lightning. In turn, this expansion of air creates a sonic shock wave, similar to a sonic boom, which produces the sound of thunder, often referred to as a clap, crack, or peal of thunder.

viciousness/'vishesnis/ n

تندی، خشونت، وحشیگری

Investing in disaster risk reduction reduces the vulnerability of people to hazard and helps breaks the vicious cycle of poverty.

draw up/dro âp/vt

تنظیم کردن، تهیه و تدوین کردن

A pre-requisite for good emergency preparedness for natural disasters is national and international collaboration between actors working with risk management, natural disasters, and community planning. A vital task is to draw up guidelines and

strategies for the adaptation of society to a changed climate. Sweden has established a national platform in accordance with the Hyogo Framework for Action. The overall aim of which is to reduce the consequences of natural disasters for society as a whole.

modulate/'mâdyuleyt/vt,vi

تنظیم کردن، میزان کردن، تغییر دادن

draftsman/'draftsman/ n

تنظیم کننده، تهیه کننده [لایحه، قرارداد، سند]

A plan created under the instructions of the Head of State or Cabinet could then be drafted in language that makes the plan itself the legal instrument for establishing the planning and response structure suitable to deal with environmental emergencies.

modulation/'mâdyu'leyshen/n

تنظیم، تعدیل، میزان

diversify/dây'versifây/vt

تنوع بخشیدن، تنوع دادن به، تنوع تر کردن، بسط دادن، گسترش دادن

Owing to the diverse factors contributing to disaster risk and the far – reaching impact of a natural disaster, disaster risk management can only have a sustainable impact as a multisectoral issue in development cooperation, comprising a broad range of sectors (e.g. environmental protection and resource conservation, land registration, health and energy supply) at local, national and international levels.

diversification/dâyversifi'keyshen/n

تنوع، گوناگونی

consensus/kân'senses/n

توافق، اجماع، اتفاق نظر، نظر عمومی، نظر اکثریت

(consensus among sb.,(consensus about sth.)- Important frameworks exist to guide disaster management, such as the United Nations International Strategy for Disaster Reduction's Hyogo Framework for Action, and the WHO Regional Office for Europe Toolkit, which are developed through expert consultation to create a consensus set of guidelines and checklist.

concomitant /kân'kâmitent /adj

توام، همراه، همایند، ملازم، پیوست، همزمان، مقارن، مصادف

The management of the child who has sustained significant radiation exposure is dependent on the type and degree of exposure as well as the presence of concomitant injuries. Principles of disaster management, including contamination, prehospital care and field triage, should be fully employed.

empowerment/im'pawerment/n

توانمندسازی

Both communities and local authorities should be empowered to manage and reduce disaster risk.

rationalization/ rashenalây'zeyshen / n

توجیه

sustainable development/ sâs'teynebel di'velopmen/ n

توسعه پایدار

Sustainable development refers to a mode of human development in which resource use aims to meet human needs while ensuring the sustainability of a

natural systems and the environment, so that these needs can be met not only in the present, but also for generations to come.

Knowledge of disaster management and sustainable development including frameworks and skills for addressing cotemporary hazards, disasters and complex emergencies with an emphasis on either post-development or majority world contexts.

urbanization/erbenây'zeyshen/n

توسعه شهری، شهرسازی، شهری شدگی

capacity development/ke'pasiti di'volopment/n

توسعه ظرفیت، ظرفیت‌سازی

The process by which people, organizations and society systematically simulate and develop their capacities overtime to achieve social and economic goals, including through improvement of knowledge, skills, systems and institutions.

elaborate/i'lalobreyt/vt , vi

توضیح دادن، شرح دادن، گسترش دادن، بسط دادن

elucidation/i'loosideyshen/n

توضیح، شرح

elucidatory/i'loosideyteri/adj

توضیحی

Past experiences elucidate that community has always adopted a culture of reaction after a hazard rather adopting a culture of pre-action before the same occurs. As a result, fate of affected community goes to the hand relief / rehabilitation agencies.

windstorm/'windstorm/ n

توفان (کم باران)

A wind that is strong to cause at least light damage to trees and buildings and may or may not be accompanied by precipitation. Wind speed during a windstorm typically exceeds 55km (34 mile) per hour.

tornado/ tor 'ney do/ n

توفان پیچنده (متداول در ایالات متحده آمریکا)، ترنادو، تورنادو

A tornado is violent, dangerous, rotating column of air that is in contact with both the surface of the earth and a cumulonimbus cloud or, in rare cases, the base of a cumulus cloud. Tornadoes come in many shapes and sizes, but they are typically in the form of a visible condensation funnel, whose narrow end touches the earth and is often encircled by a cloud of debris and dust. Most tornadoes have wind speeds less than 110 miles per hour (177km/hr), are about 250 feet (76m) across, and travel a few miles (several kilometers) before dissipating.

thunderstorm/'thânderstorm/n

توفان تندی، توفان همراه با آذرخش و صاعقه

A thunderstorm, also known as an electrical storm, a lightning storm, thundershower or simply a storm, is a form of turbulent weather characterized by the presence of lightning and its acoustic effect on the Earth's atmosphere known as thunder. The meteorologically assigned cloud type associated with the thunderstorm is the cumulonimbus. Thunderstorms are usually accompanied by strong winds, heavy rain and sometimes snow, sleet, hail, or no precipitation at

all. Those that cause hail to fall are called hailstorms. Thunderstorms may line up in a series or rainband, known as a squall line.

hurricane/'hâriken/ n

A severe tropical cyclone having winds greater than 64 Knots(74 mile per hour; 119 km per hour), originating in the equatorial regions of the Atlantic Ocean or Caribbean Sea or eastern regions of the Pacific Ocean, traveling north, northwest, or northeast from its point of origin, and usually involving heavy rains.

Nor'wester/nor'wester/n

A weather pattern that develops over the Bay of Bengal during the hot months of the year. The duration of nor'westers may last over an hour and are more frequent in late afternoon.

threatened/ 'thretend /adj

threaten/ 'threten / vt, vi

threat / thret/ n

threatening/ 'threning/adj

perceptiveness/per'septivnis/n

emergency management team/i'merjensi 'manijment tiim/n

The emergency management team will need to have the right set of abilities, skills and knowledge. The ability we seek is the latent capability to perform well under difficult conditions. The skill required will be practical expertise to deal with abnormal or out of line situations. Knowledge is the possession of, or access to, relevant information.

توفان شدید مناطق حاره، توفند، تندباد دریایی

توفان‌های موسمی در نیوزلند و بنگلادش

displaced/dis'pleyst/adj

جابجا شده، آواره، رانده شده

displace/dis'pleys/vt

جابجا کردن، جای [کسی یا چیزی را] گرفتن

displacement/dis'pleysment/n

جابجایی، تغییر مکان، آوارگی، جانشینی، جایگزینی

Migration and displacement are interlinked, but must be distinguished. Displaced populations – either across borders such as refugee influxes, or within a country because of disasters or armed conflict – usually need relief operations combined with efforts aiming at collective and lasting solutions. Migration on the other hand usually involves more individual social assistance, legal protection and personal support.

community-based /kâ'myooniti beysd /n

جامعه محور، مبتنی بر جامعه، مردم محور

The Community Based Disaster Management (CBDM) approach promotes a bottom – up approach working in harmony with the Top – down approach, to address the challenges and difficulties. To be effective, local communities must be supported into analyzing their hazardous conditions, their vulnerabilities and capacities as they see themselves.

amends/a'mendz/n

جبران، پرداخت خسارت

In addition, traditional flood modifying and against – flood protecting measures need to be amended with two new measures characteristic only for urban setting: small near - to- source detention structures and low cost protection techniques.

isolate /'âysoleyk /vt

به سختی، به شدت، با حالت جدی

earnest /'ernist/ n

جدی، صادق، به شدت، جدا، با جدیت تمام

uptake/'âpteyk/ n

جذب، میزان جذب

The networks could be used to give early warning of any weakening in the uptake of carbon dioxide by the global oceans. This uptake is very important in showing the rise of CO2 in the atmosphere, and some scientists have warned that such a weakening of the sink could be beginning to occur as climate change

becomes more pronounced.

trivial/ 'triviyâl /adj

جزیی، ناچیز، خرد، پیش پا افتاده معمولی، سطحی

Specifics/spe'sifiks/n

جزئیات

search and rescue /se'rch and reskyoo/n

جستجو و نجات

Search and rescue is a life- saving vocation. And the ability to save a life is often dependent upon how quickly the person can be found and access. If the missing person is one of your loved ones, you will expect well- equipped, well trained search and rescue professionals to bring your loved one home safely to you.

dovetail/'dâvteyl/n,vt,vi

جفت و جور شدن، جور شدن، جور درآمدن

This program will also dovetail all national programs supported by UNDP, especially pro-poor initiatives, uncertainty reduction, and vulnerability adaption and assessment under the UN Framework for Convention on Climatic Change.

hamper / hamper / vt

جلو (چیزی را) گرفتن، مانع (چیزی) شدن

Flash floods in northwest Kenya are hampering the delivery of emergency relief aid to thousands of pastoralists hard hit by a severe drought there, say officials.

outstrip/ aot'strip /vt

جلو زدن از، پشت سر گذاشتن، بهتر انجام دادن از

As rapidly increasing risk the region threatens to outstrip the mitigation capacity there is need to translate the growing momentum for risk reduction into rapid action based on sound strategies.

pre – empt/ prii'empt/vt

جلوگیری کردن، مانع شدن، اشغال کردن

impede/im'piid/vt

جلوگیری کردن، مانع شدن، سد راه شدن

aggregate/'agregeyt/vt, vi

جمع کردن، جمع شدن، گروه بندی کردن

rainwater harvesting/'reynwoter 'hârvisting/n

جمع آوری آب باران

The proposed program will focus on building awareness on rain water harvesting, demonstrate at public facilities (schools and hospitals) to construct model tanks, expand rain water harvesting to the private sector, research and develop low cost tank designs for market-based solutions and promote collaborations with other USG partner and others for wider application.

systematic data collection/ sisti'matik 'deytâ kâ'lekshen/ n

جمع آوری نظام مند داده ها، جمع آوری منظم داده ها

The lack of systematic and standardised data collection from disasters in the past is now revealing itself as a major weakness for any long term planning.

marshalling / 'mârshâling / n

جمع آوری، تجمع

Policies and prompt coordination are evident, but marshalling the will and commitment to coordinate is

a major challenge in disaster management.

aggregate/'agrigit / n, adj

جمعی، مجموعه، گروه، کلی، مجموعاً، حاصل جمع

concerted/kân'sertid/adj

جمعی، مشترک، هماهنگ

population /'pâpyu'leyshen / n

جمعیت، سکنه، تعداد

demographic/ demo'grafik/ adj

جمعیت‌شناختی، جمعیتی

demographer/ di'mâgrafer/ n

جمعیت‌شناس

demography/ di'mâgrafi /n

جمعیت‌شناسی

The symposium noted unique features of the Island Pacific States with respect to ICT, such as the state of introduction of ICTs, diverse languages and cultures, and unique demography and geography.

social aspects/'soshâl aspekts/ n

جنبه‌های اجتماعی

The social aspects and problems of disasters are generally the same regardless of the type of disaster. For example, the problems of getting a local community to prepare for a disaster are the same regardless of the type of the impact. The problems of warning people about an oncoming disaster are the same whether it is a chemical release, tornado, or flashflood.

gender-based/'jender- beysd/n

جنسیت محور

Gender-based analysis could also be accomplished in this fashion. Nevertheless, female-headed household are often a poor proxy for this and thus this is one measure than can be used when Census's or large enough sample data sets are available.

deforest /dii'fârist/vt

جنگل‌زدایی کردن، جنگل‌های (جایی را) تخریب کردن

deforestation /dii'fâris'teyshen/n

جنگل‌زدایی، تخریب جنگل، انهدام جنگل

Disaster management is a global policy problem with a critical land-use change component related to settlement patterns, deforestation, and agriculture development.

earthquake safe communities/'erthkweyk 'seyf kâmyoonitiz/n

جوامع ایمن در برابر زلزله

Earthquake safe communities can be established by;

- a) Identify and implement measures to reduce vulnerability through retrofitting of existing buildings or construction of new buildings;
- b) Raise awareness on earthquake, and
- c) Risk and preparedness for teachers, students, local and central government officials and local communities.

economic loss/iikâ'nâmik lâs/n

خسارت اقتصادی

Economic loss is a term of art which refers to financial

loss and damage suffered by a person such as can be seen only on a balance sheet rather than as physical injury to the person or destruction of property. There is a fundamental distinction between pure economic loss and consequential economic loss, as pure economic loss occurs independent of any physical damage to the person or property of the victim. It has also been suggested for it to be called "commercial loss" as injuries to person or property could be regarded as "economic".

Examples of pure economic loss include the following:

- Loss of income suffered by a family whose principal earner dies in an accident. The physical injury is caused to the deceased, not the family.
- Loss of market value of a property owing to the inadequate specifications of foundations by an architect.
- Loss of production suffered by an enterprise whose electricity supply is interrupted by a contractor excavating a public utility.

These hazards can result in considerable human suffering and billions of dollars in property and economic losses.

tireless/'tâyerlis/ adj

خستگی ناپذیر، پرمقاوت، پرتوان

drought/ draot/ n

خشکسالی

Drought is a temporary reduction in water or moisture availability significantly below the normal or expected amount for a specific period. This condition occurs either due to inadequacy of rainfall, or lack of irrigation facilities, under – exploitation or deficient availability for meeting the normal crop requirements in the context of the agro – climatic conditions prevailing in any particular area. There are three types of drought, Meteorological Drought, Hydrological Drought and Agricultural Drought.

satisfaction/ satis'fakshen / n

خشنودی، رضایت، موجب مسرت، مایه خشنودی

poverty line /'pâverti lâyn/n

خط فقر

The poverty threshold or poverty line is the minimum level of income deemed adequate in a particular country. In practice, like the definition of poverty, the official or common understanding of the poverty line is significantly higher in developed countries than in developing countries. In October 2015, the World Bank updated international poverty line to US\$1.90 a day.

poverty line / 'pâverti lâyn/ n

خط فقر

subsistence level / sab'sistens level /n

خط فقر

Mozambique offers an example of a post – conflict country faced with major natural disasters – It also offers an example of recovery in an extremely poor and primarily subsistence livelihood population, but in

a country favored by donors and receiving substantial amounts of both relief and recovery assistance.

biological hazard/bâyâlâjîkâl hazerd/n

Biological agents are living things, or products of living things, that can cause illness and disease in humans.

Biological agents include viruses, bacteria and fungi, as well as parasitic worms and some plants. Biological agents enter the body when they are inhaled, eaten (ingested) or absorbed. Most biological agents are inhaled. Once inside the body, these infectious agents can multiply quickly and may be passed from one person to another. Some can survive outside the body for a quite a long time if they have the right breeding ground, such as water or food. Others die quickly without the protection of the body.

خطر بیولوژیکی، خطر زیستی

acceptable risk/ ak'septebel risk/n

The term "acceptable risk" describes the likelihood of an event whose probability of occurrence is small, whose consequences are so slight, or whose benefits are (perceived or real) are so great, that individuals or groups in society are willing to take or be subjected to the risk that the event might occur.

خطر پذیرفتنی، ریسک مجاز، خطرپذیری قابل قبول

seismic hazard/'sâyzmik'hazerd/n

One of the natural phenomenon, the earthquakes give rise to seismic hazard to the part of the globe is very specific from the identification of seismic belt located in the earth crust. It is known by every one that the Northeast India is seismically one the six most active earthquake prone zones in the world. The other five being are the Mexico, Taiwan, California, Japan, and Turkey.

خطر لرزه‌ای

risk/risk/n,vt

Risk is the potential of gaining or losing something of value. Values (such as physical health, social status, emotional well-being or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen. Risk can also be defined as the intentional interaction with uncertainty. Uncertainty is a potential, unpredictable, unmeasurable and uncontrollable outcome; risk is a consequence of action taken in spite of uncertainty.

خطر، احتمال خطر، ریسک کردن، خطر کردن، به خطر انداختن، خطر (چیزی را) پذیرفتن

Jeopardy /'jɛpɛrdi/n

A business continuity plan comprises an organization's strategies to prepare for future national, regional or local crises that could Jeopardize its capacity to continue with its core mission, as well as its long term stability.

خطر، مخاطره

exogenic hazards/ ek'sâjenik 'hazerd / n

Exogenic hazards caused by the earth surface processes (flood, riverbank erosion, coastal erosion,

خطرات برونزا (خطرات ناشی از فرآیندهای سطح زمین)

land slide, soil erosion and ground water contamination).

atmospheric hazards/ atmosferik hazardz/ n

Atmospheric hazards caused by atmospheric processes (storm, cyclone, nor'wester, tornado, hurrican, drought, etc).

خطرات جوی

endogenic hazards/ en'dojenik 'hazerd / n

In Bangladesh the risks of atmospheric and exogenic hazards are high where as risk from endogenic hazards are relatively low. Cyclone, flood, riverbank erosion, coastal erosion, landslides, drought and groundwater contamination are major natural hazards.

خطرات درون‌زا

geological hazards/ jiyâ'lâjikâl 'hazerdz/n

Some geological hazards can be reduced or mitigated by engineering, design, or modified construction or mining practices so that risks to health and safety are acceptable.

خطرات زمین‌شناختی

intensive risk/ in'tensive risk/n

The risk associated with the exposure of large concentrations of people and economic activities to intense hazard events, which can lead to potentially catastrophic disaster impacts involving high mortality and asset loss.

خطرپذیری شدید، ریسک زیاد

extensive risk/ iks'tensiv risk/n

The widespread risk associated with the exposure of dispersed populations to repeated or persistent hazard conditions of low or moderate intensity, often of a highly localized nature, which can lead to debilitating cumulative disaster impact.

خطرپذیری گسترده، خطرکردن گسترده

burdensom /'berdensâm /adj

Disasters strike suddenly, often involve large groups of people, cause substantial personal and societal damage, and lay a considerable burden on economic and public health resources.

خطیر، مهم، سنگین، شاق، طاقت فرسا

counterfactual/ 'konter'facchuwâl/n

One could also predict the counterfactual situation with rainfall at a given percent below its mean level.

خلاف واقعیت، نادرست

در بر گرفتن، شامل بودن، پذیرفتن

in the wake of/in dhe weyk âv/idiom

در پی، به دنبال، در نتیجه

An effective disaster risk management campaign strategy will be developed in consultation with all stakeholders to take preventive measures in the wake of natural hazard to minimize the loss.

pursuance / per'syoo - ence / n

در حال انجام، در حین انجام

vicinity/vi'siniti/ n

در حومه، در مجاورت، در اطراف، نزدیکی، مجاورت

It has also been prescribed that these industries will carry out awareness campaign for the population in the vicinity regarding the dos/don'ts in case of any accident involving hazardous material.

ongoing/'ân go-ing/adj

در دست اقدام، جاری، در جریان، در حال پیشرفت

Disasters can be considered an outcome of an ongoing "risk process", in which the prevailing circumstances of hazards, exposure and vulnerabilities combine to generate disaster risk.

to deal with/too diil width/ PHR V

در دست گرفتن، ازعهده برآمدن، اداره کردن

One of the main goals of disaster management, and one of its strongest links with development, is the promotion of sustainable livelihoods and their protection and recovery during disasters and emergencies. Where this goal is achieved, people have a greater capacity to deal with disasters and their recovery is more rapid and long lasting.

in conjunction with/ in kân'jânkshen widh/idiom

در رابطه با

The overall aim of the Central Asia Dp training project was to support National Societies in further developing their own structures for preparedness in conjunction with those of Emergency Committees, Ministries and Civil Defense Organizations in each of the five countries in the region.

in terms of/ in termz âv/idioms

در رابطه با، در خصوص، به صورت، برحسب

The thematic focus will be on awareness generation and education, training and capacity development for mitigation and better preparedness in terms of disaster risk management and recovery at community, district and state levels and strengthening of state and district disaster management information centers for accurate and timely dissemination of warning.

in line with/in lâyn width/idioms

در راستای، مطابق، در امتداد

To promote the further development of and investment in effective, nationally compatible, regional multi-hazard early warning mechanisms, where relevant, in line with the Global Framework for Climate Services, and facilitate the sharing and exchange of information across all countries.

globally/'globâli/adj

در سراسر جهان، کلاً، عموماً

thrust/ thrâst / vt

در شرایط خاص قرار دادن، انداختن

The death of a husband can thrust a widow into

becoming the primary income earner (bread winner of a family).

at the risk of /at dhe risk âv /idioms

Such stress can place a widow and her children at the risk of bondage, prostitution, trafficking and other exploitative situations.

overwhelm / over'wel'm /vt

Climate change is overwhelming the capacity of relief agencies to cope with people made sick or homeless by natural disasters.

revenue/ 'revenyoo/ n

To a large extent, impacts on revenue depend on the macro economic dynamics occurring following the disaster shock, and the structure of revenue sources (income taxes consumption taxes, custom dues, etc.) since each may react differently in the aftermath of the disaster event. We find fiscal behavior in the aftermath of disasters in developed countries that can best be characterized as counter cyclical. In contrast, we find pro- cyclical decreased spending and increasing revenues in developing countries following large natural disasters.

include/ in'klood/ vt

comprise/kâm'p'rây/z/vt

The concept of 'invulnerable development' attempts this: In this formulation, invulnerable development is development directed toward reducing vulnerability to disaster, comprising 'decisions and activities that are intentionally designed and implemented to reduce risk and susceptibility, and also raise resistance and resilience to disaster'.

in situ/in sityoo/adv., adj

The drill site, Ashio, is 100 km north of Tokyo. Downhole testing and measurements were conducted five times: four times after each 500 m drilling and the fifth time after completing the 2000 m borehole. Measurements of in-situ stress orientation and magnitude were conducted by the hydraulic fracturing method, stress-induced well bore breakout analysis, and drilling-mud pressure induced hydraulic fracturing analysis.

emergent/i'merjent/adj

The basic emergency procedures are designed to protect lives and property through effective use of community resources. Since an emergency may be sudden and without warning, these procedures are designed to be flexible in order to accommodate contingencies of various types and magnitudes.

interim/ 'interim/ n, adj

# ذ

intrinsically/in'trinsikli/adv

We recognize the intrinsic relationship between disaster reduction, sustainable development and poverty eradication, among others, and the importance of involving all stakeholders, including governments, regional and international organizations and financial institutions, civil society, including non-governmental organizations and volunteers, the private sector and the scientific community.

ذاتا، فطرا، فی نفسه، به خودی خود

inhere/in'hiyer/vi

intrinsic/in'trinsic, -zik/adj

inherent/in'hiyerent/adj

inherently/in'hiyerentli/adv

The Philippines is one of the most hazard prone countries in the world. Its location in the tropics and in the Pacific Ring of Fire exposes it to multiple natural hazards including typhoons, floods, drought, as well as earthquakes and volcanic eruptions. This inherently high disaster risk is exacerbated by the effects of unplanned urbanization, environmental degradation, and global climate change. The resulting human and economic costs of disasters are significant. Over the last ten years, the Philippines have witnessed over 6,000 people killed, over 23 million people affected, and about 1.3 billions of dollars in economic damage (EM-DAT).

ذینفع، مرتبط، سهام دار

liaison/li'eyzen/n

Initial reconnaissance and aerial surveillance may be available to assist provincial authorities in determining the scope of damage. In addition, Regional Liaison Officers have been designated to self-active and deploy to affected Provincial Regional Emergency Operations Centers and the Provincial Emergency Coordination Center to provide liaison and coordination between the Provincial Emergency Program and the commander of Joint Task Force Pacific.

رابط، ارتباط، رابطه، ربط

truly /'trooli / adv

It is a generally accepted truism that for any contingency plan to be effective, it must have strong support of the organization or of the government for which it is being prepared.

راست، حقیقت، واقعا، صادقانه

satisfy/'satisfây/vt

satisfied/'satisfây/d/adj

landslip/'landslip/n

A landslide, also known as a landslip is a geological phenomenon which includes a wide range of ground movements, such as rockfalls, deep failure of slopes and shallow debris flows, which can occur in offshore, coastal and onshore environments. Although the action of gravity is the primary driving force for a landslide to occur, there are other contributing factors affecting the original slope stability. Typically, pre-conditional factors build up specific sub-surface conditions that make the area/slope prone to failure, whereas the actual landslide often requires a trigger before being released.

راضی، خرسند، خشنود، رضایت‌مندانده،

رائش زمین، (ریزش) کوه، زمین لغزه

mudslide/ mâdslây/d/ n

Mudslides, also known as debris flows or mudflows are a common type of fast-moving lands lide that tends to flow in channels.

Mudslides develop when water rapidly collects in the ground and results in a surge of water – soaked rock, earth and debris. Mudslides usually begin on steep slopes and can be triggered by natural disasters.

رائش گل

stairwell/ 'ster wel/ n

Use a blank sheet of paper to draw the floor plans of

راه پله

your home. Show the location of doors, windows, stairways, large furniture, your disaster supplies kit, fire extinguisher, smoke alarms, other visual and auditory alarms, collapsible ladders, first-aid kits, and utility shut-off points. Show important points outside such as garages, patios, stairways, elevators, driveways, and porches.

detour/diitur/n,vt

راه فرعی، مسیر انحرافی

Our study investigates the establishment of backup links in order to provide a network that can be re-established during disasters as an emergency detour route more rapidly and easily.

constituent/kânsti'tyu-ent/n,adj

رای دهنده، موکل

When a disaster occurs, the information is communicated to Cabinet through the National Disaster Risk Management Committee (NDRMC). The NDRMC is directly accountable to Cabinet through the Secretary to Cabinet. At a local level, the Settlement Disaster Risk Management Committee (SDRMC), that works closely with the community, transmits information about a possible disaster or risk to the Constituency Disaster Risk Management Committee (CDRMC).

prevalent /prevelent/adj

رایج، متداول

In many cases, short-term economic interests prevail above long-term sustainability, in other; poverty leaves people no other option than to use the natural resource base in an unsustainable way.

prevailing /pri'veyling/adj

رایج، متداول، موجود، حاکم، غالب

relevance/'relivens/n

رابط، ارتباط

occur/â'ker/vi

رخ دادن، اتفاق افتادن

mission /'mishen/n

رسالت، ماموریت

The mission of the National Earthquake Hazard Reduction Programme, NEHRP, is to develop and promote knowledge and mitigation practices that reduce fatalities, injuries, and economic and other expected earthquake related losses.

sediment /'sediment/n

رسوب، ته نشست، لرد، لای

Sedimentation /sedimen'teyshen/n

رسوب‌گذاری، ته‌نشینی

Oil and natural gas are both fluids that can exist in the pore spaces and fractures of rock, just like water. When and natural gas are withdrawn from regions in the Earth near the surface, fluid pressure, the pore spaces begin to close and the sediment may start to compact resulting of the surface.

sedimentary /sedi'mentri/adj

رسوبی [زمین‌شناسی]

attain / e'tyn/ vt,vi

رسیدن، دست یافتن به، به دست آوردن، کسب کردن

satisfactory/satis'fakteri/ adj

رضایت بخش، کافی، مناسب

well-being/ wel'bii - ing/ n

رفاه، خیر، خوشی، سلامت

While disasters can strike wide region or a nation, that impact is felt at the community level although it may hit one or several communities at once. It is these communities that constitute what is referred to as "disaster fronts". Being at the forefronts, communities need to have capacity to respond to threats themselves. It is for this reason that communities should be involved in managing the risks that may threaten their well-being.

prosperity / prâs'periti/n

رفاه، رونق، سعادت، خوشبختی

decontaminate/diikân'tamineyt/vt

رفع آلودگی کردن از، آلودگی‌زدایی کردن از

Decontamination is the reduction or removal of chemical agents. Decontamination may be accomplish by removal of these agents by physical means or by chemical neutralization or detoxification.

decontamination/diikânâ'tamineyshen/n

رفع آلودگی، آلودگی‌زدایی

dissipation / disi'peyshen / n

رفع، برطرف شدگی، پراکندگی، پخش، اتلاف، افت

Restoration of equilibrium means the gradual dissipation of disaster effects and the return to a non-disaster state of nature.

challenger/'chalinjer/n

رقیب، حریف

shower/ 'shao-er/n, vt,vi

رگبار، درشت باران، باریدن

showery/'shao-eri/adj

رگباری، بارگبارهای پراکنده

Heavy monsoon showers hit the flood-hit regions of Pakistan on Sunday, worsening the flooding and impeding relief operations, compounding a humanitarian crisis that has affected over 14 million people across the country and claimed nearly 1700 lives so far.

diminishing/di'minishing/adj

رو به نقصان، نزولی، کاهش یابنده

The effects of persistent drought conditions have had visible implications on diminishing agricultural and livelihood options, and increasing migratory population trend.

foster/fâster /vt,vi

رواج دادن، ترویج دادن، پروراندن، تشویق کردن

The foremost challenge facing, the National Earthquake Hazard Reduction Programme NEHRP is encouraging the use of knowledge to foster risk reduction among local, and state agencies and private entities.

prevail / pri'veyl / vi

رواج داشتن، حاکم بودن، غلبه کردن، پیروز شدن

liquefy /likwifây/vt, vi

روان‌گرا شدن، روان‌گرا کردن

Assessment of the potential for and consequences of earthquake induced soil liquefaction is a critical aspect

of geotechnical earthquake engineering that informs the likelihood and extend of soil deformation and ground failure of saturated (or nearly saturated) soils during an earthquake.

liquefaction/likwi'fakshen/ n

روان‌گرایی

demoralize/di'mârâlâyz/vt

روحیه (کسی را) تضعیف کردن یا خراب کردن

provincialism/pro'vinshâlizem/n

روحیه شهرستانی، دهاتی‌گری، کوفته‌فکری، تنگ‌نظری

At the provincial level, the provincial civil defense committee is headed by the governor of the province. And sectoral agencies at provincial level would integrate disaster risk reduction activities into their sectoral annual development plans.

performance-based seismic design method/per'formens-beysd 'sayzmik di'zayn 'method/n

روش طراحی لرزه‌ای اجرا محور

A performance-based seismic design(PBSD) method is aimed at controlling the structural damage based on precise estimations of proper response parameters. PBSD method evaluates the performance of a building frame for any seismic hazard, the building may experience.

elucidate/i'loosideyt/vt

روشن کردن، توضیح دادن، شرح دادن

mainstream/'meynstriim/ n, adj

روند کلی، خط فکری، رایج، شایع

occurrence/â'kârens/n

رویداد، اتفاق، وقوع

Mitigation activities actually eliminate or reduce the probability of disaster occurrence, or reduce the effects of unavoidable disasters. Mitigation measures include building codes; vulnerability analyses updates; zoning and land use management; building use regulations and safety codes; preventive health care; and public education.

preventive approach/ priventiv e'proch/ n

رویکرد پیش‌گیرانه

The proposed preventive approach therefore, corresponds to risk management based on the consideration of the consequences, rather than the causes of failures.

all hazard approach/ol 'hazerd e'proach/n

رویکرد جامع بلایا و سوانح

In Canada, emergency management adopts an all hazard approach that addresses both natural and human-induced hazards and disasters. These are increasing in both number and frequency across the world, resulting in ever growing human suffering and economic cost.

Comprehensive approach/kâmpri'hensiv 'eproch/ n

رویکرد جامع، رویکرد جامع

Efforts to prevent and plan for natural and technological disasters have arisen from the need to protect society from hazards that are prevalent in the area of governmental jurisdiction. This approach to risk reduction and civil protection has been developed

through legislation, the defining of institutional responsibilities and the allocation of financial resources (top down), coupled with local responses and community involvement. Such a comprehensive approach to multi hazard planning is a feature of the strategy of Organization for Economic Co-operation and Development (OECD) countries and has evolved from extensive research into both natural and anthropogenic disasters.

people-centered approach/ piipel'senterd e'proch /n

رویکرد مردم محور

Effective early warning a people-centered approach to make communities safer.

Dr.Raymond Ford, president of the Barbados Red Cross Society, "...warning systems by themselves are of little value unless communities understand how they work and how warnings should be transmitted...

integrated approach/intigreytid e'proach/n

رویکرد یکپارچه

Comprehensive Emergency Management (CEM) is an integrated approach to the management of emergency programs and activities for all four emergency phases (mitigation, preparedness, response, and recovery), for all types of emergencies and disasters (natural, man-made, and attack), and for all levels of government and the private sector.

approach/ e'proch / n

رویکرد، نگرش، دید، روش، شیوه، برخورد

deliverance/di'liverens/n

رهایی، نجات

micro- zonation/'mâykro-zoneyshen/n

ریز پهنه‌بندی

From the geophysical point of view, disaster management includes the several geophysical topics to investigate the physical properties and to use physical techniques for regional and local land use planning or micro - zonation and natural disaster risk estimation studies etc.

spill /spil/n

ریزش، نشت، موادریخته شده سرازیرشدن، به دریاریختن،

spill/ spil/vt,vi

سرایت کردن، به زبان آوردن، فاش کردن [نفت و غیره]

spillage / 'spilij /n

ریزش، نشت، موادریخته شده سرایت، مقدار سرریز شده، ناشی

spillover / 'spilover / n, adj

شده، سرایت کرده [نفت و غیره]

Provide assistance for emergencies such as chemical and oil spills, industrial and technological accidents, forest fires, and other nature disasters.

risk taking/risk teyking/n

ریسک کردن، خطر کردن، مخاطره جویی

risky/'riski/adj

The challenges of the last 20 years, since 1986 that have contributed to developing current concepts and approaches to the emergency management function are outlined. Enormous resources have been invested in studying risk in context of environment and there have been significant advances in thinking and practice in

risk and emergency management.

embedded/im'bedid/adj

The impact assessment showed that, in order to be effective, small interventions in disaster risk management (e.g., community-based early warning systems) need to be embedded in a comprehensive national program and/or a program with multi-institutional support.

ریشه‌دار، محکم، جاسازی شده

moderator/ 'mâdereyter / n

The committee was informed of the recommendations of the Expert Group Meeting on WSIS + 5 and Emerging Issues in Asia and the Pacific, held in Bangkok, by the chairperson, who had served as a moderator.

رئیس جلسه، حَکَم، واسط، مدیر

# ز

real time/'riyel 'tâym/n

This paper considers the rôle of information technology in forecasting, monitoring and managing disasters in real-time (i.e., by analysis of data as soon as they are collected). First, the advantages and pitfalls of a technological approach to natural hazards are discussed, then the general nature of real-time technology is described. There follows a review of the appropriate techniques of monitoring the physical impacts of earthquakes, volcanic eruptions, tsunamis, floods and landslides. Next the rôle of information technology in disaster management is assessed, with emphasis on telecommunications and simulation modelling.

terrain / te'reyn/ n

Pollution incidents can effect vast areas and very remote terrain, and the potential need for surveillance should be considered as part of a national environmental contingency plan.

geo – textile / jiyo-'tekstây/ n

A geo – textile fabric is a material that is utilized in foundations, earths, rocks, and soil. It is also referred to as erosion control cloth, filter fabric, support membrane and civil engineering cloth. As a mitigation measure, the geo – textile increases resistance to localized flooding damage by reinforcing roadway sub – base and by improving sub – base drainage. Geotextiles are designed to be permeable to allow the flow of water through it.

earthquake/'erthkweyk/n-An earthquake (also known as a quake, tremor or temblor) is the result of a sudden release of energy in the Earth's crust that creates seismic waves. The seismicity, seismism or seismic activity of an area refers to the frequency, type and size of earthquakes experienced over a period of time.

Surveying/ ser'veying/n,adj

scenario/ si'nâriyo/ n

Data obtained from different sensors are particularly useful when combined with ground – based data and information and integrated into Geographical Information Systems (GIS) for analysis and modelling of complex scenarios.

# س

conformation/kânfor'meyshen/n

ساخت، ترکیب، شکل

social fabric /soshâl'fabrik/n

ساختار اجتماعی، بافت اجتماعی

Researchers have created a computer model that predicts how a disaster's impact on critical infrastructure would affect a city's social and economic fabric, a potential tool to help reduce the severity of impacts, manage the aftermath of catastrophe and fortify infrastructure against future disasters.

decision – making- structure/ di'sizhen meykning 'strâkcher/n

ساختار تصمیم‌گیری

In fact, the majority of organizational and decision making structures and components created in most contingency plans are seldom made use of.

structural/strâkcherâl/adj

ساختاری، ساختی، ساختمانی

structuralist/strâkcherâlist/n,adj

ساخت‌گرا، ساختارنگر، ساخت‌گرایانه

Implement integrated environmental and natural resource management approaches that incorporate disaster risk reduction including structural and non-structural measures.

structuralism/strâkcherâlizem/n

ساخت‌گرایی، ساختارنگری

built-environment /bilt-in'vâyrement/n

ساختمان‌ها و تاسیسات موجود در محیط

The built environment is the urban and technological infrastructure that we live in, as opposed to a naturally occurring environment, such as forest or grass plains. Managing the built environment is key to managing the risks of disasters and natural hazards.

adapt/a'dapt/vt

سازگار کردن، وفق دادن، تنظیم کردن

institutional/ insti'tyooshenâl/ adj

سازمانی، نهادی

risk transfer mechanism/risk 'transfer 'mekanizem/n

سازوکار انتقال ریسک، مکانیزم انتقال ریسک

Risk transfer mechanism complement mitigation strategies by providing financial compensation to organizations that have suffered a catastrophic loss.

mechanism/'mekanizem/n

سازوکار، نظام، ساخت و کار، ساختکار، شیوه، روش

Work on development and implementation of the concept of the regional cooperative mechanisms on the use of space technology for disaster management.

collapse mechanisms/ko'laps 'mekanizemz/n

سازوکارهای ریزش

In historic city centers the mitigation of seismic risk is dependent on the possibility of implementing strengthening programs. Given the cultural and economic value attached to the historic structures, however, interventions should be tailored to suit aesthetic and structural requirements of each building type, and provide sufficient reliability of performance in future earthquakes. A simple analytical model is developed to calculate load factors associated with various collapse mechanisms of wall assemblies, and vulnerability functions are derived. An application shows the capability of the procedure to quantify reduction in vulnerability associated with strengthening implementations for different typologies.

prefab/'priifab/n

سازه پیش ساخته

Early Estimation System (ESS)/ 'erli esti'meyshen sistem/n

سامانه برآورد اولیه

EES provides a quick, rough estimate of the scale of damage immediately following an earthquake.

emergency Measures Support System (EMS)/n

سامانه پشتیبان اقدامات اضطراری

EMS provide support for the formulation of response plans by displaying disaster-prevention and damage information on digital maps.

global positioning system (GPS) /'globâl po'zishening 'sistem/n

سامانه مکان‌یابی جهانی

New technologies utilizing advanced drilling techniques and satellite – based global positioning system now afford unprecedented opportunities to measure strain accumulation and physical conditions under which earthquake occur.

task force/'tâsk fors/n

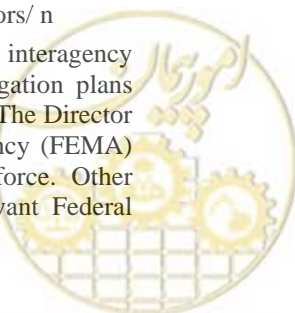

ستاد حوادث

The Task Force on Disaster Risk Reduction aims to promote the effective participation of private sector in disaster risk reduction and building of resilience as guided by the Sendai Framework for Disaster Risk Reduction 2015–2030 (SFDRR) and ESCAP Resolution 71/12 on strengthening regional mechanisms for the implementation of the SFDRR in Asia and the Pacific. In its first meeting in mid-May 2015, the Task Force discussed the role of the private sector in disaster risk management as outlined in the Sendai Framework.

interagency task force/ inter'eyjensi 'tâsk fors/ n

ستاد حوادث درون سازمانی

The president can also establish a Federal interagency task force to implement predisaster mitigation plans administered by the Federal Government. The Director of Federal Emergency Management Agency (FEMA) serves as the chairperson of the task force. Other members of the task force include relevant Federal

agencies, State and local organizations, and the American Red Cross.

challenging/'chalinjing/adj

There are a range of challenges to the effective implementation of disaster risk reduction laws and policies.

سخت، دشوار، پرزحمت، جالب، هیجان انگیز، نقادانه

vicious/'vishes / adj

سخت، شدید، خطرناک، وحشی

rigour/'rigger /n

سخت گیری، جدیت، حدت و شدت، دقت، موشکافی

containment/kân'teynment/n

With respect to unauthorized or accidental discharges of hazardous materials or pollutants, the responsibility for containment and clean up remains with the discharger.

سد نفوذ، [سیاست] تحدید نفوذ

custodian/kâs'todiyen/ n

سرپرست، متولی، قیم، مسوول

custody/'kâstediy / n

Essential equipment /machines required for handling building collapse and fire fighting should be kept ready in each of these Units so that in case of a localized and smaller disaster the Disaster Management Unit of that area itself is in a position to handle the situation with the help of fire Brigade. The equipment may be kept under the custody of the SHO or the officer next to him so that at the time of need these are already available to DMU, which should start helping victims without any loss of time.

سرپرستی، [حقوقی] حضانت، امانت، بازداشت، توقیف

decisive/di'sâyisiv/adj

سرنوشت ساز، تعیین کننده، قاطع، بی چون و چرا

expeditious/ ekspi'dishes /adj

survivor syndrome/ ser'vayver 'sindrom/ n

سندروم بازماندگان

That's classic survivor guilt, otherwise known as survivor syndrome, which is a mental condition making a person feel they have somehow done wrong by surviving traumatic, events such as combat, natural disasters, or even a lay off in the work place.

dependency – syndrome/ di'pendensi 'sindrom/n

سندروم وابستگی، نشانگان وابستگی

The emergency paradigm may save lives in the short term, but it has several negative implications, particularly for protracted humanitarian crisis. Emergency relief is most often criticized for its tendency to create a dependency – syndrome among its recipients.

malnutrition/malnyoo'trishen/n

سوء تغذیه، بدی تغذیه

Food shortages and crop destruction after heavy floods may increase the prevalence of malnutrition in some populations: thereby increasing the host susceptibility to disease. Though malnutrition is usually based on a chronic food shortage, acute disaster – induced food shortages may trigger serious malnutrition in an otherwise nutritionally marginal population, thus increasing susceptibility of the population to disease and high mortality rates.

emergencies/i'merjensiz/ n

سوانح، مواقع اضطراری

trilateral / trây'laterâl /adj

سه جانبه

The delegation noted the Trilateral Joint Announcement on Disaster Management Cooperation between Japan, China and the Republic of Korea.

input/'input/n

سه‌م، کمک، مشارکت

Disaster risk management requires specialist input and support due to hazardous conditions which may prompt loss and understanding of vulnerable factors that increase the severity of the impact. Thus our programming is facilitated by experienced staff and volunteers in consultation with government, local authorities and communities. Disaster risk management is thus carried out to lessen the impact of the disaster.

Interventionism / inter'venshenizm / n

سیاست مداخله‌گری، مداخله جویی

National policies/nashnâl 'pâlisiz/n

سیاست‌های ملی، خط‌مشی‌های ملی

The Hyogo Declaration affirmed that states have the primary responsibility to protect the people and property on their territory from hazard, and highlighted the necessity of giving high priority to disaster risk reduction in national policy, consistent with their capacities and the resources available to them.

cyclone/'sâyklon / n-In meteorology, a cyclone is an area of closed, circular fluid motion rotating in the same direction as the Earth. This is usually characterized by inward spialing winds that rotate anti-clockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere of the Earth. Most large-scale cyclonic circulations are centered on areas of low atmospheric pressure. The largest low-pressure systems are cold-core polar cyclones and extratropical cyclones which lie on the synoptic scale.

Devastating cyclones hit the coastal areas of Bangladesh almost every year accompanied by high – speed winds, sometimes reaching 250 km/hr or more and 3-10 m high waves, causing extensive damage to life property and livestock.

Inundation /inân'deyshen/n

Japan has attmepd to minimize the inundation area by construction of tsunami seawalls (often more than 10 m high) along the shoreline.

flood/flâd/n

A flood is an overflow of water that submerges land which is usually dry. The European Union (EU) Floods Directive defines a flood as a covering by water of land not normally covered by water. In the sense of "flowing water", the word may also be applied to the inflow of the tide. Flooding may occur as an overflow of water from water bodies, such as a river or lake , in which the water overtops or breaks levees, resulting in some of that water escaping its usual boundaries, or it may occur due to an accumulation of rainwater on saturated ground in an areal flood.

torrent /'târent/ n

torrential /'târenshâl /adj

Torrential monsoonal rain across southern Pakistan has killed nearly 200 people and wiped out a million homes, many in villages that were still recovering from last year's devastating nation wide floods.

سیل گرفتگی، آب گرفتگی، سیل آب گرفتگی

سیل، تندآب

سیلاب، رگبار، سیل مانند

سیلابی، سیل آسا

# ش

vulnerability index/vâlnere'biliti 'indeks/n

A vulnerability index is a measure of the exposure of a population to some hazard. Typically, the index is a composite of multiple quantitative indicators that via some formula, delivers a single numerical result. Through such an index “diverse issues can be combined into a standardized framework...making comparisons possible”. For instance, indicators from the physical sciences can be combined with social, medical and even psychological variables to evaluate potential complications for disaster planning.

شاخص آسیب پذیری

underlie/ânder'lây/vt

In recent years, we have recognized that preparing for and coping with disasters is essential but not sufficient. With more than 200 million people affected every year, disaster losses continue to rise with grave consequences for the survival, livelihood and dignity of people, especially the poor. Of course, not all disasters can be prevented but their impact - and the risks that underlie them - can be reduced.

شالوده (چیزی را) تشکیل دادن، علت اصلی (چیزی) بودن، در زیر (چیزی) قرار گرفتن

encompass /in'kâmpas /vt

A disaster can encompass a more general period in which there is a clear and marked deterioration in the coping abilities of a group or community. Unusual initiatives by groups, communities and external intervention are also evident during this period.

شامل (چیزی) بودن، در بر گرفتن، احاطه کردن

inclusive/ in'kloosive/adj

Through promoting the socio-economic and cultural inclusion, as well as the political recognition of marginalised people, this paper provides examples of where their participation as active agents of change has proven beneficial for achieving effective and equitable resilience. This evidence will support recommendations for the inclusion and empowerment of vulnerable groups within the post-2015 framework for DRR.

شامل، گنجیده، کلی، لغایت، تا پایان

dignify/'dignifây/vt

rampant/'rampant/adj

Natural disasters were rampant in 2013, causing wide spread damage, chaos and impacting millions of lives. In a report from CBC News, German insurance company Munich Re, said that there were about 880

شان و اعتبار بخشیدن، بزرگ کردن، شکوه بخشیدن

شایع

major natural disasters around the world in 2013. According to the insurance company 20,000 people's lives came to a tragic end, which was more than double that of 2012, and with an estimated cost of \$125 billion dollars in damage — both figures were still lower than the average for the past decade. On the average in the past decade, 106,000 human lives were lost per year due to hurricanes, typhoons, earthquakes and other natural disasters. Summer hailstorms in Germany, floods in Central Europe and multiple severe storms in the United States were the costliest disasters of 2013. "Floods and hailstorms caused double-digit billion-dollar losses in central Europe, and in the Philippines one of the strongest cyclones in history, Super Typhoon Haiyan, resulted in a human catastrophe with over 6,000 fatalities," said Munich Re, as cited by Phys.org. The typhoon also caused \$10 billion in damage as it surged across the Philippines.

knowledge networking/nâlij netwerking/n

شبکه دانش

Knowledge networking is an effective way of combining individuals' knowledge and skills in the pursuit of personal and organizational objectives. Knowledge networking is not easy to define or describe. It is a rich and dynamic phenomenon in which knowledge is shared, developed and evolved.

cultivate/ 'kâltiveyt/ vt

شخم زدن، آماده کردن، زراعت کردن در [زمین]

severity/si'veriti/ n

شدت، سختی، سختگیری

Disasters often follow natural hazards. A disaster's severity depends on how much impact a hazard has on society and the environment. The scale of the impact in turn depends on the choices we make for our lives and for our environment. These choices relate to how we grow our food, where and how we build our homes, what kind of government we have, how our financial system works and even what we teach in schools. Each decision and action makes us more vulnerable to disasters - or more resilient to them.

acute / a'kyoot/adj

شدید، بحرانی، وخیم، مبرم

deeply moved/diipli moovd/adj

شدیدا تحت تاثیر قرار گرفته

"I am deeply moved by this tragedy and express my condolences to the town of Minami-Sanriku. I hope Mr. Sato will be able to share the town's recovery and rebuilding experiences with UNISDR as it will be useful for other disaster prone municipalities and local governments around the world. It will help inform our ongoing World Disaster Risk Reduction Campaign which is focused on making cities resilient," said Wahlström who plans to visit the town again to observe its progress in building back better.

stringently /'strinjentli/adv

شدیدا، با شدت، با جدیت، مجدانه

The higher costs of meeting stringent objectives for critical facilities, such as hospitals, emergency-

dispatch centers, and interstate freeway can be justified within the performance

critical situation/ kritikâl sichu'weyshen/ n

Poverty during normal times or in response to critical situations can also lead to undesirable livelihood practices that magnify hazard level or generate new hazard.

modality/mo'daliti/n

Decides to further study the modalities for strengthening regionally coordinated disaster information management and early warning, including the viability of establishing a regional center for information, communication and space technology – enabled disaster management.

brief account/brief e'kaont/n

The chairperson invited the speakers whose names were included on the list to give a brief account of the activities of the organizations they represented before engaging in a dialogue with members of the committee.

elaboration/ ilabo'reyshen/ n

Disaster management enhances the efficiency of business by elaborating all the technical requirements, especially IT, for business continuity and disaster recovery.

participate / pârtisi'peyt/ vi

participant / pârtisipent/ n

commence /kâ'mense/ vt, vi

inception/in'seption/n

Pakistan Red Crescent (PRC) has responded to disasters since its inception in 1947. In 2002 Disaster Management (DM) became a number one priority area of PRCS, leading to the establishment of the Disaster Management Department. The DM system was established at all levels of PRCS from 2005 to 2008, and during 2009-2010 further extended to 40 most vulnerable districts by establishing Disaster Management Cells.

commencement/ kâ'mensment / n

Based on the final report on an emergency operation, the National Disaster, Management Office will commence rehabilitation consultation with relevant agencies and compile a report to be presented to the National Disaster Management Council within 3 months.

lifelines / lâyflâynz/ n

Lifelines include transportation systems (bridges, high ways, railroads, airport), water and sewerage, electric,

municipality/myoonisi'paliti/n

The district municipality must establish in its administration a disaster management centre for its municipal area in consultation with the local municipalities within its area, and may operate such centre in partnership with those local municipalities.

شورای امنیت

شهرداری

urbanism/'erbenizem/n

urban/'erben/adj

urbanized/'erbenâyzd/adj

New urbanism development projects are going into high risks locations around the country, including flood prone areas. Berke and a group of colleagues designed a study to determine if such projects performed better with regard to hazard mitigation than the conventional sprawl development. The study involved comparing new urbanism and conventional development projects in flood hazardous areas across the country having similar characteristics, such as age, size, and number of dwelling units.

شهرنشینی، زندگی شهری، توسعه شهری، شهرسازی

شهری

شهری شده، به شهر تبدیل شده، شهر نشین

municipal/myoo'nisipâl/adj

steep slope/ stiip slop/ adj

A landslide is the movement of a large mass of rocks, mud or earth down the side of a mountain, cliff or steep slope.

شهری، داخلی

شیب‌دار، با شیب تند

escape ramp/is'keyp ramp/n

In steep mountainous areas, the brakes on large heavily loaded vehicles can become overheated and then fail to work on long downhill runs. The ramp is usually located on a curve of the downhill road. The road curves right or left and the ramp continues

شیب‌راهه خروج اضطراری

straight and up a steep hill. The ramp is an excavated trench filled with loose, round, smooth river rock. When the runaway truck enters the ramp, the effect is the same as when you try to walk through deep snow or in deep water in a swimming pool, substantial yet gradual resistance. This brings the truck to a safe halt with no assistance from the brakes.

fire hydrant /fâyer hâydrent/n

The National standard for the body colors of the hydrants is a chrome yellow; however, silver is still recognized as a standard color. Therefore, municipal hydrant body color will continue to be silver. The tops or caps of the hydrants are going to change and will be painted according to flow on the hydrant at 20 pounds per square inch of pressure (psi).

NFPA recommends that the bodies of municipal hydrants, private hydrants, and non-potable hydrants be distinctively color coded. The NFPA standard calls for private hydrants to be red. The most important thing in consistency in our approach so the Fire Department knows what the capacity of each fire hydrant is and whether the capacity of each hydrant is and whether it belongs to the municipality or not.

prevalence /prevelens/n

شیر آتش نشانی، فلکه آب آتش نشانی

Management of the dead is one of the most difficult aspects of disaster response. It has profound and long – lasting consequences for survivors and communities. Globally, disasters claim thousands of lives each year. However, care the deceased is often overlooked in highlighted following several large disasters.

theme topic/thiim'tâpik/n

عنوان اصلی، مضمون اصلی

The four symposium theme topics were hazards and disasters, global change natural resources, and technology and infrastructure.

exogenous factors/'eksojiines/n

عوامل بیرونی، عوامل برون‌زا، عوامل غیرذاتی

To establish a relevant correlation between poverty and hazards, one must take out the exogenous factors associated with hazard loss.

drawback/ 'drobak/n

However, there are two drawbacks to using telephones for disaster warning. Telephone penetration in many areas is still not satisfactory – particularly in rural and coastal areas most at risk. Even with the exponential increase in the number of phones that has occurred in recent years, there are still many regions in the Asia-Pacific region, where a telephone is considered a luxury. The other drawback is the congestion of phone lines that usually occurs immediately before and during a disaster, resulting in many phone calls in that vital period that cannot be completed.

عیب، ایراد، اشکال، نقطه ضعف

pitfall/'pitfol/n

Knowledge based on systematically collected data from field disaster research studies might help planners avoid common disaster management pitfalls, thereby improving disaster response planning.

عیب، ایراد، اشکال، نقطه ضعف

# غ

haze / heyz /n

غبار

hayz / 'heyzi /adj

غبارآلود

Haze is traditionally an atmospheric phenomenon where dust, smoke and other dry particles obscure the clarity of the sky. The World Meteorological Organization manual of codes includes a classification of horizontal obscuration into categories of fog, icefog, steamfog, mist, haze, smoke, volcanic ash, sand and snow. Sources of haze particles include farming (ploughing in dry weather), traffic, industry and wildfires.

haze / heyz /vi,vt

غبارآلود شدن، غبارآلود کردن

tragicomic/ 'traji'kâmik/ adj

غم انگیز و درعین حال خنده‌دار، تراژی کمیک

This earthquake is a tragic reminder of the need to concurrently ensure good infrastructure, policy foresight, and functional institutions for disaster preparedness. In Kathmandu's case, unstable geological conditions, together with high density and substandard building stock, create a dangerous environment. According to Demographia Kathmandu is the world's 33rd densest city out of over 1,000 studied, unsurpassed by any Western city.

cross- fertilize/ krâs'fertilâyz/vt

غنی کردن، بارور کردن، بهره‌مند کردن

cross – fertilization/ krâs fertilây'zeyshen/ n

غنی، بارور، بهره‌مند

Previous International Disaster and Emergency Readiness, IDER conferences have shown what an immense benefit can be gained from cross – fertilization of experiences and procedures from around the world. Robotics, for instance, that are used in the nuclear industry to detect contamination can be adapted to search for survivors after a building collapse or in the devastation caused by earthquakes.

anomalous/e'nâmeles/adj

غیرعادی، نابهنجار، نامنظم، بی‌قاعده

anomaly/e'nâmeli/n

بی‌قاعدگی، بی‌نظمی، نابهنجاری

Appearance of anomalies in the atmosphere before earthquakes (EQs) has been verified, through observation of anomalous transmission of VHE electromagnetic (EM) waves beyond line-of-sight.

decentralized/dii'sentrâlâyzd/adj

غیرمتمرکز

Development and use of a web-site linking DRM program implementation partners (National and State

Governments, UNDP, etc) to share activities, approaches, methods to mainstream disaster management, gender, decentralization etc.

# ف

disastrous/ di'zâstres/ adj

فاجعه آمیز، مصیبت بار، فجیع

calamity/ka'lamiti/n

فاجعه، بلا، مصیبت

Other calamities such as, floods, earthquakes, wildfires, highwinds, and sandslides are high on the list of sources of deaths, destruction and economic losses in the region.

catastrophe/ ke'tastrefi/ n

فاجعه، مصیبت، بلا، سانحه

catastrophic/ kates'trafik/adj

فاجعه آمیز، اسفبار، مصیبت بار، فجیع

The Mass Evacuee Support planning initiative focuses on developing strategies and guidelines for support of disaster victims through development of planning guidance and a Host – State Evacuee, Support Plan template. These planning efforts will enhance operational effectiveness to provide recovery assistance to individuals and households, as well as public assistance to State and local governments in the event of an extraordinary or catastrophic disaster.

planning phase/ 'planning feyz/ n

فاز برنامه ریزی، مرحله برنامه ریزی، دوره برنامه ریزی

The purpose of project planning phase is: establish business requirements; establish cost, schedule, list of deliverables and delivery dates; establish resource plan and get management approval; proceed to next phases.

sewage/ 'syoo- ij/ n

فاضلاب

surmount / ser'maont/ vt

فائق آمدن، غلبه کردن، پشت سر گذاشتن

enormities/ i'normitiz/ n

فجایع

calamitous/ka'lamits/adj

فجیع، اسفبار، مصیبت بار

overarching / over'arching / adj

فراگیر، گسترده، دامنه دار

Much has been done in Ethiopia over the past thirty five years to shift from disaster response towards an all-inclusive disaster risk management approach. The recently adopted policy sets out the necessary steps to build overarching disaster risk management architecture in the country.

ubiquitous/ yoo'bikwites/ adj

فراگیر، متداول، رایج، فراوان

ubiquity/ yoo'bikwiti/ n

فراگیری، همه جاگیری، رواج، شیوع، وفور

Universal, ubiauitous, equitable and affordable access to ICT infrastructure and services, constitutes one of

the challenges of the Information Society and should be an objective of all stakeholders involved in building it.

transboundary/trans'baondri/ n

The ASEAN Ministers for the Environment agreed to harmonize policy directions and set up operational and technical cooperation on environment matters such as transboundary air and water pollution, natural disasters, forest fires, oil spills, and the transboundary movements and disposal of toxic chemicals and hazardous wastes, and undertake joint actions to address the anti – tropical timber campaign; and undertak to develop and implement specific programmes relating to haze caused by forest fiers, air and water quality management and protection of marine environment in ASEAN areas.

فرامرزی

ample/ 'ampel/ adj

Animal brought to a pet shelter are required to have proper identification collar and rabies tag, proper identification on all belongings, a carrier or cage, a leash, an ample supply of food, water and food bowls, any necessary medications, specific care instructions and newspapers or trash bags for clean up.

فراوان، زیاد، کافی، به اندازه

desertification/de'zertifikeyshen /n

Desertification is the degradation of land in drylands. Caused by a variety of factors, such as climate change and human activities, desertification is one of the most significant global environmental problems.

فرایند بیابان‌زایی، بیابان‌سازی، لوت‌سازی، بیابانی شدن

credibility gap/ kredi'biliti gap/ n

Governor- General/gâverner 'jenerâl/n

It is demonstrated that only if a country's governance structure enables the implementation and enforcement of public policies conducive to a country's economic and social development can sustainable livelihoods be achieved and susceptibility to disasters be reduced. Accountability, participation, predictability and transparency are identified as the key features of a

فرق بین حرف و عمل، فرق بین گفتار و کردار، بدبینی اجتماعی

فرماندار کل

governance structure that fosters development and supports risk reduction

governor/'gâverner/n

فرماندار، استاندار، حاکم، عضو هیات ریسه

incident commander/'insident kâ'mânder/n

فرمانده حادثه

The incident commander is the person responsible for all aspects of an emergency response; including quickly developing incident objectives, managing all incident operations, application of resources as well as responsibility for all persons involved. The incident commander sets priorities and defines the organization of the incident response teams and the overall incident action plan. The role of incident commander may be assumed by senior or higher qualified officers upon their arrival or as the situation dictates. Even if subordinate positions are not assigned, the incident commander position will always be designated or assumed. The incident commander may, at their own discretion, assign individuals, who may be from the same agency or from assisting agencies, to subordinate or specific positions for the duration of the emergency.

subduction / sâb'dakshen/ n

فرو رانش

By studying core samples from submarine channels in various locations along the subduction zones, scientists have been able to create a 10,000 year timeline of huge earthquakes that provide sobering evidence that the Northwest is due for a major event.

suppressant / sâpresent /n

فرو نشاننده، بازدارنده

suppressible / sâ'presible /adj

فروکش کننده، تشفی پذیر

digital culture/dijitâl kâlcher/n

فرهنگ دیجیتالی

Examining Paratextual Theory and its Applications in Digital Culture suggests a theoretical and practical tool for building bridges between disciplines interested in conducting joint research and exploration of digital culture. Helping scholars from different fields find an interdisciplinary framework and common language to study digital objects, this book serves as a useful reference for academics, librarians, professionals, researchers, and students, offering a collaborative outlook and perspective.

acculturation/ a'kâlchereyshen/ n

فرهنگ پذیری

An interpreter's behavior may evoke certain feelings in the disasters survivor. Factors such as interpreter's gender, age, or level of acculturation may affect the survivor's willingness to speak openly.

cumulative/'kyoomyuletiv/adj

فزاینده، افزاینده

pore pressure/ por 'preshen/n

فشار منفذی

The pressure of fluids within the pores of a reservoir, usually hydrostatic pressure, or the pressure exerted by a column of water from the formation's depth to sea level. When impermeable rocks such as shales form as

sediments are compacted, their pore fluids cannot always escape and must then support the total overlying rock column, leading to anomalously high formation pressures.

articulateness/ ârtikyu litnis/ n

فصاحت، زبان آوری، قدرت بیان

articulate/ âr'tikyulit/ adj

فصیح، واضح، رسا، زبان آور، دارای قدرت بیان، روشن

urban settings / erban setingz / n

فضاهای شهری، محیط‌های شهری

The death toll from the May 12 magnitude 7.9 Sichuan province earthquakes in China may exceed 50000 based on previous similar earthquakes in urban settings.

impoverishment/im'pâverishment/n

فقر، تنگدستی

Children are extremely vulnerable when it comes to the impacts of disasters-whether physically less protected from death, disability and injury, left orphaned, at risk due to impoverishment, or their education irrevocably disrupted.

proverty / 'pâverti/ n

فقر، تنگدستی

impoverished/im'pâverisht/adj

فقیر، فقرزده، بی‌مایه، ضعیف

cultivation/ kâlti'veyshen / n

کاشته، زیرکشت، زراعی، مزروعی

sound /sound /adj

کامل، بی‌عیب، سالم، منطقی، معقول، مطمئن، درست

The International Center of Emergency Techniques (ICET) is committed to promote sound strategies for risk, crisis and disaster management.

hypo-center/ hâypo'senter/ n

کانون، کانون زلزله، مرکز درونی زمین لرزه، میانگاه زمین لرزه

An earthquake's hypo-center is the position where the strain energy stored in the rock is first released, and is the point where the fault begins to rupture. This occurs at the focal depth below the epicenter.

focal point / 'fokâl point / n

کانون، هسته مرکزی، مرجع

The focal point is the key agency that has the authority and resources to coordinate all related bodies for disaster management such as ministries, international donor agencies, NGOs and the private sector.

disaster risk reduction/di'zâster risk ri'dâkshen/n

کاهش خطرپذیری سوانح، کاهش خطرپذیری از بلایا

Disaster risk reduction (DRR) is a systematic approach to identifying, assessing and reducing the risks of disaster. It aims to reduce socio-economic vulnerabilities to disaster as well as dealing with the environmental and other hazards that trigger them: Heddre it has been strongly influenced by the mass of research on vulnerability that has appeared in print since the mid-1970s.[1] It is the responsibility of development and relief agencies alike. It should be an integral part of the way such organizations do their work, not an add-on or one-off action. DRR is very wide-ranging: Its scope is much broader and deeper than conventional emergency management. There is potential for DRR initiatives in just about every sector of development and humanitarian work.

disaster mitigation/ di'zâster miti'geyshen/n

کاهش سوانح، کاهش بلایا

Disaster mitigation measures may be structural (e.g. flood dikes) or non-structural (e.g. land use zoning). Mitigation activities should incorporate the measurement and assessment of the evolving risk

environment. Activities may include the creation of comprehensive, pro-active tools that help decide where to focus funding and efforts in risk reduction.

Other examples of mitigation measures include:

- Hazard mapping
- Adoption and enforcement of land use and zoning practices
- Implementing and enforcing building codes
- Flood plain mapping
- Reinforced tornado safe rooms
- Burying of electrical cables to prevent ice build-up
- Raising of homes in flood-prone areas
- Disaster mitigation public awareness programs
- Insurance programs

abate/ e'beyt / vi, vt

abatement/e'beytment / n

The Ministry of Environment administers the Environment Conservation Act, numerous surveillance and abatement programs designed to maintain acceptable standards.

کاهش یافتن، کاستن، خاتمه یافتن، برطرف کردن، کاهش، جلوگیری

diminished/di'minish/adj

mitigating / mitigeying / n

alleviation/ aliivi'yeysen / n

The Comprehensive Disaster Management Programme (CDMP) is a five year initiative from January, 2010 to December, 2014, with the overall aim of contributing to poverty alleviation in Bangladesh through disaster risk reduction.

کاهش یافته، نقصان یافته، کم شده

کاهش، تخفیف، تسکین، تعدیل

کاهش، تخفیف، تسکین، وسیله تخفیف، مایه تسکین

mitigation/ miti'geysen/n

Mitigating means planning, programming, setting policies, coordinating, facilitating, raising awareness, assisting and strengthening. If structural measures are the bones of a flood management programme, then mitigation is its flesh.

کاهش، تخفیف، تعدیل

depletion /di'pliishen /n

Environmental impacts, which may include the depletion or discovery of natural resources, changes in ambient concentrations of pollutants and deteriorating or improving living conditions in human settlements, can thus be either harmful or beneficial.

کاهش، نقصان

fire extinguisher/fâyer ikstingwisher/n

Fire extinguishers have been in use by Police and Fire Departments, warehouses and factories and home owners all over the country. These professional grade fire extinguishers are designed to deal with auto, kitchen, or trash and spot fires quickly and safely.

کپسول آتش‌نشانی

crustal strain/krâstâl streyn/n

How the solid Earth responds to deformational forces is a topic of considerable uncertainty. The inside of

گرنش پوسته‌ای

Earth is physically and chemically heterogeneous, and its ability to carry and transmit stress varies widely depending on composition, mineralogy, pressure, temperature, deformation history, and the presence or absence of fluids. Variations in these properties determine where the crust will deform broadly and slowly or, alternatively, break locally and rapidly in a damaging earthquake.

globular/ 'glâbyulâr/adj

کروی، گوی مانند، گرد

In this report we assess the global risks of two disaster – related outcomes: mortality and economic losses. We estimate risk levels by combining hazard exposure with historical vulnerability for two indicators of elements at risk – gridded population and Gross Domestic product (GDP) per unit area – for six major natural hazards: earthquakes, volcanoes, landslides, floods, drought, and cyclones.

cultivator/ 'kâltiveyter / n

کشت، زراعت، کشت و کار، کشت کاری، کشاورز، (ماشین) علف چین

The communities face many natural hazards but the major ones are drought and floods. These invariably cause famine, food insecurity and poverty. However, the communities have devised a variety of measures such as growing drought – resistant and early-maturing indigenous crop varieties, gathering wild fruits and vegetables, wetlands cultivation, livestock diversifying and splitting, that have enabled them to survive climate hazards with little or no support from the outside world.

developed countries/di'velopt 'kantriz/n

کشورهای توسعه یافته

A developed country disaster relief fund is a public fund that is established and maintained by a registered public benevolent institution. The fund's sole purpose must be providing money for the relief of people in a developed country (other than Australia) who are in distress as a result of a disaster officially recognised by the Treasurer. The relief may be by way of assistance to re-establish a community.

developing countries/ di'veloping 'kântriz / n

کشورهای در حال توسعه

Developing countries suffer the greatest costs when a disaster hits – more than 95 percent of all deaths caused by disasters occur in developing countries, and losses due to natural disasters are 20 times greater (as a percentage of GDP) in developing countries than in industrialized countries.

least developed countries/ liist di'velopt 'kântriz / n

کشورهای کم‌تر توسعه یافته

The Least Developed Countries (LDCs) constitute a special category of countries that are characterized by extreme poverty, weak economies, inadequate institutional and human resources and are often vulnerable to natural disasters.

## کشورهای محصور در خشکی

land – locked countries/ land lâkt 'kântriz/n

A landlocked country is a country entirely enclosed by land, or whose only coastlines lie on closed seas. There are 48 landlocked countries in the world, including partially recognized states. No landlocked countries are found on the continents of North America, Australia and Antarctica. The general economic and other disadvantages experienced by landlocked countries make the majority of these countries Landlocked Developing Countries (LLDCs). Nine of the twelve countries with the lowest HDI, Human Development Index, scores are landlocked.

adequacy/'adikwisi/n

adequate/'adikwit/adj

adequately/'adikwitli/adv

Emergency response and management must explicitly target women as well as men in all areas of support, based on the recognition that women's involvement is essential to adequate recovery and potential for sustainable development and reduction of natural disasters.

کفایت، شایستگی، بسندگی، تکافو  
مناسب، کافی، شایسته، به اندازه کافی  
به اندازه کافی، به شایستگی، به طور شایسته

holistic/ ho'listik/ adj

Promote and support dialogue with the aim of fostering a holistic approach towards disaster risk reduction.

کل نگر، کل نگرانه

holism/ 'holizem/ n

megacity/'mega'siti/ n

A megacity is usually defined as a metropolitan area with a total population in excess of ten million people. In the recent years, the Earthquakes and Megacities Initiative, EMI, has under taken concrete actions to address disaster risk management in megacities and other complex urban centers.

کل نگری

کلان شهر

trivialization/ triviya'lây'zeyshen / n

trivialize/ 'triviya'lây / vt

Traslating the Hyogo Framework for Action, HFA, into a strategy that fits the conditions in each country and giving it the necessary legislative and political support is not trival.

کم اهمیت جلوه دادن، کوچک شماری  
کم اهمیت جلوه دادن، کوچک نشان دادن

minimal/'minimâl/adj

alleviate/ a'liiviyeyt / vt

scant/ skant/ adj/ vt

scanty /'skanti/ adj

Major reviews investigating poverty dynamics have noticed the scant evidence in this respect mainly due to the absence of hazard information in standard household survey.

کم ترین، حداقل  
کم کردن، کاستن از، تسکین دادن، آرام کردن  
کم، مختصر، ناکافی، ناقص، کم کردن، محدود کردن  
کم، ناکافی، نه چندان زیاد

prohibitive/pro'hibitivē/adj

کمرشکن، باز دارنده، منع کننده {قیمت}

invoke/in'vok/ vt

کمک خواستن، استناد کردن به، متوسل شدن به

If the pollution incident is of a nature which should be dealt with by an agency other than the Ministry of Environment, or through the invocation of a contingency plan other than this plan, the appropriate agency will be notified as soon as possible.

contribute/kân'tribyoot/vt,vi

کمک کردن، ارایه کردن، موثر بودن، تاثیر گذاشتن

کمیت پذیر، قابل اندازه گیری، چندی پذیر

quantifier/'kwântifâyer/n

کمیت نما، چندی نما

quantification/'kwântifi'keyshen/n

کمیت نمایی، چندی نمایی

steering committee/'stiyering kâmiti/n

کمیته راهبری

The Steering Committee on Risk Prevention and Management will work under the comprehensive umbrella of Future Earth. Within Future Earth's fundamental questions there is to identify the opportunities to reduce risks and vulnerabilities. A focus on vulnerability and resilience within Dynamic Planet Future Earth theme is an excellent opportunity for the disaster risk reduction research community to come together with global environmental change researchers - especially those who focus on forecasting extreme events and anticipating thresholds with those who work on vulnerability and adaptation.

committee /kâ'miti /n

Where hazardous materials affect or may affect the health and welfare of citizens or the environment of neighboring countries, these undertakings or commitments should also be reflected in the contingency plan.

کمیته، کمیسیون، هیات بررسی

quantify/'kwântifây/vt

An increasing number of countries are taking steps at national to local levels to reduce risks associated with natural hazards. Among issues hampering these efforts is a lack of data concerning a country's past climate to quantify hazard characteristics (e.g., frequency, severity and location) of local climatic extremes in the future.

کمی کردن، با عدد نشان دادن

frontage road/'frântij 'rod/n

A frontage road (also access road, service road, parallel road, etc.) is a local road running parallel to a higher-speed, limited-access road. A frontage road is often used to provide access to private driveways, shops, houses, industries or farms. Where parallel high-speed roads are provided as part of a major highway, these are also known as local-express lanes. Frontage roads provide access to homes and businesses which would be cut off by a limited-access road and connect these locations with roads which have direct access to the main roadway. Frontage roads give indirect access to abutting property along a freeway, either preventing the commercial disruption of an urban area that the freeway traverses or allowing commercial development of abutting property.

کنار گذر، راه جانبی

consortium/kân'sortiyem/n

The objective of this consortium is to support the development of national components of the Indian Ocean Tsunami Warning and Mitigation System (IOTWS) in ten countries in the region.

کنسرسیوم، ائتلاف کوتاه مدت چند شرکت یا بانک

emergency kit/i'merjensi kit/n

Support will be provided to the district administration for having an emergency kit with some essential equipment like a boat, portable power generator set, early warning equipment, tents, power saw.. etc to meet the emergency need at the time of natural disasters like cyclones or floods or earthquakes.

poison gas/ 'poyzen gas/n

stride/strayd/n,vi

Although the HFA has substantively contributed to strengthened global attention on disaster risk reduction(DRR), its goals and priorities for action are far from being achieved. USAID's DRR agenda has made significant strides, but given current and future realities, increased attention and resources are needed to reduce global disaster losses and protect development investments.

transition /'tran'zishen /n

While efforts to further strengthen the NATIONAL DISASTER

MANAGEMENT SYSTEM (NDRMS) preparation and response capacities continue, there is a greater need to focus on protecting investments as well as livelihoods in order to transition from a 'living at risk' to 'living with risk' approach.

Tendency/ 'tendenci/n

When it comes to environmental emergencies, many disaster plans tend to be silent on the topic of environmental aspects of emergencies.

garner/'gârner /vt

Children's Administration emergency management planning is a reflection of the garnering and mobilization of support agencies and resources which can help connect families to communities and services during a disaster.

typhoon/ tâyfoon/ n

A typhoon is a mature tropical cyclone that develops in the northwestern part of the Pacific Ocean between 180° and 100° E. This region is referred to as the northwest Pacific basin. The northern Pacific Ocean is divided into three regions: the eastern (North America to 140°w), central (140°w to 180°), and western (180° to 100° E). Identical phenomena in the eastern north Pacific are called hurricanes, with tropical cyclones moving into the western Pacific re-designated as Typhoons.

encrustation/ inkrâs'teyshen/ n

In addition, the geographical distribution of poverty and hazards estimates can be overlaid with geo-referenced data on important community information related with local infrastructure (roads, electricity and telecommunications), health and education facilities and the travel distance to them.

لایه، پوست، قشر

لایه، پوشش

seismograph/'sâymogrâf/n

A seismograph, or seismometer, is an instrument used to detect and record earthquakes. Generally, it consists of a mass attached to a fixed base. During an earthquake, the base moves and the mass does not. The motion of the base with respect to the mass is commonly transformed into an electrical voltage. The electrical voltage is recorded on paper, magnetic tape, or another recording medium. This record is proportional to the motion of the seismometer mass relative to the earth, but it can be mathematically converted to a record of the absolute motion of the ground. Seismograph generally refers to the seismometer and its recording device as a single unit.

لرزه نگاشت، لرزه نگار، زلزله نگار

tremor-prone/'tremor pron/n

All important buildings in Japan, one of the most termor – prone countries in the world, are retrofitted, a modification technique of existing structures to make them more resistant to seismic activity, ground motion or soil failure due to the earthquake.

لرزه پذیر

ocean bottom seismometer/'oshen bâtem sâymâ'mittter/n

Ocean Bottom Seismometer (OBS) is a seismometer that is designed to record the earth motion under oceans and lakes from man-made sources. Sensors at the sea floor are used to observe acoustic and seismic events. Seismic and acoustic signals may be caused by different sources, by earthquakes and tremors as well as artificial sources.

addressee/adre'sii/n

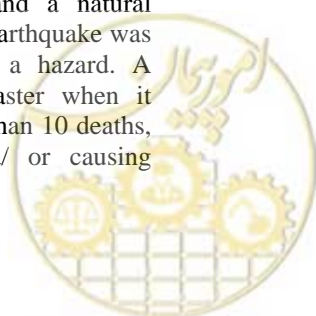

مخاطب، {نامه} گیرنده

The disaster mitigation works mainly address the followings; (i) minimize the potential risks by developing disaster early warning strategies, (ii) prepare and implement developmental plans to provide resilience to such disasters, (iii) mobilize resources including communication and tele-medicinal services and (iv) to help in rehabilitation and post-disaster reduction.

natural hazards / nachrâl'hazardz/n

مخاطرات طبیعی، حوادث طبیعی

A natural hazard is a threat of a naturally occurring event that will have a negative effect on people or the environment. Many natural hazards are interrelated, e.g. earthquake can cause tsunamis and drought can lead directly to famine. A concrete example of the deviation between a natural hazard and a natural disaster is that the 1906 San Francisco earthquake was a disaster, where as earthquakes are a hazard. A natural hazard become a natural disaster when it affects people, officially causing more than 10 deaths, injuring more than 100 people, and/ or causing \$16,000,000 of damage.

hazard /'hæzəd/n, vt

hazardous/'hæzədəs/ adj

A hazard is a situation which poses a level of threat to life, health, property or environment.

مخاطره، در معرض خطر، خطر، اتفاق، به خطر انداختن  
پرمخاطره، مخاطره‌آمیز، خطرناک

technological hazards/ tekno'lâjîkâl 'hæzəd /n

A hazard originating from technological or industrial conditions, including accidents, dangerous procedures, infrastructure failures or specific human activities, that may cause loss of life, injury, illness or other health impacts, property damage, loss of livelihoods and services, social and economic disruption, or environmental damage.

Examples of technological hazards include industrial pollution, nuclear radiation, toxic wastes, dam failures, transport accidents, factory explosions, fires, and chemical spills. Technological hazards also may arise directly as a result of the impacts of a natural hazard event.

مدولی، واحدی، قطعه‌ای، بخش بخش

management of dead bodies/'manijment av ded 'bâdiz/n

مدیریت اجساد

In disaster situations, the State and its authorities are responsible not only for being prepared to effectively provide immediate assistance to disaster victims and to maintain basic services following an event. It is also the State's responsibility to attend to the handling and final disposal of dead bodies resulting from the disaster, regardless of their numbers. The management of dead bodies involves a series of activities that begin with the search for corps, in situ identification of the body, transfer to the facility that serves as a morgue, delivery of the body to family members, and assistance from the State for final disposal of the body in accordance to the wishes of the family and following the religious and cultural norms of the community.

corrective disaster risk management/kâ'rektiv di'zâster risk 'manijment/n

مدیریت اصلاحی خطرپذیری سوانح، مدیریت تعدیل کننده خطرپذیری بلایا

Management activities that address and seek to correct or reduce disaster risks which are already present. This concept aims to distinguish between the risks that already present, and which need to be managed and reduced now, and the prospective risks that may develop in future if risk reduction policies are not put in place.

crisis management/'krâysis 'manijment /n

مدیریت بحران

Crisis management is the application of strategies designed to help an organization deal with a sudden and significant negative event. A crisis can occur as a result of an unpredictable event or as an unforeseeable consequence of some event that had been considered a potential risk. In either case, crises almost invariably require that decisions be made quickly to limit damage to the organization. For that reason, one of the first actions in crisis management planning is to identify an individual to serve as crisis manager.

shelter management/'shelter manijment/n

مدیریت پناهگاه

Task forces will be provided specialized training focusing on their assigned tasks through specialists in the particular field to effectively carry out their responsibilities such as warning

dissemination(awareness generation), damage assessment, search and rescue operation, shelter management, first aid, trauma counseling etc.

Prospective disaster risk management /

prâs'pektiv di'zâster risk 'manijment/n

This concept focuses on addressing risks that may develop in future if risk reduction policies are not put in place, rather than on the risks that are already present and which can be managed and reduced now.

risk management/risk 'manijment/n

Risk management is the identification, assessment, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability and/or impact of unfortunate events or to maximize the realization of opportunities.

disaster management /di'zâster 'manijment /n

In any disaster management planning, the cost of repeatedly devoting public funds for relief and rehabilitation activities following disasters should be balanced against the cost of providing preparedness and mitigation measures before the event.

disaster reduction management / di'zâster ri'dâkshen 'manijment / n

Disaster reduction management is a cycle of activities that involves prevention, mitigation, preparedness, disaster impact, response, recovery, and development.

deliberations /dilibe'reyshenz/n

community knowledge centers/kâ'myooniti 'nâlij 'senterz/n

CKC is a new information center that aims to provide interested individuals and professionals working in the field of community development.

climatological/klây'metâ'lâjikâl/adj

pertaining/per'teyning/adj

In light of the interrelated and complex reality Small Island Developing States, SIDS, face, vis-à-vis disaster risk, the Featured Event aims to draw upon national and regional experiences through the perspectives of political leaders, experts and stakeholders in various aspects pertaining to the disaster risk reduction agenda for SIDS.

relevant/'relivent/adj

Small Island Developing States continue to “grapple with the effects of natural disasters, including those due to climate change, which impede progress towards sustainable development.”

consult/kãn'sãlt/vt,vi

مشورت کردن، مشاوره کردن، تبادل نظر کردن

consultation/kãn'sãl'teyshen/n

مشورت، مشاوره، تبادل نظر، جلسه مشاوره

consultative/kân'sâltetive/adj

UNISDR Europe is hiring a DRR Capacity Building Consultant who will support the implementation of the activities related to Task 1 of this intervention: "Enhance the regional institutional capacity and coordination with respect to disaster risk reduction and adaptation to climate change". Hence, consultant's task will be to offer recommendations for developing proposals for EWS development and regional DRR road-map.

مشورتی

deliberative /di'liberetiv/adj

The operation planning branch supports the full spectrum of disaster response and recovery operational and deliberate planning, ensuring continuity between long-range planning, and field element incident action planning.

مشورتی

tax incentive/'taks in'sentive/ n

At the macro level, early warning systems and social funds that can involve community – based initiatives seems particularly relevant, so as subsidies, debt or revenue recovery write – off as well as tax incentives for households or communities to adopt mitigation measures.

مشوق مالیاتی، انگیزه مالیاتی، محرک مالیاتی

incentive /in'sentiv /n

One aspect of the incentive structure, international provision of humanitarian aid after a disaster, is difficult to remove, given the humanitarian imperative to provide assistance. However, provision of reconstruction funding should be conditional on proper risk reduction planning – meaning that funding will only be provided for reconstruction programs designed to reduce future risk.

مشوق، محرک، انگیزه، شوق، اشتیاق، دلگرمی

expediency/ iks'piidyensi /n

مصلحت، مصلحت اندیشی

determined/di'termind/adj

مصمم، با اراده، قاطع، قاطعانه، مصممانه

resolute/'rezolot/adj

مصمم، ثابت قدم، با عزم راسخ، قاطعانه، قاطع

determinedly/di'termindli/adv

مصممانه، قاطعانه، باسرسختی

The preparation of a natural disaster management plan to mitigate the adverse impacts of climate change is hence extremely timely and indicates the commitment and determination of senior leaders in the government to deal resolutely with these critical challenges.

resolutely/'rezolootli/adv

مصممانه، قاطعانه، به طور جدی

Out of deep concern over the frequency and seriousness of its crises, Niger, like many other African countries, committed itself to resolutely develop and build its capacity to handle emergency situation through prevention and institutional capacity building, especially in its early warning systems.

prejudicial / preju'dishâl/ adj

مضر، زیان آور، زیانمند

Nothing in this plan shall prejudice existing or future international agreements, or affects the right and obligations of partners to this plan with respect to obligations they may have under the National Disaster Plan.

comply /kâm'play /vi

مطابق با، پیروی کردن، اطاعت کردن

The Ministry's role is to ensure that the discharger responds promptly, and complies with requirements for cleanup, disposal and the repair of damage to property and to environment.

as per/'az per/preposition

مطابق با، طبق، بنابر، برحسب

As per Article 3, the governments are obliged to ensure the equal right of men and women to the enjoyment of all economic, social and cultural rights set forth in the present convene.

put forward / put forward/ vt

مطرح کردن، پیشنهاد کردن

The Global Platform's reference to the role of the scientific community is both an implicit call for better and newer technology and a return to the origins of disaster reduction, which was put forward as a global challenge by the scientific community in the late 80s and led to the first World Conference on DRR in Yokohama in 1994.

broach/ broch/vt

مطرح کردن، عنوان کردن، در میان گذاشتن با

Its strategic role is enhanced by its well – developed focus on broaching disaster risk management.

secure/ si'kyur/ adj

مطمئن، مصون، ایمن، قطعی، حتمی

rationality/ rashe'naliti / n

معقول بودن، منطقی بودن، عقلانیت، خردمندی

denotation/ diino'teyshen /n

معنی، معنی صریح، نشانه، نماد، دلالت

benchmark/'benchmârk/n

معیار، ملاک

The Millennium Declaration and the Hyogo Framework for Action point towards the need for methods to identify urban vulnerability to disaster risk as a pre-cursor for the development of benchmarks with which to track policy progress for urban sustainability and risk reduction

delineate/ di'liniyet/ vt

معین کردن، تعیین کردن، تعریف کردن

determinate/ di'terminat/adj

معین، ثابت، قطعی، نهایی، مصمم

discrepancy/dis'krepensi/n-A discrepancy was identified between the goals of urban development and disaster management. The negative side of this discrepancy has been amplified by ineffective construction regulations and a lack of specificity with regard to ordinances on Dyke.

مغایرت، تضاد، اختلاف، تفاوت، فرق

word –for–word/ werd for 'werd/adj

مفصل، مطول، پر از لفاظی

word- splitting /'wɜrd splɪtɪŋ/n

When caught in the middle of a disaster, the last thing you need is a wordy, confusing, and vague booklet designed to 'help'.

concep/ kân'sept/ n

fruitful/'frootful/adj

fruitfully/'frootfuli/adv

dignitary/'digniteri/n

retrofit /ret'rofit/vt

retrofitter/ret'rofi'ter/n

sturdy/'sterdi /adj

A safe place could be under a sturdy table or desk or against an interior wall away from windows, bookcases or tall furniture that could fall on you.

retrofitting /ret'rofitɪŋ/n

Seismic retrofitting is the modification of existing structures to make them more resistant to seismic activity, ground motion or soil failure due to earthquake.

Preparatory to/ pri'pætri tu/ adv

Richter scale/rikter'skeɪl/n

The Richter scale, developed in the 1930s, is a base-10 logarithmic scale, which defines magnitude as the logarithm of the ratio of the amplitude of the seismic waves to an arbitrary, minor amplitude. An earthquake measuring 6.4 on Richter scale struck Claremore, Oklahoma on June 23, 1953.

pragmatics/prag'mætics/n

gauge/geɪj/n

One can also gauge the impact of hazards on income, or consumption poverty in cross-sectional data by linking predicted consumption levels to varying hazard scenarios.

incorporate/ in'kɔrpɔreɪt/vt, vi

oblige/ob'lâj/vt

constrain/kâns'treɪn/vt

obligated/'âbligeytɪd/adj

obliged/ob'lâjɪd/adj

Although Home Ministry has embarked on an initiative to mitigate consequences of natural disasters, through this mission for technology development, these premier technical institutions of the country shall strive to fulfill their societal obligation for disaster

مفهوم

مفید، سودمند، موثر، مثمر، موفقیتمیز  
به طور موثری، به نحو سودمندی

مقام عالی مرتبه

مقاوم کردن

مقاوم کننده

مقاوم، محکم، تنومند، خوش بنیه، قوی

مقاوم سازی

مقدماتی، تدارکاتی، به منظور آماده سازی

مقیاس ریشتر [زلزله]

ملاحظات عملی

ملاک، میزان، معیار، مقیاس، وسیله اندازه گیری

ملزم ساختن، مجبور کردن

ملزم کردن، مجبور کردن، تحت فشار قرار دادن

ملزم، متعهد، موظف

ملزم، مجبور

mitigation through development of technologies that would mitigate impact of natural disasters through pre and post disaster

mitigation technologies and decision support systems.

constrained/kâns'treynd/adj

ملزم، مقید، مجبور، تحمیلی، ساختگی، غیرطبیعی

obstruction / âbs'trâkshen/ n

ممانعت، کارشکنی، مانع

safety audit/ seyfti 'odit /n

ممیزی ایمنی

Safety audits involve checking, as a regular routine, all electrical equipment, wiring, fire extinguishers, hose maintenance, roof leaks, pest infections, damaged flooring or steps, clearways through fire exits, and more generally ongoing daily OH & S issues. Particular attention needs to be paid at times of capital works.

mandatory safety audit/ 'mandetri 'seyfti 'odit/n

ممیزی ایمنی اجباری

Mandatory safety audit of all existing school buildings with respect to their location, design and quality of construction and prioritizing them for demolition, retrofit or repair.

adapted/a'dapted/adj

مناسب، سازگار، تنظیم شده

The adjustment in natural or human systems in response to actual or expected climatic stimuli or their effects, which moderates harm or exploits beneficial opportunities. The border concept of adaptation also applies to non-climatic factors such as soil erosion or surface subsidence.

conducive/kân'dyoosiv/adj

مناسب، مساعد، منشا، سرچشمه، موجب

One of the goal is to provide open source information exchange and sharing between public, government and non – government agencies. To accomplish this, efforts are directed toward creating and promoting an environment that is conducive for open exchange of information in complex emergency and disaster situations.

disseminate /di'semineyt /vt

منتشر کردن، اشاعه دادن، ترویج کردن، پخش کردن

promulgate/ 'prâmâlgeyt/vt

منتشر کردن، پخش کردن، رسماً اعلام کردن

culminate /'kâlmineyt /vi,vt

منتهی شده به، به کمال رسیدن، به اوج رساندن

seismogram /'sâyzmogram/n

منحنی‌های ترسیم شده توسط لرزه نگار

A seismogram is a graph output by a seismograph. Magnitude measures the energy released at the source of the earthquake. The magnitude of an earthquake is determined from the logarithm of the amplitude of waves recorded on a seismogram at a certain period. Intensity measures the strength of shaking produced by the earthquake at a certain location. Intensity is determined from effects on people, human structures, and the natural environment.

fragility curves/ fra'jiliti kervz/n

منحنی‌های شکنندگی، منحنی‌های آسیب‌پذیری

This project being undertaken for developing fragility curves that can be used in various ways as part of a seismic vulnerability analysis methodology for bridges of Karachi. The vulnerability assessment of bridges will be beneficial to the disaster management agencies of the country and will allow the development of useful information regarding evacuation maps, seismic retrofitting decisions, disaster response planning, estimation of direct monetary loss, and evaluation of loss of functionality of highway systems.

accommodating/ e'kâmo'deyting/ adj

Disaster management services are trying to arrange temporary accommodation for about 400 people left without a roof over their heads after a fire in Alexandria.

isolated /'âysoleytid /adj

cohere/ko'hiyer/vi

coherent/ko'hiyerent/adj

Emergency management requires collaboration, coordination and integration to facilitate complementary and coherent action by all partners to ensure the most effective use of emergency management resources and execution of activities. Complementary emergency management systems at all levels are to provide for concerted efforts to facilitate timely and effective prevention and mitigation, preparedness, response and recovery measures to deal with disasters.

charter/'chârter/n

This charter has been developed through consultations with more than 600 children in 21 countries in Africa, Asia, the Middle East and Latin America.

It identifies children's priorities for reducing the impacts of disasters before they happen. This is a charter for children by children. It is an important reflection of what children themselves are talking about when it comes to disasters and how to prepare for them.

rationalize /'rashenalâyz/ vt

enlist/in'list/vi,vt

At the end of this session, the participants should be able to enlist the major disasters that occurred in their district, municipality or commune over the past ten years.

prohibit/pro'hibit/vt

prohibition/prohi'bishen/n

foreshadowed/ for'shadod/ adj

According to Mark Stafford, director of disaster

منزل مناسب، سازگار، خوش برخورد، مهربان، همراه

منزوی، تنها، مجزا (ازهم)، دورافتاده، پرت، تک، منفرد

منسجم بودن، به هم بستگی داشتن، به هم چسبیدن

منسجم، منطقی، روشن، واضح، قابل فهم

منشور، فرمان، حکم

منطقی کردن، عقلایی کردن، معقول جلوه دادن

منظور کردن، به حساب آوردن، به دست آوردن

منع کردن، بازداشتن، جلوگیری کردن، مانع شدن

منع، بازداری، ممنوعیت، قانون منع، حکم ممنوعیت

منعکس (شده)، بازتاب یافته

services for the Fort Worth, Texas, Chapter of American Red Cross, disasters are either foreseen includes hurricanes, floods, and tornadoes. By contrast, the unforeseen cannot be specifically planned for, and preparations will be more challenging.

hazardous material/ hazerdes ma'teriyâl/ n

Dangerous goods, also called hazardous materials or HAZMAT, are solids, liquids, or gasses that can harm people, other living organisms, property, or the environment. They are often subject to chemical regulations. "HAZMAT teams" are personnel specially trained to handle dangerous goods. Dangerous goods include materials that are radioactive, flammable, explosive, corrosive, oxidizing, asphyxiating, biohazardous, toxic, phatogenic, or allergenic.

مواد خطرناک مواد پر خطر، مواد مخاطره آمیز

action stations/'akshen steyshenz/ n

The reporting requirement for releases of hazardous materials and pollutants are established in legislation these include, but are not limited to the:

- a) National Clean Water Act,
- b) Clean Air Act,
- c) Environmental Conservation Act,
- d) Transportation of Hazardous Material Act.
- e) National Maritime Shipping Act, and
- f) Port Authorities Act.

مواضع، مواضع عملیاتی

concurrence/kân'kârens/ n

contributing/kân'tribyooting/adj

breakwater /breykwoter /n

The concrete breakwater, nearly 207 feet deep, was designed to blunt an incoming tsunami. Its construction marked the culmination of decades of research on wave dynamics and dissipation. It stretches 6430 feet and was completed in 2009 after more than three decades of construction.

موافقت، توافق، تقارن

موثر، مهم

موج شکن

render/'render/vt

The earthquake left 614 people dead and 1411 injured, rendered around 35000 people homeless, and severely damaged housing units.

موجب شدن، ارائه کردن، عرضه کردن، انجام دادن

elicit/i'lisit/vt

Research effective means to communicate real-time warnings to various intended recipients so that appropriate responses are elicited.

موجب شدن، باعث شدن، استنباط کردن

conduce/kân'dyoos/vi

succinct/sâk'sink/adj

Developing systems for effective disaster risk management at all levels, suggests that succinct relevance of the program objectives.

موجب شدن، منجر شدن به

موجز، کوتاه، مختصر، فشرده

Promoter/ pro'moter/ n

موسس، بانی، حامی، طرفدار

theme/ thiim/ n

موضوع، مضمون

The informal thematic debate of the General Assembly on Disaster Risk Reduction aims to strengthen the understanding of how to reduce risk and exposure to disaster through effective investment policies and practices and sustainable urban management.

thematic/ thi'matik/ adj

موضوعی، مضمونی

prosper/ 'prâsper/vi

موفق شدن، رونق گرفتن، رونق داشتن،

tentativeness/ ten'tetivnis/ n

موقت

In accordance with the Post Katrina Act, FEMA is developing a next generation of rapidly deployable interagency National and Regional emergency response teams, tentively identified as Incident Management Assistance Teams (IMAT).

tentative/ tentativ/ adj

موقت، آزمایشی، موقتی، غیرقطعی

acting/ 'akting/adj

موقت، جانشین، قائم مقام، کفیل

tentatively/ ten'tetivli/ adv

موقتا، با تردید، با حالت دودلی

ad hoc/ad 'hâc/ adj,adv

موقتی، موردی، خاص، اختصاصی، برحسب ضرورت، موقتا

Ad hoc and wireless sensor networks have been proposed as an appealing communication method to deal with the unexpected conditions that emerge during and/or after a disaster. Communications among victims and crew members involved in rescue operations are crucial in order to alleviate the disaster consequences and save lives. In particular, at the peak of this i-phone era, people mostly communicate with each other using smartphones, making calls or sending text messages through internet and via applications such as WhatsApp, Facebook, and Line among others. However,cellular-based communications may not be possible after a disaster due to the damage caused to the telecommunication infrastructure, leaving many people isolated and unprotected.

dignified /'dignifâyd/adj

موقر، باوقار، متین، محترم، موقرانه، با متانت، محترمانه

monitor / 'mâniter/ n

مونیتور، نمایشگر رایانه، دستگاه کنترل

Space technology plays a crucial role in efficient mitigation of disasters. While communication satellites help in disaster warning, relief mobilization and tele-medical support, earth observation satellites provide required database for pre – disaster preparedness programmes, disaster response, monitoring activities, and post- disaster damage assessment, and reconstruction, and rehabilitation.

fog /fâg/ n

مه

foggy /'fâgi/ adj

مه آلود، تیره، تار، مبهم

fog-bank /fâg bank / n

مه غلیظ [روی دریا]

fog /fâg /vi

مه گرفتن، بخار گرفتن

harness/'hârnis/ n,vt

مه‌ار، مه‌ار کردن، تحت کنترل درآوردن، آماده کردن

harnessed/'hârnisd/adj

مه‌ار کرده، تحت کنترل درآمده، آماده کرده

Yet, the fact remains, that sharing data and harnessing a river's potential together (as in the case of the Mekong River Commission between Cambodia, Laos, Thailand and Vietnam) is the only way to prevent/mitigate disasters like floods and, for whatever reason, this not happening in India.

consequential/kânsi'kwenshâl/adj

مهم، در نتیجه، منتج از، ناشی از، متعاقب

# ن

ravage/'ravij/vt,vi,n

Forest fires, like those that ravaged the Iberian Peninsula last summer, would fought more effectively if the coordination between different fire departments, meteorologists and civil defense services was enhanced to allow resources to be deployed more quickly and effectively.

نابود کردن، تخریب کردن، غارت کردن، چپاول کردن، نابودی، تخریب، ویرانی، {به صورت جمع} اثرات تخریبی

feeble /'fiibel /adj

Social workers can help to calm people down, identify natural leaders to organize the victims, coordinate with agencies and government departments or the logistics, mobilize healthy adults to help the weak and feeble.

ناتوان، کم زور، نزار، نحیف

overlooked /over'lukt /adj

Even though indigenous cultural values, practices and traditions lie at the heart of the social fabric of local communities around the world, these values are often overlooked or marginalized during disaster management –initiatives.

نادیده گرفته شده، مورد غفلت قرار گرفته

aggravating / 'agreveyting / adj

stem/ stem/vi

The planning embraced not only natural disasters but also those stemming from the activities of man.

ناراحت کننده، آزار دهنده

ناشی شدن از، سرچشمه گرفتن از

fragmentary/' fragmentri/adj

fragmented/' fragmentid/adj

Prior to establishing a functional Regional Medical Examiner system, military procedures for multiple (mass) incidents were fragmented and often ineffective. Multidisciplinary team training and participation in exercises have been often identified in the disaster management literature as a major key to the success of mass casualty /multiple fatality management.

ناقص، پراکنده، تکه تکه، شکسته، خرد شده

ناقص، پراکنده، گسیخته

consequence/'kânsikwens/n

consequent/'kânsikewent/adj,n

aftermath/âftermath/n-The aftermath of the earthquake highlighted the extreme vulnerability of women with low socio- economic standing especially in terms of their access to resources.

نتیجه، پیامد، اهمیت، عواقب

نتیجه، در نتیجه، منتج از، ناشی از، متعاقب، پیامد

نتیجه، عواقب، پیامد، دوره پس از

frayed/ freyd/ adj

Look for electrical system damage. If you see sparkes or broken or frayed wires, or if you smell burning insulation, turn off electricity at the main fuse box or circuit breaker. If you have to step in water to get to the fuse box or circuit breaker, call an electrician first for advice.

نخ‌نما، کهنه، فرسوده، ساییده

impending/im'pending/adj

With the 2014 cyclone season now well and truly with us, the Carins District Disaster Management Group (DDMG) is actively preparing for the various contingencies as they keep a close eye on an impending weather system that is making its presence felt in the Coral Sea.

نزدیک، در راه، قریب‌الوقوع

precipitation/prisipi'teyshen/n

In meteorology , precipitation is any product of the condensation of atmospheric water vapour that falls under gravity. The main forms of precipitation include drizzle, rain, sleet, snow, graupel and hail. Precipitation occurs when a local portion of the atmosphere becomes saturated with water vapour, so that the water condenses and "precipitates". Thus, fog and mist are not precipitation but suspensions, because the water vapour does not condense sufficiently to precipitate.

نزولات آسمانی، بارندگی

emanate/'emeneyt/vi

emanation/eme'neyshen/n

Information on floods and droughts emanating from space applications has demonstrated its potential in terms of hazard reduction.

نشات گرفتن، سرچشمه گرفتن

نشات، انتشار، گسیل، صدور

accidental release/ aksi'dentâl ri'liis / n

Unauthorized and accidental releases (spills) of oils, chemicals and other hazardous or polluting substances may present an immediate threat to the nearby community.

نشت، ریزش پیش‌بینی نشده، ریزش تصادفی

subsidence/sâb'sâydens/n

The phenomenon of increased occurrence of certain geophysical and hydrometeorological hazard events, such as landslides, flooding, land subsidence and drought, that arise from the interaction of natural hazards with overexploited or degraded land and environmental resources.

نشست، نشست خاک، فرونشست، فروکش {ساختمان}

surveillance/ ser'veylens/n

patriarchy/ peytri'yârki/ n

Post disaster resource distribution often reflects the patriarchal structure of society where women may not have a voice in reconstruction planning and are marginalized in their access to their resources.

نظارت، مراقبت

نظام (مردسالاری)، نظام پدرسالار

leverage /'leverij/ n

نفوذ، قدرت نفوذ، وسیله اعمال فشار، زور، قدرت

The committee recommended that the secretariat consider leveraging existing ICT – enabled infrastructure networks, such as telecenters, to be used effectively for disaster risk reduction and emerging issues, such as food security.

pivotal role/'pivetâl rol/ n

We recognise the pivotal role that multi – stakeholder partnership plays in putting in place the necessary financing mechanisms and other forms of support to the on going efforts by the Member States, sub-regional, regional, international organizations, Non – State Actors, and the private sector to use ICTs as a conduit to delivering digital opportunities to the peoples in the Pacific Islands Developing States.

نقش محوری، نقش بنیادی، نقش مهم

risk mapping/ risk 'maping /n

Risk mapping is the activity where elements at risk are plotted on hazard map. Therefore, at a risk mapping workshop, the committee locates areas prone to flooding and landslides on a large aerial photograph of the area.

نقشه خطرپذیری، بازنمایی خطرپذیری، نقشه ریسک

the road-map/ dhe 'rod map/n

In consultation with the stakeholders, identify implementation mechanism to operationalize the road-map in accordance with the Hyogo Framework of Action.

نقشه راه، جزئیات اجرایی

seismic hazard maps/'sâyzmik'hazerd maps/ n

The USGS provides seismic hazard maps for the US and areas around the World. These hazard maps serve as the basis for seismic provisions used in building codes and influence billions of dollars of new construction every year.

نقشه‌های خطر لرزه‌ای

ground motion maps/'graond moshen maps/ n

An improved understanding of earthquake process is utilized by the USGS to develop long range earthquake probability forecast, hazard assessments, and ground motion maps.

نقشه‌های زمین لرزه‌ای، نقشه‌های حرکت زمین

thematic maps/ thimatik maps/ n

The thematic maps allow the users to explore information related to natural resources and disasters, such as land use, soil, earthquake etc. The specific details for each of the thematic issue are depicted on the interactive map page under the head about the map.

نقشه‌های موضوعی

contravene / kântran'iin /vt

contravention/ kântra'venshen /n

Where it is determined that the incident was caused by a person or an entity in contravention to applicable laws, the Ministry of Environment is responsible to compensate those who encounter expenses as result of activities on the basis of requests made by the OSC in

نقص کردن، نادیده گرفتن، تخطی کردن از

نقص، خلاف، تضاد

the response to a pollution incidents for which the plan was implemented.

ultimate/'âltimit/ n

ultimately/'âltimitli/ adv

The ultimate goal of integrated disaster management should be limit the hazard and dmages to socially acceptable levels to promote environmental enhancement and to provide disaster warning, response, evacuation and recovery from the onset to the aftermath of the disaster.

نقطه اوج، حد نهایی، اوج، نهایت، حد اعلا  
نهائتاً، در نهایت، دست آخر، بالاخره، سرانجام

Achilles heel/ ekiliiz 'hiil/ n

It represents the Achilles Heel of traditional disaster recovery planning and can only be effectively addressed by DR coordinators who are willing to adopt new, proactive roles within the IT organization.

نقطه ضعف، پاشنه آشیل

milestone / mâylstone/ n

The creation of the National Earthquale Hzard Reduction Program (NEHRP) in 1977 was a milestone event in earthquale engineering research.

نقطه عطف

turning point/'terning poynt/ n

The decentralization of decision- making power represents a turning point in the counry, providing more autonomy to local authorities to make progress on disaster risk reduction.

نقطه عطف، نقطه تحول

citation/ sây'teyshen/ n

alarming /e'lârmîng/adj

emerge /i'merj/vi

emergence/i'merjens/n

In the case of natural disaster declaration, for example, from government's prespective, information that a disaster requiring relief attention has occurred does not emerge until the protocal for disaster declaration described above has been carried to its conclusion.

نقل قول، مثال، تقدیرنامه

نگران کننده، اضطراب آور، وحشتناک

نمایان شدن، ظاهر شدن، شکل گرفتن، پدیدار شدن پیدایش،  
ظهور، پیدایی، بروز

manifestation /manifes'teyshen/n

manifestly / 'manifestli /adv

showcase/'shokeys/n,vt

Asia-Pacific Space Agency proposed a project in 2004 to showcase the value and impact of earth observation technologies.

نمود، تجلی، ابراز، اظهار، بروز، نشانه، مظهر آشکارا، به  
روشنی، به وضوح

نمونه بارز، به نمایش گذاشتن

exemplar/ ig'zemplâr/ n

exemplary/ig'zempleri/ adj

Risk management applications in this industry provide a practical exemplar of risk practice and will enable you to understand the implications of risk theory and techniques in an industrial setting.

نمونه بارز، سرمشق

نمونه، هشدار دهنده، عبرت‌انگیز

provinces/'pravinciz/n provincial/pro'vinshâl/adj

نواحی خارج از پایتخت، شهرستان‌ها

hazard-prone areas/'hazard-pron 'eryâz/ n

نواحی خطرپذیر، مناطق خطرپذیر

Massive concentration of people in hazard-prone areas in citie-settlements where houses or infrastructures are not safely constructed lead to disastrous effects after an earthquake event at low scale.

innovate/'inoveyt/ vi, vt

نوآوری کردن، راه ورسم تازه نشان دادن، ابداع کردن

innovation/'ino'veyshen/ n

نوآوری، ابداع، تغییر، پیشرفت

fluctuate/'flâkchuweyt/ vi

نوسان کردن، نوسان داشتن، تغییر کردن، متغیر بودن

fluctuation/'flâkchu'veyshen/ n

نوسان، تغییر، افت وخیز

When a tropical cyclone passed over a sea, the long period sea surface fluctuation often appears. This phenomenon is called the storm surge. And the storm surge is caused mainly by the suction of sea water due to the pressure drop as well as by the wind drift of seawater.

executive agency/'ig'zekyutiv 'eyjensi/

نهاد اجرایی، دستگاه اجرایی

An executive agency is a part of a government department that is treated as managerially and budgetarily separate, to carry-out some part of the executive functions of the United Kingdom Government, Scottish Government, Welsh Government, or Northern Ireland Executive. Executive agencies are "machinery of government" devices distinct both from non-ministerial government departments and non-departmental public bodies (or "quangos"), each of which enjoy a real legal and constitutional separation from ministerial control. The model was also applied in several other countries.

lead agency/'liid'eyjensi/ n

نهاد مسوول، نهاد اصلی، نهاد پیشرو

The Bureau is also the lead agency (Disaster Management Area Coordinator [DMAC]) for Disaster Management Area F. Area F includes the cities of Avalon, Signal Hill and Long Beach. As the lead agency, the DMAC represents the area at Operational Area, Regional and State meetings and events.

body/'bâdi/ n

نهاد، هیات

This is accomplished by assigning participation of suitable representatives from the ministry responsible for the environment and/or for renewable resources to the body established to implement the national disaster paln.

institutionalized/'insti'tyooshenâlyzd/ adj

نهادی، نهادی شده، تثبیت شده، ریشه‌دار

The project components will:1) institutionalize, and strengthen the Office of Disaster Preparedness, i.e, elaborate and revise emergency procedures, by procuring specialized equipment, emergency supplies, and developing a comprehensive disaster management training, and a public awareness program.

streamline / 'striimlâyn / vt

نهادینه ساختن، کارآمد ساختن

ultimate/âltimit /adj

نهایی، غایی، اوج، حد نهایی، نهایت

ditch/dich/n,vi,vt

نهر، جوی آب، جوی کندن، جوی کشیدن

Combating water run-off can be done by small ditches, stone walls, soil furrows etc. which will lead to increased water availability in the soil to plants. All of them have to follow the contour lines otherwise the effects can be very detrimental when water concentrates on one particular point potentially causing erosion.

underlying/ânder'lâying/adj

نهفته، واقعی، نهانی

Having a clear vision of ethical principles that underlie a disaster management strategy will also enhance communication and coordination between different organizations.

driving force / drâying fors /n

نیروی محرکه

The many natural disasters taking place annually all over the world are often caused by weather phenomena and one of the most affected fields is agriculture. Remote sensing, GPS, GIS and ICT appear to be effective tools in countering disasters, and this has been the main driving force behind establishing the UTEEDA network in six countries in Iberian America.

# و

programmatic/'programeic /adj

Program management requires a programmatic agenda, or implementation plan, that identifies the projects, schedules, responsible agencies, and resource commitments and that describes the involvement of each agency.

وابسته به برنامه‌ریزی، برنامه‌ای، مرتبط

reliant /ri'lâyent/adj

Reliability is what those disaster management communication systems must focus on as the need for these systems might be more in remote part and some time even inaccessible areas like deep seas and mountain tops. Many accidents occur during avalanche and landslides. So a communication system must be reliable and must be in working conditions at all times.

وابسته، متکی، محتاج

mandatory/'mandeteri/adj, n

The mandate of UNISDR expanded in 2011 to serve as the focal point in the United Nations system for the coordination of disaster reduction and to ensure synergies among the disaster reduction activities of the United Nations system and regional organizations and activities in socio – economic and humanitarian fields (GA resolution 56/195).

واجب، اجباری، حتمی، ضروری، الزام‌آور

incumbent/in'kâmbent/adj,n

The issue of children's access to education following a disaster is fundamentally the same as access to education at any time. It is incumbent upon education authorities to "expect the unexpected" and to have adequate contingency plans for educational continuity in the face of a variety of known hazards.

واجب، لازم

irony /'âyreni/n

Ironically and unfortunately, coastal areas that are preferred sites of human habitation have been frequent, vulnerable targets of tsunamis.

وارونه رویداد، رویداد شگفت، طعنه

collective response/kâlealtive ris'pâns / n

A national environmental contingency plan is often developed to take advantage of the collective response capability of several ministries, agencies or departments.

واکنش مشترک، واکنش جمعی، جوابگویی گروهی

respond/ res'pând/ vi

respondent / ris'pândent/ n

واکنش نشان دادن، پاسخ گفتن، جواب دادن  
واکنش نشان دهنده، پاسخ دهنده، جواب‌دهنده

response/ris'pâns / n

Several internet applications were used in the post disaster response, mainly in two key areas: coordination of aid disbursement and finding information about missing people.

واکنش، پاسخ، جواب‌گویی

entrust/in'trâst/vt

State Administrative Training Institute would be entrusted to train the government functionaries, civil society response groups and state task force on disaster management.

واگذار کردن، محول کردن، به عهده (کسی) گذاشتن

cholera/'kâlerâ/n

Cholera is an acute diarrhoeal infection caused by ingestion of food or water contaminated with the bacterium *Vibrio cholerae*. Researchers have estimated that every year, there are roughly 1.4 to 4.3 million cases, and 28 000 to 142 000 deaths per year worldwide<sup>1</sup> due to cholera. The short incubation period of 2 hours to 5 days, is 1 factor that triggers the potentially explosive pattern of outbreaks.

subsist/sâb'sist/ vi

وجود داشتن، زیستن، امرار معاش کردن

alarmed/e'lârmd/adj

وحشت‌زده، مضطرب

dire/dâyr/ adj

In Federal Emergency Management Agency lists a hurricane strike on New Orleans as one of the most dire threats to the nation, up there with a large earthquake in California or a terrorist attack on New York City.

وحشتناک، وخیم، هولناک، شدید، حاد، نگران کننده،

exacerbation /igzaser'beyshen /n

وخامت

The impact of disasters, whether natural or man-made, not only have human dimensions, but environmental ones as well. Environmental conditions may exacerbate the impact of a disaster, and vice versa disasters have an impact on the environment.

exacerbate /ig'zaserbeyt /vt

وخیم‌تر کردن، بدتر کردن، خراب‌تر کردن

insolvency/in'sâlvensi/n

ورشکستگی

insolvent/insâlvant/n.adj

ورشکسته

Natural disasters have not been a leading cause of insurer insolvency in the past—but could they cause companies to fail in the future? This was the question raised in the Property and Casualty Insurance Compensation Corporation's (PACICC) latest report, "Why insurers fail: Natural disasters and catastrophes."

assistive devices /e'sistiv di'vâysez /n

Donating equipment and supplies can be more complicated. Before organizing collections of physical therapy equipment and assistive devices, it is important to confirm with the relief agencies that there

وسایل کمک توان بخشی

is a need for the items.

immeasurable /i'mezherebel / adj

وسیع، گسترده، بیکران، بی حد، بی اندازه

Instrumentation/ instrumen'teyshen / n

وسیله، واسطه، عامل، ابزار دقیق، ابزارهای سنجش

This will be done through enhancing stakeholder awareness, providing disaster risk management information, teaching disaster risk reduction in particular, and utilizing information, tools, instruments towards the participants' knowledge and experiences.

obligation/âbli'geyshen/n

وظیفه، تعهد، دین

devoted/di'votid/adj

وفادار، صادقانه، صمیمانه، صدیق، از خود گذشته

devote/di'vot/vt

وقف (چیزی) کردن، صرف (چیزی) کردن

Prioritize/prâ'yâritâyz/vt

الویت دادن به، در الویت قرار دادن

devastate /'devasteyt/vt

ویران کردن، تخریب کردن، نابود کردن، از بین بردن

devastating /'devesteyting/adj

ویران کننده، ویرانگر، مخرب، خانمان برانداز

devastation /devas'teyshen/n

ویرانی، خرابی، تباهی، نابودی

The 21st century has already been marked by escalating economic losses and human devastation caused by natural disasters. And in 2008 alone, more than 300 disasters killed more than 235000 people, affected more than 200 million others and caused losses and damage worth \$181 billion.

channel/'chanel /vt

The approach of Comprehensive Disaster Management Programme (CDMP) II is to channel support through government and development partners, civil society and NGOs into a people-oriented disaster management and risk reduction partnership. That partnership will promote cooperation, provide coordination, rank priority programmes and projects, and allocate resources to disaster management activities, risk reduction activities and climate change adaptation activities in Bangladesh.

هدایت کردن، سوق دادن، جهت دادن به

myriad/'miriyad/n,adj

Planning for security has also, since 9/11, become salient on many political agendas. Moreover, many of the myriad decisions, policies, and plans made by communities and governments (e.g. / land use zoning or infrastructure planning) often have profound but unrecognized impacts on environmental risks. A sound understanding of risks and risk management is therefore important for all planners to acquire.

هزاران، هزارها، بی‌شمار، گوناگون

defray/ di'frey/ vt

economic cost/ iikâ'nâmik kâst/n

Some 95 percent of disaster – related deaths occurred in developing countries, the economic cost of natural disasters can be 20 times higher in terms of gross domestic product, GDP, for developing countries than for industrialized nations, and developing countries often lack state – of the art technical and scientific expertise to prevent or reduce future devastation.

هزینه (چیزی را) پرداخت کردن، پرداختن

هزینه اقتصادی، هزینه جاری، قیمت واقعی، قیمت تمام شده اقتصادی

restoration expenditure/ resto'ryshen iks'pendicher/ n

Expenditure as a result of a natural disaster should be first met through the agency's existing budget, where possible. Dependant on the extent of relief and restoration expenditure, undue pressure may be put on agency budgets and additional appropriation may be required to meet such unexpected costs.

هزینه بازسازی

cost – benefit / kâst benefit / n

An increasing commitment to addressing risk in development projects seems related to a realization of the cost – benefit ratio of investing in risk reduction.

هزینه فایده، هزینه سود

disbursement/ dis'bersment /n

هزینه کرد، پرداخت، مبلغ

Slow disbursement may not only be related to decision – making and administrative procedures but also be caused by weak post – disaster assessment capacity and poor information management mechanism.

early warning /erli worning/adj

Early warning is a major element of disaster risk reduction. It prevents loss of life and reduces the economic and material impact of disasters. To be effective, early warning systems need to actively involve the communities at risk, facilitate public education and awareness of risks, effectively disseminate messages and warnings and ensure there is constant state of preparedness. A complete and effective early warning system is more than about supporting the prediction of catastrophic environment events; it supports four main functions, spanning knowledge of the risks faced through to preparedness to act on early warning. These four functions are risk analysis, monitoring and warning, dissemination and communication, and a response capability.

word- splitting /'werd splitting/n

When caught in the middle of a disaster, the last thing you need is a wordy, confusing, and vague booklet designed to 'help'.

on equipment and also may short circuit electrical equipment. Another problem regarding ash and water apply, is that an increased demand for water resources may occur as water is used to clean up after the volcanic eruption.

**welfare**/'welfer/ n, adj

welfare work/ 'welfer werk/ n

To respond immediately to an emergency or disaster, 25% of the National Calamity Fund is released to lead departments such as the social welfare and development, public works and highways and national defense departments as a Quick Response Fund.

خوشبختی، سعادت، رفاه، رفاهی، اجتماعی  
خدمات به زیستی

**well-being**/ wel'bii - ing/ n

While disasters can strike wide region or a nation, that impact is felt at the community level although it may hit one or several communities at once. It is these communities that constitute what is referred to as "disaster fronts". Being at the forefronts, communities need to have capacity to respond to threats themselves. It is for this reason that communities should be involved in managing the risks that may threaten their well-being.

رفاه، خیر، خوشی، سلامت

**wetlands**/ wet landz/ n

A wetland is a land area that is saturated with water, either permanently or seasonally, such that it takes on the characteristics of a distinct ecosystem. The primary factor that distinguishes wetlands from other land forms or water bodies is the characteristic vegetation of aquatic plants, adapted to the unique hydric soil. Wetlands play a number of roles in the environment, principally water purification, flood control, carbon sink and shoreline stability. Wetlands are also considered the most biologically diverse of all ecosystems, serving as home to a wide range of plant and animal life. Wetlands occur naturally on every continent except Antarctica, the largest including the Amazon River basin, the West Siberian Plain, and the Pantanal in South America.

Many wetlands are subject to more than one hazard such as flooding, erosion, and subsidence which make them poor sites for development apart from their ecological functions and values. Even highly degraded wetlands in urban settings with limited ecological functions and values may also be important for food storage, flood conveyance, and stormwater storage and purification.

تالاب، زمین‌های باتلاقی که زیستگاه بعضی از پرندگان و رویش بعضی از گیاهان است

**wind gust**/'wind gâst/n

Wind gust is the maximum wind speed measured during a specified time period. The American Meteorological Society defines a wind gust as a sudden brief increase in the speed of the wind. More

## **water – borne disease/** woter born di'ziiz/ n

Waterborne diseases are caused by pathogenic microorganisms that most commonly are transmitted in contaminated fresh water. Infection commonly results during bathing, washing, drinking, in the preparation of food, or the consumption of food thus infected. Various forms of waterborne diarrheal disease probably are the most prominent examples, and affect mainly children in developing countries; according to the World Health Organization, such diseases account for an estimated 4.1% of the total DALY global burden of disease, and cause about 1.8 million human deaths annually. The World Health Organization estimates that 88% of that burden is attributable to unsafe water supply, sanitation and hygiene.

بیماری‌های آب برد، بیماری‌های موجود در آب، بیماری‌های منتقله از راه آب

## **watershed /** wotershed / n

The basic cause of watershed degradation is a combination of ignorance and economic backwardness of people, outdated social systems, overpopulation and overgrazing. When a typhoon, forest fire, or earthquake occurs in the watershed, a damage assessment report has to be provided within, one week in case a cloud – free satellite image is required. Since the geographic distribution of the damaged areas is crucial for decision making, the damage assessment report must include the location, area, and terrain slope of these areas.

آبخیز، حوضه آبخیز، آب پخشا، منطقه‌ای که آب رودخانه یا دریا را تقسیم می‌کند.

## **weak/** wiik/ adj

weaken/'wiiken/vt, vi

weakened/'wiikend/adj

weakness/'wiiknis/ n

Disasters attract traffickers who prey on survivors at their most vulnerable, particularly orphans, who find themselves weakened by shock and loss of loved ones and of livelihood.

## **wear – and – tear/** wer n'ter/n

At water treatment plants, ash may cause wear and tear

استهلاک، فرسایش

up to large regional infrastructures. Vulnerability from the perspective of disaster management means assessing the threats from potential hazards to the population and to infrastructure. It may be conducted in the political, social, economic or environmental fields.

**vulnerability index** /vâlnere'biliti 'indeks/n

A vulnerability index is a measure of the exposure of a population to some hazard. Typically, the index is a composite of multiple quantitative indicators that via some formula, delivers a single numerical result. Through such an index “diverse issues can be combined into a standardized framework...making comparisons possible”. For instance, indicators from the physical sciences can be combined with social, medical and even psychological variables to evaluate potential complications for disaster planning.

شاخص آسیب پذیری

**vulnerable groups** /vânerebel groups/ n

In disaster, context inclusion means that vulnerable groups are presented and included in all the phases of disaster management, from disaster risk reduction, relief, recovery and development activities. Their participation in the planning of disaster management and risk reduction activities throughout the decision – making process helps to ensure an equitable and effective program that is responsive to their needs and maximizes their capacities.

اقشار آسیب پذیر، گروه های آسیب پذیر

**vicious**/ 'vishes / adj

vicious cycle of poverty/'vishes 'sâykel âv

viciously/'vishesli / adv

viciousness/'vishesnis/ n

Investing in disaster risk reduction reduces the vulnerability of people to hazard and helps break the vicious cycle of poverty.

# V v

## **value added**/valyoo 'adid / n

ارزش افزوده

In business, the difference between the sale price and the production cost of a product is the unit profit. In economics, the sum of the unit profit, the unit depreciation cost, and the unit labor cost is the unit value added. Summing value added per unit over all units sold is total value added. Total value added is equivalent to revenue less outside purchases (of materials and services). Value added is a higher portion of revenue for integrated companies, e.g., manufacturing companies, and a lower portion of revenue for less integrated companies, e.g., retail companies. Total value added is very closely approximated by total labor expense (including wages, salaries, and benefits) plus "cash" operating profit (defined as operating profit plus depreciation expense, i.e., operating profit before depreciation).

## **vernacular**/ver'nakyuler/n

بومی، محلی، زبان بومی، زبان محلی

Once upon a time in Indonesia, probably back to mid 1990s, most pilot projects that adopted 'community based' approach to disaster risk reduction in Indonesia, were actually supported by international organizations such as INGOs and United Nations (UN) agencies. Just quite recently, vernacular approach to disaster risk management lately adopted intentionally by local universities and disaster management experts.

## **viability** /vâya'bility /n

کارایی، عملی بودن، امکان

viable /vâyeble/adj

زنده (ماندن)، عملی، ممکن، شدنی، کارآمد، خودکفا

A capable and accountable state, supported by an effective civil society and engaged private sector, is indispensable for the sustainable reduction of disaster risk. Without capable and viable national institutions, there is little that external resources can do to reduce risk and promote sustainable recovery.

## **vicinity**/vi'siniti/ n

در حومه، در مجاورت، در اطراف، نزدیکی، مجاورت

It has also been prescribed that these industries will carry out awareness campaign for the population in the vicinity regarding the dos/don'ts in case of any accident involving hazardous material.

sink could be beginning to occur as climate change becomes more pronounced.

**urban resiliency**/erban ri'ziliyensi/n

Urban resilience is defined as the “capability to prepare for, respond to, and recover from significant multi-hazard threats with minimum damage to public safety and health, the economy, and security” of a given urban area. More recently, there has also been an increasing attention to the capability to adapt to changing conditions. Contemporary academic discussion of urban resilience focuses on three distinct threats; climate change, natural disasters and terrorism.

تاب‌آوری شهری، برگشت‌پذیری شهری

**urban**/'erben/adj

urbanism/'erbenizem/n

urbanization/erbenây'zeyshen/n

urbanize/'erbenâyz/vt

urbanized/'erbenâyzd/adj

New urbanism development projects are going into high risks locations around the country, including flood prone areas. Berke and a group of colleagues designed a study to determine if such projects performed better with regard to hazard mitigation than the conventional sprawl development. The study involved comparing new urbanism and conventional development projects in flood hazardous areas across the country having similar characteristics, such as age, size, and number of dwelling units.

به طور بی سابقه‌ای

**unsafe – dwellings**/ ân'seyf dwelingz/ n

Immigrants of poor households seeking to escape poverty in rural areas often arrive into or from urban squatter settlements, where land values are lowest and where the pressing need to acquire housing and basic services translate into sub – standard urbanization, characterized by unsafe- dwellings.

اقامتگاه‌های نا امن، اقامتگاه‌های خطرناک

**uptake**/âpteyk/ n

The networks could be used to give early warning of any weakening in the uptake of carbon dioxide by the global oceans. This uptake is very important in showing the rise of CO2 in the atmosphere, and some scientists have warned that such a weakening of the

جذب، میزان جذب

**unattainable**/âna'teynebel /adj

However, like many other natural disasters, many aspects of the earthquake hazard reduction are unattainable since the hazard itself is an uncontrollable act of nature.

Risk = Hazard × vulnerability

دست نیافتنی، حاصل نشدنی، غیرقابل دسترسی

**under the umbrella**/ânder dhi âm'brelâ /n

A broad range of disaster risk evaluation tools, including indicators and indexes fall under the umbrella of risk assessment tools, which the ISDR define as those tools which seeks to: ' determine the nature and extent of risk by analyzing potential hazards and evaluating existing conditions of vulnerability that could pose a potential threat or harm to people, property, livelihoods and the environmental on which they depend.

تحت حمایت، تحت پوشش

**underlie**/ânder'lây/vt

In recent years, we have recognized that preparing for and coping with disasters is essential but not sufficient. With more than 200 million people affected every year, disaster losses continue to rise with grave consequences for the survival, livelihood and dignity of people, especially the poor. Of course, not all disasters can be prevented but their impact - and the risks that underlie them - can be reduced.

شالوده (چیزی را) تشکیل دادن، علت اصلی (چیزی) بودن، در زیر (چیزی) قرارگرفتن

**underlying**/ânder'lâyng/adj

Reducing these two components of risk requires identifying and reducing the underlying drivers of risk, which are particularly related to poor economic and urban development choices and practice, degradation of the environment, poverty and inequality and climate change, which create and exacerbate conditions of hazard, exposure and vulnerability. Addressing these underlying risk drivers will reduce disaster risk, lessen the impacts of climate change and, consequently, maintain the sustainability of development (UNISDR, 2015a).

واقعی، اصلی، نهانی، نهفته

**underlying disaster risk drivers** / 'ânder'lâyng di'zâster risk 'drâyverz/n

Processes or conditions, often development-related, that influence the level of disaster risk by increasing levels of exposure and vulnerability or reducing capacity.

Underlying disaster risk drivers — also referred to as underlying disaster risk factors — include poverty and inequality, climate change and variability, unplanned and rapid urbanization and the lack of disaster risk considerations in land management and environmental and natural resource management, as well as compounding factors such as demographic change, non disaster risk-informed policies, the lack of regulations and

ضربه روحی خورده، دچار ضربه روحی (شده)

**tremor-prone**/'tremer pron/n

All important buildings in Japan, one of the most termor – prone countries in the world, are retrofitted, a modification technique of existing structures to make them more resistant to seismic activity, ground motion or soil failure due to the earthquake.

لرزه‌پذیر

**trilateral** / trây'laterâl /adj

The delegation noted the Trilateral Joint Announcement on Disaster Management Cooperation between Japan, China and the Republic of Korea.

سه جانبه

**trivia**/'triviyâ / n

trivial/'triviyâl /adj

triviality/'triviyâility / n

trivialization/ triviyâlây'zeyshen / n

trivialize/'triviyâlâyz / vt

Traslating the Hyogo Framework for Action, HFA, into a strategy that fits the conditions in each country and giving it the necessary legislative and political support is not trival.

امور جزئی، جزئیات بی‌اهمیت، مسایل پیش پا افتاده  
جزیی، ناچیز، خرد، پیش پا افتاده معمولی، سطحی  
خردی، ناچیزی، امر جزئی، چیزی بی‌ارزش  
کم اهمیت جلوه دادن، کوچک شماری  
کم اهمیت جلوه دادن، کوچک نشان دادن

**truism**/'troo -izem/ n

truly/'trooli / adv

It is a generally accepted truism that for any contingency plan to be effective, it must have strong support of the organization or of the government for which it is being prepared.

حقیقت بدیهی

راست، حقیقت، واقعا، صادقانه

**Tsunami** /soo'nâmi/n

A tsunami is a huge ocean wave that can travel at speed up to 965km/hr (600mi/hr), hundreds of miles over open sea before it hits lands. Sometimes incorrectly called a tidal wave, a tsunami is usually caused by an earthquake, volcanic eruption or coastal landslide.

A **Megatsunami**, which is an informal term to describe a tsunami that has initial wave heights that are much larger than normal tsunamis.

آب تاز، سونامی، آبلرزه، موج بسیار بزرگی که در دریا به علت  
زمین لرزه به وجود می‌آید.

**turning point**/'terning poynt/ n

The decentralization of decision- making power represents a turning point in the counry, providing

نقطه عطف، نقطه تحول

sizes, but they are typically in the form of a visible condensation funnel, whose narrow end touches the earth and is often encircled by a cloud of debris and dust. Most tornadoes have wind speeds less than 110 miles per hour (177km/hr), are about 250 feet (76m) across, and travel a few miles (several kilometers) before dissipating.

**torrent** /'tãrent/ n

سیلاب، رگبار، سیل مانند

torrential /'tãrenshãl /adj

سیلابی، سیل آسا

Torrential monsoonal rain across southern Pakistan has killed nearly 200 people and wiped out a million homes, many in villages that were still recovering from last year's devastating nation wide floods.

**tragic** /'trajik/ adj

[مربوط به] تراژدی، مصیبت بار، فاجعه آمیز، غم انگیز

tragically /'trajikli/ adv

به طور غم انگیزی، به طرز فجیعی، به طور اسفانگیزی

tragicomic /'traji'kãmik/ adj

غم انگیز و درعین حال خنده دار، تراژی کمیک

This earthquake is a tragic reminder of the need to concurrently ensure good infrastructure, policy foresight, and functional institutions for disaster preparedness. In Kathmandu's case, unstable geological conditions, together with high density and substandard building stock, create a dangerous environment. According to Demographia Kathmandu is the world's 33rd densest city out of over 1,000 studied, unsurpassed by any Western city.

**transboundary**/trans'baondri/ n

فرامرزی

The ASEAN Ministers for the Environment agreed to harmonize policy directions and set up operational and technical cooperation on environment matters such as transboundary air and water pollution, natural disasters, forest fires, oil spills, and the transboundary movements and disposal of toxic chemicals and hazardous wastes, and undertake joint actions to address the anti – tropical timber campaign; and undertak to develop and implement specific programmes relating to haze caused by forest fiers, air and water quality management and protection of marine environment in ASEAN areas.

**transition** /'tran'zishen /n

گذار، تحول، تغییر از یک حالت به حالت دیگر

While efforts to further strengthen the NATIONAL DISASTER

MANAGEMENT SYSTEM (NDRMS) preparation and response capacities continue, there is a greater need to focus on protecting investments as well as livelihoods in order to transition from a 'living at risk' to 'living with risk' approach.

**trauma** /'troma /n

آسیب، ضایعه، ضربه، ضربه عاطفی، شوک روحی

traumatic/tro'matik /adj

ضربه ای، [تجربه] تلخ، تکان دهنده، فراموش نشدنی

The secretariat had been a tireless advocate of the distributive role of Governments in promoting access to ICT by all citizens, regardless of where they live or what their economic situation was.

**to deal with/too diil width/ PHR V**

One of the main goals of disaster management, and one of its strongest links with development, is the promotion of sustainable livelihoods and their protection and recovery during disasters and emergencies. Where this goal is achieved, people have a greater capacity to deal with disasters and their recovery is more rapid and long lasting.

در دست گرفتن، از عهده برآمدن، اداره کردن

**toe tag/to tag /n**

A toe tag is a piece of cardboard normally attached with string to the big toe of a dead person in a morgue. It is used for identification purposes, allowing the mortician, coroner, law enforcement and others involved in the death process to correctly identify the corpse.

It usually bears the decedent's name, a case number if law enforcement is involved, and some descriptors like hair and eye color. However, in many places, actual toe tags are no longer used but have been replaced by wrist and/or ankle bands which serve the same purpose.

برچسب جنازه [که به شصت پا بسته می شود]

**toll/ tol / n**

By 24 January, at least 52 aftershocks measuring 4.5 or greater had been recorded. An estimated three million people were affected by the quake. Death toll estimates range from 100,000 to about 160,000 to Haitian government figures from 220,000 to 316,000 that have been widely characterized as deliberately inflated by the Haitian government. The government of Haiti estimated that 250,000 residences and 30,000 commercial buildings had collapsed or were severely damaged.

تلفات، مقدار خسارت یا تعداد کشته شدگان

**top down/'tâp daon/adj**

Indonesia has also altered its top-down approach in viewing disaster management which overlooked the capacity of the local people to disasters risks. New risk management and reduction framework has therefore been focused on the community to allow greater involvement of the locals in the planning, implementation and evaluation.

{تصمیم گیری} از بالادست به زیردست، از بالا به پایین

**tornado/ tor 'ney do/ n**

A tornado is violent, dangerous, rotating column of air that is in contact with both the surface of the earth and a cumulonimbus cloud or, in rare cases, the base of a cumulus cloud. Tornadoes come in many shapes and

توفان پیچنده (متداول در ایالات متحده آمریکا)، ترنادو، تورنادو

(brontide). The sudden increase in pressure and temperature from lightning produces rapid expansion of the air surrounding and within a bolt of lightning. In turn, this expansion of air creates a sonic shock wave, similar to a sonic boom, which produces the sound of thunder, often referred to as a clap, crack, or peal of thunder.

**thunderstorm**/'thânderstorm/n

A thunderstorm, also known as an electrical **storm**, a lightning storm, thundershower or simply a storm, is a form of turbulent weather characterized by the presence of lightning and its acoustic effect on the Earth's atmosphere known as thunder. The meteorologically assigned cloud type associated with the thunderstorm is the cumulonimbus. Thunderstorms are usually accompanied by strong winds, heavy rain and sometimes snow, sleet, hail, or no precipitation at all. Those that cause hail to fall are called hailstorms. Thunderstorms may line up in a series or rainband, known as a squall line.

توفان تندر، توفان همراه با آذرخش و صاعقه

**tidal wave**/'tâydâl weyv/adj

Tidal wave is a large, sudden, and disastrous wave of water caused by a tremendous disturbance in the ocean. When an earthquake occurs, tidal wave information will be broadcast on both TV and radio. If a tidal wave warning is issued, Osaka City, Japan, will announce it by radio broadcast. The term tidal wave may refer to one of the following:

a gigantic wave caused by the force of the moon and sun;

a **tidal bore**, which is a large movement of water formed by the funneling of the incoming tide into a river or narrow bay;

A **storm surge**, or tidal surge, which can cause waves that breach flood defences.

آبلرزه، ابرخیزاب، خیزاب کشندی، موج جزر و مدی، موج کشندی

**timely fashion**/'tâymlî 'fâshen/ idioms

Through a coordinated approach, and working with its partners, WMO addresses the information needs and requirements of the disaster risk management community, effectively and in a timely fashion.

به موقع، سروقت، بجا، به هنگام

**timely**/'tâymlî/ adj

The effectiveness of emergency plans or disaster plans depends on a number of factors, most of which are associated with or rely on the willingness of response partners to facilitate an effective and timely response while making use of all possible resources.

به موقع، به هنگام، بجا، به وقت

**tireless**/'tâylerlis/ adj

tirelessly/'tâylerlisli/ adv

خستگی ناپذیر، پرمقاوت، پرتوان، به طور خستگی ناپذیری، باشور و شوق فراوان

**terrain** / te'reyn/ n

Pollution incidents can effect vast areas and very remote terrain, and the potential need for surveillance should be considered as part of a national environmental contingency plan.

(قطعه) زمین، بوم، ناحیه

**the road-map**/ dhe 'rod map/n

In consultation with the stakeholders, identify implementation mechanism to operationalize the road-map in accordance with the Hyogo Framework of Action.

نقشه راه، جزئیات اجرایی

**thematic maps**/ thimatik maps/ n

The thematic maps allow the users to explore information related to natural resources and disasters, such as land use, soil, earthquake etc. The specific details for each of the thematic issue are depicted on the interactive map page under the head about the map.

نقشه‌های موضوعی

**thematic**/ thi'matik/ adj

thematically/ thi'matikli/ adv

theme/ thiim/ n

The informal thematic debate of the General Assembly on Disaster Risk Reduction aims to strengthen the understanding of how to reduce risk and exposure to disaster through effective investment policies and practices and sustainable urban management.

موضوعی، مضمونی  
از لحاظ موضوع، از نظر مضمون  
موضوع، مضمون**theme topic**/thiim'tâpik/n

The four symposium theme topics were hazards and disasters, global change natural resources, and technology and infrastructure.

عنوان اصلی، مضمون اصلی

**threat** / thret/ n

threaten/ 'threten / vt, vi

threatened/ 'thretend /adj

threatening/ 'threning/adj

threateningly/'threningli/adv

Rape, sexual violence, human trafficking and abduction and conflict are common threats to human security in post – disaster situation.

تهدید، خطر  
تهدید کردن، هشدار دادن، احتمال داشتن  
تهدید شده، مورد تهدید قرار گرفته  
تهدیدآمیز، تهاجمی، پرخطر  
به طور تهدیدآمیزی، با حالت تهاجمی**thrust**/ thrâst / vt

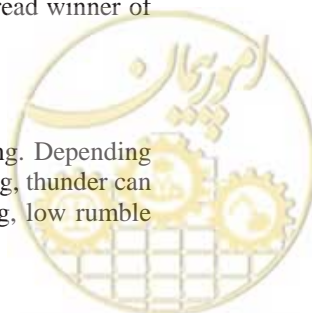

The death of a husband can thrust a widow into becoming the primary income earner (bread winner of a family).

در شرایط خاص قرار دادن، انداختن

**thunder**/thânder/n

Thunder is the sound caused by lightning. Depending on the distance and nature of the lightning, thunder can range from a sharp, loud crack to a long, low rumble

تندر، رعد، آسمان غرش

**template** / templeyt / n

الگو، شابلون

Proper and easy to understand roles and responsibilities is the key to successful Disaster Recovery Plan (DRP) Program. Below is simple Roles and Responsibilities templates for DRP. DRP program team usually consist of Damage Assessment Team, Executive Team, Restoration Team, Operations Team, Customer Support Team, Salvage/ Reclamation Team, Administrative Support Team.

**temporary housing**/ 'tempreri 'haozing /n

اسکان موقت

In addition to standard mobile offices and classrooms, Mod Space also has an inventory of barracks and “bunk houses” that can be utilized for temporary housing when disaster strikes.

**temporary shelter**/ 'tempreri 'shelter/n

پناهگاه موقت، سرپناه

A political or environmental crisis can be devastating to populations and families – forcing people from their homes and property. To lessen the human damage and provide a measure of safety and comfort for victims, temporary shelters are an invaluable asset. These designs, however, go above and beyond the standard stock emergency shelters in providing more efficient, affordable and all around more interesting living quarters.

**tend**/tend/vi

متمايل بودن، گرايش داشتن، آمادگي داشتن

Tendency/ 'tendenci/n

گرايش، تمايل، ميل، رغبت

When it comes to environmental emergencies, many disaster plans tend to be silent on the topic of environmental aspects of emergencies.

**tentative**/ 'tentetiv/ adj

موقت، آزمايشي، موقتي، غير قطعي

tentatively/ ten'tetivli/ adv

موقتا، باتريديد، با حالت دودلي

tentativeness/ ten'tetivnis/ n

موقت

In accordance with the Post Katrina Act, FEMA is developing a next generation of rapidly deployable interagency National and Regional emergency response teams, tentively identified as Incident Management Assistance Teams (IMAT).

**tenure**/ 'tenyar/ n

تصرف، اجاره، اجاره داري، تصدي، مدت اجاره

Existing tenure security issues and problems are highlighted after disasters, and the recovery and reconstruction phase is an opportunity to assess these. Disasters affect urban and rural lands and invariably a range of tenures and forms of access rights to land. Often the landless (labourers and sharecroppers, etc) and people with insecure tenure are the most vulnerable to disasters.

71/12 on strengthening regional mechanisms for the implementation of the SFDRR in Asia and the Pacific. In its first meeting in mid-May 2015, the Task Force discussed the role of the private sector in disaster risk management as outlined in the Sendai Framework.

**tax incentive**/'taks in'sentive/ n

At the macro level, early warning systems and social funds that can involve community – based initiatives seems particularly relevant, so as subsidies, debt or revenue recovery write – off as well as tax incentives for households or communities to adopt mitigation measures.

مشوق مالیاتی، انگیزه مالیاتی، محرک مالیاتی

**technological disasters**/tekno'lâjikâl di'zâsterz/ n

Many technological disasters have marked the xxth century. Minamocata in Japan (1953), Three Mile Island in the USA (1979), Bhopal in India (1984) and Chernobyl in Belarus (1986) permanently disrupted the lives of populations and changed their environment. Each disaster reminds us of our industrial systems' possible failures because zero risk is impossible in any sector.

بلايای تکنولوژیکی، بلايای فناوری زاد

**technological hazards**/ tekno'lâjikâl 'hazard / n

A hazard originating from technological or industrial conditions, including accidents, dangerous procedures, infrastructure failures or specific human activities, that may cause loss of life, injury, illness or other health impacts, property damage, loss of livelihoods and services, social and economic disruption, or environmental damage.

Examples of technological hazards include industrial pollution, nuclear radiation, toxic wastes, dam failures, transport accidents, factory explosions, fires, and chemical spills. Technological hazards also may arise directly as a result of the impacts of a natural hazard event.

مخاطره‌های تکنولوژیکی، مخاطره‌های فناوری زاد

**telecenter**/ telisenter / n

He expressed appreciation for the work of the secretariat in facilitating the networking of Thai telecenters with other telecenters networks in the Asia – pacific region.

مرکز عمومی دسترسی به شبکه رایانه‌ای اینترنت، کافی نت

**telemedicine**/'telimedsin / n

Telemedicine has two basic functions. In the preparedness phase, telemedicine applications can be used in continuing medical education, knowledge based expert systems and resource databases. During relief operations, it includes tele- monitored procedures/ surgery, tediagnosics and second opinion; and in rehabilitation phase, teleconsultations, complex problem interpretation, and epidemiological surveillance.

پزشکی از راه دور، درمان از راه دور

# T t

## **table**/'teybel/ vt

The National Council of Provinces called a disaster management conference to consider risk management issues on a regional basis in may 2000, and following that the bill was finally tabled.

ارائه کردن، مطرح کردن، به بحث گذاشتن، [طرح یا لایحه] از دستور خارج کردن

## **take stock**/'teyk sâtk/ vt

The UNCRD Disaster Management Planning Unit will formulate and implement projects in line with the "Hyogo Framework for Action (HFA)," adopted in 2005 at the UN World Conference on Disaster Reduction (WCDR) in Kobe, Hyogo, Japan, and support the efforts of the target countries to further implement the HFA and to achieve the Millenium Development Goals (MDGs). In the formulation of the projects, UNCRD will take stock of the experiences gained and lessons learned from recent major natural disasters.

ارزیابی شرایط خاص، برآورد شرایط خاص

## **tandem**/'tandem/n,adv

Disaster risk management is essentially a development problem and thus any preparedness and mitigation planning will have to be taken up in tandem with environmental concerns that the country is facing today.

با هم، هم‌زمان، پا به پای هم  
به طور هماهنگ، به طور مشترک

## **tangible**/'tanjibel/adj

tangibly/'tanjibli/adv

The UNISDR Private Sector Alliance for Disaster Resilient Societies (ARISE) facilitates exchange of experience and knowledge on how to implement tangible disaster risk reduction projects through seven work-streams: Disaster Risk Management strategies, investment metrics, benchmarking and standards, education and training, legal and regulatory, urban risk reduction & resilience, and insurance.

مشخص، آشکار، محسوس، واقعی، ملموس  
مشخصاً، آشکاراً، به طور محسوسی

## **task force**/'tâsk fors/n

The Task Force on Disaster Risk Reduction aims to promote the effective participation of private sector in disaster risk reduction and building of resilience as guided by the Sendai Framework for Disaster Risk Reduction 2015–2030 (SFDRR) and ESCAP Resolution

ستاد حوادث

through planned surveillance activities, through planned surveillance activities, through observations of agencies or departments of the various levels of government.

**survivor syndrome**/ ser'vayver 'sindrom/ n

سندروم بازماندگان

That's classic survivor guilt, otherwise known as survivor syndrome, which is a mental condition making a person feel they have somehow done wrong by surviving traumatic, events such as combat, natural disasters, or even a lay off in the work place.

**susceptibility** /sâseptibiliti /n

قابلیت، آمادگی، استعداد، حساسیت

susceptible /sâ'septibel /adj

مستعد، آسیب پذیر، قابل

A new statistical method has been applied for the forest fire susceptibility mapping. The results of the analysis were verified using forest fire location data with the help of a newly written programming code.

**sustainable development**/ sâs'teynebel di'velopmen/n

توسعه پایدار

Sustainable development refers to a mode of human development in which resource use aims to meet human needs while ensuring the sustainability of a natural systems and the environment, so that these needs can be met not only in the present, but also for generations to come.

Knowledge of disaster management and sustainable development including frameworks and skills for addressing cotemporary hazards, disasters and complex emergencies with an emphasis on either post-development or majority world contexts.

**synergy**/ 'sinerji/ n

همیاری، اشتراک مساعی

The assessment environment impacts of disasters offers good opportunities for the synergy of national and interntional efforts for capacity building in disaster risk management.

**systematic data collection**/ sisti'matik 'deytâ kâ'lekshen/ n

جمع آوری نظام مند داده ها، جمع آوری منظم داده ها

The lack of systematic and standardised data collection from disasters in the past is now revealing itself as a major weakness for any long term planning.

**subsist**/sâb'sist/ vi

subsistence /sâb'sistens / n, adj

subsistence crop / sâb'sistens krâp/n

subsistence level / sab'sistens level /n

Mozambique offers an example of a post – conflict country faced with major natural disasters – It also offers an example of recovery in an extremely poor and primarily subsistence livelihood population, but in a country favored by donors and receiving substantial amounts of both relief and recovery assistance.

وجود داشتن، زیستن، امرار معاش کردن  
زیست، هستی، گذراندن، وسیله امرار معاش (درحد زنده ماندن)، حیاتی، ضروری، بخور و نمیر  
محصول مصرفی کشاورزی  
خط فقر

**substantial**/sâb'stanshâl/adj

substantially/sâb'stanshâli/adv

substantive/sâb'stantiv/adj,n

In the absence of any consistent requirement or approach, we found substantial variation in the maturity of, and participation in, natural disaster planning forums at ports.

عظیم، کلان، قابل توجه، اساسی، بنیادی  
اساسا، به مقدار زیاد، به طور قابل توجهی  
اساسی، بنیادی، واقعی، جدی

**succinct**/sâk'sink/adj

Developing systems for effective disaster risk management at all levels, suggests that succinct relevance of the program objectives.

موجز، کوتاه، مختصر، فشرده

**suppress** / sâpres /vt

suppressant / sâpresent /n

suppressible / sâ'presible /adj

suppressor/sâ'preses/n

Forest resource protection strives to prevent, mitigate and suppress wildfires and other natural disasters that endanger lives, property and the state's natural resources.

خاموش کردن، متوقف کردن، جلوگیری کردن از  
فرو نشاننده، بازدارنده  
فروکش کننده، تشفی پذیر  
بازدارنده

**surmount** / ser'maont /vt

surmountable/ ser'maontebel/ adj

There is also a set of intangible features which might potentially limit (improve) the household efforts to surmount the effect of natural hazards on them, Just as unfavourable socio – economic opportunities might well do.

فائق آمدن، غلبه کردن، پشت سر گذاشتن  
[مشکل وغیره] حل شدنی، قابل حل

**surveillance**/ ser'veylens/n

Survey/ser'vey/vt

Survey/'servey/ n

Surveying/ ser'veying/n,adj

Surveyor/ser'veyer/n

The discovery of a pollution incident may be made

نظارت، مراقبت  
بررسی کردن، مرور کردن، سنجیدن، ارزیابی کردن، مساحی  
کردن، نقشه برداری کردن  
مساحی، نقشه برداری، نقشه  
زمین پیمایی، نقشه برداری  
مساح، نقشه بردار، ممیز، ارزیاب

or systems. Non-structural measures are measures not involving physical construction which use knowledge, practice or agreement to reduce disaster risks and impacts, in particular through policies and laws, public awareness raising, training and education.

Common structural measures for disaster risk reduction include dams, flood levies, ocean wave barriers, earthquake-resistant construction and evacuation shelters. Common non-structural measures include building codes, land-use planning laws and their enforcement, research and assessment, information resources and public awareness programmes. Note that in civil and structural engineering, the term “structural” is used in a more restricted sense to mean just the load-bearing structure, and other parts such as wall cladding and interior fittings are termed “non-structural”.

**structural**/strâkcherâl/adj

structuralism/strâkcherâlîzem/n

structuralist/strâkcherâlîst/n,adj

Implement integrated environmental and natural resource management approaches that incorporate disaster risk reduction including structural and non-structural measures.

سازه‌ای، ساختمانی

ساخت‌گرایی، ساختارگرایی

ساخت‌گرا، ساختارنگر، ساخت‌گرایانه

**sturdily**/'sterdili/ adv

sturdiness/'sterdinis/n

sturdy/'sterdi /adj

A safe place could be under a sturdy table or desk or against an interior wall away from windows, bookcases or tall furniture that could fall on you.

محکم، قرص و محکم، مصرانه، قاطعانه، باسماجت

پرطاقت، سخت

مقاوم، محکم، تنومند، خوش بنیه، قوی

**subduction** / sâb'dakshen/ n

By studying core samples from submarine channels in various locations along the subduction zones, scientists have been able to create a 10,000 year timeline of huge earthquakes that provide sobering evidence that the Northwest is due for a major event.

فرو رانش

**subsequent disasters**/'sâbsikwent di'zâsterz/n

Temporary shelter is rarely temporary and must be built solidly enough to withstand predictable subsequent disasters.

بحران‌های بعدی

**subsidence**/sâb'sâydens/n

The phenomenon of increased occurrence of certain geophysical and hydrometeorological hazard events, such as landslides, flooding, land subsidence and drought, that arise from the interaction of natural hazards with overexploited or degraded land and environmental resources

{ساختمان} نشست، نشست خاک، فرونشست، فروکش

**stipulate**/'stipyuleyt /vt, vi

stipulation / stipyu'leyshen / n

UNDP attempt will be to focus on reducing risk associated with earthquakes within the stipulated program time period.

قید کردن، تصریح کردن

تصریح، قید، شرط

**stocktaking** /'stâktheyking/ n

The president, acting under the authority delegated by the Board, has approved the provision of technical assistance not exceeding the equivalent of \$ 400,000 on a grant basis for Regional Stocktaking and Mapping of Disaster Risk Reduction Interventions for Asia and the Pacific, and hereby reports this action to the Board.

ارزیابی شرایط موجود، بازنگری [مجازی] صورت‌برداری از موجودی، گرفتن موجودی انبار

**streamline** / 'striimlâyn / vt

streamlined / 'striimlâynd /adj

The Committee recommended that the secretariat, taking into account the work of other commissions and keeping within existing resources, put in place follow – up mechanisms at the regional level to review the implementation of the outcomes of the World Summit on the Information Society in 2015 and streamline the implementation of the Regional Action Plan towards the Information Society in Asia and the Pacific.

نهادینه ساختن، کارآمدساختن

کارآمد، کارا، نهادینه

**stride**/strayd/n,vi

Although the HFA has substantively contributed to strengthened global attention on disaster risk reduction(DRR), its goals and priorities for action are far from being achieved. USAID's DRR agenda has made significant strides, but given current and future realities, increased attention and resources are needed to reduce global disaster losses and protect development investments.

گام بلند برداشتن، پریدن، گام بلند، پرش، (معمولا جمع) پیشرفت

**stringent** /'strinjent/adj

stringency /'strinjensi/n

stringently /'strinjentli/adv

The higher costs of meeting stringent objectives for critical facilities, such as hospitals, emergency-dispatch centers, and interstate freeway can be justified within the performance

دشوار به علت کمی عرضه پول، لازم الاجرا، سخت، شدید، قانع کننده

[اقتصاد] کمی پول، کمی عرضه پول، شدت و حدت، قاطعیت، تنگنای پول

شدیدا، با شدت، با جدیت، مجدانه

**structural and non-structural measures**/'strâkcherâl and nân'strâkcherâl 'mezherz/n

Structural measures are any physical construction to reduce or avoid possible impacts of hazards, or the application of engineering techniques or technology to achieve hazard resistance and resilience in structures

اقدامات سازه‌ای و غیر سازه‌ای

**standard operating procedures** /'standerd'âpereyting pro'sijerz /n

SOP: The standard operating procedures are the steps prepared in concise form as a response to any kind of disaster. It suggests the sequence of actions to be taken by different department in the central /state/ district level. Therefore, it recommends an institutional mechanism in explicit terms for any disasters with the state / district level administrators functioning on a cause-based mechanism.

دستورالعمل‌های عملیاتی استاندارد، فرآیندهای عملیاتی استاندارد

**standing** /'standing / n, adj

The inter- ministerial standing committee provides the policy and program support for ensuring the integration of DRR into the development programs, creates environment for incorporation of the experiences and existing capacities of the line ministries and department to contribute to the holistic DRM to be coordinated by NADRM.

مدت، مقام، منزلت، ثابت، دائمی، همیشگی، مستمر، معتبر، به قوت خودباقی

**state of the art**/steyt âv dhi 'ârt/adj

The contributors, professionals from the science and disaster management communities around the world, represent state of the art knowledge, practices, and perspectives on the topic. It is intended to serve as a basis to encourage and further develop discussion among scientists, practitioners, policy makers, and development planners.

پیشرفته‌ترین

**steep slope**/ stiip slop/ adj

A landslide is the movement of a large mass of rocks, mud or earth down the side of a mountain, cliff or steep slope.

شیب‌دار، با شیب تند

**steering committee**/'stiyering kâmiti/n

The Steering Committee on Risk Prevention and Management will work under the comprehensive umbrella of Future Earth. Within Future Earth's fundamental questions there is to identify the opportunities to reduce risks and vulnerabilities. A focus on vulnerability and resilience within Dynamic Planet Future Earth theme is an excellent opportunity for the disaster risk reduction research community to come together with global environmental change researchers - especially those who focus on forecasting extreme events and anticipating thresholds with those who work on vulnerability and adaptation.

کمیته راهبری

**stem**/ stem/vi

The planning embraced not only natural disasters but also those stemming from the activities of man.

ناشی شدن از، سرچشمه گرفتن از

It might be useful to identify potential disaster areas, enforce building codes, in these areas and the laws against squatting and mining of mountains and rivers generally, seeing to the insurance of the country's assets, ensuring that roads, bridges and gullies are built and maintained according to the standards of disaster management.

**staff**/ stâf/n, vi

staffers/'stâferz/ n

staffing/ 'stâfng/n, adj

Most disaster plans are prepared for, and are administered by those groups and agencies in society responsible, staffed and equipped for civil defense or similar emergency services.

کارکنان، کارمند بودن، کارمند گرفتن

کارمندان، پرسنل

کارمندان، پرسنل، کارمندی، پرسنلی

**staggered**/'stagerd /adj

staggering/'stagering /adj

staggeringly/'stageringli/adv

Disaster imposes staggering human and economic costs. In 2010 alone, disaster affected some 430 million people in China, killing nearly 8000 people and destroying three million homes. Direct economic losses exceeded 500 billion Yuan (\$77 billion) and nearly 40 million hectares of crops were damaged.

مات و مبهوت

گیج کننده، مبهوت کننده، بهت آور

به طور شگفت‌انگیزی، به نحو اعجاب‌آوری

**stair**/'ster/ n,adj

stair – carpet/'ster karpit /n

staircase / 'sterkeys/ n

stairway/'sterwey / n

stairwell/ 'ster wel/ n

Use a blank sheet of paper to draw the floor plans of your home. Show the location of doors, windows, stairways, large furniture, your disaster supplies kit, fire extinguisher, smoke alarms, other visual and auditory alarms, collapsible ladders, first-aid kits, and utility shut – off points. Show important points outside such as garages, patios, stairways, elevators driveways, and proches.

پله، {به صورت جمع} پلکان، پله‌ای

فرش پلکان، کناره

پلکان، پله‌ها

پلکان، پله‌ها

راه پله

**stakeholder** /'steykholder /n

The Northern Division Planning Office has met stakeholders to create a temporary natural disaster management plan which could be implemented in the North prior to and in the aftermath of a disaster. Stakeholders at the meeting included the National Fire Authority, the Health Department, the Police, military, Land Transport Authority, Fiji Electricity Authority, Red Cross and businessmen.

ذینفع، مرتبط، سهام‌دار

**spatial planning** /'speyshâl 'planing / n

In the last 40 years, there was evolution on how disaster risks reduction efforts have been studied or implemented specifically related to land use and spatial planning. Hazard zoning and land use control to protect people from hurricane has been implemented in the USA since 1977.

برنامه‌ریزی آمایشی، برنامه‌ریزی فضایی

**spatial**/'speyshâl/adj

The analyse of the interrelation between environmental catastrophes and regional development will enable to point out strategies and instruments of spatial planning and land management to support the prevention hazards.

آمایشی، فضایی

**specification** /spesifi'keyshen/ n

Specifics/spe'sifiks/n

specified/'spesifây/d/adj

specify /'spesifây/vt

The objective of this part of the specifications is to define the minimum requirements for the earthquake resistant design and construction of buildings subjected to earthquake ground motion.

**seismic hazard maps**/'sâyzmik'hazerd maps/ n

The USGS provides seismic hazard maps for the US and areas around the World. These hazard maps serve as the basis for seismic provisions used in building codes and influence billions of dollars of new construction every year.

نقشه‌های خطر لرزه‌ای

**seismic hazard**/'sâyzmik'hazerd/n

One of the natural phenomenon, the earthquakes give rise to seismic hazard to the part of the globe is very specific from the identification of seismic belt located in the earth crust. It is known by every one that the Northeast India is seismically one the six most active earthquake prone zones in the world. The other five being are the Mexico, Taiwan, California, Japan, and Turkey.

خطر لرزه‌ای

**seismic vulnerability**/'sâyzmik vâlnere'biliti/ n

The evaluation of the seismic vulnerability of the existent building stock in the perspective of seismic risk mitigation should not be placed only in relation to the isolated buildings of relevant historical and cultural importance, but also, in relation to residential buildings within old urban centers. When assessing the seismic vulnerability of buildings it is essential to first establish the project objectives, before subsequently choosing the most appropriate strategy and tools necessary for building assessment and fulfillment of these objectives. The evaluation of the seismic vulnerability of the existent building stock in the perspective of seismic risk mitigation should not be placed only in relation to the isolated buildings of relevant historical and cultural importance, but also, in relation to residential buildings within old urban centers. When assessing the seismic vulnerability of buildings it is essential to first establish the project objectives, before subsequently choosing the most appropriate strategy and tools necessary for building assessment and fulfillment of these objectives.

آسیب‌پذیری لرزه‌ای

**seismograph**/'sâyzmogrâf/n

A seismograph, or seismometer, is an instrument used to detect and record earthquakes. Generally, it consists of a mass attached to a fixed base. During an earthquake, the base moves and the mass does not. The motion of the base with respect to the mass is commonly transformed into an electrical voltage. The electrical voltage is recorded on paper, magnetic tape, or another recording medium. This record is proportional to the motion of the seismometer mass relative to the earth, but it can be mathematically converted to a record of the absolute motion of the ground. Seismograph generally refers to the seismometer and its recording device as a single unit.

لرزه نگاشت، لرزه‌نگار، زلزله نگار

**scenario**/ si'nâriyo/ n

Data obtained from different sensors are particularly useful when combined with ground – based data and information and integrated into Geographical Information Systems (GIS) for analysis and modelling of complex scenarios.

زمینه، طرح، سناریو

**scene**/ siin/ n

The on scene coordinator will determine the severity of the pollution incident and determine if other jurisdictions on the public should be notified of the event.

صحنه، جا، محل وقوع

**scrutinize**/ 'skrootinâyz/ vt

scrutiny / 'skrootini / n

The Federal Emergency Management Agency (FEMA), the lead federal agency for disaster management, responds to many smaller natural disasters every year without extensive public scrutiny.

استحکام، قدرت، قوت

**root causes**/root kozez/n

Low incomes levels make full recovery from a crisis impossible; leaving affected communities even more vulnerable, often the root cause of this situation is weak structures of governance, limited resources, and insufficient empowerment of communities, and cities to maximize their capacity for preparedness and response.

علل ریشه‌ای، دلایل ریشه‌ای

**rubble**/râbel/n

Earthquake strikes without warning, leaving cities in rubble and killing tens of hundreds of thousands of people.

آوار، مواد بازمانده از تخریب ساختمان

**rupture**/râpcher/vt,vi,n

ruptured/râpcherd/adj

The prediction of future earthquakes will be greatly enhanced by the development of dynamic models of fault rupture.

گسیختگی، قطع، پارگی، پاره شدن، گسیختن  
گسیخته، پاره شده، قطع شده

**risk perception**/risk per'sepshen/n

Risk perception is the subjective judgement that people make about the characteristics and severity of a risk. The phrase is most commonly used in reference to natural hazards and threats to the environment or health, such as nuclear power.

تعبیر خطرپذیری، ادراک خطرپذیری

**risk sharing**/risk shering/n,adj

Risk sharing also known as "risk distribution," means that the premiums and losses of each member of a group of policyholders are allocated within the group based on a predetermined formula.

مشارکت در خطرپذیری، تسهیم خطرپذیری

**risk taking**/risk teyking/n

risky/'riski/adj

The challenges of the last 20 years, since 1986 that have contributed to developing current concepts and approaches to the emergency management function are outlined. Enormous resources have been invested in studying risk in context of environment and there have been significant advances in thinking and practice in risk and emergency management.

ریسک کردن، خطر کردن، مخاطره جویی

**risk transfer**/risk 'transfer/n

The process of formally or informally shifting the financial consequences of particular risks from one party to another, whereby a household, community, enterprise or State authority will obtain resources from the other party after a disaster occurs, in exchange for ongoing or compensatory social or financial benefits provided to that other party.

Insurance is a well-known form of risk transfer, where coverage of a risk is obtained from an insurer in exchange for ongoing premiums paid to the insurer. Risk transfer can occur informally within family and community networks where there are reciprocal expectations of mutual aid by means of gifts or credit, as well as formally, wherein governments, insurers, multilateral banks and other large risk-bearing entities establish mechanisms to help cope with losses in major events. Such mechanisms include insurance and reinsurance contracts, catastrophe bonds, contingent credit facilities and reserve funds, where the costs are covered by premiums, investor contributions, interest rates and past savings, respectively.

انتقال خطرپذیری، انتقال ریسک

**risk transfer mechanism**/risk 'transfer 'mekanizem/n

Risk transfer mechanism complement mitigation strategies by providing financial compensation to organizations that have suffered a catastrophic loss.

سازوکار انتقال خطرپذیری، مکانیزم انتقال خطرپذیری

**risk**/risk/n,vt

Risk is the potential of gaining or losing something of value. Values (such as physical health, social status,

خطر، احتمال خطر، خطرپذیری، ریسک کردن، خطر کردن، به خطر انداختن، خطر (چیزی را) پذیرفتن

**Richter scale**/rikter'skeyl/n

[زلزله] مقیاس ریشتر

The Richter scale, developed in the 1930s, is a base-10 logarithmic scale, which defines magnitude as the logarithm of the ratio of the amplitude of the seismic waves to an arbitrary, minor amplitude. An earthquake measuring 6.4 on Richter scale struck Claremore, Oklahoma on June 23, 1953.

**rigorous** / 'rigreres/adj

بسیار دقیق، جدی، شدید، سخت، طاقت فرسا

rigorously / 'rigreresli/adv

بادقت تمام، به طور جدی، باجدیت

rigour / 'riger /n

سخت گیری، جدیت، حدت و شدت، دقت، موشکافی

rigours/'rigerz / n

مشقات، سختی ها، مصائب

In training and education the creation of the figure of the professional emergency manager requires rigorous courses to be taught, certificates of competency to be awarded, employers in the public and private sector to recognize that it is essential to hire qualified applicants and roles to be created for people who have taken approved courses.

**risk analysis**/risk e'nalysis/ n

تحلیل خطرپذیری، تحلیل مخاطره

The process of identifying and understanding the relevant components associated with a risk as well as the evaluation of alternative strategies to manage that risk.

**risk assessment**/ risk a'sesment/ n

تحلیل خطرپذیری، برآورد خطرپذیری

The process of risk assessment is a sociopolitical process that involves bringing together available information about risks and hazards from experts and lay sources for the purpose of making a policy decision about appropriate response. What complicates this process is that not only are the scientific assessments used to estimate risk, but laws, customs, ethics, values, attitudes, and preferences are factors that must be woven into the total risk estimate.

**risk management**/risk 'manijment/n

مدیریت خطرپذیری، مدیریت ریسک

Risk management is the identification, assessment, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability and/or impact of unfortunate events or to maximize the realization of opportunities.

**risk mapping**/ risk 'mapping /n

نقشه خطرپذیری، بازنمایی خطرپذیری، نقشه ریسک

Risk mapping is the activity where elements at risk are plotted on hazard map. Therefore, at a risk mapping workshop, the committee locates areas prone to flooding and landslides on a large aerial photograph of the area.

good idea to make copies of vital and important documents and mail them to a friend or relative you can trust to keep them safe and retrievable.

**retrofit** /ret'rofit/vt

retrofitable /ret'rofit'tebl /adj

retrofitter/ret'rofi'ter/n

retrofitting /ret'rofiting/n

Reinforcement or upgrading of existing structures to become more resistant and resilient to the damaging effects of hazards.

Retrofitting requires consideration of the design and function of the structure, the stresses that the structure may be subject to from particular hazards or hazard scenarios and the practicality and costs of different retrofitting options. Examples of retrofitting include adding bracing to stiffen walls, reinforcing pillars, adding steel ties between walls and roofs, installing shutters on windows and improving the protection of important facilities and equipment.

Seismic retrofitting is the modification of existing structures to make them more resistant to seismic activity ,ground motion or soil failure due to earthquake.

مقاوم کردن

قابل مقاومسازی

مقاوم کننده

مقاومسازی

**revegetation**/rii'veji'teyshen/n

To determine revegetation potential the application applies a “cost distance” paradigm where a relative “cost” surface is developed from key features such as major rivers, water bodies, wetlands and areas of high roadside conservation value. The resultant cost surface is then used in conjunction with identified core areas to generate a revegetation potential index over the study area.

احیای زندگی گیاهی، تجدید گیاه کاری

**revenue** /'revenyoo/ n

To a large extent, impacts on revenue depend on the macro economic dynamics occurring following the disaster shock, and the structure of revenue sources (income taxes consumption taxes, custom dues, etc.) since each may react differently in the aftermath of the disaster event. We find fiscal behavior in the aftermath of disasters in developed countries that can best be characterized as counter cyclical. In contrast, we find pro- cyclical decreased spending and increasing revenues in developing countries following large natural disasters.

درآمد، عایدی، درآمد دولت

**revitalization**/riivâyatalay'zeyshen/ n

revitalize/rii'vâyatalayz/ vt

The recovery reconstruction phase is marked by large-scale efforts to replace buildings and infrastructures, which have been destroyed by the disaster, revitalize economies and restoring agricultural systems to their normal production capacity.

احیا، رونق بخشی، بهبود و تقویت

احیا کردن، رونق بخشیدن، تقویت کردن

**response spectra**/ris'pâns 'spectrâ/n

طیف پاسخ

The concept of "response spectra" was developed in the 1930s, but it wasn't until 1952 that a joint committee of the San Francisco Section of the ASCE and the Structural Engineers Association of Northern California (SEAONC) proposed using the building period (the inverse of the frequency) to determine lateral forces.<sup>[1]</sup> Parameters used by structural and geotechnical engineers are peak acceleration, ground velocity and displacement, response spectra and shaking duration.

**responsive**/ris'pânsive /adj

پاسخ‌ده، پذیرا، راغب به پاسخگویی

## responsiveness/ris'pânsivnis / n

پاسخ‌دهی، پاسخگویی

The comprehensive approach to Risk Assessment in Djibouti technical program, which is focused on developing a comprehensive and sustainable system to assess, communicate and monitor risks associated with natural disasters in Djibouti, is helping the country to shift from a responsive to preventive approach to natural disasters.

**rest area**/rest eryâ/n

استراحتگاه کنار جاده، محل استراحت کنار جاده

A rest area, travel plaza, rest stop, or service area is a public facility, located next to a large thoroughfare such as a highway, expressway, or freeway at which drivers and passengers can rest, eat, or refuel without exiting on to secondary roads. Other names include motorway service area, service station, rest and service area (RSA), resto, service plaza, and service centre. Facilities may include park-like areas, fuel station, restrooms, and restaurants. A rest area or rest stop with limited or no public facility is a parking area or scenic area. Along some highways and roads are rest stops known as a wayside parks, roadside parks, or picnic areas. Rest areas are common in the United States, Canada, Australia, and parts of Europe and Asia.

**restoration expenditure**/resto'ryshen iks'pendicher/ n

هزینه بازسازی

Expenditure as a result of a natural disaster should be first met through the agency's existing budget, where possible. Dependant on the extent of relief and restoration expenditure, undue pressure may be put on agency budgets and additional appropriation may be required to meet such unexpected costs.

**retrievable**/ri'triivebel/adj

{رایانه} قابل بازیابی، بازیافتنی

## retrieval/ri'triival/n

بازیابی، اصلاح، جبران

## retrieve/ri'triiv/vt,vi

یافتن، پیدا کردن، بازیابی کردن

To prevent further loss of vital documents, place the originals or copies in a sealable plastic bag or other watertight container and secure that container where it is best protected and can easily be located. It is also a

not been combined before. By definition, disasters involve local emergency response capacity being exceeded and relief and resilience processes called on to provide short – and long – term aid.

**resilience action plan/** ri'ziliyens akshen plan/n

The action plan shows how we might start creating a more localised, vibrant and resilient local economy which can not only help us to cope with the major challenges which lie ahead but which, we believe, can create significant opportunities –for meaningful work, to develop new skills, to strengthen community networks and working to enhance the local environment.

برنامه عملیاتی برگشت پذیری، برنامه عملیاتی تاب آوری

**resolute/**rezolot/adj

resolutely/rezolootli/adv

Out of deep concern over the frequency and seriousness of its crises, Niger, like many other African countries, committed itself to resolutely develop and build its capacity to handle emergency situation through prevention and institutional capacity building, especially in its early warning systems.

مصمم، ثابت قدم، با عزم راسخ، قاطعانه، قاطع  
مصممانه، قاطعانه، به طور جدی

**respond/** res'pând/ vi

respondent / ris'pândent/ n

response/ ris'pâns / n

Actions taken directly before, during or immediately after a disaster in order to save lives, reduce health impacts, ensure public safety and meet the basic subsistence needs of the people affected.

Disaster response is predominantly focused on immediate and short-term needs and is sometimes called disaster relief. Effective, efficient and timely response relies on disaster risk-informed preparedness measures, including the development of the response capacities of individuals, communities, organizations, countries and the international community.

The institutional elements of response often include the provision of emergency services and public assistance by public and private sectors and community sectors, as well as community and volunteer participation. “Emergency services” are a critical set of specialized agencies that have specific responsibilities in serving and protecting people and property in emergency and disaster situations. They include civil protection authorities and police and fire services, among many others. The division between the response stage and the subsequent recovery stage is not clear-cut. Some response actions, such as the supply of temporary housing and water supplies, may extend well into the recovery stage.

باقی مانده، بقیه، مانده، پس مانده

**residual risk** /ri'zidyuwâl risk/n

Is the disaster risk that remains even when effective disaster risk reduction measures are in place, and for which emergency response and recovery capacities must be maintained. The presence of residual risk implies a continuing need to develop and support effective capacities for emergency services, preparedness, response and recovery, together with socioeconomic policies such as safety nets and risk transfer mechanisms, as part of a holistic approach.

احتمال وقوع خطرپذیری، احتمال خطر ابتلا، خطرپذیری  
باقی مانده، خطر باقی مانده

**resilience** /ri'ziliyens /n

resilient /ri'ziliyent /adj

The ability of a system, community or society exposed to hazards to resist, absorb, accommodate, adapt to, transform and recover from the effects of a hazard in a timely and efficient manner, including through the preservation and restoration of its essential basic structures and functions through risk management. Emergency management is a data-intensive activity which requires evaluation of many forms of data, and often consideration of combination of data which have

برگشت پذیری، سازگاری، تاب آوری، واگشت پذیری  
برگشت پذیر، سازگار، تاب آور، واگشت پذیر،

First, by supporting the development of reliable early warning systems and of flexible social safety nets to protect the most vulnerable groups is one. Second, by strengthening agricultural and agribusiness systems by improving farmers' access to drought-resistant varieties of crops, improved rainwater-harvesting technologies and information from weather-forecasting systems, while continuing to increase investment in irrigation development is the other.

**rehabilitate**/riiha'bilitteyt/vt  
rehabilitation/riihabili'teyshen/n

The restoration of basic services and facilities for the functioning of a community or a society affected by a disaster.

نوسازی کردن، مرمت کردن، تعمیر کردن، توان بخشیدن  
نوسازی، مرمت، تعمیر، توان بخشی

**reimburse** /rii-im'bers /vt  
reimbursement /rii-im'bersment /n

When a major disaster strikes, community resources are often overwhelmed. While Federal and State governments play a major role in the recovery process through reimbursement of eligible costs related to declared disaster, it is critical that management of disaster remains at the local level.

پرداختن، بازپرداختن، زیان کسی را جبران کردن  
بازپرداخت، پرداخت، جبران

**relevance** /relivens/n  
relevant /relivent/adj

We strive to ensure that a well-functioning, relevant global disaster management system is in place to address the needs of vulnerable people affected by disasters and crises, by working as part of an effective global disaster management.

رابط، ارتباط  
مربوط، مربوط به موضوع، مناسب، مطابق

**reliability** /rilâye'biliti/ n  
reliable /ri'lâyebel /adj  
reliably /ri'lâyebli/ adj  
reliance /ri'lâyens/ n

reliant /ri'lâyent/adj

Reliability is what those disaster management communication systems must focus on as the need for these systems might be more in remote part and some time even inaccessible areas like deep seas and mountain tops. Many accidents occur during avalanche and landslides. So a communication system must be reliable and must be in working conditions at all times.

**relief** /ri'liif/n,adj

Promote regular disaster preparedness exercises including evacuation drills and access to essential food and non-food relief supplies, as appropriate to local needs.

کمکی، کمک، اعانه، راحتی، آرامش، رهایی، خلاصی

The Ministry of Environment will determine the suitability of any disposal site which is being considered as receptor for any hazardous material, pollutant, contaminated soil or other derbis.

**Reconnaissance investigation** / ri'kânisens investigeysheh/n

USGS also has primary responsibility for monitoring earthquake activity in the US and coordinating post-earthquake reconnaissance investigations.

بررسی شناسایی، بررسی اکتشافی، تحقیقات اکتشافی، تحقیقات شناسایی

**reconstruct** / riikâns'trâkt/ vt  
reconstructed / riikâns'trâktid/ adj  
reconstruction / riikâns'trâkshen / n

The medium- and long-term rebuilding and sustainable restoration of resilient critical infrastructures, services, housing, facilities and livelihoods required for the full functioning of a community or a society affected by a disaster, aligning with the principles of sustainable development and “build back better”, to avoid or reduce future disaster risk.

UNESCO suggests that for every \$100 spend by the international community on risks and disasters, \$96 go to emergency relief and reconstruction, and only \$4 on prevention.

بازسازی کردن، تغییر دادن، ترمیم کردن  
نوسازی شده، بازسازی شده، ترمیم شده  
نوسازی، تجدید بنا، بازسازی، ترمیم

**recovery** / ri'kâveri/n

The restoring or improving of livelihoods and health, as well as economic, physical, social, cultural and environmental assets, systems and activities, of a disaster-affected community or society, aligning with the principles of sustainable development and “build back better”, to avoid or reduce future disaster risk.

بازیابی، بهبودی، احیا، بازیافت

**recovery operations** / ri'kâveri âpe'reyshens/n

Recovery in the aftermath of natural or man-made disasters is directly related to the availability of local resources and the infrastructure and operational ability to deliver assistance from outside the affected region. RAND researchers have helped governments, militaries, and private organizations organize recovery operations during disasters, learn from past experience, and prepare for future disasters.

عملیات بازیابی، عملیات شناسایی

**recur** / ri'ker/vi

recurrence / ri'kârens/n  
recurrent / ri'kârent/adj  
recurring / ri'kering/adj

Immediate relief and recovery is, of course, the urgent priority in a calamity. But the recurrent nature of the crisis, especially in the face of climate change, also highlights the need to build resilience – in two ways.

The Corporate Network for Disaster Response(CNDR) is a network of business groups, associations, corporations, and corporate foundations in the Philippines, which seek to rationalize and insitutorialize disaster risk management efforts of the business community.

**ravage**/'ravij/vt,vi,n

Forest fires, like those that ravaged the Iberian Peninsula last summer, would fought more effectively if the coordination between different fire departments, meteorologists and civil defense services was enhanced to allow resources to be deployed more quickly and effectively.

**reaffirm**/rii-e'ferm/vi

“We reaffirm our commitment to the Hyogo Framework for Action 2005-2015” and “ We invite governments at all levels, as well as relevant sub-regional, regional and international organizations, to commit to adequate, timely and predictable resources for disaster risk reduction.”

**real time**/'riyel 'tâym/n

This paper considers the rôle of information technology in forecasting, monitoring and managing disasters in *real-time* (i.e., by analysis of data as soon as they are collected). First, the advantages and pitfalls of a technological approach to natural hazards are discussed, then the general nature of real-time technology is described. There follows a review of the appropriate techniques of monitoring the physical impacts of earthquakes, volcanic eruptions, tsunamis, floods and landslides. Next the rôle of information technology in disaster management is assessed, with emphasis on telecommunications and simulation modelling.

## **rainwater harvesting**/'reynwoter 'hârvisting/n

The proposed program will focus on building awareness on rain water harvesting, demonstrate at public facilities (schools and hospitals) to construct model tanks, expand rain water harvesting to the private sector, research and develop low cost tank designs for market-based solutions and promote collaborations with other USG partner and others for wider application.

استحصال آب باران، جمع‌آوری آب باران

## **rampant**/'rampent/adj

Natural disasters were rampant in 2013, causing wide spread damage, chaos and impacting millions of lives. In a report from CBC News, German insurance company Munich Re, said that there were about 880 major natural disasters around the world in 2013. According to the insurance company 20,000 people's lives came to a tragic end, which was more than double that of 2012, and with an estimated cost of \$125 billion dollars in damage — both figures were still lower than the average for the past decade. On the average in the past decade, 106,000 human lives were lost per year due to hurricanes, typhoons, earthquakes and other natural disasters. Summer hailstorms in Germany, floods in Central Europe and multiple severe storms in the United States were the costliest disasters of 2013. "Floods and hailstorms caused double-digit billion-dollar losses in central Europe, and in the Philippines one of the strongest cyclones in history, Super Typhoon Haiyan, resulted in a human catastrophe with over 6,000 fatalities," said Munich Re, as cited by Phys.org. The typhoon also caused \$10 billion in damage as it surged across the Philippines.

**prevention**/pri'venshən/n

Activities and measures to avoid existing and new disaster risks.

Prevention (i.e., disaster prevention) expresses the concept and intention to completely avoid potential adverse impacts of hazardous events. While certain disaster risks cannot be eliminated, prevention aims at reducing vulnerability and exposure in such contexts where, as a result, the risk of disaster is removed. Examples include dams or embankments that eliminate flood risks, land-use regulations that do not permit any settlement in high-risk zones, seismic engineering designs that ensure the survival and function of a critical building in any likely earthquake and immunization against vaccine-preventable diseases. Prevention measures can also be taken during or after a hazardous event or disaster to prevent secondary hazards or their consequences, such as measures to prevent the contamination of water.

بازداری، پیشگیری، ممانعت، جلوگیری

**preventive approach**/ pri'ventiv e'proʊʃ / n

The proposed preventive approach therefore, corresponds to risk management based on the consideration of the consequences, rather than the causes of failures.

رویکرد پیش گیرانه

**preventive measures**/ pri'ventive mezʃəz / n

Training is an integral part of capacity building as trained personnel respond much better to different disasters and appreciate the need for prompt preventive measures.

اقدامات پیش گیرانه

prepared/pri'perd/adj

حاضر، آماده، از پیش آماده

preparedness/pre'perdnis/ n

آمادگی

The knowledge and capacities developed by governments, response and recovery organizations, communities and individuals to effectively anticipate, respond to and recover from the impacts of likely, imminent or current disasters.

Preparedness action is carried out within the context of disaster risk management and aims to build the capacities needed to efficiently manage all types of emergencies and achieve orderly transitions from response to sustained recovery.

Preparedness is based on a sound analysis of disaster risks and good linkages with early warning systems, and includes such activities as contingency planning, the stockpiling of equipment and supplies, the development of arrangements for coordination, evacuation and public information, and associated training and field exercises. These must be supported by formal institutional, legal and budgetary capacities. The related term "readiness" describes the ability to quickly and appropriately respond when required.

**preparedness plan**/ pri'perdnis plan/n

برنامه آمادگی

Establishes arrangements in advance to enable timely, effective and appropriate responses to specific potential hazardous events or emerging disaster situations that might threaten society or the environment.

**prerequisite**/'priirekwizit/ n, adj

پیش نیاز، لازم، ضروری، شرط لازم، لازمه

updated international poverty line to US\$1.90 a day.

**pragmatic**/prag'matic/adj

pragmatically/prag'matikili/adv

pragmatics/prag'matics/n

pragmatism/'pragmatizem/n

pragmatist/'pragmatist/n

The short lead time of flash floods limits the effectiveness of typical hydrological run-off models. Consequently a more pragmatic approach, very similar to the Central American Flash Floods Guidance (CAFFG) System, was proposed in a meeting during 2004 in South Africa involving hydrologists, meteorologists and disaster managers.

pre – emptive/ prii'emptive/ adj

pre-emption/ prii'empshen/ n

Effective Emergency Management training is more than managing the response. You also want your team trained on how to be pre-emptive and prevent emergencies.

جلوگیری کردن، مانع شدن، اشغال کردن

پیشگیرانه، بازدارنده

پیشگیری، ممانعت، جلوگیری

**precipitation**/prisipi'teyshen/n

In meteorology , precipitation is any product of the condensation of atmospheric water vapour that falls under gravity. The main forms of precipitation include drizzle, rain, sleet, snow, graupel and hail. Precipitation occurs when a local portion of the atmosphere becomes saturated with water vapour, so that the water condenses and "precipitates". Thus, fog and mist are not precipitation but suspensions, because the water vapour does not condense sufficiently to precipitate.

نزولات آسمانی، بارندگی

**precursor**/prii'kenser/n

The multidisciplinary program includes five major components aiming at identifying potential seismological, geomagnetic, geodetic and ionospheric precursors, respectively and to perform statistical tests on any indentified precursors.

پیش‌نشانگر

**predominant** / pri'dâminent / adj

predominate / pri'dâmineyt / vi

predominantly / pri'dâmineytl / adv

Counter measures activities for pollution incidents involving gaseous substances may be restricted to monitoring and modelling efforts aside from urgent notifications under phase II, and supplying advice to those providing, or in charge of, emergency services, while priorities for the health and safety of the public and responders predominate.

**pore pressure** / por 'presher/n

The pressure of fluids within the pores of a reservoir, usually hydrostatic pressure, or the pressure exerted by a column of water from the formation's depth to sea level. When impermeable rocks such as shales form as sediments are compacted, their pore fluids cannot always escape and must then support the total overlying rock column, leading to anomalously high formation pressures.

فشار منفذی

**pose** /poz/vt,vi

Structural and non-structural measures undertaken to limit the adverse impact of natural hazards; for example, planting mangroves to reduce the risk posed by tidal surges or raising awareness of natural hazards through school-based education projects.

ایجاد کردن، مطرح کردن، به وجود آوردن

**post disaster** /post di'zastâr/n, adj

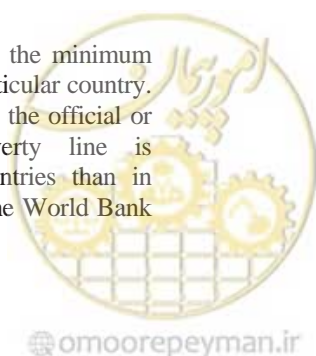

A comprehensive post disaster needs assessment exercise, launched simultaneously with response and relief efforts at the request of the Government of Nepal, with the objective to estimate damages and losses caused by the earthquake and to help identify recovery needs as well as strategy required for its implementation. The assessment exercise was led by the National Planning Commission (NPC) with assistance of more than 250 national and international experts who worked round the clock to produce this assessment covering 23 sectors in less than one month.

بعد از بحران

**poverty line** /'pâverti lâyn/n

The poverty threshold or poverty line is the minimum level of income deemed adequate in a particular country. In practice, like the definition of poverty, the official or common understanding of the poverty line is significantly higher in developed countries than in developing countries. In October 2015, the World Bank

خط فقر

for representatives of governments and other stakeholders-UN agencies, regional bodies, international financial institutions, civil society, the private sector and the scientific and academic communities-to:

1. Assess programme made in implementation of the Hyogo Framework for Action.
2. Enhance global awareness of disaster risk reduction.
3. Share experiences among countries and learn from good practice.
4. Identify remaining gaps and actions needed to accelerate national and local implementation of the Hyogo Framework.

**physical constrains**/'fizikâl kâns'treynz/n

محدودیت‌های فیزیکی

'A "holistic" approach to flood and erosion problem is necessary – one that recognize the complex interactions of all aspects of how people traditionally have organized, produced, and survived within the physical constraints.

**pitfall**/'pitfol/n

عیب، ایراد، اشکال، نقطه ضعف

Knowledge based on systematically collected data from field disaster research studies might help planners avoid common disaster management pitfalls, thereby improving disaster response planning.

**pivotal role**/'pivetâl rol/ n

نقش محوری، نقش بنیادی، نقش مهم

We recognise the pivotal role that multi – stakeholder partnership plays in putting in place the necessary financing mechanisms and other forms of support to the on going efforts by the Member States, sub-regional, regional, international organizations, Non – State Actors, and the private sector to use ICTs as a conduit to delivering digital opportunities to the peoples in the pacific Islands Developing States.

**plague**/'pleyg/n

طاعون

plague-ridden/'pleyg riden/adj

طاعون زده، دچار طاعون

Plague is an infectious disease that is caused by the bacteria Yersinia pestis. Depending on lung infection, or sanitary conditions, plague can be spread in the air, by direct contact, or very rarely by contaminated undercooked food. The symptoms of plague depend on the concentrated areas of infection in each person: bubonic plague in lymph nodes, septicemic plague in blood vessels, and pneumonic plague in lungs. It is treatable if detected early. Plague is still relatively common in some remote parts of the world.

**planning phase**/'planning feyz/ n

فاز برنامه‌ریزی، مرحله برنامه‌ریزی، دوره برنامه‌ریزی

The purpose of project planning phase is: establish business requirements; establish cost, schedule, list of deliverables and delivery dates; establish resource plan and get management approval; proceed to next phases.

**plate tectonics** /pleyt 'tektaniks/n

صفحات تکتونیکی، زمین ساخت بشقابی

The lithosphere of the earth is divided into a small number of plates which float on and travel independently over the mantle and much of the earth's seismic activity occurs at the boundaries of these plates.

**platform**/'platform/ n

برنامه، طرح، بیانیه سیاست کلی

The global platform provides the main global forum

and most visible among all the elements of the disaster management cycle, the efficacy of the government's role in disaster management is going to be judged largely, most of the times, by the quality of "response" and its effectiveness in minimizing the loss of lives and property of the affected people, when a calamity actually takes place.

**perception** / per'sepshen/ n

perceptive/per'septiv/adj

perceptively/per'septivli/adv

perceptiveness/per'septivnis/n

perceptivity / per'septiviti/n

perceptual/per'sepchoowâl/adj

No doubt that a long term visionary approach has a breakthrough in the current levels of perception of disaster risk is required to mitigate the long term disaster risk challenges the mega cities face.

باذکاوت، هوشمندانه

تیزهوشی، ذکاوت، فراست، زیرکی

ادراکی

**performance-based seismic design method**/per'formens-beysd 'sayzmik di'zayn 'method/n

A performance-based seismic design(PBSD) method is aimed at controlling the structural damage based on precise estimations of proper response parameters. PBSD method evaluates the performance of a building frame for any seismic hazard, the building may experience.

روش طراحی لرزه‌ای اجرا محور

**peri-urban**/peri'erben/adj

The survey also confirms peri-urban areas are more vulnerable to natural hazard and climate change risk. A large proportion of people residing in peri-urban areas are floating population (people living in irregular zones), in unauthorized development (wrt urban planning regulations), in informal /squatter settlements, and in locations highly vulnerable to natural disasters.

برون شهری

**pertain**/per'teyn/vi

pertaining/per'teyning/adj

In light of the interrelated and complex reality Small Island Developing States, SIDS, face, vis-à-vis disaster risk, the Featured Event aims to draw upon national and regional experiences through the perspectives of political leaders, experts and stakeholders in various aspects pertaining to the disaster risk reduction agenda for SIDS.

متعلق بودن به، مربوط بودن به، مناسب بودن

مربوط (به)، متعلق (به)، مناسب

**pesticide**/ 'pestisâyd /n

In a real disaster, victims would be hosed down to wash away the chemicals, using cold water to close their pores and prevent them from further absorbing

حشره کش، آفت کش، سم دفع آفات

participatory / pãrtisi'peyteri/ adj

مبتنی بر مشارکت افراد

At the outset, participant's identified major problems and gaps facing organizations involved in disaster management and complex emergency response, which, should be addressed in training. They cited problems ranging from knowledge sharing mechanisms to fundraising from coordination and partnering to ethics.

**patriarch**/ peytri'yãrk/ n

مرد خانواده، رئیس قبیله، ریش سفید قوم، شیخ مردم سالار،

patriarchal/ peytr'yãrkãl/ adj

پدرسالار، مرد سالارانه، پدرسالارانه

patriarchy/ peytri'yãrki/ n

نظام (مردسالاری)، نظام پدرسالار

Post disaster resource distribution often reflects the patriarchal structure of society where women may not have a voice in reconstruction planning and are marginalized in their access to their resources.

**peak acceleration** / piik aksele'reyshen / n

اوج شتاب، حداکثر شتاب

During an earthquake when the ground is shaking, it also experiences acceleration. The peak acceleration is the largest acceleration recorded by a particular station during an earthquake

**people- centered**/'piipel'senterd/adj

مردم محور

We can and must further build the resilience of nations and communities to disaster through people – centered early warning systems.

**people-centered approach**/ piipel'senterd e'proch /n

رویکرد مردم محور

Effective early warning a people-centered approach to make communities safer.

Dr.Raymond Ford, president of the Barbados Red Gross Society, "...warning systems by themselves are of little value unless communities understand how they work and how warnings should be transmitted...

**perceivable**/per'siivabel/adj

محسوس، ممکن، به طور محسوس

perceivably/ per'siivabli/adv

دریافتنی، درک کردنی، مشاهده کردنی

perceive/ per'siiv/vt

درک کردن، یافتن، متوجه شدن، پی بردن به، احساس کردن،

According to a group of geologists from the Massachusetts Institute of Technology and the Chengdu Institute of Geology and Mineral Resources, the criteria used to assess the likelihood of earthquakes should be reevaluated after the unexpected May 12 quake occurred in a region that was perceivably of low risk.

تعبیر کردن، تلقی کردن، مشاهده کردن

**perceptible** / perseptible/adj

محسوس، قابل ملاحظه

Perceptibly / perseptibli /adv

به طور محسوسی، به طور قابل ملاحظه‌ای

Never thless, "response", being the most perceptible

**panel** /'panel/ n

panellist/ panelist /n

Satellite – based disaster management, virtual space doctors and the potential threat of an asteroid or meteor crashing into Earth were among key agenda items of the latest session of a United Nations panel on outerspace.

هیاتی از کارشناسان، هیات، اعضا هیات، میزگرد  
عضو شرکت کننده در میزگرد

**paradigm**/'paradâym/n

With the significant advancement in the understanding of the natural processes that underlie the hazardous events, a more technocratic paradigm came into existence which conceded that the only way to deal with disasters was by the public policy application of geophysical and engineering knowledge and the associated interventions.

پارادایم، الگوواره، نمونه

**paramedics**/para'medics/n

The paramedic is a healthcare professional who works in **emergency medical** situations. A paramedic may be more formally defined as a medical professional who provides medical care at an advanced life support level in the pre-hospital environment, usually in an emergency, at the point of illness or injury. This includes an initial assessment of the patient after a particular health crisis. Treatment can also be continued en route to a hospital if more definitive care for the patient is required. Paramedics provide advanced levels of care for medical emergencies and trauma.

پیراپزشک، اعضا تیم اورژانس پیش بیمارستانی

**paramount**/'pramaont/ adj

Disaster can strike at any time and being under insured or unprepared can wreck havoc in anyone's life. This is of paramount importance to homeowners who generally have a lot riding on their homes and will experience serious financial repercussions.

فوق‌العاده، بسیار زیبا، مهم، در درجه اول اهمیت

مشارکت، شرکت

translate the growing momentum for risk reduction into rapid action based on sound strategies.

**overarching** / over'ârching / adj

Much has been done in Ethiopia over the past thirty five years to shift from disaster response towards an all-inclusive disaster risk management approach. The recently adopted policy sets out the necessary steps to build overarching disaster risk management architecture in the country.

فراگیر، گسترده، دامنه‌دار

**overlap** / 'overlap/ n

overlap/ over'lap/ vt, vi

To further improve the current reform and to reduce potential overlap and fragmentation, it would be prudent for the membership to reexamine mandates concerning internally displaced persons, with a view to clearly determining responsibility for assistance to this population, including reinforcing the role of the Emergency Relief Coordinator in coordinating country – level assistance and protection.

تداخل، هم‌پوشانی  
تداخل داشتن، هم پوشانی داشتن

**overlay** /over'ley/vt

In addition, the geographical distribution of poverty and hazards estimates can be overlaid with geo-referenced data on important community information related with local infrastructure (roads, electricity and telecommunications), health and education facilities and the travel distance to them.

تحت‌الشعاع قرار دادن، پوشاندن  
لایه، پوشش

**overlook** /over'luk /vt

overlooked /over'lukt /adj

Even though indigenous cultural values, practices and traditions lie at the heart of the social fabric of local communities around the world, these values are often overlooked or marginalized during disaster management –initiatives.

بی‌توجهی کردن به، نادیده گرفتن، غفلت کردن  
نادیده گرفته شده، مورد غفلت قرار گرفته

**overwhelm** / over'welm /vt

Climate change is overwhelming the capacity of relief agencies to cope with people made sick or homeless by natural disasters.

در هم کوبیدن، تحت کنترل درآوردن، مستاصل کردن، از پا درآمدن

**ocean bottom seismometer** /'oʃenbâtem sâyzmâ'mittter/n

لرزه‌سنج بستر اقیانوس

Ocean Bottom Seismometer (OBS) is a seismometer that is designed to record the earth motion under oceans and lakes from man-made sources. Sensors at the sea floor are used to observe acoustic and seismic events. Seismic and acoustic signals may be caused by different sources, by earthquakes and tremors as well as artificial sources.

**online and offline**/ân 'lâyn and âf 'lâyn/adj

برخط و برون خط

For more than a decade, NCDP has been a professional training ground for more than 100,000 online and face-to-face learners. Our web-based learning management system provides an efficient means for training and “just-in-time” resources, and has been designed to accommodate a robust evaluation and certification process. More than 40 free online courses are available to help public health workers master the skills and knowledge—and demonstrate the competencies—that they will need in a public health emergency.

**on-scene coordinator**/ân-siin ko'ordineyter/ n

هماهنگ کننده مقیم

The OSC or his designate is responsible for obtaining Ministry of Environment clearance for the disposal of substances or wastes associated with pollution incidents within the context of the plan.

**ongoing**/ân go-ing/adj

در دست اقدام، جاری، در جریان، در حال پیشرفت

Disasters can be considered an outcome of an ongoing “risk process”, in which the prevailing circumstances of hazards, exposure and vulnerabilities combine to generate disaster risk.

**onset** /ânset / n

آغاز، شروع، حمله، هجوم

The continuation or quick rehabilitation of effective environmental health services is of primary importance in emergency health management after the onset of a natural disaster.

**operation** / âpe'reyshen/ n

عملکرد، کار، فعالیت، عملیات

operational / âpe'reyshenâl/ adj

عملی، عملیاتی، قابل استفاده، قابل بهره‌برداری

operationalise / âpe'reyshenâliz/ vt

عملیاتی کردن، قابل استفاده نمودن، قابل بهره‌برداری نمودن

operative / âperetive/ adj, n

قابل اجرا، در حال بهره‌برداری، قابل بهره‌برداری

Many of WFP's emergency response operations have disaster risk mitigation components, for example raising of houses in flood areas, construction of water catchments, tree planting and terracing.

**outstrip** / aot'strip / vt

جلو زدن از، پشت سر گذاشتن، بهتر انجام دادن از

As rapidly increasing risk the region threatens to outstrip the mitigation capacity there is need to

**occur**/â'ker/vi

occurrence/ â'kârens/n

Mitigation activities actually eliminate or reduce the probability of disaster occurrence, or reduce the effects of unavoidable disasters. Mitigation measures include building codes; vulnerability analyses updates; zoning and land use management; building use regulations and safety codes; preventive health care; and public education.

رخ دادن، اتفاق افتادن

رویداد، اتفاق، وقوع

**norm**/ norm/ n

normal/'normâl / adj, n

normalcy/'normâlsi / = normality/n

normalization/ normâlây'zeyshen / n

normalize/' normâlây'z/ vt,vi

normally/'normali / adv

Recovery is the fourth phase of disaster and is the restoration of all aspects of the disaster's impact on a community and the return of the local economy to some sense of normalcy. By this time, the impacted region has achieved a degree of physical, environmental, economic and social stability.

**normative**/'normetiv/adj

The main challenges for disaster preparedness development of normative and legal base, establishment of research institutes, emergency management upgrade, additional and technical reserves, institutional strengthening of control and local authorities, professional training and community training

**Nor'wester**/nor'wester/n

A weather pattern that develops over the Bay of Bengal during the hot months of the year. The duration of nor'westers may last over an hour and are more frequent in late afternoon.

**notability**/note'biliti/n

notable/'notebel/adj,n

notably/'notebli/adv

The next notable era in the evolution of emergency management took place during the 1950's. The Cold War years presented as the principal disaster risk the potential for nuclear war and its subsequent radioactive fallout. Civil Defense programs proliferated across communities during this time.

**note** /not/ vt

The committee noted the importance of the forthcoming second session of the Global Platform for Disaster Risk Reduction in June 2009.

**notifiable** / noti'fâyebel/adj

notification/ notifi'keyshen/ n

notify / 'notifây / vt

To enhance early warning systems (EWS), ADPC, under the Indian Ocean Early -Warning System Programme also introduced the Tsunami Alert Rapid Notification System Programme with emphasis on robust ICT systems to disseminate information and warnings from the national to the community level.

**natural hazards** / nachrâl'hazardz/n

A natural hazard is a threat of a naturally occurring event that will have a negative effect on people or the environment. Many natural hazards are interrelated, e.g. earthquake can cause tsunamis and drought can lead directly to famine. A concrete example of the deviation between a natural hazard and a natural disaster is that the 1906 San Francisco earthquake was a disaster, whereas earthquakes are a hazard. A natural hazard becomes a natural disaster when it affects people, officially causing more than 10 deaths, injuring more than 100 people, and/or causing \$16,000,000 of damage.

مخاطرات طبیعی، حوادث طبیعی

**neutralization**/nyootrâl â'zeyshen/ n

neutralize/'nyootr âlâyz/vt

The goals of Emergency Management Program Committee is to save lives, reduce suffering, sustain health and morale, minimize property damage, maintain and restore utilities and essential services; simply put, they work to neutralize the effects of emergency and effect rehabilitation.

بی طرفی، خنثی سازی، خنثی شدگی  
بی طرف اعلام کردن، خنثی کردن، بی اثر کردن**niche**/nich/n

This research effort maps out the DRR advocacy landscape and identifies: key players and relationships, key issues and policy agendas within DRR, key approaches to advocacy, and niche opportunities for Cooperative for Assistance and Relief Everywhere (CARE).

فرصت، موقعیت خوب، وضع خوشایند

**non- structural measures**/nân-'strâkcherâl 'mezherz/n

Non-structural measures are any measure not involving physical construction that uses knowledge, practice or agreement to reduce risks and impacts, in particular through policies and laws, public awareness raising, training and education. Common non-structural measures include building codes, land use planning laws and their enforcement, research and assessment, information resources, and public awareness programs.

اقدامات غیرسازه‌ای

**nonlinear soil response**/nân'liniyer soyl ris'pâns/n

Geotechnical models consistently indicate that the stress-strain relationship of soils is nonlinear and hysteretic, especially at shear strains larger than  $\sim 10^{-5}$  to  $10^{-4}$ . Nonlinear effects, such as an increase in damping and reduction in shear-wave velocity as excitation strength increases, are commonly recognized in the dynamic loading of soils. On the other hand, these effects are usually ignored in seismological models of ground-motion prediction because of the lack of compelling corroborative evidence from strong-motion observations.

پاسخ غیرخطی خاک

# Nn

**national platform for disaster risk reduction**/'nashnâl 'platform for di'zâster risk ri'dâkshen/n

A generic term for national mechanisms for coordination and policy guidance on disaster risk reduction that are multisectoral and interdisciplinary in nature, with public, private and civil society participation involving all concerned entities within a country.

Effective government coordination forums are composed of relevant stakeholders at national and local levels and have a designated national focal point. For such mechanisms to have a strong foundation in national institutional frameworks, further key elements and responsibilities should be established through laws, regulations, standards and procedures, including: clearly assigned responsibilities and authority; building awareness and knowledge of disaster risk through the sharing and dissemination of non-sensitive disaster risk information and data; contributing to and coordinating reports on local and national disaster risk; coordinating public awareness campaigns on disaster risk; facilitating and supporting local multisectoral cooperation (e.g., among local governments); and contributing to the determination of and reporting on national and local disaster risk management plans and all policies relevant for disaster risk management.

**national policies**/'nashnâl 'pâlisiz/n

The Hyogo Declaration affirmed that states have the primary responsibility to protect the people and property on their territory from hazard, and highlighted the necessity of giving high priority to disaster risk reduction in national policy, consistent with their capacities and the resources available to them.

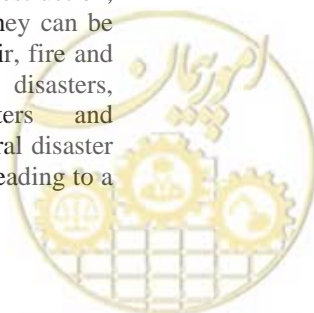

**natural disaster** /nachrâl di'zâster/n

Natural disasters are events that we have no control over that can lead to environmental destruction, financial loss and/or loss of human life. They can be linked back to the four elements of earth, air, fire and water in the form of geological disasters, meteorological disasters, fire disasters and hydrological disasters. Sometimes one natural disaster can lead to another, such as an earthquake leading to a tsunami, or a flood causing a mud slide.

سازوکار ملی برای کاهش خطرپذیری بلایا،  
مکانیزم ملی برای کاهش خطرپذیری بلایا

سیاست‌های ملی، خط‌مشی‌های ملی

بلای طبیعی، سانحه طبیعی

different type in contexts where hazardous events may occur alone, simultaneously, cascadingly or cumulatively over time, and taking into account the potential interrelated effects. A multi-hazard early warning system with the ability to warn of one or more hazards increases the efficiency and consistency of warnings through coordinated and compatible mechanisms and capacities, involving multiple disciplines for updated and accurate hazards identification and monitoring for multiple hazards.

**multilateral**/mâlti'laterâl/adj

چند جانبه

Few bilateral or multilateral donors have integrated their support for DRR and adaptation. Many DRR programs are founded from humanitarian budgets and coordinated from humanitarian aid departments. In most cases, this segmentation of the DRR agenda is making it more difficult to achieve integration with adaptation, but with the broader development agenda.

**municipal**/myoo'nisipâl/adj

شهری، داخلی

municipality/myoonisi'paliti/n

شهرداری

The district municipality must establish in its administration a disaster management centre for its municipal area in consultation with the local municipalities within its area, and may operate such centre in partnership with those local municipalities.

**myriad**/miriyad/n,adj

هزاران، هزارها، بی‌شمار، گوناگون

Planning for security has also, since 9/11, become salient on many political agendas. Moreover, many of the myriad decisions, policies, and plans made by communities and governments (e.g. / land use zoning or infrastructure planning) often have profound but unrecognized impacts on environmental risks. A sound understanding of risks and risk management is therefore important for all planners to acquire.

Federation of Red Cross and Red Crescent Societies  
Disaster preparedness office in Geneva.

**monitor**/'mâniter/vt

monitor / 'mâniter/ n

Space technology plays a crucial role in efficient mitigation of disasters. While communication satellites help in disaster warning, relief mobilization and tele-medical support, earth observation satellites provide required database for pre – disaster preparedness programmes, disaster response, monitoring activities, and post- disaster damage assessment, and reconstruction, and rehabilitation.

پایش کردن، نظارت کردن، کنترل کردن  
مونیتور، نمایشگر رایانه، دستگاه کنترل

**monitoring tools**/mânitering toolz/n

As an internal tool for use by the health sector, it will aid in determining priorities for a national health sector risk reduction or disaster management program( or set of initiatives) and, if used regularly, as a monitoring tool for measuring changes ( or lack thereof) over time.

ابزار نظارتی

**monsoon**/ mân'soon/ n

It must be emphasized that any programme of this type is not a one – off operation but must be repeated at regular intervals and especially during periods before disasters frequently occur (i.e. heavy rains and flooding during the southwest monsoon, the typhoon season or other adverse weather periods).

بادهای موسمی که در اقیانوس هند به سمت شمال و به طرف  
قاره آسیا می‌وزد، موسم بارندگی، بارندگی سنگین

**mudslide**/ mâdslây/d/ n

Mudslides, also known as debris flows or mudflows are a common type of fast-moving lands lide that tends to flow in channels.

Mudslides develop when water rapidly collects in the ground and results in a surge of water – soaked rock, earth and debris. Mudslides usually begin on steep slopes and can be triggered by natural disasters.

رانس گل

**multi-hazard**/mâlti/ 'hazerd/n, adj

means (1) the selection of multiple major hazards that the country faces, and (2) the specific contexts where hazardous events may occur simultaneously, cascadingly or cumulatively over time, and taking into account the potential interrelated effects.

Hazards include (as mentioned in the Sendai Framework for Disaster Risk Reduction 2015-2030, and listed in alphabetical order) biological, environmental, geological, hydrometeorological and technological processes and phenomena.

چند مخاطره‌ای

**multi-hazard early warning systems** /mâlti 'hazerd  
erli 'woring systemz/n

Address several hazards and/or impacts of similar or

سامانه‌های هشدار سریع چند مخاطره‌ای

The lessening or minimizing of the adverse impacts of a hazardous event.

The adverse impacts of hazards, in particular natural hazards, often cannot be prevented fully, but their scale or severity can be substantially lessened by various strategies and actions. Mitigation measures include engineering techniques and hazard-resistant construction as well as improved environmental and social policies and public awareness. It should be noted that, in climate change policy, "mitigation" is defined differently, and is the term used for the reduction of greenhouse gas emissions that are the source of climate change.

**mobilization**/mobilây'zeyshen/n

mobilize-ise/mobilâyz/vi,vt

Cuba has effectively implemented a system of popular mobilization and education to prepare people for such natural disasters as hurricanes. Compliance with evacuation orders is impressive. Top priority is attached to saving lives.

تجهیز، بسیج

تجهیز کردن، بسیج کردن

**mock**/mâk/vt,vh,adj

Activities under PSO II include development of school primers on disaster management, training of teachers in curricula, preparedness and response activities, mock drills in school, etc.

آزمایشی، تمرینی

**modality**/mo'daliti/n

Decides to further study the modalities for strengthening regionally coordinated disaster information management and early warning, including the viability of establishing a regional center for information, communication and space technology – enabled disaster management.

شرایط و اصول حاکم بر، وجه تمایز، شکل، (به صورت جمع) تشریفات،

قانونی، الزامی، اجباری، تحت قیومیت  
واجب، اجباری، حتمی، ضروری، الزام آور

**mandatory safety audit**/'mandetri 'seyfti 'odit/n

Mandatory safety audit of all existing school buildings with respect to their location, design and quality of construction and prioritizing them for demolition, retrofit or repair.

ممیزی ایمنی اجباری

**manifest**/'manifest/adj,n,vt

manifestation /manifes'teyshen/n

manifestly /'manifestli /adv

manifesto /mani'festo /n

The paradigm shift in poverty reduction programs- from income poverty to human poverty- has almost been matched in the disaster management sector. Disasters are no longer seen as extreme events, created entirely by natural forces, but as manifestations of unsolved problems of development.

آشکار، روشن، هویدا، نشان دادن، آشکار کردن  
نمود، تجلی، ابراز، اظهار، بروز، نشانه، مظهر آشکارا، به  
روشنی، به وضوح  
بیانیه، مانیفست

**marginal lands**/'mârjinâl landz / n

On the other hand insecure, inequitable and opaque land tenure systems lead many to live in marginal, hazard – prone areas without infrastructure required to withstand the natural threats dictated by geography and climate. The marginal lands typically settled by low- income communities are rarely surveyed and integrated in disaster risk assessment.

اراضی پست، زمین های فاقد ارزش کشاورزی

**marginalized groups**/'mârjinâlâyzd groops/ n

The vision of the National Disaster Management Authority, NDMA, is to achieve sustainable social, economic and environmental development in Pakistan through reducing risks and vulnerabilities, particularly those of the poor and marginalized groups, and be effectively responding to and recovering from all types of disaster events.

اقشار رانده شده، گروه های حاشیه ای، اقشار نادیده گرفته شده

# M m

**mainstream**/'meynstriim/ n, adj

mainstream/ 'meynstriim/vt

The Indian government has embraced the new paradigm for disaster management as part of development and it plans to mainstream prevention, preparation and mitigation into all sectors.

روند کلی، خط فکری، رایج، شایع  
هماهنگ کردن، یکی کردن، نهادینه کردن، (به هم) ملحق  
کردن، عمومی کردن

**malaria**/ma'leriyâ/n

malarial/ma'leriyâl/adj

Symptoms of malaria include fever, headache, and vomiting, and usually appear between 10 and 15 days after the mosquito bite. If not treated, malaria can quickly become life-threatening by disrupting the blood supply to vital organs. In many parts of the world, the parasites have developed resistance to a number of malaria medicines.

مالاریا  
مالاریایی، مبتلا به مالاریا، مالاریا خیز

**malnourished**/mal'nârisht/adj

malnutrition/malnoo'trishen/n

Food shortages and crop destruction after heavy floods may increase the prevalence of malnutrition in some populations: thereby increasing the host susceptibility to diseases. Though malnutrition is usually based on a chronic food shortage, acute disaster – induced food shortages may trigger serious malnutrition in an otherwise nutritionally marginal population, thus increasing susceptibility of the population to disease and high mortality rates.

دچار سوء تغذیه  
سوء تغذیه، بدی تغذیه

**management of dead bodies**/'manijment av ded 'bâdiz/n

In disaster situations, the State and its authorities are responsible not only for being prepared to effectively provide immediate assistance to disaster victims and to maintain basic services following an event. It is also the State's responsibility to attend to the handling and final disposal of dead bodies resulting from the disaster, regardless of their numbers. The management of dead bodies involves a series of activities that begin with the search for corps, in situ identification of the body, transfer to the facility that serves as a morgue, delivery of the body to family members, and assistance

مدیریت اجساد

loss/lâs /n

loos – making / lâs mayking / adj

lost/ lâst/adj

lost cause / lâst'koz/n

Drought and famine have proved to be the deadliest disasters globally, followed by flood, technological disaster, earthquake, winds storm, extreme temperature and others. Global economic loss related to disaster events average around US\$880 billion per year.

**loss of business opportunities/** lâs âv 'biznis âpor'tyoonitiz/ n

A post – disaster community development plan may use disaster recovery funds to redevelop the area in a way that improves or reduces loss of business opportunities in the disaster area.

**loss of human life/âls âv 'hyooman lâyf/ n**

On August 6, 2010, in the dark of the midnight, there were flash floods due to cloud burst in Leh in Ladakh region of North India. It rained 14 inches in 2 hours, causing loss of human life and destruction. The civil hospital of Leh was badly damaged and rendered dysfunctional. Search and rescue operations were launched by the Indian Army immediately after the disaster.

**leverage** /'leverij/ n

The committee recommended that the secretariat consider leveraging existing ICT – enabled infrastructure networks, such as telecenters, to be used

نفوذ، قدرت نفوذ، وسیله اعمال فشار، زور، قدرت

# LI

## **lahar**/ 'lâhâr/ n

The conjunction of heavy rain following a volcanic eruption is producing lahars. Lahars are a type of mudflow or landslide composed of pyroclastic material and water that flows down from a volcano, typically along a river valley. The term “lahar” originated in the Javanese language of Indonesia.

گل روان (واژه گل روان در زبان اندونزیایی)

## **land – locked countries**/ land lâkt 'kântriz/n

A landlocked country is a country entirely enclosed by land, or whose only coastlines lie on closed seas. There are 48 landlocked countries in the world, including partially recognized states. No landlocked countries are found on the continents of North America, Australia and Antarctica. The general economic and other disadvantages experienced by landlocked countries make the majority of these countries Landlocked Developing Countries (LLDCs). Nine of the twelve countries with the lowest HDI, Human Development Index, scores are landlocked.

کشورهای محصور در خشکی

## **land use planning**/land yoos 'planning/n

Land use planning is the term used for a branch of public policy which encompasses various disciplines which seek to order and regulate the use of land in an efficient and ethical way, thus preventing land use conflicts.

برنامه‌ریزی استفاده از زمین

## **landslip**/landslip/n

A landslide, also known as a landslip is a geological phenomenon which includes a wide range of ground movements, such as rockfalls, deep failure of slopes and shallow debris flows, which can occur in offshore, coastal and onshore environments. Although the action of gravity is the primary driving force for a landslide to occur, there are other contributing factors affecting the original slope stability. Typically, pre-conditional factors build up specific sub-surface conditions that make the area/slope prone to failure, whereas the actual landslide often requires a trigger before being released.

رائش زمین، (ریزش) کوه، زمین لغزه

# K k

## **keynote** /'kiinote/n

The keynote presentation addressed the critical issues associated with business continuity in the face of major disasters and featured a panel of IT experts discussing the impact of the World Trade Center attacks on their organizations, as well as first – hand experience and lessons learned.

اصلي، عمدہ، موضوع اصلي، مطلب عمدہ

## **know-how** /'nohao/n

Swiss Agency for Development and Cooperation will contribute to and facilitate the regional (in particular countries on the southern slopes of the Himalaya-Karakoram-Hindu Kush mountain ranges) mechanisms on regular sharing of knowledge and know how in disaster risk reduction.

دانش عملي يا تجربي، کاردانی، مهارت

## **knowledge hub** /'nâlij hâb/n

ICHARM is focusing the initial phase of its mission on risk management of flood-related disasters, such as flash floods, continental floods, landslides, debris flows, storm surges, and tsunamis. ICHARM bases its operations on three pillars of activity: research, training, and information networking. ICHARM collaborates closely with organizations throughout the world to ensure that the solutions it proposes reflect local geographical and societal conditions. As the regional water knowledge hub for disaster risk reduction and flood management, ICHARM can assist central and local government agencies, local communities, and others.

درگاه دانش

## **knowledge networking** /'nâlij netwerking/n

Knowledge networking is an effective way of combining individuals' knowledge and skills in the pursuit of personal and organizational objectives. Knowledge networking is not easy to define or describe. It is a rich and dynamic phenomenon in which knowledge is shared, developed and evolved.

شبکه دانش

intervention /inter'venshen/n

مداخله، دخالت

Interventionism / inter'venshenizm /n

سیاست مداخله‌گری، مداخله جویی

Interventionist / inter'venshenist /adj

مداخله‌گرانه، مداخله جویانه

In order to fully understand the necessity for and functions of a Crisis Intervention Team, it is important to have a basic understanding of the psychological factors which influence the emotional responses of disaster victims.

**intrinsic**/in'trinsic, -zik/adj

ذاتی، درونی، داخلی

intrinsically/in'trinsikli/adv

ذاتاً، فطراً، فی نفسه، به خودی خود

We recognize the intrinsic relationship between disaster reduction, sustainable development and poverty eradication, among others, and the importance of involving all stakeholders, including governments, regional and international organizations and financial institutions, civil society, including non-governmental organizations and volunteers, the private sector and the scientific community.

**inundate** /'inândeýt/vt

زیر آب بردن، غرق کردن، زیر آب بردن، آب بستن به

Inundation /inân'deyshen/n

سیل گرفتگی، آب گرفتگی، سیل آب گرفتگی

Japan has attempted to minimize the inundation area by construction of tsunami seawalls (often more than 10 m high) along the shoreline.

**Inventory**/'inventri/n,vt

فهرست، صورت، صورت موجودی، صورت‌برداری کردن از،

In addition, a large inventory of existing structures lack earthquake-resistant design and have not been retrofitted to meet current design codes.

موجودی

exposed to intense hazards such as strong earthquakes, active volcanoes, heavy floods, tsunamis or major storms but also have high levels of vulnerability to these hazards.

**intensive risk**/in'tensive risk/n

The risk associated with the exposure of large concentrations of people and economic activities to intense hazard events, which can lead to potentially catastrophic disaster impacts involving high mortality and asset loss.

خطرپذیری شدید، ریسک زیاد

**inter – regional** / inter –'riijenâ/n

The ICDRR focuses on international and inter – regional cooperation and collaboration in drought risk reduction.

درون منطقه‌ای، بین منطقه‌ای

**inter alia**/inter 'eyliyâ/adv

The Hyogo Framework calls for disaster risk reduction to be integrated into sustainable development plans of both rich and poor nations in order to stem economic losses due to disaster. This is done, inter alia, by strengthening risk assessment and investing in disaster prevention and early warning. The Hyogo Framework also calls on nations and communities to improve the resilience of vulnerable populations as an additional way of containing the social and economic impact of disasters on society as a whole.

ضمناً، علاوه بر چیزهای دیگر، در کنار چیزهای دیگر

**inter sectoral coordination**/inter' sektorâl ko-ordi'neyshen/n

Plans intersectoral coordination with the participation of the Ministry of Finance so that social development plans are considered in allocation of resources.

هماهنگی بین بخشی

**interagency task force**/ inter'eyjensi 'tâsk fors/ n

The president can also establish a Federal interagency task force to implement predisaster mitigation plans administered by the Federal Government. The Director of Federal Emergency Management Agency (FEMA) serves as the chairperson of the task force. Other members of the task force include relevant Federal agencies, State and local organizations, and the American Red Cross.

ستاد حوادث درون سازمانی

**interim**/ 'interim/ n, adj

This document presents the interim progress in the implementation of the Hyogo Framework for Action in some countries of the Asia and the Pacific region.

نهادی، نهادی شده، تثبیت شده، ریشه‌دار

**instrument** /'instrument /n

Instrumental /instru'mentâl /adj

Instrumentality/instrumen'taliti / n

Instrumentation/instrumen'teyshen / n

This will be done through enhancing stakeholder awareness, providing disaster risk management information, teaching disaster risk reduction in particular, and utilizing information, tools, instruments towards the participants' knowledge and experiences.

ابزار، وسیله، سند، دستگاه

ابزاری، موثر

کمک، دستیاری، وسیله، واسطه، عامل

وسيله، واسطه، عامل، ابزار دقیق، ابزارهای سنجش

**integrated approach**/intigreytid e'proach/n

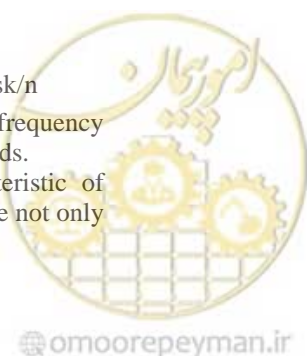

Comprehensive Emergency Management (CEM) is an integrated approach to the management of emergency programs and activities for all four emergency phases (mitigation, preparedness, response, and recovery), for all types of emergencies and disasters (natural, man-made, and attack), and for all levels of government and the private sector.

رویکرد یکپارچه

**Intensive disaster risk**/in'tensive di'zâster risk/n

The risk of high-severity, mid- to low-frequency disasters, mainly associated with major hazards. Intensive disaster risk is mainly a characteristic of large cities or densely populated areas that are not only

خطرپذیری شدید بلایا، ریسک زیاد بلایا

Over the past decade, the number of natural and man made disasters has claimed inexorably. From 1998, reported disasters average was 428 per year showing an increase of about 60 percent over the previous years.

**inhere**/in'hiyer/vi

inherent/in'hiyerent/adj

inherently/in'hiyerentli/adv

The Philippines is one of the most hazard prone countries in the world. Its location in the tropics and in the Pacific Ring of Fire exposes it to multiple natural hazards including typhoons, floods, drought, as well as earthquakes and volcanic eruptions. This inherently high disaster risk is exacerbated by the effects of unplanned urbanization, environmental degradation, and global climate change. The resulting human and economic costs of disasters are significant. Over the last ten years, the Philippines have witnessed over 6,000 people killed, over 23 million people affected, and about 1.3 billions of dollars in economic damage (EM-DAT).

inexorably/ in'eksorebli/adv

بی‌وقفه، تغییرناپذیر، بی‌چون و چرا  
به طور اجتناب‌ناپذیر، به طور مهار نشدنی

their arrival or as the situation dictates. Even if subordinate positions are not assigned, the incident commander position will always be designated or assumed. The incident commander may, at their own discretion, assign individuals, who may be from the same agency or from assisting agencies, to subordinate or specific positions for the duration of the emergency.

**include**/ in'klood/ vt

including/ in'klooding / prep

inclusion/ in'kloozhen/ n

inclusive/ in'kloosive/adj

Through promoting the socio-economic and cultural inclusion, as well as the political recognition of marginalised people, this paper provides examples of where their participation as active agents of change has proven beneficial for achieving effective and equitable resilience. This evidence will support recommendations for the inclusion and empowerment of vulnerable groups within the post-2015 framework for DRR.

**incorporate**/ in'korporeyt/vt, vi

incorporated/ in'korporeytid/adj

incorporation/ in'korporeyshen/ n

The discussion considers how sustainability considerations are currently incorporated into the use of these tools, and how sustainability could be incorporated to a greater extent with additional research and development. Our discussion of particular tools should not be interpreted to mean those tools are most appropriate, or that tools not discussed are inappropriate.

**incumbent**/in'kâmbent/adj,n

The issue of children's access to education following a disaster is fundamentally the same as access to education at any time. It is incumbent upon education authorities to "expect the unexpected" and to have adequate contingency plans for educational continuity in the face of a variety of known hazards.

**incur**/in'ker/vt

incurred/in'kerd/adj

Cyclones, tsunamis, floods, droughts, earthquakes and volcanoes are a few examples of natural disasters; and wars and nuclear accidents fall in the category of the man-made disasters. All these calamities and catastrophes incur heavy toll on man and his habitat. However, the disasters can be mitigated and losses can be minimised with efficient preparedness and management.

دور از دسترس، غیرقابل دسترس، غیرقابل فهم

**incentive** /in'sentiv /n

One aspect of the incentive structure, international provision of humanitarian aid after a disaster, is difficult to remove, given the humanitarian imperative to provide assistance. However, provision of reconstruction funding should be conditional on proper risk reduction planning – meaning that funding will only be provided for reconstruction programs designed to reduce future risk.

مشوق، محرک، انگیزه، شوق، اشتیاق، دلگرمی

**inception** /in'seption/n

Pakistan Red Crescent (PRC) has responded to disasters since its inception in 1947. In 2002 Disaster Management (DM) became a number one priority area of PRCS, leading to the establishment of the Disaster Management Department. The DM system was established at all levels of PRCS from 2005 to 2008, and during 2009-2010 further extended to 40 most vulnerable districts by establishing Disaster Management Cells.

شروع، آغاز

**incident commander** /insident kâ'mânder/n

The incident commander is the person responsible for all aspects of an emergency response; including quickly developing incident objectives, managing all incident operations, application of resources as well as responsibility for all persons involved. The incident commander sets priorities and defines the organization of the incident response teams and the overall incident action plan. The role of incident commander *may* be assumed by senior or higher qualified officers upon

فرمانده حادثه

**impinge**/im'pinj/vi

impinging/im'pinjing/adj

The country has also witnessed a rise in annual mean temperature due to an impinging process of climate change.

تاثیر گذاشتن، اثر گذاشتن، تاثیر سو گذاشتن

تاثیرگذار، اثرگذار

**implicate**/'implikeyt/vt

implication/im'plikeyshen/n

With the myriad challenges of mass poverty and underdevelopment across Africa, what implication does the HFA(The Hyogo Framework for Action hold for disaster risk reduction and management in African States?

بسیار، بی اندازه، بی حد و حصر

**impact dimensions**/ 'impakt di'menshenz/ n

Risk management involves measures to avoid disasters, prevention, as well as measures to limit the impact dimensions of disasters (preparedness and mitigation).

ابعاد تاثیر، دامنه اثر

**impede**/im'piid/vt

impediment/im'pediment/n

Small Island Developing States continue to “grapple with the effects of natural disasters, including those due to climate change, which impede progress towards sustainable development.”

جلوگیری کردن، مانع شدن، سد راه شدن  
مشکل، مانع، سد راه، اختلال

**impending**/im'pending/adj

With the 2014 cyclone season now well and truly with us, the Carins District Disaster Management Group (DDMG) is actively preparing for the various contingencies as they keep a close eye on an impending weather system that is making its presence felt in the Coral Sea.

نزدیک، در راه، قریب الوقوع

**impetus** /'impites /n

The major disasters provided a strategic impetus for the establishment and development of natural disaster preparedness schemes in the Asia -pacific region.

عزم، انگیزه، حرکت، جنبش

**hurricane**/hâriken/ n

A severe tropical cyclone having winds greater than 64 Knots(74 mile per hour; 119 km per hour), originating in the equatorial regions of the Atlantic Ocean or Caribbean Sea or eastern regions of the Pacific Ocean, traveling north, northwest, or northeast from its point of origin, and usually involving heavy rains.

توفان شدید مناطق حاره، توفند، تندباد دریایی

**hydrometeorological** / haydromiitiyorolâjikal / n

The Philippines had developed a methodology on community – based flood early warning systems and documentation for hazard mapping for hydrometeorological and geological hazards that could be made available to other member countries.

هواشناختی آب، آب- هواشناسی، شاخه‌ای از هواشناسی که در خصوص جریان، تغییرات و حالات مختلف آب موجود در اتمسفر بحث می‌کند. کاربرد هواشناسی در مساله هیدرولوژی

**hydrometeorological hazards**/ haydromiitiyorolâjikal 'hazardz / n

Are of atmospheric, hydrological or oceanographic origin. Examples are tropical cyclones (also known as typhoons and hurricanes); floods, including flash floods; drought; heatwaves and cold spells; and coastal storm surges. Hydrometeorological conditions may also be a factor in other hazards such as landslides, wildland fires, locust plagues, epidemics and in the transport and dispersal of toxic substances and volcanic eruption material.

خطرات هیدروترئولوژیکی

**hypocenter**/ hâypo'senter/ n

An earthquake's hypocenter is the position where the strain energy stored in the rock is first released, and is the point where the fault begins to rupture. This occurs at the focal depth below the epicenter.

کانون، کانون زلزله، مرکز درونی زمین لرزه، میانگاه زمین لرزه

**hinterland** / 'hinterland / n

The Guyana Red Cross Society on launched two initiatives, for water and sanitation aimed at improving the lives of hinterland residents and another for enhancing countries' sustainability through comprehensive disaster management.

دورافتاده، مناطق دور افتاده، پس کرانه

**holism** / 'holizem/ n

holistic/ ho'listik/ adj

Promote and support dialogue with the aim of fostering a holistic approach towards disaster risk reduction.

کل نگری  
کل نگر، کل نگرانه

**homeless**/'homlis/adj

homelessness/'homlisnis/n

Across the 12 affected countries in Asia and Africa, more than 230000 people were reported dead or missing, over 2.1 million were displaced and left homeless.

بی خانمان، آواره، در به در، بی سرپناه  
بی خانمانی، آوارگی، در به دری

**hospital command center(HCC)**/'hâspitâl kâ'mând 'senter/n

An HCC is a designated location to convene and coordinate response activities, resources and information during a complex incident, emergency or disaster.

The HCC must receive, analyze, display, and disseminate information about the incident to enable executive decision-making;

The HCC must find, prioritize, deploy, and track critical resources;

The HCC must enhance decision making using C4I (communication, cooperation, coordination, collaboration, and intelligence).

مرکز فرماندهی بیمارستانی

**hub** / hâb / n

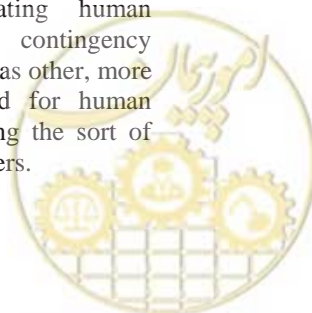

The community counts on the library, before and after a storm, to be a communication hub (offering copiers, phones, fax, computers, Wifi, Internet access recharges), as well as to offer hurricane preparation and recovery information and assistance.

درگاه، مرکز، کانون، مرکز ابزار انشعاب در شبکه محلی با  
پیکربندی ستاره‌ای که تمامی کابل‌های ارتباط دهنده  
رایانه‌های شبکه از آن عبور می‌کنند.

**human trafficking** /'hyooman'trafiking/n

An increase in human trafficking often comes in the wake of a natural disaster, but it usually takes a few months to manifest. so incorporating human trafficking prevention into disaster contingency planning may not appear to be as urgent as other, more immediate needs. But planning ahead for human trafficking is the first step in preventing the sort of exploitation that can follow major disasters.

قاچاق انسان

**hazardous material** /'hæzərdəs ma'teriyâl/ n

Dangerous goods, also called hazardous materials or HAZMAT, are solids, liquids, or gasses that can harm people, other living organisms, property, or the environment. They are often subject to chemical regulations. "HAZMAT teams" are personnel specially trained to handle dangerous goods. Dangerous goods include materials that are radioactive, flammable, explosive, corrosive, oxidizing, asphyxiating, biohazardous, toxic, phatogenic, or allergenic.

مواد خطرناک، مواد پر خطر، مواد مخاطره آمیز

**haze** / heyz /n

haze / heyz /vi,vt

hayz / 'heyzi /adj

Haze is traditionally an atmospheric phenomenon where dust, smoke and other dry particles obscure the clarity of the sky. The World Meteorological Organization manual of codes includes a classification of horizontal obscuration into categories of fog, icefog, steamfog, mist, haze, smoke, volcanic ash, sand and snow. Sources of haze particles include farming (ploughing in dry weather), traffic, industry and wildfires.

غبار  
غبارآلود شدن، غبارآلود کردن  
غبارآلود

**health sector** /'helth'sekter /n

WHO supports countries in building national capacity in risk reduction and emergency preparedness, and to assist the health sector in Member States in reducing the adverse public health consequences for communities in terms of mortality, morbidity, disability and damage to health care delivery services resulting from emergencies, disasters and other and other crises.

بخش سلامت

**high fidelity** /hâi fidelity/adj

Government investments in high-fidelity digital seismograph networks and community development of standards have created a global infrastructure for earthquake monitoring with few technical impediments to data sharing and real-time information exchange.

[دستگاه‌های صوتی] بسیار حساس، با کیفیت بالا

**hillside** /'hilsâyd/n

A disaster resistant organization of hillside community should satisfy the three function, "autonomous disaster management system in normalization", "disaster technical support system in institutionalization", and "disaster finance measures in standardization".

دامنه تپه، شیب تپه

**hinge** (hinj)vi,vt

The success of a state wide warning system hinges on the density of early warning capable seismic stations.

بستگی داشتن به، منوط بودن به

location, intensity or magnitude, frequency and probability. Biological hazards are also defined by their infectiousness or toxicity, or other characteristics of the pathogen such as dose-response, incubation period, case fatality rate and estimation of the pathogen for transmission.

**hazard analysis**/'hæzəd e'nælɪsɪs/n

تحلیل خطر

Hazard analysis is the process of recognizing hazards that may arise from a system or its environment, documenting their unwanted consequences and analyzing their potential causes. It is used as the first step in a process used to assess risk. The result of a hazard analysis is the identification of different type of hazards. A hazard is a potential condition and exists or not (probability is 1 or 0). It may in single existence or in combination with other hazards (sometimes called events) and conditions become an actual Functional Failure or Accident (Mishap). The way this exactly happens in one particular sequence is called a scenario. This scenario has a probability (between 1 and 0) of occurrence. Often a system has many potential failure scenarios. It also is assigned a classification, based on the worst case severity of the end condition. Risk is the combination of probability and severity. Preliminary risk levels can be provided in the hazard analysis. The validation, more precise prediction (verification) and acceptance of risk is determined in the Risk assessment (analysis). The main goal of both is to provide the best selection of means of controlling or eliminating the risk. The term is used in several engineering specialties, including avionics, chemical process safety, safety engineering, reliability engineering and food safety.

**hazard mapping**/'hæzəd 'mæpɪŋ/n

پهنه‌بندی خطر

A hazard map is a map that highlights areas that are affected or vulnerable to a particular hazard. They are typically created for natural hazards, such as earthquakes, volcanoes, landslides, flooding and tsunamis. Hazard maps help prevent serious damage and deaths.

**hazard- prone areas**/'hæzəd-prɒn 'eryəz/ n

نواحی خطرپذیر، مناطق خطرپذیر

Massive concentration of people in hazard-prone areas in citie-settlements where houses or infrastructures are not safely constructed lead to disastrous effects after an earthquake event at low scale.

**hazardous event**/'hæzədəs i'vent/n

واقعه خطرناک، واقعه پرخطر، واقعه مخاطره‌آمیز

The manifestation of a hazard in a particular place during a particular period of time. Severe hazardous events can lead to a disaster as a result of the combination of hazard occurrence and other risk factors.

# H h

## **hamper** / hamper / vt

Flash floods in northwest Kenya are hampering the delivery of emergency relief aid to thousands of pastoralists hard hit by a severe drought there, say officials.

جلو (چیزی را) گرفتن، مانع (چیزی) شدن

## **Handheld Amateur Radio (HAM) equipment**/n

Necessary support will be provided in terms of equipment like advanced communication equipment such as computer with internet facilities, HAM equipment, fax etc. to the district and state control rooms.

تجهیزات رادیو آماتوری، تجهیزات بی سیم آماتوری

## **harness**/'hârnis/ n,vt

harnessed/'hârnisd/adj

Yet, the fact remains, that sharing data and harnessing a river's potential together (as in the case of the Mekong River Commission between Cambodia, Laos, Thailand and Vietnam) is the only way to prevent /mitigate disasters like floods and, for whatever reason, this not happening in India.

مهار، مهار کردن، تحت کنترل درآوردن، آماده کردن  
مهار کرده، تحت کنترل درآمده، آماده کرده

## **hazard** /'hæzrd/n, vt

hazardous/'hæzrdes/ adj

A process, phenomenon or human activity that may cause loss of life, injury or other health impacts, property damage, social and economic disruption or environmental degradation.

Hazards may be natural, anthropogenic or socionatural in origin. Natural hazards are predominantly associated with natural processes and phenomena. Anthropogenic hazards, or human-induced hazards, are induced entirely or predominantly by human activities and choices. This term does not include the occurrence or risk of armed conflicts and other situations of social instability or tension which are subject to international humanitarian law and national legislation. Several hazards are socionatural, in that they are associated with a combination of natural and anthropogenic factors, including environmental degradation and climate change.

Hazards may be single, sequential or combined in their origin and effects. Each hazard is characterized by its

مخاطره، در معرض خطر، خطر، اتفاق، به خطر انداختن  
پرمخاطره، مخاطره آمیز، خطرناک

**grass roots**/ grâs 'roots/n

Discussion sessions included debates on urban risk, climate change and disaster risk reduction, the role of grass roots and indigenous women, communicating risk and the power of visual media, risk financing through public-private partnerships, up scaling grassroots efforts, and the development of a new generation of risk reduction actors.

عامه مردم، مردم عادی، توده مردم، واقعیات، مسایل اساسی

**ground motion maps**/'graond moshen maps/ n

An improved understanding of earthquake process is utilized by the USGS to develop long range earthquake probability forecast, hazard assessments, and ground motion maps.

نقشه‌های زمین لرزه‌ایی، نقشه‌های حرکت زمین

techniques and satellite – based global positioning system now afford unprecedented opportunities to measure strain accumulation and physical conditions under which earthquake occur.

**global**/ 'globâl/adj

globalism/'globalizem/ n

globalist/'globâlist/ n,adj

globally/'globâli/adj

global warming/ globâl 'worming/ n

globe/ glob/n

globalize/ 'globâlây/ vi, vt

globular/ 'glâbyulâr/adj

In this report we assess the global risks of two disaster – related outcomes: mortality and economic losses. We estimate risk levels by combining hazard exposure with historical vulnerability for two indicators of elements at risk – gridded population and Gross Domestic product (GDP) per unit area – for six major natural hazards: earthquakes, volcanoes, landslides, floods, drought, and cyclones.

**go off** / go âf/ vi

If you must leave a building after the shaking stops, use the stairs, not the elevator, and look for falling debris. Earthquakes can cause fire alarms and fire sprinklers to go off. You will not be able to rule out whether there is a real threat of fire, and the elevators may have been compromised. Always use the stairs.

**govern**/'gâvern/vt,vi

governance/'gâvernens/n

governess/'gâverniss/n

governing/'gâverning/n,adj

governing body/'gâverning bâdi/n

government/gâ'verment/n,adj

governmental/'gâvernmentâl/adj

governor/'gâverner/n

Governor- General/gâverner 'jenerâl/n

It is demonstrated that only if a country's governance structure enables the implementation and enforcement of public policies conducive to a country's economic and social development can sustainable livelihoods be achieved and susceptibility to disasters be reduced. Accountability, participation, predictability and transparency are identified as the key features of a governance structure that fosters development and supports risk reduction

It does not necessarily mean making the same programs and facilities available to both males and females. Gender equity requires that girls and women be provided with a full range of activity and program choices that meet their needs, interests and experiences. Therefore, some activities may be the same as those offered to boys and men, some may be altered, and some may be altogether different.

**gender-based** /'jender- beysd/n

جنسیت محور

Gender-based analysis could also be accomplished in this fashion. Nevertheless, female-headed household are often a poor proxy for this and thus this is one measure than can be used when Census's or large enough sample data sets are available.

**geo – textile** / jiyo-'tekstâyl /n

زمین پارچه، ژئوتکستایل

A geo – textile fabric is a material that is utilized in foundations, earths, rocks, and soil. It is also referred to as erosion control cloth, filter fabric, support membrane and civil engineering cloth. As a mitigation measure, the geo – textile increases resistance to localized flooding damage by reinforcing roadway sub – base and by improving sub – base drainage. Geotextiles are designed to be permeable to allow the flow of water through it.

**geodetics** /jiyo'detik/adj

جیو دیزی، ژئودیزی، زمین سنجی، وابسته به علم کره سنجی

Geodetics or geodesy is the science of accurately measuring and understanding three fundamental properties of the Earth: its geometric shape, its orientation in space, and its gravity field- as well as the change of these properties with time.

**Geological or geophysical hazards** /jiyâlâjikâl or jiyo'fizikâl 'hazerdz/n

خطرات ژئوفیزیکی یا زمین شناختی

Originate from internal earth processes. Examples are earthquakes, volcanic activity and emissions, and related geophysical processes such as mass movements, landslides, rockslides, surface collapses and debris or mud flows. Hydrometeorological factors are important contributors to some of these processes. Tsunamis are difficult to categorize: although they are triggered by undersea earthquakes and other geological events, they essentially become an oceanic process that is manifested as a coastal water-related hazard.

Some geological hazards can be reduced or mitigated by engineering, design, or modified construction or mining practices so that risks to health and safety are acceptable.

**global positioning system (GPS)** /'globâl po'zishening 'sistem/n

سامانه مکان یابی جهانی

New technologies utilizing advanced drilling

# G g

## gap / gap / n

The goal of the project is to create and train volunteer response teams aimed to fill a gap in the community to respond to disasters.

شکاف، فاصله، وقفه، [مجازی] خلا

## garner/'gârner /vt

Children's Administration emergency management planning is a reflection of the garnering and mobilization of support agencies and resources which can help connect families to communities and services during a disaster.

گردآوری کردن، جمع‌آوری کردن، انباشتن، ذخیره کردن، انبار کردن

## gas line/'gas lâyn /n

Fire is the most common earthquake – related hazard, due to broken gas line, damaged electrical lines or appliances, and previously contained fire or sparks being released.

لوله گاز، خط گاز

## gauge/geyj/vt

## gauge/geyj/n

One can also gauge the impact of hazards on income, or consumption poverty in cross-sectional data by linking predicted consumption levels to varying hazard scenarios.

سنجیدن، برآورد کردن، تخمین زدن، استنباط کردن، اندازه گرفتن، برداشت کردن  
ملاک، میزان، معیار، مقیاس، وسیله اندازه‌گیری

## gender equality/'jender i'kwâliti/n

UNDP recognizes the strong relationship between gender equality and disaster resilience, and the importance of this relationship to the achievement of the Millennium Development Goals (MDGs). It is necessary to include women's and men's voices, needs and expertise equally in disaster risk reduction (DRR), and recovery policy and programming.

تساوی جنسیتی، برابری جنسیتی

## Gender equity/'jender 'ekwiti/n

It is the process of allocating resources, programs and decision-making fairly to both males and females. This requires ensuring that everyone has access to a full range of opportunities to achieve the social, psychological and physical benefits that come from participating and leading in sport and physical activity.

عدالت جنسیتی، انصاف جنسیتی

road and connect these locations with roads which have direct access to the main roadway. Frontage roads give indirect access to abutting property along a freeway, either preventing the commercial disruption of an urban area that the freeway traverses or allowing commercial development of abutting property.

**fruitful**/frootful/adj

fruitfully/frootfuli/adv

fruition/froo'ishen/n

fruitless/frootlis/adj

fruits/froots/n

A broad range of actors are required to bring these to fruition: the education authorities that prioritize school safety, the engineers that develop building codes, the public officials that adopt them, the builders that adhere to them and the consumers that demand them.

**fray**/ frey/vt, vi

frayed/ freyd/ adj

Look for electrical system damage. If you see sparkes or broken or frayed wires, or if you smell burning insulation, turn off electricity at the main fuse box or circuit breaker. If you have to step in water to get to the fuse box or circuit breaker, call an electrician first for advice.

فرسوده شدن، ریش ریش شدن، نازک شدن  
نخ‌نما، کهنه، فرسوده، ساییده

**fringe**/ frinj/n,adj

fringe benefit/'frinj benefit/n

Northridge earthquake of 1994 occurred along the fringe of major metropolitan areas and struck during off – hours when impact was reduced.

حاشیه، لبه، کناره، جنبی، فرعی  
مزایای جانبی

**frontage road**/frántij 'rod/n

A frontage road (also access road, service road, parallel road, etc.) is a local road running parallel to a higher-speed, limited-access road. A frontage road is often used to provide access to private driveways, shops, houses, industries or farms. Where parallel high-speed roads are provided as part of a major highway, these are also known as local-express lanes. Frontage roads provide access to homes and businesses which would be cut off by a limited-access

کنار گذر، راه جانبی

forecasting/'forkâsting/adj

پیش‌بینی

An advance system of forecasting, monitoring and issuing early warning plays the most significant role in determining whether a natural hazard will assume disastrous proportions or not.

**foresee**/ for'sii/vt

پیش‌بینی کردن

foreseeable/ for'sii – ebel / adj

قابل پیش‌بینی

foreshadow/ for'shadow/vt

خبر از (چیزی) دادن، حکایت از (چیزی) کردن، نشانه (چیزی) بودن

foreshadowed/ for'shadod/ adj

منعکس (شده)، بازتاب یافته

According to Mark Stafford, director of disaster services for the Fort Worth, Texas, Chapter of American Red Cross, disasters are either foreseen includes hurricanes, floods, and tornadoes. By contrast, the unforeseen cannot be specifically planned for, and preparations will be more challenging.

**foreshock**/'forshâk/ n

پیش لرزه

In general big earthquakes begin with light vibrations (foreshocks). These are the initial fractures in the rocks. As the time period between a foreshock and a main shock may be short, earthquake warning must be communicated instantly.

**forewarn**/for'warn/vt

اخطار کردن، هشدار دادن، از پیش خبر دادن

forewarning / for'warning /n

اخطار قبلی، هشدار قبلی

Fundamentally, when people are given sufficient forewarning, the chances of people coming to harm or death is dramatically reduced.

**forge**/forj/vt,vi

پیشی گرفتن، سبقت گرفتن، استحکام بخشیدن، قوام بخشیدن، پیوسته پیش رفتن (علیرغم اشکالات)، ناگهان تند پیشرفت کردن (معمولا با ahead)

“NBSB members bring a broad range of perspectives and experiences, and over the past four years, the board has helped us improve federal policies and practices in disaster preparedness and response,” said Assistant Secretary Nicole Lurie. “I look forward to working with the new members as we forge ahead in helping communities across the country become more resilient to all hazards.”

**forum**/'forem/n

محل تبادل نظر، جلسه بحث و تبادل نظر، گردهمایی، تریبون آزاد

The Secretariat acts as an international forum that brings together disaster managers and environmental expert from around the world.

**foster**/'fâster /vt,vi

رواج دادن، ترویج دادن، پروراندن، تشویق کردن

The foremost challenge facing, the National Earthquake Hazard Reduction Programme NEHRP is encouraging the use of knowledge to foster risk reduction among local, and state agencies and private entities.

**fluctuate** /'flâkchuweyt/ vi

fluctuating /'flâkchuweyting/ adj

fluctuation /'flâkchu'weyshen/ n

When a tropical cyclone passed over a sea, the long period sea surface fluctuation often appears. This phenomenon is called the storm surge. And the storm surge is caused mainly by the suction of sea water due to the pressure drop as well as by the wind drift of seawater.

نوسان کردن، نوسان داشتن، تغییر کردن، متغیر بودن

متغیر، بی ثبات

نوسان، تغییر، افت و خیز

**flurried** / flârid/ adj

flurry/flâri / n

A flurry of disciplines are studying hazards and their impacts, ranging from geologists, geographers, economists, social scientists, chemists, insurance, media, ... a mixture of common language and technical terminology is being used thus leading to some confusion.

exceeding 40 pounds per square inch (absolute) at 100°F (37.8°C). Flammable Class I liquids are subdivided as follows:

Class IA: Liquids having flash points below 73°F (22.8°C) and boiling points below 100°F (37.8°C). Flammable aerosols (spray cans) are included in Class IA.

Class IB: Liquids having flash points below 73°F (22.8°C) and having boiling points at or above 100°F (37.8°C).

Class IC: Liquids having flash points at or above 73°F (22.8°C) and below 100°F (37.8°C). The boiling point is not considered.

Combustible Liquids (Classes II and III): Liquids having flash points at or above 100°F (37.8°C). Combustible liquids in Classes II and III are subdivided as follows:

Class II: Liquids having flash points at or above 100°F (37.8°C) and below 140°F (60.0°C).

Class IIIA: Liquids having flash points at or above 140°F (60.0°C) and below 200°F (93.4°C).

Class IIIB: Liquids having flash points at or above 200°F (93.4°C).

**flexibility**/ fleksi'biliti/n

flexible/'fleksiblel/adj

flexibly/'fleksibli/adv

These features ensure system –wide redundancy, extreme flexibility and scalability, fast deployment and extended mobility significantly and further strengthen the ability of disaster relief organizations to respond to any emergency situation throughout all phases of disaster recovery management.

انعطاف پذیری، تغییر پذیری، قابلیت تغییر، نرمش  
انعطاف پذیر، تغییر پذیر، متغیر، قابل انعطاف،  
با انعطاف، بانرمش

**flood plain**/ flâd pleyn / n

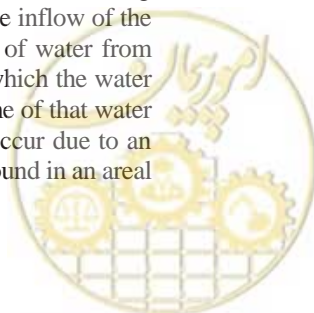

Map of areas at risk from natural disasters are valuable information and communication tools. They can be used for a wide variety of purposes ranging from flood plain delineation, zoning and land use planning to presentation of information at public meetings.

دشت سیلابی

**flood**/flâd/n

A flood is an overflow of water that submerges land which is usually dry. The European Union (EU) Floods Directive defines a flood as a covering by water of land not normally covered by water. In the sense of "flowing water", the word may also be applied to the inflow of the tide. Flooding may occur as an overflow of water from water bodies, such as a river or lake, in which the water overtops or breaks levees, resulting in some of that water escaping its usual boundaries, or it may occur due to an accumulation of rainwater on saturated ground in an areal flood.

سیل، تندآب

**fire extinguisher**/fâyer ikstingwisher/n

کیسول آتش‌نشانی

Fire extinguishers have been in use by Police and Fire Departments, warehouses and factories and home owners all over the country. These professional grade fire extinguishers are designed to deal with auto, kitchen, or trash and spot fires quickly and safely.

**fire hydrant**/fâyer hâydrent/n

شیر آتش‌نشانی، فلکه آب آتش‌نشانی

The National standard for the body colors of the hydrants is a chrome yellow; however, silver is still recognized as a standard color. Therefore, municipal hydrant body color will continue to be silver. The tops or caps of the hydrants are going to change and will be painted according to flow on the hydrant at 20 pounds per square inch of pressure (psi).

NFPA recommends that the bodies of municipal hydrants, private hydrants, and non-potable hydrants be distinctively color coded. The NFPA standard calls for private hydrants to be red. The most important thing in consistency in our approach so the Fire Department knows what the capacity of each fire hydrant is and whether the capacity of each hydrant is and whether it belongs to the municipality or not.

**fire prevention**/fâyer pri'venshen /n

پیشگیری از حریق، جلوگیری از آتش‌سوزی

Understanding the “fire triangle” is the most basic concept in fire prevention and control. In order for any fire to occur, three critical elements must be present: A fuel combustible material, an ignition or heat source, and oxygen in sufficient quantities to support combustion.

**fire protection**/fâyer pro'tekshen/n

حفاظت در برابر حریق

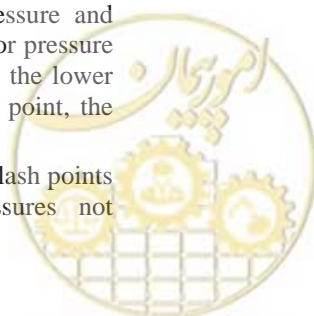

Research is needed to improve fire protection and suppression equipment such as piping, valves, tanks, and smart control system to minimize the number of ignitions after an earthquake.

**flammable**/flamebel/adj

آتش‌زا، قابل اشتعال، اشتعال‌پذیر

Flammable and combustible chemicals include liquids such as organic solvents, oils, greases, tars, oil base paints, and lacquers, as well as flammable gases. Flammable and combustible liquids are defined by their flash points. The flash point of a liquid is the minimum temperature at which it gives off sufficient vapor to form an ignitable mixture with the air near its surface or within its containment vessel. A liquid's flash point is a function of its vapor pressure and boiling point. Generally, the higher the vapor pressure and the lower the boiling point of a liquid, the lower its flash point will be. The lower the flash point, the greater the fire and explosion hazard.

Flammable Liquids (Class I): Liquids with flash points below 100°F (37.8°C) and vapor pressures not

**fiction**/'fikshən /n

fictional/'fikshənəl /adj

fictionalize/'fikshənâlyz/vt

fictitious/fik'tiʃəs/ adj

It is important to note that we did not use the identities or addresses of real people to submit these applications. The identities were developed in coordination with federal agencies and credit-reporting agencies in order to simulate what an identity thief would do in a similar situation. Addresses were fictitious or non residential addresses.

تخیلی، تصویری، غیرواقعی، ساختگی، خیالی

**fire and rescue operation**/'fâyer and

'reskyoo âpe'reyshən/n

The Fire Rescue Communications Section (COMMs) is an enhanced 911 facility which handles Fire and EMS calls, in addition to dispatching services for emergency response. The staff must initially be certified by New York State as Emergency Medical Technicians and maintain national certification as Emergency Medical Dispatchers (EMD) and Emergency Fire Dispatchers (EFD). The staff also operates the county's Mobile Command Vehicles in conjunction with the FMO section.

عملیات نجات و اطفای حریق

**fire drill**/'fâyer dril/n

Fire drill is a method of practicing the evacuation of a building for a fire or other emergency. Usually, the emergency system (usually the fire alarm/smoke detector) sounds and the building is evacuated as though a real fire had occurred. Usually, the time it takes to evacuate is measured to ensure that it occurs within a reasonable length of time, and problems with the emergency system or evacuation procedures are identified to be remedied.

تمرین فرار از حریق

**fire escape**/'fâyer iskeyp/n

A fire escape is a special kind of emergency exit, usually mounted to the outside of a building or occasionally inside but separate from the main areas of the building. It provides a method of escape in the event of a fire or other emergency that makes the stairwells inside a building inaccessible. Fire escapes are most often found on multiple-story residential buildings, such as apartment buildings. At one time, they were a very important aspect of fire safety for all new construction in urban areas; more recently, however, they have fallen out of common use.

A fire escape consists of a number of horizontal platforms, one at each story of a building, with ladders or stairs connecting them.

پلکان فرار، پلکان خروج اضطراری

# F f

## **facet**/fasit/n

بُعد، جنبه، وجه، سطح

The objective was to generate awareness on the different facets of disaster management amongst community members. The strategy was to involve them in decision making and disaster management structures and processes.

## **facilitate**/ fa'siliteyt/vt

تسهیل کردن، آسان کردن، راحت تر کردن تسهیل

facilitation/ fasili'teyshen/ n

تسهیلات، امکانات، تجهیزات، تاسیسات

facilities/ fa'silitiz/ n

استعداد، آمادگی، قابلیت، توانایی، سهولت، آسانی، راحتی،

facility/ fa'siliti/ n

وسیله، امکان مزیت

The use of satellite, computers, electronics, better communication facilities are going to make significant difference in disaster management. Now a days satellite communication play a major role in disaster management communication.

## **far – reaching**/fâr 'riiching/adj

دارای پیامدهای مهم، با ابعاد وسیع، گسترده، وسیع

Climate change has far-reaching implications for managing disaster risk in India, as the frequency and intensity of flash floods, landslides, droughts, cyclones, and storm surges are expected to increase in upcoming decades.

## **feasible**/fiizibel/adj

عملی، معقول، ممکن، امکان پذیر، قابل اجرا، متحمل، شدنی،

قابل قبول، قابل توجیه

feasibility/ fiizi'biliti/ n

امکان، احتمال

feasibility study/fiizibiliti 'stâdi / n

امکان سنجی، بررسی توجیهی، مطالعه توجیهی

Containment as defined in section 3.4 of this plan should be feasible for releases of hazardous material and pollutants in their liquid or solid state, and will not likely feasible for substances in their gaseous state.

## **feeble**/'fiibel /adj

ناتوان، کم زور، نزار، نحیف

Social workers can help to calm people down, identify natural leaders to organize the victims, coordinate with agencies and government departments or the logistics, mobilize healthy adults to help the weak and feeble.

**expeditious**/ ekspi'dishes /adj

expeditiously/ ekspi'dishesli/adv

It is responsibility of the Environmental Response Team (ERT) to select, as expeditiously as possible, nominees to the National Operations Group (NOG) with expertise and experiences to be of direct assistance to the OSC for the type of pollution incident the OSC has to deal with.

سریع، فوری  
باسرعت، باعجله

**explicit**/iks'plisit/adj

explicitly/iksplicitly/adv

explicitness/iks'plisitnis/n

In order to facilitate effective disaster risk reduction in such contexts, it is important to start by involving the stakeholders in an explicit discussion of what is valuable in their specific context. Without such discussion there is a risk that stakeholders unintentionally impede each other's efforts by pursuing different goals.

صریح، روشن، بی‌پرده، عیان، رک  
آشکارا، صراحتا، با صراحت، بی‌پرده  
صراحت

**expose**/iks'poz/vt

exposed/iks'poz/d/adj

The exposure of developing countries populations and their institutions to natural hazards is thus becoming an important component of international development and aid strategies as well as an important consideration in adapting to climate change.

بی‌حفاظ در معرض عوامل طبیعی قرار دادن  
بی‌حفاظ، در معرض نهاده

**exposure**/iks'pozher/n

The situation of people, infrastructure, housing, production capacities and other tangible human assets located in hazard-prone areas.

Measures of exposure can include the number of people or types of assets in an area. These can be combined with the specific vulnerability and capacity of the exposed elements to any particular hazard to estimate the quantitative risks associated with that hazard in the area of interest.

بی‌حفاظ در معرض عوامل طبیعی قرار گرفتن

**extensive disaster risk** /iks'tensiv di'zâster risk/n

The risk of low-severity, high-frequency hazardous events and disasters, mainly but not exclusively associated with highly localized hazards.

Extensive disaster risk is usually high where communities are exposed to, and vulnerable to, recurring localized floods, landslides, storms or drought. Extensive disaster risk is often exacerbated by poverty, urbanization and environmental degradation.

خطرپذیری بلایای گسترده

**extensive risk**/iks'tensiv risk/n

The widespread risk associated with the exposure of dispersed populations to repeated or persistent hazard conditions of low or moderate intensity, often of a highly localized nature, which can lead to debilitating cumulative disaster impact.

خطرپذیری گسترده، خطرکردن گسترده

environmental ones as well. Environmental conditions may exacerbate the impact of a disaster, and vice versa disasters have an impact on the environment.

**excluded people**/iks'kloodid 'piipel/n

مردم محروم

Even with the new legislation and good intentions and efforts, two and a half years after the tsunami the recovery, particularly for poor and excluded people, is very slow and the attention given in response to reducing the risk to future disasters has been low.

**executive agency**/ig'zekyutiv 'eyjensi/

نهاد اجرایی، دستگاه اجرایی

An executive agency is a part of a government department that is treated as managerially and budgetarily separate, to carry-out some part of the executive functions of the United Kingdom Government, Scottish Government, Welsh Government, or Northern Ireland Executive. Executive agencies are "machinery of government" devices distinct both from non-ministerial government departments and non- departmental public bodies (or "quangos"), each of which enjoy a real legal and constitutional separation from ministerial control. The model was also applied in several other countries.

**exemplar**/ ig'zemplâr/ n

نمونه بارز، سرمشق

exemplary/ig'zempleri/ adj

نمونه، هشدار دهنده، عبرت‌انگیز

Risk management applications in this industry provide a practical exemplar of risk practice and will enable you to understand the implications of risk theory and techniques in an industrial setting.

**exogenic hazards**/ ek'sâjenik 'hazerd / n

خطرات برون‌زا (خطرات ناشی از فرآیندهای سطح زمین)

Exogenic hazards caused by the earth surface processes (flood, riverbank erosion, coastal erosion, land slide, soil erosion and ground water contamination).

**exogenous factors**/eksojiines/n

عوامل بیرونی، عوامل برون‌زا، عوامل غیرذاتی

To establish a relevant correlation between poverty and hazards, one must take out the exogenous factors associated with hazard loss.

**expediency**/ iks'piidyensi / n

مصلحت، مصلحت‌اندیشی

expedient / iks'piidiyent / adj

به مصلحت، به صلاح، مصلحت، مصلحت‌آمیز

expedient / iks'piidiyent / n

تدبیر، ترفند، چاره، راه، علاج

FEMA and its federal partners have worked diligently to balance expediency and accountability, and support the efforts of our State and local counterparts.

**escape - hatch**/is'keɪp hach/n

A hatch which permits persons to escape from a compartment, such as the interior of a submarine or aircraft, when normal means of exiting are blocked.

[کشتی، هواپیما، زیردریایی] دریچه نجات

**escape ramp**/is'keɪp ramp/n

In steep mountainous areas, the brakes on large heavily loaded vehicles can become overheated and then fail to work on long downhill runs. The ramp is usually located on a curve of the downhill road. The road curves right or left and the ramp continues straight and up a steep hill. The ramp is an excavated trench filled with loose, round, smooth river rock. When the runaway truck enters the ramp, the effect is the same as when you try to walk through deep snow or in deep water in a swimming pool, substantial yet gradual resistance. This brings the truck to a safe halt with no assistance from the brakes.

شیراهه خروج اضطراری

**evacuate** /ivakju'weɪt/vt,vi

evacuation /ivakju'weɪʃən/n

evacuees /ivakju'i:z/n

Moving people and assets temporarily to safer places before, during or after the occurrence of a hazardous event in order to protect them.

Evacuation plans refer to the arrangements established in advance to enable the moving of people and assets temporarily to safer places before, during or after the occurrence of a hazardous event. Evacuation plans may include plans for return of evacuees and options to shelter in place.

Emergency evacuation is the immediate and rapid movement of people away from the threat or actual occurrence of a hazard.

Examples range from the small scale evacuation of a building due to a bomb threat or fire to the large scale evacuation of a district because of a flood, bombardment or approaching hurricane.

تخلیه کردن، انتقال دادن، بیرون بردن، خارج کردن

تخلیه، انتقال

[هنگام جنگ، سیل و غیره] افراد تخلیه شده

**evolve** /i'vɔlv/vi,vt

The disaster management community has been evolving. Until the 1990's disaster management was primarily focused on the response of governments, communities, and international organization after disasters. This included the humanitarian aspects of relief, such as providing medical care, food and water, search and rescue, and containing the secondary disasters (e.g. fires that occur following an earthquake).

تحول یافتن، رشد کردن، شکل گرفتن، درست شدن

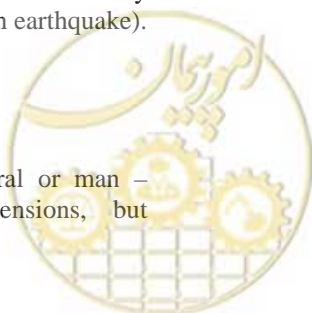

**exacerbate** /ig'zæsəbeɪt/vt

exacerbation /ig'zæsəbeɪʃən/n

The impact of disasters, whether natural or man-made, not only have human dimensions, but

وخیم‌تر کردن، بدتر کردن، خراب‌تر کردن

وخامت

**entrust**/in'trâst/vt

State Administrative Training Institute would be entrusted to train the government functionaries, civil society response groups and state task force on disaster management.

واگذار کردن، محول کردن، به عهده (کسی) گذاشتن

**Environmental degradation** /invâyren'mentâl degre'deyshen/n

Environmental degradation is the process by which our environment i.e., air, water and land, is progressively contaminated, over – exploited and destroyed. When the environment becomes less valuable or damaged, environment degradation is said to occur. In specific term, environmental degradation is the deterioration of the environment through depletion of resources such as air, water, soil and forest; the destruction of eco-systems and the extinction of wildlife.

تخریب زیست محیطی

**environmental hazards**/invâyren'mentâl' hazerd/n

may include chemical, natural and biological hazards. They can be created by environmental degradation or physical or chemical pollution in the air, water and soil. However, many of the processes and phenomena that fall into this category may be termed drivers of hazard and risk rather than hazards in themselves, such as soil degradation, deforestation, loss of biodiversity, salinization and sea-level rise.

خطرات زیست محیطی

**envisage**=envisage /in'vizhen,inv'izij/vt

envisaged /in'vizijd/adj

The collaborative programme on disaster risk management taken up with UNDP support covers 169 multi – hazard prone districts in the country and envisages assisting the States to draw up plans for district / block/ village levels to build up effective resilience to disasters.

پیش بینی کردن، تصور کردن، مجسم کردن

پیش بینی شده، تصور شده، مجسم شده

**epidemic**/epi'demic/n,adj-Epidemic may be the consequence of disasters of another kind, such as tropical storms, earthquakes, droughts, etc. Epidemics may also attack animals, causing local economic disasters.

بیماری همه گیر، شیوع، همه گیری

**equip**/ i'kwip/ vt

equipment/ i'kwipment/ n

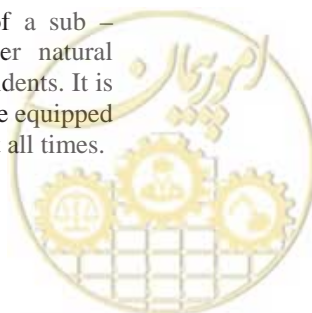

equipped/'ikwipt/ adj

Seismic studies reveal sizeable portions of a sub – continent prone to earthquakes, and other natural calamities like floods, landslides and fire accidents. It is imperative for all regions in the country to be equipped with the Disaster Management Equipment at all times.

مجهز کردن، تجهیز کردن، آماده کردن

لوازم، وسایل، تجهیزات، تجهیز، دستگاهها

مجهز، آماده

impacts, as well as for the implications that hazards can have on poverty.

**energy security** / 'enerji sikyuriti/n

امنیت انرژی

Energy security is the association between national security and the availability of natural resources for energy consumption. Access to cheap energy has become essential to the functioning of modern economies. However, the uneven distribution of energy supplies among countries has led to significant vulnerabilities. In earthquake – prone Japan, 55 nuclear- power plants produce 30 percent of the country's electricity, and nuclear – power generation is important in the fight against global warming and for the nation's energy security.

**enforce** / in'fors/vt

به اجرا درآوردن، اجرا کردن، اعمال کردن

enforceable / in'forsibel/adj

قابل اجرا، اجرا کردنی

enforced / in'forst/adj

تحمیلی، اجباری

enforcement / in'forsment/ n

اجرا، اعمال

Implementation of new design standards is done through the adoption and enforcement of building codes.

**enlist** / in'list/vi,vt

منظور کردن، به حساب آوردن، به دست آوردن

At the end of this session, the participants should be able to enlist the major disasters that occurred in their district, municipality or commune over the past ten years.

**enormities** / i'normitiz/n

فجایع

enormity / i'normiti/n

عظمت، بزرگی، وسعت

enormous / i'normes/sdj

بزرگ، عظیم، کلان، مفصل، فوق العاده

enormously / i'normesli/adv

بسیار، بسیار زیاد، فوق العاده

The scale of the devastation presented enormous challenges for disaster response in the context of evolving concept of disaster management

**enshrine** / in'shrâyn/vt

محفوظ داشتن، مصون نگه داشتن، حفظ کردن، در خود جای دادن

The ASEAN charter should enshrine pro-poor policies ensuring equitable access to an ownership of markets and productive resources and institutionalize disaster management mechanism.

**entail** / in'teɪl /vt,n

مستلزم چیزی کردن، ایجاب کردن، ایجاب

entailment / in'teɪlment /n

استلزام، تضمین

Disaster management entails the creation of a coordinating team that is centrally responsible for the direction of different teams that aid in helping abate potential casualties from natural disasters.

which there is a clear and marked deterioration in the coping abilities of a group or community. Unusual initiatives by groups, communities and external intervention are also evident during this period.

**encroach**/in'kroch/vi

encroachment/in'krochment/n

These factors include flood plain encroachment, followed by deforestation, extensive gravel mining, and improper design of infrastructure along riversides and lack of public awareness on disaster risk mitigation.

پیشروی کردن، زیر پا گذاشتن، تعدی کردن  
پیشروی، تعدی، دست اندازی

**encrust** / in'krâst / vt, vi

encrustation/ inkrâs'teyshen/ n

encrusted/ in'krâstid/ adj

In the case of rural areas, these shortages can be compounded by a high incidence of hazards as a result of being encrusted hazard – prone areas, deepening the susceptibility of households to suffer hazard losses.

پوشاندن (با)، دلمه بستن، رویه بستن  
لایه، پوست، قشر  
پوشیده (از)، پُر (از)

**endemic diseases**/en'demic di'ziizez/n

Endemic and epidemic are both words that diseases love, but something endemic is found in a certain place and is ongoing, and epidemic describes a disease that's widespread. A disease that is endemic is found in a certain geographic region or in a specific race of people.

بیماری‌های بومی

**endogenic hazards**/ en'dojenik 'hazerd / n

In Bangladesh the risks of atmospheric and exogenic hazards are high where as risk from endogenic hazards are relatively low. Cyclone, flood, riverbank erosion, coastal erosion, landslides, drought and groundwater contamination are major natural hazards.

خطرات درون‌زا

**endorse**/in'dorse/ vt

endorsement/in'dorsment/ n

Reducing the risk of disasters associated with natural hazards in Central Asia has also been making steady progress, thereby preparing for the establishment of Central Asian Center for Disaster Response and Risk Reduction with the endorsement from donors and international organizations including the ADRC.

تایید کردن، تصدیق کردن، پشت‌نویسی کردن  
پشت‌نویسی، ظهرنویسی، تایید، حمایت

**endow**/ in'dao/vt

endowment / in'daoment/ n

endowment policy / in'daoment pâlisi/ n

Therefore, we refer to the regional or district level of analysis while thinking of the implications that low asset endowments and the poor management can have for the susceptibility to experience larger hazard

اعطا کردن، بخشیدن، هزینه چیزی را تقبل کردن  
اعطا، اهدا، وقف، موقوفه، درآمد موقوفه، استعداد، موهبت،  
بهره‌مندی، برخورداری

**emergency management**/i'merjensi 'manijment/n

مدیریت اضطرار

Is also used, sometimes interchangeably, with the term disaster management, particularly in the context of biological and technological hazards and for health emergencies. While there is a large degree of overlap, an emergency can also relate to hazardous events that do not result in the serious disruption of the functioning of a community or society.

**emergency management team**/i'merjensi 'manijment tiim/n

تیم مدیریت اضطرار

The emergency management team will need to have the right set of abilities, skills and knowledge. The ability we seek is the latent capability to perform well under difficult conditions. The skill required will be practical expertise to deal with abnormal or out of line situations. Knowledge is the possession of, or access to, relevant information.

**emergency Measures Support System (EMS)**/n

سامانه پشتیبان اقدامات اضطراری

EMS provide support for the formulation of response plans by displaying disaster-prevention and damage information on digital maps.

**emergency operation plan (EOP)** /i'merjensi âpe'reyshen plan/n

برنامه عملیات اضطراری

A document that describes how people and property will be protected in disaster and disaster threat situations; details who is responsible for carrying out specific actions; identifies the personnel, equipment, facilities, supplies, and other resources available for use in the disaster; and outlines how all actions will be coordinated.

**empirical** /im'pirikâl/adj

تجربی

empirically /im'pirikli/adv

از لحاظ تجربی، به روش تجربی

empiricism /im'pirisizem/n

تجربه‌گرایی

empiricist /im'pirisist/n,adj

تجربه‌گرا، تجربه‌گرایانه

Specific predictions of liquefaction and ground deformation for engineering projects use more detailed geological and geotechnical information and mostly empirical or semi-empirical prediction methods based on compilations of case histories in past earthquakes.

**empower**/im'pauer/vt

اختیار دادن، صلاحیت دادن، توانمند کردن

empowerment/im'pawerment/n

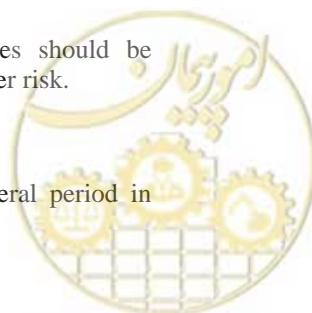

توانمندسازی

Both communities and local authorities should be empowered to manage and reduce disaster risk.

**encompass** /in'kâmpas /vt

شامل (چیزی) بودن، در بر گرفتن، احاطه کردن

A disaster can encompass a more general period in

The impact assessment showed that, in order to be effective, small interventions in disaster risk management (e.g., community-based early warning systems) need to be embedded in a comprehensive national program and/or a program with multi-institutional support.

**embrace** /im'breys /vt

In Disaster Risk Management, comprehensive approach includes the development of disaster arrangement to embrace the aspects of prevention/preparedness, response and recovery.

در بر گرفتن، شامل بودن، پذیرفتن

**emerge** /i'merj/vi

emergence/ i'merjens/ n

emergencies/i'merjensiz/ n

emergency/i'merjenci/n, adj

emergency ward/i'merjensi word/ n

emergent/i'merjent/adj

Emergency is sometimes used interchangeably with the term disaster, as, for example, in the context of biological and technological hazards or health emergencies, which, however, can also relate to hazardous events that do not result in the serious disruption of the functioning of a community or society.

In the case of natural disaster declaration, for example, from government's perspective, information that a disaster requiring relief attention has occurred does not emerge until the protocol for disaster declaration described above has been carried to its conclusion.

پدیدار شدن، نمایان شدن، به وجود آمدن

پیدایش، پیدایی، ظهور، بروز، پدیداری

سوانح، مواقع اضطراری

حالت فوق العاده، غیرمنتظره، سانحه، حادثه، اتفاق

بخش سوانح، بخش فوریت‌های پزشکی، بخش اورژانس

در حال ظهور، در حال پیدایش، در حال تکوین

**emergency equipment** /i'merjensi i'kwipment/n

Emergency equipment must be maintained, inspected and tested to maintain proper working order as part of preparation and planning for an emergency. In the event of an emergency, properly functioning emergency equipment can help minimize both personal injury and property damage. Types of emergency equipment found in laboratories include eyewash stations, safety showers and fire extinguishers.

تجهیزات و وسایل اضطراری

**emergency kit** /i'merjensi kit/n

Support will be provided to the district administration for having an emergency kit with some essential equipment like a boat, portable power generator set, early warning equipment, tents, power saw.. etc to meet the emergency need at the time of natural disasters like cyclones or floods or earthquakes.

کیت اضطراری، وسایل اضطراری

business by elaborating all the technical requirements, especially IT, for business continuity and disaster recovery.

**elicit**/i'lisit/vt

Research effective means to communicate real-time warnings to various intended recipients so that appropriate responses are elicited.

موجب شدن، باعث شدن، استنباط کردن

**ElNiño**/é l'nino/n

ElNiño is characterized by unusually warm ocean temperature in Equatorial Pacific, as opposed to La Niña, which characterized by unusually cold ocean temperature in the Equatorial Pacific. ElNiño is an oscillation of the ocean atmosphere system in the Tropical Pacific having important consequences for weather around the globe.

إل نینو

**elucidate**/i'loosideyt/vt

elucidation/i'loosideyshen/n

elucidatory/i'loosideyteri/adj

Past experiences elucidate that community has always adopted a culture of reaction after a hazard rather adopting a culture of pre-action before the same occurs. As a result, fate of affected community goes to the hand relief / rehabilitation agencies.

روشن کردن، توضیح دادن، شرح دادن

**embed**/im'bed/vt

embedded/im'bedid/adj

کار گذاشتن، جایگزین کردن، نشاندن

ریشه دار، محکم، جاسازی شده

added as a consequence of direct economic loss and/or human and environmental impacts.

Examples of physical assets that are the basis for calculating direct economic loss include homes, schools, hospitals, commercial and governmental buildings, transport, energy, telecommunications infrastructures and other infrastructure; business assets and industrial plants; and production such as crops, livestock and production infrastructure. They may also encompass environmental assets and cultural heritage. Economic loss is a term of art which refers to financial loss and damage suffered by a person such as can be seen only on a balance sheet rather than as physical injury to the person or destruction of property. There is a fundamental distinction between pure economic loss and consequential economic loss, as pure economic loss occurs independent of any physical damage to the person or property of the victim. It has also been suggested for it to be called "commercial loss" as injuries to person or property could be regarded as "economic".

Examples of pure economic loss include the following:

- Loss of income suffered by a family whose principal earner dies in an accident. The physical injury is caused to the deceased, not the family.
- Loss of market value of a property owing to the inadequate specifications of foundations by an architect.
- Loss of production suffered by an enterprise whose electricity supply is interrupted by a contractor excavating a public utility.

These hazards can result in considerable human suffering and billions of dollars in property and economic losses.

### **ecosystem** / 'iikosistem/ n

بوم سامانه، اکوسیستم

A complex set of relationships of living organisms functioning as a unit and interacting with their physical environment. The extent of an ecosystem may range from very small spatial scales to, ultimately, the entire Earth.

### **efficacious**/ef'ikeyshes/ adj

ثمربخش، نتیجه بخش، موثر، مفید، سودمند

efficacy/'efikesi/n

تاثیر، اثر، اثربخشی، فایده

Full community involvement, including women's active participation improves the efficacy of prevention, relief, reconstruction and transformation efforts.

**earthquake safe communities**/'erthkweyk 'seyf kâmyoonitiz/n

Earthquake safe communities can be established by;

- a) Identify and implement measures to reduce vulnerability through retrofitting of existing buildings or construction of new buildings;
- b) Raise awareness on earthquake, and
- c) Risk and preparedness for teachers, students, local and central government officials and local communities.

جوامع ایمن در برابر زلزله

**earthquake**/'erthkweyk/n-An earthquake (also known as a quake, tremor or temblor) is the result of a sudden release of energy in the Earth's crust that creates seismic waves. The seismicity, seismism or seismic activity of an area refers to the frequency, type and size of earthquakes experienced over a period of time.

زمین لرزه، زلزله

**economic cost** /iikâ'nâmik kâst/n

Some 95 percent of disaster – related deaths occurred in developing countries, the economic cost of natural disasters can be 20 times higher in terms of gross domestic product, GDP, for developing countries than for industrialized nations, and developing countries often lack state – of the art technical and scientific expertise to prevent or reduce future devastation.

هزینه اقتصادی، هزینه جاری، قیمت واقعی، قیمت تمام شده  
اقتصادی

**economic loss** /iikâ'nâmik lâs/n

Total economic impact that consists of direct economic loss and indirect economic loss.

Direct economic loss: the monetary value of total or partial destruction of physical assets existing in the affected area. Direct economic loss is nearly equivalent to physical damage.

Indirect economic loss: a decline in economic value

خسارت اقتصادی، زیان اقتصادی

# E e

**Early Estimation System (ESS)**/ 'erli esti'meyshen sistem/n

سامانه برآورد اولیه

EES provides a quick, rough estimate of the scale of damage immediately following an earthquake.

**early warning** /erli worning/adj

هشدار اولیه، اعلام وضعیت، هشدار سریع

Early warning is a major element of disaster risk reduction. It prevents loss of life and reduces the economic and material impact of disasters. To be effective, early warning systems need to actively involve the communities at risk, facilitate public education and awareness of risks, effectively disseminate messages and warnings and ensure there is constant state of preparedness. A complete and effective early warning system is more than about supporting the prediction of catastrophic environment events; it supports four main functions, spanning knowledge of the risks faced through to preparedness to act on early warning. These four functions are risk analysis, monitoring and warning, dissemination and communication, and a response capability.

**early warning system**/erli 'worning system/n

سامانه هشدار سریع

An integrated system of hazard monitoring, forecasting and prediction, disaster risk assessment, communication and preparedness activities systems and processes that enables individuals, communities, governments, businesses and others to take timely action to reduce disaster risks in advance of hazardous events.

Effective “end-to-end” and “people-centred” early warning systems may include four interrelated key elements: (1) disaster risk knowledge based on the systematic collection of data and disaster risk assessments; (2) detection, monitoring, analysis and forecasting of the hazards and possible consequences; (3) dissemination and communication, by an official source, of authoritative, timely, accurate and actionable warnings and associated information on likelihood and impact; and (4) preparedness at all levels to respond to the warnings received. These four interrelated components need to be coordinated within and across sectors and multiple levels for the system to work effectively and to include a feedback mechanism for continuous improvement. Failure in one component or a lack of coordination across them could lead to the failure of the whole system.

in the context of the agro – climatic conditions prevailing in any particular area. There are three types of drought, Meteorological Drought, Hydrological Drought and Agricultural Drought.

**drought contingency plan/** draot kân'tinjensi plan/ n

A document that identifies specific actions that can be taken before, during and after a drought to mitigate some of the impacts and conflicts that results.

برنامه احتمالی خشکسالی

**duly/**dyooli/adv

As a follow-up to the global children and youth mobilization process on the occasion of global and regional platforms for disaster risk reduction, the highly successful Children and Youth Forum for Disaster Risk Reduction at the World Conference and their effective reach out to Governments, decision-makers and private sectors' CEOs, children and youth's capability to shape and design their future, to convey their views and opinions and to influence the decision-making process was duly recognized and acknowledged as part of the Sendai Framework.

به طور شایسته‌ای، به نحو مطلوبی، طبق مقررات

**drain away**/dreyn 'ewey / vt,vi

This invariably results in a lack of synergy which drains away the possibility of building effective disaster preparedness and response.

محو کردن، تباه کردن، تلف کردن

**drainage basin** /'dreynij 'beysin /n

Depending on the size of the drainage basin, the length of river and the time of concentration of floodwater in the main channel, flood forecasts and warnings may be issued well in advance of the arrival of the flood crest on large rivers.

حوضه زهکشی، حوضچه زهکشی

**draw up**/dro âp/vt

A pre-requisite for good emergency preparedness for natural disasters is national and international collaboration between actors working with risk management, natural disasters, and community planning. A vital task is to draw up guidelines and strategies for the adaptation of society to a changed climate. Sweden has established a national platform in accordance with the Hyogo Framework for Action. The overall aim of which is to reduce the consequences of natural disasters for society as a whole.

تنظیم کردن، تهیه و تدوین کردن

**drawback** /'drobak/n

However, there are two drawbacks to using telephones for disaster warning. Telephone penetration in many areas is still not satisfactory – particularly in rural and coastal areas most at risk. Even with the exponential increase in the number of phones that has occurred in recent years, there are still many regions in the Asia-Pacific region, where a telephone is considered a luxury. The other drawback is the congestion of phone lines that usually occurs immediately before and during a disaster, resulting in many phone calls in that vital period that cannot be completed.

عیب، ایراد، اشکال، نقطه ضعف

**driving force** / drâyving fors /n

The many natural disasters taking place annually all over the world are often caused by weather phenomena and one of the most affected fields is agriculture. Remote sensing, GPS, GIS and ICT appear to be effective tools in countering disasters, and this has been the main driving force behind establishing the UTEEDA network in six countries in Iberian America.

نیروی محرکه

**drought**/ draot/ n

Drought is a temporary reduction in water or moisture availability significantly below the normal or expected amount for a specific period. This condition occurs either due to inadequacy of rainfall, or lack or irrigation facilities, under – exploitation or deficient availability for meeting the normal crop requirements

خشکسالی

unique missions and responsibilities, varied resources and capabilities, and operating principles and procedures.

**ditch**/dich/n,vi,vt

Combating water run-off can be done by small ditches, stone walls, soil furrows etc. which will lead to increased water availability in the soil to plants. All of them have to follow the contour lines otherwise the effects can be very detrimental when water concentrates on one particular point potentially causing erosion.

نهر، جوی آب، جوی کندن، جوی کشیدن

**divers**/dâyverz/adj

diverse/dây'vers/ adj

diversification/dâyversifi'keyshen/n

diversify/dây'versifây/vt

Owing to the diverse factors contributing to disaster risk and the far – reaching impact of a natural disaster, disaster risk management can only have a sustainable impact as a multisectoral issue in development cooperation, comprising a broad range of sectors (e.g. environmental protection and resource conservation, land registration, health and energy supply) at local, national and international levels

**discharge**/ dis'chârz / vt,vi

[حکم دادگاه] تخلیه کردن، نقض کردن، خالی کردن، ریختن  
به (رود وغیره)، [وظیفه] انجام دادن  
تخلیه، دبی

discharge /'dischârj/ n

Mayor, as chief executive, pursuant to the mandates of Article 2B shall make all necessary decisions and shall issue all necessary directives during the course of the disaster on matters pertaining to the coordination of disaster relief measures and to the discharge of responsibilities of the department chiefs.

**disciplinary measures**/disiplineri mezhez/n

اقدامات انضباطی

Ministry of Environment is to monitor the response activities of responsible parties and, when warranted, to initial disciplinary measures or to intervene or pre-empt response measures in order to protect the interests of the public and the Ministry.

**discrepancy**/dis'krepensi/n-A discrepancy was identified between the goals of urban development and disaster management. The negative side of this discrepancy has been amplified by ineffective construction regulations and a lack of specificity with regard to ordinances on Dyke.

مغایرت، تضاد، اختلاف، تفاوت، فرق

**disparate** / 'disparit / adj

بسیار متفاوت، مختلف، ناهمخوان، غیرقابل مقایسه  
تفاوت، اختلاف، ناهمخوانی

disparity / dis'pariti / n

Some delegations noted that regional cooperative mechanisms must take into account the overall capacity and the economic and social disparities among countries in the Asia – pacific region.

**displace**/dis'pleys/vt

جابجا کردن، جای [کسی یا چیزی را] گرفتن

displaced/dis'pleyst/adj

جابجا شده، آواره، رانده شده

displacement/dis'pleysment/n

جابجایی، تغییر مکان، آوارگی، جانشینی، جایگزینی

Migration and displacement are interlinked, but must be distinguished. Displaced populations – either across borders such as refugee influxes, or within a country because of disasters or armed conflict – usually need relief operations combined with efforts aiming at collective and lasting solutions. Migration on the other hand usually involves more individual social assistance, legal protection and personal support.

**disposable** / dis'pozebel/adj

یک بار مصرف، قابل مصرف

disposal/dis'pozâl / n

دورریزی، خنثی سازی، انهدام، اختیار، دسترسی

dispose/ dis'poz / vt, vi

دور ریختن، منهدم کردن، حل و فصل کردن، در اختیار داشتن

The clean up and disposal phase of the operation is directed towards reducing the residual impact of a release of hazardous materials and other pollutants as much as possible.

funding should be specified in the plan. Linkages to sustainable development and climate change adaptation plans should be made where possible.

**disaster risk reduction**/di'zâster risk ri'dâkshen/n

Disaster risk reduction is aimed at preventing new and reducing existing disaster risk and managing residual risk, all of which contribute to strengthening resilience and therefore to the achievement of sustainable development.

Disaster risk reduction is the policy objective of disaster risk management, and its goals and objectives are defined in disaster risk reduction strategies and plans.

Disaster risk reduction (DRR) is a systematic approach to identifying, assessing and reducing the risks of disaster. It aims to reduce socio-economic vulnerabilities to disaster as well as dealing with the environmental and other hazards that trigger them: Heddre it has been strongly influenced by the mass of research on vulnerability that has appeared in print since the mid-1970s.[1] It is the responsibility of development and relief agencies alike. It should be an integral part of the way such organizations do their work, not an add-on or one-off action. DRR is very wide-ranging: Its scope is much broader and deeper than conventional emergency management. There is potential for DRR initiatives in just about every sector of development and humanitarian work.

**disaster risk reduction strategies and policies**

Define goals and objectives across different timescales and with concrete targets, indicators and time frames. In line with the Sendai Framework for Disaster Risk Reduction 2015-2030, these should be aimed at preventing the creation of disaster risk, the reduction of existing risk and the strengthening of economic, social, health and environmental resilience.

A global, agreed policy of disaster risk reduction is set out in the United Nations endorsed Sendai Framework for Disaster Risk Reduction 2015-2030, adopted in March 2015, whose expected outcome over the next 15 years is: "The substantial reduction of disaster risk and losses in lives, livelihoods and health and in the economic, physical, social, cultural and environmental assets of persons, businesses, communities and countries".

**disburse**/dis'bers / vt

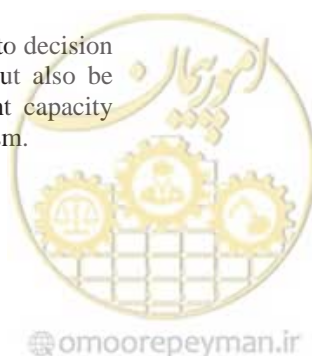

disbursement/ dis'bersment /n

Slow disbursement may not only be related to decision – making and administrative procedures but also be caused by weak post – disaster assessment capacity and poor information management mechanism.

کاهش خطرپذیری از سوانح

سیاست‌ها و استراتژی‌های کاهش خطرپذیری از سوانح

(پولی را) خرج کردن، هزینه کردن، پرداختن  
هزینه کرد، پرداخت، مبلغ

flood dikes) or non-structural (e.g. land use zoning). Mitigation activities should incorporate the measurement and assessment of the evolving risk environment. Activities may include the creation of comprehensive, pro-active tools that help decide where to focus funding and efforts in risk reduction.

Other examples of mitigation measures include:

- Hazard mapping
- Adoption and enforcement of land use and zoning practices
- Implementing and enforcing building codes
- Flood plain mapping
- Reinforced tornado safe rooms
- Burying of electrical cables to prevent ice build-up
- Raising of homes in flood-prone areas
- Disaster mitigation public awareness programs
- Insurance programs

**disaster reduction management** / di'zâster ri'dâkshen 'manijment / n

مدیریت کاهش سوانح

Disaster reduction management is a cycle of activities that involves prevention, mitigation, preparedness, disaster impact, response, recovery, and development.

**disaster risk**/di'zâster risk/n,adj

خطرپذیری از سوانح، ریسک پذیری بلایا

The potential loss of life, injury, or destroyed or damaged assets which could occur to a system, society or a community in a specific period of time, determined probabilistically as a function of hazard, exposure, vulnerability and capacity.

The definition of disaster risk reflects the concept of hazardous events and disasters as the outcome of continuously present conditions of risk. Disaster risk comprises different types of potential losses which are often difficult to quantify. Nevertheless, with knowledge of the prevailing hazards and the patterns of population and socioeconomic development, disaster risks can be assessed and mapped, in broad terms at least.

It is important to consider the social and economic contexts in which disaster risks occur and that people do not necessarily share the same perceptions of risk and their underlying risk factors.

**disaster risk management**/di'zâster risk 'manijment/n

مدیریت خطرپذیری سوانح

Plans set out the goals and specific objectives for reducing disaster risks together with related actions to accomplish these objectives. They should be guided by the Sendai Framework for Disaster Risk Reduction 2015-2030 and considered and coordinated within relevant development plans, resource allocations and programme activities. National-level plans need to be specific to each level of administrative responsibility and adapted to the different social and geographical circumstances that are present. The time frame and responsibilities for implementation and the sources of

hazards such as their location, intensity, frequency and probability; the analysis of exposure and vulnerability, including the physical, social, health, environmental and economic dimensions; and the evaluation of the effectiveness of prevailing and alternative coping capacities with respect to likely risk scenarios.

**disaster risk governance**/di'zâster risk 'gâvernens/n

The system of institutions, mechanisms, policy and legal frameworks and other arrangements to guide coordinate and oversee disaster risk reduction and related areas of policy.

Good governance needs to be transparent, inclusive, collective and efficient to reduce existing disaster risks and avoid creating new ones.

اداره کردن خطرپذیری سوانح، اداره خطرپذیری بلایا

**disaster risk information**/di'zâster risk in'formeysheh/n

Comprehensive information on all dimensions of disaster risk, including hazards, exposure, vulnerability and capacity, related to persons, communities, organizations and countries and their assets.

Disaster risk information includes all studies, information and mapping required to understand the disaster risk drivers and underlying risk factors.

اطلاعات خطرپذیری سوانح

**disaster risk management**/di'zâster risk 'manijment/n

Disaster risk management is the application of disaster risk reduction policies and strategies to prevent new disaster risk, reduce existing disaster risk and manage residual risk, contributing to the strengthening of resilience and reduction of disaster losses.

Disaster risk management actions can be distinguished between prospective disaster risk management, corrective disaster risk management and compensatory disaster risk management, also called residual risk. Management.

مدیریت خطرپذیری سوانح

**disaster management** /di'zâster 'manijment /n

The organization, planning and application of measures preparing for, responding to and recovering from disasters.

Disaster management may not completely avert or eliminate the threats; it focuses on creating and implementing preparedness and other plans to decrease the impact of disasters and “build back better”. Failure to create and apply a plan could lead to damage to life, assets and lost revenue.

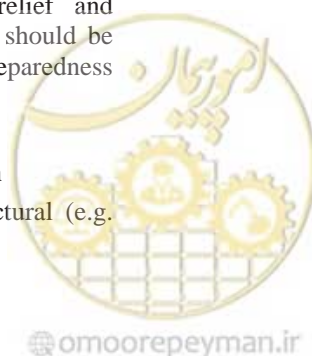

In any disaster management planning, the cost of repeatedly devoting public funds for relief and rehabilitation activities following disasters should be balanced against the cost of providing preparedness and mitigation measures before the event.

مدیریت سوانح، مدیریت بلایا

**disaster mitigation**/ di'zâster miti'geyshen/n

Disaster mitigation measures may be structural (e.g.

کاهش سوانح، کاهش بلایا

**disaster impact**/di'zâster 'impakt/n

تأثیر سانحه، تأثیر بلایا

Is the total effect, including negative effects (e.g., economic losses) and positive effects (e.g., economic gains), of a hazardous event or a disaster. The term includes economic, human and environmental impacts, and may include death, injuries, disease and other negative effects on human physical, mental and social well-being.

For the purpose of the scope of the Sendai Framework for Disaster Risk Reduction 2015-2030 (para. 15), the following terms are also considered:

Small-scale disaster: a type of disaster only affecting local communities which require assistance beyond the affected community.

- Large-scale disaster: a type of disaster affecting a society which requires national or international assistance.

- Frequent and infrequent disasters: depend on the probability of occurrence and the return period of a given hazard and its impacts. The impact of frequent disasters could be cumulative, or become chronic for a community or a society.

- A slow-onset disaster is defined as one that emerges gradually over time. Slow-onset disasters could be associated with, e.g., drought, desertification, sea-level rise, epidemic disease.

- A sudden-onset disaster is one triggered by a hazardous event that emerges quickly or unexpectedly. Sudden-onset disasters could be associated with, e.g., earthquake, volcanic eruption, flash flood, chemical explosion, critical infrastructure failure, transport accident.

**disaster loss database**/di'zâster lâs 'deytâbeys/n

پایگاه داده خسارات سوانح، پایگاه داده تلفات بلایا

A set of systematically collected records about disaster occurrence, damages, losses and impacts, compliant with the Sendai Framework for Disaster Risk Reduction 2015-2030 monitoring minimum requirements

**disaster recovery fund**/ di'zâster ri'kâveri fând/ n

صندوق بازتوانی سوانح، صندوق بازتوانی بلایا

Disaster recovery fund will operate specifically for the purpose of providing resources for long – term recovery – it will not take the place of immediate relief efforts already provided by existing organizations.

**disaster risk assessment**/di'zâster risk a'ssessment/n

ارزیابی خطرپذیری سوانح

A qualitative or quantitative approach to determine the nature and extent of disaster risk by analysing potential hazards and evaluating existing conditions of exposure and vulnerability that together could harm people, property, services, livelihoods and the environment on which they depend.

Disaster risk assessments include: the identification of hazards; a review of the technical characteristics of

In Federal Emergency Management Agency lists a hurricane strike on New Orleans as one of the most dire threats to the nation, up there with a large earthquake in California or a terrorist attack on New York City.

وحشتناک، وخیم، هولناک، شدید، حاد، نگران کننده،

**direct economic losses**/direct iikâ'nâmik lâsez/n

Usually happen during the event or within the first few hours after the event and are often assessed soon after the event to estimate recovery cost and claim insurance payments. These are tangible and relatively easy to measure.

خسارت‌های مستقیم اقتصادی

**disaster** / di'zâster/ n

disastrous/di'zâstres/ adj

disastrously/di'zâstresli / adv

A serious disruption of the functioning of a community or a society at any scale due to hazardous events interacting with conditions of exposure, vulnerability and capacity, leading to one or more of the following: human, material, economic and environmental losses and impacts. The effect of the disaster can be immediate and localized, but is often widespread and could last for a long period of time. The effect may test or exceed the capacity of a community or society to cope using its own resources, and therefore may require assistance from external sources, which could include neighboring jurisdictions, or those at the national or international levels.

سانحه، بلا، فاجعه، مصیبت، واقعه ناگوار  
فاجعه آمیز، مصیبت بار، فجیع  
به طور وحشتناکی، به طور فجیعی

The World Health Organisation defines a disaster as any occurrence that causes damage, ecological disruption, loss of human life, deterioration of health and health services on a scale sufficient to warrant an extraordinary response from outside the affected community. A disaster can be either natural (rain, flood, cyclone, storm, land slides, earthquake and volcanoes) or man-made (war, riots, accident (train, air and ship), industrial accidents, fires, bomb explosions, nuclear explosions and ecological disasters).

**disaster damage**/di'zâster 'damij/n

Occurs during and immediately after the disaster. This is usually measured in physical units (e.g., square meters of housing, kilometers of roads, etc.), and describes the total or partial destruction of physical assets, the disruption of basic services and damages to sources of livelihood in the affected area.

آسیب سانحه، خسارت سانحه

diffused/ di'fyoozd/ adj

diffusion / difyoozhen / n

The Committee recommended that the secretariat make further efforts in inter – agency cooperation and in building regional cooperation on ICT for development and make greater efforts in promoting public – private partnerships, where appropriate, while recognizing that the private sector is a main drive of ICT adoption and diffusion.

determinedly/di'termindli/adv

The preparation of a natural disaster management plan to mitigate the adverse impacts of climate change is hence extremely timely and indicates the commitment and determination of senior leaders in the government to deal resolutely with these critical challenges.

عامل تعیین کننده، عامل موثر  
معین، ثابت، قطعی، نهایی، مصمم  
تعیین، تصمیم، عزم راسخ، اراده  
تعیین کننده، موثر، عامل تعیین کننده، عامل موثر  
تصمیم گرفتن، تعیین کردن، مشخص کردن  
مصمم، با اراده، قاطع، قاطعانه، مصممانه  
مصممانه، قاطعانه، باسرسختی

**deterrence** / di'terens / n

deterrent/ di'terent / n, adj

The presence of droughts and floods can be a deterrent labour mobilization as they extensively affect the land, limiting the working opportunities of people around it.

بازدارندگی  
عامل بازدارنده، بازدارنده، عبرت‌انگیز

**detour**/diitur/n,vt

Our study investigates the establishment of backup links in order to provide a network that can be re-established during disasters as an emergency detour route more rapidly and easily.

راه فرعی، مسیر انحرافی

**detriment**/'detriment/n

detrimental/detri'mentâl/adj

detrimentally/detri'mentâli/adv

Disasters have a tremendous detrimental impact or effect or efforts at significant challenge to sustainable development.

ضرر، زیان، آسیب  
زیان‌بخش، مضر، به زیان، به ضرر  
به شکل زیان‌آوری، به طور زیان بخشی

demography/ di'mâgrafi /n

جمعیت‌شناسی

The symposium noted unique features of the Island Pacific States with respect to ICT, such as the state of introduction of ICTs, diverse languages and cultures, and unique demography and geography.

**demonstrate**/'demonstreyt/vt,vi

گواه (بر چیزی) بودن، نشان دهنده (چیزی) بودن، ابراز کردن، بیات کردن

demonstration/demons'treyshen/n

دلیل، گواه، اثبات، نمایش، ابراز، بیان

demonstrative/di'mânstretiv/adj,n

برون‌گرا، نشانگر، نشان‌دهنده، گرم، احساساتی

demonstratively/di'mânstretivli/adv

با احساسات، به گرمی

It will demonstrate a sustainable model for mainstreaming of disaster risk management at all levels with focus on disaster and community level activities.

**demoralize**/di'mârâlâyz/vt

روحیه (کسی را) تضعیف کردن یا خراب کردن

demoralized/di'mârâlâyzd/adj

مایوس، ناامید

demoralizing/di'mârâlâyzing/adj

یاس‌آور، ناامید کننده، دلسرد کننده

For a developing country, nothing can be more demoralizing than a single disaster wiping out years of development. Countries that are prone to disasters have to prepare for the worst to protect what they've worked so hard to gain. Understanding disaster and climate risk management is an important step to safeguard development achievements

**denotation**/ diino'teyshen /n

معنی، معنی صریح، نشانه، نماد، دلالت

denote/ di'not / vt

دلالت کردن بر، نشانه (چیزی) بودن، معنی دادن

The result of that exercise is the floods extend (boundry) maps such as the iso – depth map, which denotes inundation for selected baseline probability of occurrence.

**dependency – syndrome**/ di'pendensi 'sindrom/n

سندروم وابستگی، نشانگان وابستگی

The emergency paradigm may save lives in the short term, but it has several negative implications, particularly for protracted humanitarian crisis. Emergency relief is most often criticized for its tendency to create a dependency – syndrome among its recipients.

**deplete** / di'pliit /vt

به اتمام رساندن، مصرف کردن، کاهش دادن

depletion/di'pliishen /n

کاهش، نقصان

Environmental impacts, which may include the depletion or discovery of natural resources, changes in ambient concentrations of pollutants and deteriorating or improving living conditions in human settlements, can thus be either harmful or beneficial.

Disaster management is a global policy problem with a critical land-use change component related to settlement patterns, deforestation, and agriculture development.

**defray**/ di'frey/ vt

defrayal/di'freyâl/ n

Funds allocated by the UN and by the co – sponsor (ESA) were used to defray the costs of air travel and daily subsistence allowance of 16 participants and 2 representatives of the Office for Outer Space Affairs.

هزینه (چیزی را) پرداخت کردن، پرداختن  
پرداخت، پرداخت هزینه

**degradation**/degre'deyshen/ n

degrade/ di'greyd/vt

Environmental degradation, which occurs mostly as land degradation, can be a serious problem in some parts of the country. Human activities, such as mining, overgrazing of animals, over population, soil erosion and deforestation, has led to some big tract of land being so seriously degraded that it can no longer support plant life.

- Hazard causing these disaster conditions typically includes droughts, famines, environmental degradation, desertification, deforestation and pest infestation.

- Slow onset disasters occur over time and slowly deteriorate a society's and a population's capacity to withstand the effects of the hazard or threat.

فرسایش، تخریب، نهشتیری (کم شدن بلندی زمین در اثر فرسایش)، (زمین‌شناسی) فروسایی

**delineate**/ di'liniyet/ vt

delineation/ dilinil'yeyshe/ n

This state of affirs makes it more crucial for FEMA to better define and delineates its disaster response roles and responsibilities.

معین کردن، تعیین کردن، تعریف کردن  
تعریف، تعیین

**demographer**/ di'mâgrafer/ n

demographic/ demo'grafik/ adj

جمعیت‌شناس  
جمعیت‌شناختی، جمعیتی

**decision – making - structure**/ di'sizhen meyking 'strâkcher/n

ساختار تصمیم‌گیری

In fact, the majority of organizational and decision making structures and components created in most contingency plans are seldom made use of.

**decisive**/di'sâysiv/adj

سرنوشت‌ساز، تعیین‌کننده، قاطع، بی‌چون و چرا

decisively/di'sâysivili/adv

قاطعانه، با قاطعیت،

decisiveness/gi'sâysivnis/n

قاطعیت

A stable personality and decisiveness are needed for managing a crisis.

**declar**/di'kler/vi,vt

اعلام کردن، بیان کردن، تصریح کردن، اذعان کردن

declaration/dekle'ryshen/n

بیانیه، اعلامیه، اظهاریه، بیان، اعلام، اعلان

declared/di'klerd/adj

اعلام شده، اظهار شده، اقرار شده، آشکار، علنی

The Sharm El Sheikh declaration on Disaster Risk Reduction reflects the Arab disaster risk reduction challenges and puts commitments by the Arab States on the post-2015 framework for disaster risk reduction. New stakeholder recommendations for the post-2015 framework for disaster risk reduction from civil society and youth/children are also included.

**decontamination**/diikânâ'tamineyshen/n

رفع آلودگی، آلودگی‌زدایی

decontaminate/diikân'tamineyt/vt

رفع آلودگی کردن از، آلودگی‌زدایی کردن از

Decontamination is the reduction or removal of chemical agents. Decontamination may be accomplish by removal of these agents by physical means or by chemical neutralization or detoxification.

**deem**/diim/vt

تلقی کردن، در نظر کردن، معتقد بودن، تصور کردن

deemed/diimd/adj

تلقی کرده، در نظر گرفته شده، تصور شده

Disaster management is deemed to be a 'state subject' and different states have initiated efforts to strengthen their agencies responsible for disaster management.

**deeply moved**/diipli moovd/adj

شدیدا تحت تاثیر قرار گرفته

"I am deeply moved by this tragedy and express my condolences to the town of Minami-Sanriku. I hope Mr. Sato will be able to share the town's recovery and rebuilding experiences with UNISDR as it will be useful for other disaster prone municipalities and local governments around the world. It will help inform our ongoing World Disaster Risk Reduction Campaign which is focused on making cities resilient," said Wahlström who plans to visit the town again to observe its progress in building back better.

**deforest** /dii'fârist/vt

جنگل‌زدایی کردن، جنگل‌های (جایی را) تخریب کردن

deforestation /dii'fâris'teyshen/n

جنگل‌زدایی، تخریب جنگل، انهدام جنگل

# D d

## **damage assessment report**/'damij'asesment ri:port/n

Within 72 hours of the event, the local government will provide a Cumulative Local Initial Damage Assessment Report, or IDA. The IDA is a summary of damages to homes, businesses and public infrastructures.

گزارش ارزیابی خسارات

## **death toll**/'deth tol/ n

The death toll from a 7.0 magnitude earthquake that struck the Indonesia island of Java on Wednesday afternoon rose to 44 and was expected to continue to climb, according to the country's Disaster Management Agency.

شمار کشته شدگان، تعداد تلفات انسانی

## **debrief**/ dii'briif/ vt, n

debriefing/ dii'briifing/ n

Critical Incident Debriefing, CID, is an approach to address and mitigate, the distress caused by sudden traumatic events such as explosions, injuries, assault or other acts of violence and life threatening events. Debriefing usually takes place after an unusual or traumatic incident. It is preferably done directly with the person or persons who experienced the events.

## **decentralization**/diisentrâlay'zeyshen/n

decentralize/dii'sentrâlayz/vt

decentralized/dii'sentrâlayzd/adj

Development and use of a web-site linking DRM program implementation partners (National and State Governments, UNDP, etc) to share activities, approaches, methods to mainstream disaster management, gender, decentralization etc.

تمرکززدایی  
تمرکززدایی کردن  
غیرمتمرکز

## **decipher**/di'sâyfer /vt

Information on disaster risk, which is reliable, accessible, timely and appropriately packaged, is a prerequisite to any disaster reduction effort. Iran has significant scientific and technical capacities on different aspects of disaster risk management. The country is host to a number of fine institutions of international repute, which frequently compile and have access to a range of relevant data and information that could help decipher 'missing links' in Iran's context of risk management.

پی بردن (به چیزی یا مطلبی)، رمزگشایی کردن، سر در آوردن، خواندن

**cyclone**/'sâyklon / n-In meteorology, a cyclone is an area of closed, circular fluid motion rotating in the same direction as the Earth. This is usually characterized by inward spialing winds that rotate anti-clockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere of the Earth. Most large-scale cyclonic circulations are centered on areas of low atmospheric pressure. The largest low-pressure systems are cold-core polar cyclones and extratropical cyclones which lie on the synoptic scale.

Devastating cyclones hit the coastal areas of Bangladesh almost every year accompanied by high – speed winds, sometimes reaching 250 km/hr or more and 3-10 m high waves, causing extensive damage to life property and livestock.

سیکلون، چرخ باد، چرخند

**cultivable**/ 'kâltivebel / adj

cultivate/ 'kâltiveyt / vt

cultivated/ 'kâltiveytid / adj

cultivation/ kâlti'veyshen / n

cultivator/ 'kâltiveyter / n

The communities face many natural hazards but the major ones are drought and floods. These invariably cause famine, food insecurity and poverty. However, the communities have devised a variety of measures such as growing drought – resistant and early-maturing indigenous crop varieties, gathering wild fruits and vegetables, wetlands cultivation, livestock diversifying and splitting, that have enabled them to survive climate hazards with little or no support from the outside world.

**cumulative**/'kyoomyuletiv/adj

cumulatively/'kyoomyuletivly/adv

In particular, earthquakes, floods, and droughts are hazards that have cumulatively affected Iran's coping capacities.

**current** / kârent /adj

Keep your training current, training will help you to keep calm and know what to do when an earthquake occurs.

**custodial**/ kâs'todiâl/n

custodian/kâs'todiyen/ n

custody/'kâstedi/ n

Essential equipment /machines required for handling building collapse and fire fighting should be kept ready in each of these Units so that in case of a localized and smaller disaster the Disaster Management Unit of that area itself is in a position to handle the situation with the help of fire Brigade. The equipment may be kept under the custody of the SHO or the officer next to him so that at the time of need these are already available to DMU, which should start helping victims without any loss of time.

**cutting – edge** / 'kâting 'ej / n

Several delegations noted that keeping up with the rapid development of information and communication technology and other cutting – edge technologies was of particular importance to the Asia – pacific region, where agriculture remained dominant.

قابل کشت، مزروعی

[زمین] شخم زدن، آماده کردن، زراعت کردن در،

کاشتن، زیرکشت بردن، کشت و کار کردن

سرپرستی، [حقوقی] حضانت، امانت، بازداشت، توقیف

پیشگام، پیشتاز

**cross linking**/'krâs linking/n

ارتباط متقابل

It is the most powerful and efficient way of communicating with all major players at the same time. Linking of databases ensures rapid flow of information and data. It facilitates cross-linking of information thereby giving a big boost to the decision making process under uncertain premises.

**crosscutting**/'krâskâting / n,adj

مشترک، میان بخشی

The German Aerospace Center (DLR) has set up a dedicated crosscutting service, which is the so – called “Center for Satellite – based Crisis Information” (ZKI), to facilitate the use of its Earth – observation capacities in the service of national and international response to major disaster situations, humanitarian relief efforts, and civil security issues.

**crustal deformation**/'krâstâl diifor'meyshen/n

تغییر شکل پوسته‌ای، تغییر شکل لایه‌ای

The theory of plate tectonics states that the Earth's crust is made up of rigid plates that "float" on top of the mantle and move relative to one another. As the plates move, the crust deforms dominantly along the plate margins. Intraplate deformation differs from that respect by the observation that deformation can occur anywhere the crust is weak and not just at plate margins. Deformation is the folding, breaking, or flow of rocks. There are many different types of crustal deformation depending on whether the rocks are brittle or **ductile**. The aspects that determine these properties are due to certain temperatures and pressures that rocks experience within the Earth. Therefore, temperature and pressure control deformation processes.

**crustal strain**/'krâstâl streyn/n

گرنش پوسته‌ای

How the solid Earth responds to deformational forces is a topic of considerable uncertainty. The inside of Earth is physically and chemically heterogeneous, and its ability to carry and transmit stress varies widely depending on composition, mineralogy, pressure, temperature, deformation history, and the presence or absence of fluids. Variations in these properties determine where the crust will deform broadly and slowly or, alternatively, break locally and rapidly in a damaging earthquake.

**culminate**/'kâlmineyt /vi,vt

منتهی شده به، به کمال رسیدن، به اوج رساندن

## culmination/'kâlmineyshen /n

اوج، نقطه اوج، منتها درجه، نتیجه نهایی، حاصل

Every day hazards and vulnerability from patterns of accumulating risk that can culminate in disaster triggered by an extreme natural hazard event.

to the organization. For that reason, one of the first actions in crisis management planning is to identify an individual to serve as crisis manager.

**criteria/** krây'tiriya/n

ضوابط، معیارها، ملاکها

criterion/ krây'tiriyen/ n

ضابطه، معیار، ملاک

The purpose of this standard is to provide those with the responsibility for disaster /emergency management and business continuity the criteria to access current programs or to develop, implement and maintain a program to mitigate, prepare for, respond to, and recover from disasters and emergencies.

**critical facilities/**criticâl fa'silitiz/n

تاسیسات حیاتی

“Critical facilities” are defined as those structures from which essential services and functions for victim survival, continuation of public safety actions, and disaster recovery are performed or provided. Shelters, emergency operation centers, public health, public drinking water, sewer and waste water facilities are examples of critical facilities.

**critical infrastructure/**'kritikâl 'infrâstrâkcher/n

زیرساخت‌های حیاتی

The physical structures, facilities, networks and other assets which provide services that are essential to the social and economic functioning of a community or society.

**critical public facilities/**'kritikâl pâblik fa'silitiz/n

تاسیسات عمومی حیاتی

Protect and strengthen critical public facilities and physical infrastructures particularly schools, clinics, hospitals, water and power plants, communications and transport lifelines through proper design, retrofitting and rebuilding.

**critical situation/** kritikâl sichu'weyshen/ n

شرایط بحرانی، اوضاع بحرانی، وضعیت بحرانی

Poverty during normal times or in response to critical situations can also lead to undesirable livelihood practices that magnify hazard level or generate new hazard.

**cross-fertilize/** krâs'fertilâyz/vt

غنی کردن، بارور کردن، بهره‌مند کردن

cross – fertilization/ krâs fertilây'zeyshen/ n

غنی، بارور، بهره‌مند

Previous International Disaster and Emergency Readiness, IDER conferences have shown what an immense benefit can be gained from cross – fertilization of experiences and procedures from around the world. Robotics, for instance, that are used in the nuclear industry to detect contamination can be adapted to search for survivors after a building collapse or in the devastation caused by earthquakes.

**cost recovery**/ kâst ri'kâveri/ n

بازیافت بهای تمام شده، بازگیری هزینه

Disaster management and cost recovery for utilities and energy companies will examine these topics considering what hasn't worked previously, why and what will be done in the future to avoid catastrophic losses.

**counterfactual**/'konter'facchuwâl/n

خلاف واقعیت، نادرست

One could also predict the counterfactual situation with rainfall at a given percent below its mean level.

**countermeasures**/'kaontermezhez/n

اقدامات پیشگیرانه، اقدامات موثر، اقدامات متقابل

In the 1940s and 50s Japan was repeatedly ravaged by typhoons and earthquakes. Almost every year, thousands of lives were lost. In 1959; Ise-wan Typhoon hit the third largest metropolitan area of Nagoya and killed more than 5000 people. This heavy damage triggered a big debate in the Japan government on how to cope with natural disasters. After two years of debate, the Disaster Countermeasure Basic Act was legislated in 1961. This Act has three major characteristics.

**credibility** / kredi'biliti/ n

قابلیت قبول، باور، صحت، صدق، درستی، اعتبار

## credibility gap/ kredi'biliti gap/ n

فرق بین حرف و عمل، فرق بین گفتار و کردار، بدبینی اجتماعی

## credible /' kredibel/ adj

باور کردنی، قابل قبول، پذیرفتنی، موثق، معتبر

## credibly /' kredibli/ adv

به طور موثق، به طور مطمئن

Overall, the TDRM, Total Disaster Risk Management, approach presents as its added value quality and credible disaster management, enhanced efficiency in disaster reduction and response, and cost effectiveness through sound allocation of limited resources

**crisis**/'krâysis/n,adj

بحران، بحرانی

Crisis is any event that is, or is expected to lead to, an unstable and dangerous situation affecting an individual, group, community, or whole society. Crises are deemed to be negative changes in the security, economic, political, societal, or environmental affairs, especially when they occur abruptly, with little or no warning. More loosely, it is a term meaning "a testing time" or an "emergency event".

**crisis management**/'krâysis 'manijment /n

مدیریت بحران

Crisis management is the application of strategies designed to help an organization deal with a sudden and significant negative event. A crisis can occur as a result of an unpredictable event or as an unforeseeable consequence of some event that had been considered a potential risk. In either case, crises almost invariably require that decisions be made quickly to limit damage

coordinator/ko'ordineyter/ n

هماهنگ کننده، گرداننده، مدیر

All aspects and arrangements presented in the environmental contingency plan should bear in mind that the coordination of response and mitigation efforts is a key factor in all emergency response activities.

cope/kop/vi

پذیرفتن، تحمل کردن، از پس (کار یا چیزی) برآمدن

Strengthen and when necessary ensure rapid and effective disaster response in situations that exceed national coping capacity.

coping capacity/ koping ke'pasiti/n

ظرفیت روبرویی با شرایط مخاطره‌آمیز، ظرفیت تحمل‌پذیری

Is the ability of people, organizations and systems, using available skills and resources, to manage adverse conditions, risk or disasters. The capacity to cope requires continuing awareness, resources and good management, both in normal times as well as during disasters or adverse conditions. Coping capacities contribute to the reduction of disaster risks.

corrective disaster risk management/kâ'rektiv di'zâster risk 'manijment/n

مدیریت اصلاحی خطرپذیری بلایا، مدیریت تعدیل کننده خطرپذیری بلایا

Activities address and seek to remove or reduce disaster risks which are already present and which need to be managed and reduced now. Examples are the retrofitting of critical infrastructure or the relocation of exposed populations or assets.

correlate /kâri'leyt/vt,vi

همبسته کردن، ارتباط دادن، همبسته بودن، مرتبط بودن، همبستگی داشتن

correlation /kâri'leyshen/n

همبستگی، ارتباط، ربط، بستگی

correlative /kâre'letiv/adj

لازم، ملزوم، هم آیند

Any effective strategy to manage disaster risk must begin with an identification of the hazards and what is vulnerable to them. But what does this mean? What is the correlation between risk, hazards and vulnerability?

cosign/ ko'sâyn/vi, vt

ضامن شدن، تضمین کردن، ضمانت کردن

cosignatory/ ko'signeteri/adj,n

امضا کننده (یکی از دو یا چند امضا کنندگان یک قرارداد)، هم امضا

cosigned/ kosâynd/ adj

ضمانت شده، تضمین شده

cosigner/ ko'sâyner / n

ضامن، تضمین کننده

Under these circumstances, the approvals instrument should again signed by the minister of the lead agency, and also co – signed by appropriate representatives of the partners to the plan.

cost – benefit / kâst benefit / n

هزینه فایده، هزینه سود

An increasing commitment to addressing risk in development projects seems related to a realization of the cost – benefit ratio of investing in risk reduction.

**contingency planning**/kân'tinjensi 'planning/n

A management process that analyses disaster risks and establishes arrangements in advance to enable timely, effective and appropriate responses.

Contingency planning results in organized and coordinated courses of action with clearly identified institutional roles and resources, information processes and operational arrangements for specific actors at times of need. Based on scenarios of possible emergency conditions or hazardous events, it allows key actors to envision, anticipate and solve problems that can arise during disasters. Contingency planning is an important part of overall preparedness. Contingency plans need to be regularly updated and exercised.

برنامه‌ریزی برای رویدادهای احتمالی، برنامه‌ریزی احتیاطی

**contravene** / kântran'iin /vt

contravention/ kântra'venshen /n

Where it is determined that the incident was caused by a person or an entity in contravention to applicable laws, the Ministry of Environment is responsible to compensate those who encounter expenses as result of activities on the basis of requests made by the OSC in the response to a pollution incidents for which the plan was implemented.

نقص کردن، نادیده گرفتن، تخطی کردن از  
نقص، خلاف، تضاد

**contribute**/kân'tribyoot/vt,vi

contributing/kân'tribyooting/adj

contribution/kân'tribyooshen/n

contributor/kân'tribyooter/n

contributory/kân'tribyuteri/adj

Moreover, further study should be used to identify the most effective ways to encourage contributions to disaster relief efforts, and to ensure that victims quickly and efficiently receive needed aids.

کمک کردن، ارایه کردن، موثر بودن، تاثیر گذاشتن  
موثر، مهم  
کمک، سهم، نقش، کوشش، تلاش

کمکی، جانبی، موثر

**convene**/kân'viin/vi,vt

convener/kân'viiner/n

United Nations Secretary-General Ban Ki-moon is convening a Summit on Climate Change – on 22 September 2009 – to focus Heads of State and Government on the need for urgent action, and to mobilize the highest level political will needed to reach a fair, effective, and scientifically ambitious global climate deal at the United Nations Climate Change Conference in Copenhagen this December.

تشکیل جلسه دادن، تشکیل شدن، گرد آمدن، جمع شدن،  
دعوت کردن، فراخواندن  
[جلسه و غیره] برگزار کننده، دعوت کننده

**coordinate** /ko'ordineyt/vt

coordinated/ko'ordineytid/adj

coordination /ko-ordi'neyshen/ n

هماهنگ کردن، آراستن، منظم کردن  
هماهنگ، سازمان یافته، یکپارچه  
هماهنگی، هماهنگ، همکاری، مشارکت

over decisions governing their lives as well as their access to resources. Due to existing socio-economic conditions, cultural beliefs and traditional practices, women are more likely to be disproportionately affected by disasters, including increased loss of livelihoods, gender-based violence, and even loss of life during, and in the aftermath of, disasters.

**consult**/kân'sâlt/vt,vi

consultancy/kân'sâltensi/n

consultant/kân'sâltent/n,adj

consultation/kânsâl'teyshen/n

consultative/kân'sâltetive/adj

UNISDR Europe is hiring a DRR Capacity Building Consultant who will support the implementation of the activities related to Task 1 of this intervention: **“Enhance the regional institutional capacity and coordination with respect to disaster risk reduction and adaptation to climate change”**. Hence, consultant’s task will be to offer recommendations for developing proposals for EWS development and regional DRR road-map.

مشورت کردن، مشاوره کردن، تبادل نظر کردن  
دفتر مشاوره، مشاوره، نظر کارشناسی  
مشاور، مشورت کننده، مشاوره کننده  
مشورت، مشاوره، تبادل نظر، جلسه مشاوره  
مشورتی

**contain**/kân'teyn/vt

contained/kân'teynd/adj

containment/kân'teynment/n

With respect to unauthorized or accidental discharges of hazardous materials or pollutants, the responsibility for containment and clean up remains with the discharger.

در بر داشتن، شامل (چیزی) بودن، مهار کردن، کنترل کردن،  
جلوی (چیزی را) گرفتن  
خوددار، کنترل شده  
سد نفوذ، [سیاست] تحدید نفوذ

**contaminant**/kân'taminent/ n

contaminate/kân'tamineyt/vt

contaminated /kân'tamineytid/adj

contamination/kân'tami'neyshen/n

In any water supply and arsenic mitigation project, water resources management with involvement of local community would play an important role in the remediation of ground water arsenic contamination.

ماده آلوده کننده  
آلوده کردن، فاسد کردن، خراب کردن  
آلوده، آلوده به مواد رادیواکتیو  
آلودگی، آلودگی به مواد رادیواکتیو، عامل آلودگی

**contingency**/kân'tinjensi/adj,n

contingent/kân'tinjent/adj

contingent/kân'tinjent/n

District will be covered under the massive village based disaster preparedness program including development of village contingency plan.

اتفاق، پیش آمد، حادثه، تصادف، احتمال  
اتفاقی، تصادفی، مشروط به، موقوف به  
اتفاق، گروه، هیات نمایندگی

**consequence**/kânsikwens/n

consequent/kânsikewent/adj,n

consequential/kânsi'kwenshâl/adj

consequently/kânsi'kwentli/adv

There is evidence of greater official and public understanding that the threat of combined political, economic and environmental consequences of disaster demands more effective means to address vulnerability to current and emerging risks.

**consolidate**/kân'salideyt/vt,vi

consolidated/kânsali'deytid/adj

consolidation/kânsali'deyshen/n

Through the above mentioned business lines, the objective of the Programmatic Approach is to support the Government of Colombia to consolidate the country's disaster risk management framework and increase its resilience to natural hazards.

**consortium**/kân'sortiyem/n

The objective of this consortium is to support the development of national components of the Indian Ocean Tsunami Warning and Mitigation System (IOTWS) in ten countries in the region.

**constituency**/kânsti'tyu-ensi/n

constituent/kânsti'tyu-ent/n,adj

When a disaster occurs, the information is communicated to Cabinet through the National Disaster Risk Management Committee (NDRMC). The NDRMC is directly accountable to Cabinet through the Secretary to Cabinet. At a local level, the Settlement Disaster Risk Management Committee (SDRMC), that works closely with the community, transmits information about a possible disaster or risk to the Constituency Disaster Risk Management Committee (CDRMC).

**constitute**/kânstityoot/vt

constitution/kânsti'tyooshen/n

Due to erratic behavior of monsoons, both low and medium rain fall regions, which constitute about 68% of the total area, are vulnerable to periodical droughts.

**constrain**/kâns'treyn/vt

constrained/kâns'treyn/adj

constraint/kâns'treyn/n

Disasters affect men and women, and boys and girls, differently. In many contexts gender inequalities constrain the influence and control of women and girls

disaster management, most for this purpose.  
 Collect information on all aspects of disaster and disaster management;  
 Process and analyse such information;  
 Develop and maintain an electronic database envisaged in subsection (2), and  
 Take steps to disseminate such information, especially to communities that are vulnerable to disasters.

**confine** / kân'fâyn / vt

confined/ kân'fâynd / adj

confines/' kân'fâynz / n

In emphasis on a development – enhancing disaster risk management is to ensure that scarce post- loss funds are put to uses that create the most value, where value is not confined to short – term disaster needs.

محدود کردن، منحصر کردن، نگه داشتن

محدود، کوچک

مرز، حدود، حد، محدوده

**conflagration**/kânflag'reyshen/n

The Oakland firestorm of 1991 was a large suburban conflagration that occurred on the Hillside of northern Oakland , California, and southeastern Berkeley on Sunday October 20, 1991. The fire has also been called the Oakland hills firestorm or the East Bay Hills Fire. The fire ultimately killed 25 people and injured 150 others.

حریق بزرگ، حریق خانمانسوز

**conform**/kân'form/vi,vt

conformation/kânfor'meyshen/n

conformist/kân'formist/n,adj

conformity/kân'formiti/n

The current policy and programming efforts for disaster risk reduction in the four countries are comprehensive and conform to the Hyogo Framework for Action (HFA) priorities.

پیروی کردن، منطبق بودن، تطبیق دادن

ساخت، ترکیب، شکل

دنباله‌رو، محافظه کار

دنباله روی، پیروی، انطباق، سازگاری

**congested**/kân'jestid/adj

congestion/kân'jeschen/n

Combined with inadequately regulated building structures and a trend towards congested urban development are critical factors.

شلوغ، پرازدحام، پر، مملو

تراکم، ازدحام، شلوغی

**consensus**/kân'senses/n

(consensus among sb.,(consensus about sth.)- Important frameworks exist to guide disaster management, such as the United Nations International Strategy for Disaster Reduction's Hyogo Framework for Action, and the WHO Regional Office for Europe Toolkit, which are developed through expert consultation to create a consensus set of guidelines and checklist.

توافق، اجماع، اتفاق نظر، نظر عمومی، نظر اکثریت

conceptualize/ kân'sepchuwâlây/ vt,vi

A disaster risk reduction conceptual framework has been developed and will be discussed by all stakeholders in the region for adoption and implementation and promoting economic growth.

تصور کردن، مجسم کردن، متصور شدن

**concerted**/kân'sertid/adj

concert/ 'kânsert/n

Objective of ASEAN agreement on disaster management and emergency response is to provide effective mechanisms to achieve substantial reduction of disaster losses in lives and in the social, economic and environmental assets of the parties, and to jointly respond to disaster emergencies through concerted national efforts and intensified regional and international co-operation.

جمعی، مشترک، هماهنگ

هماهنگی، توافق

**concomitant** /kân'kâmitent /adj

The management of the child who has sustained significant radiation exposure is dependent on the type and degree of exposure as well as the presence of concomitant injuries. Principles of disaster management, including contamination, prehospital care and field triage, should be fully employed.

توام، همراه، همایند، ملازم، پیوست، همزمان، مقارن، مصادف

**concur**/ kân'ker/ vi

concurrence/kân'kârens/ n

concurrent/ kân'kârent/adj

concurrently/kân'kârentli/ adv

The conference will be held concurrently with the Disaster Management India trade show that features search and rescue and emergency response equipment, shelter and tenting, Emergency medical Services (EMS), and all kinds of fire fighting, communication, detection, geographical information system (GIS) and global positioning systems (GPS).

هم عقیده بودن با، موافقت کردن، دست به دست هم دادن،

موافقت، توافق، تقارن

هم زمان، تقارن، موافق، سازگار، شبیه

به طور هم زمان، هم زمان باهم

**conduce**/kân'dyoos/vi

conducive/kân'dyoosiv/adj

One of the goal is to provide open source information exchange and sharing between public, government and non – government agencies. To accomplish this, efforts are directed toward creating and promoting an environment that is conducive for open exchange of information in complex emergency and disaster situations.

موجب شدن، منجر شدن به

مناسب، مساعد، منشا، سرچشمه، موجب

**conduit** /'kândwit /n

The National Center must act as a repository, and conduit for information concerning disasters and

مجرا، کانال

change will aggravate many of the socioeconomic factors that drive vulnerability.

**compensatory disaster risk management**  
/kâmpen'seyteri di'zâster risk 'manijment/n

Activities strengthen the social and economic resilience of individuals and societies in the face of residual risk that cannot be effectively reduced. They include preparedness, response and recovery activities, but also a mix of different financing instruments, such as national contingency funds, contingent credit, insurance and reinsurance and social safety nets.

مدیریت جبران خطرپذیری بلايا

**complementary tool**/ kâmpili'mentri tool/ n

In early warning system (EWS) for sovereign default provides a complementary tool to the analysis of decision – makers by facilitating objective measures of vulnerability.

ابزار تکمیلی

**comply** /kâm'play /vi

The Ministry's role is to ensure that the discharger responds promptly, and complies with requirements for cleanup, disposal and the repair of damage to property and to environment.

مطابق با، پیروی کردن، اطاعت کردن

**Comprehensive approach**/kâmpri'hensiv 'eproch /n

Efforts to prevent and plan for natural and technological disasters have arisen from the need to protect society from hazards that are prevalent in the area of governmental jurisdiction. This approach to risk reduction and civil protection has been developed through legislation, the defining of institutional responsibilities and the allocation of financial resources (top down), coupled with local responses and community involvement. Such a comprehensive approach to multi hazard planning is a feature of the strategy of Organization for Economic Co-operation and Development (OECD) countries and has evolved from extensive research into both natural and anthropogenic disasters.

رویکرد جامع، رویکرد جامع

**comprise**/kâm'p'rây/vt

The concept of 'invulnerable development' attempts this: In this formulation, invulnerable development is development directed toward reducing vulnerability to disaster, comprising 'decisions and activities that are intentionally designed and implemented to reduce risk and susceptibility, and also raise resistance and resilience to disaster'.

درببرگرفتن، تشکیل شدن از، به وجود آمدن

تصور، تجسم، مفهوم سازی

committee /kâ'miti /n

کمیته، کمیسیون، هیات بررسی

Where hazardous materials affect or may affect the health and welfare of citizens or the environment of neighboring countries, these undertakings or commitments should also be reflected in the contingency plan.

**community-based** /kâ'myooniti beysd /n

جامعه محور، مبتنی بر جامعه، مردم محور

The Community Based Disaster Management (CBDM) approach promotes a bottom – up approach working in harmony with the Top – down approach, to address the challenges and difficulties. To be effective, local communities must be supported into analyzing their hazardous conditions, their vulnerabilities and capacities as they see themselves.

**community-based disaster risk management** /kâ'myooniti beysd di'zâster risk 'manijment/n

مدیریت جامعه محور خطرپذیری بلایا

Promotes the involvement of potentially affected communities in disaster risk management at the local level. This includes community assessments of hazards, vulnerabilities and capacities, and their involvement in planning, implementation, monitoring and evaluation of local action for disaster risk reduction.

**community knowledge centers**/kâ'myooniti 'nâlij 'senterz/n

مراکز دانش محله، مراکز آگاهی محله

CKC is a new information center that aims to provide interested individuals and professionals working in the field of community development.

**community preparedness**/ kâ'myooniti pri'perdnis/n

آمادگی محله

Individuals can make a difference in their own community but not everyone has bought into preparedness. Research on personal preparedness indicates that individuals who believe they are prepared for disasters often are not as prepared as they think. In addition, some admit they do not plan to prepare at all.

The challenge: Maximizing awareness and encouraging participation in disaster preparedness activities to affect change at the community level.

**compelling**/kâm'peling/adj

{استدلال} محکم، قوی، قانع کننده، ضروری، الزام آور

Communities around the world are already vulnerable to disasters, the “Global Assessment Report: Disaster Risk Reduction” presents compelling new evidence of concentration of risk in many developing countries. The “Intergovernmental Panel on Climate Change (IPCC) Fourth Assessment Report” reports that climate change is expected to be accompanied by an increased frequency and intensity of extreme climate events in many parts of the world. Moreover, climate

that undermine the effort of collaborative disaster management. Based on the concept of professionalism in disaster management, this research argued that it had the level of professionalism in disaster management.

**collapse mechanisms**/ko'laps 'mekanizemz/n

سازوکارهای ریزش

In historic city centers the mitigation of seismic risk is dependent on the possibility of implementing strengthening programs. Given the cultural and economic value attached to the historic structures, however, interventions should be tailored to suit aesthetic and structural requirements of each building type, and provide sufficient reliability of performance in future earthquakes. A simple analytical model is developed to calculate load factors associated with various collapse mechanisms of wall assemblies, and vulnerability functions are derived. An application shows the capability of the procedure to quantify reduction in vulnerability associated with strengthening implementations for different typologies.

**collective response**/kâlealtive ris'pâns / n

واکنش مشترک، واکنش جمعی، جوابگویی گروهی

A national environmental contingency plan is often developed to take advantage of the collective response capability of several ministries, agencies or departments.

**commence** /kâ'mense/ vt, vi

شروع کردن، آغاز کردن

commencement/ kâ'mensment / n

شروع، آغاز، جشن پایان تحصیل

Based on the final report on an emergency operation, the National Disaster, Management Office will commence rehabilitation consultation with relevant agencies and compile a report to be presented to the National Disaster Management Council within 3 months.

**commend** / kâ'mend / vt

تعریف کردن، تحسین کردن، ستودن

commendable / kâ'mendebel / adj

قابل تحسین، درخور ستایش

commendation / kâ'men'deyshen/ n

تحسین، تشویق، ستایش، توصیه، معرفی

The committee commended the important role played by the Regional Coordination Mechanism and encouraged the secretariat to continue to play a leading role in the Regional Coordination Mechanism in the area of disaster risk management.

اقلیم‌شناسی

**chaos**/'keɪʌs/n

chaotic/key'ætɪk/adj

chaotically/key'ætɪkli/adv

Chaos theory is an important issue in disaster management because a kind of chaotic condition is experienced especially within the first 72 hours of a disaster (Pine, 2006; Koehler, 1966). When the previous disaster experiences are examined, it is seen that authorized people might not be disposed to take initiative and crisis management would become inefficient under these conditions.

آشوب، اغتشاش، هرج و مرج، آشفتگی  
بی‌نظم، آشفته، درهم برهم، آشوب‌گونه  
به‌طور آشفته

**charter**/'tʃɑːtər/n

This charter has been developed through consultations with more than 600 children in 21 countries in Africa, Asia, the Middle East and Latin America.

It identifies children's priorities for reducing the impacts of disasters before they happen. This is a charter for children by children. It is an important reflection of what children themselves are talking about when it comes to disasters and how to prepare for them.

منشور، فرمان، حکم

**cholera**/'kɒlərɑː/n

Cholera is an acute diarrhoeal infection caused by ingestion of food or water contaminated with the bacterium *Vibrio cholerae*. Researchers have estimated that every year, there are roughly 1.4 to 4.3 million cases, and 28 000 to 142 000 deaths per year worldwide due to cholera. The short incubation period of 2 hours to 5 days, is 1 factor that triggers the potentially explosive pattern of outbreaks.

ذکر کردن، آوردن، مثال زدن، مثال آوردن، استناد کردن به

**civil defence**/'sɪvəl dɪ'fens/n

Civil defense, civil defence, or civil protection is an effort to protect the citizens of a state (generally non-combatants) from military attack. It uses the principles of emergency operations: prevention, mitigation, preparation, response, or emergency evacuation and recovery. Programs of this sort were initially discussed at least as early as the 1920s and were implemented in some countries during the 1930s as the threat of war and aerial bombardment grew. It became widespread after the threat of nuclear weapons was realized. Since the end of the Cold War, the focus of civil defense has largely shifted from military attack to emergencies and

پدافند غیرعامل، دفاع غیرنظامی

**capital equipment**/kapitâl i'kwipment/n

These guidelines are not specifically for use in disaster response situations and indeed note that 'The general rule of thumb is that capital equipment should not be donated in emergency situations, unless it is established that the emergency will be continued over a long period.' The donation process, flowcharts and checklists may be applicable across many settings and situations, but involvement of the recipient in decision making is paramount.

تجهیزات سرمایه‌ای

**carve**/kârv/vt,vi

For Indonesia, both the Indian Ocean tsunami and the HFA have directed it toward developing its capacity in undertaking disaster management and disaster risk reduction. Indonesia has carved out some major achievements, such as the inception of the Disaster Management Law in 2007, establishment of the National Agency for Disaster Management (BNPB) and its provincial and regional chapters, formation of the National Platform for Disaster Risk Reduction and the launch of the Indonesian Tsunami Early Warning System (Ina-TEWS), all in 2008.

ایجاد کردن، ساختن، به زحمت به دست آوردن

**catastrophe**/ ke'tastrefi/ n

catastrophic/ kates'trafik/adj

The Mass Evacuee Support planning initiative focuses on developing strategies and guidelines for support of disaster victims through development of planning guidance and a Host – State Evacuee, Support Plan template. These planning efforts will enhance operational effectiveness to provide recovery assistance to individuals and households, as well as public assistance to State and local governments in the event of an extraordinary or catastrophic disaster.

فاجعه، مصیبت، بلا، سانحه

فاجعه‌آمیز، اسفبار، مصیبت‌بار، فجیع

**challenge**/'chalinj/vt,n

challenger/'chalinjer/n

challenging/'chalinjing/adj

There are a range of challenges to the effective implementation of disaster risk reduction laws and policies.

چالش، مخالفت، به چالش خواستن، توضیح خواستن

رقیب، حریف

سخت، دشوار، پرزحمت، جالب، هیجان‌انگیز، نقادانه

**channel**/'chanel /vt

The approach of Comprehensive Disaster Management Programme (CDMP) II is to channel support through government and development partners, civil society and NGOs into a people-oriented disaster management and risk reduction partnership. That partnership will promote cooperation, provide coordination, rank priority programmes and projects, and allocate resources to disaster management activities, risk reduction activities and climate change adaptation activities in Bangladesh.

هدایت کردن، سوق دادن، جهت دادن به

# C c

## **cadre**/kâder/n

A cadre of village volunteers would be created to carry out the village based natural disaster risk management programs in the selected program districts.

کادر، تیم، گروه، دسته

## **calamitous**/ka'lamits/adj

calamity/ka'lamiti/n

Other calamities such as, floods, earthquakes, wildfires, highwinds, and sandslides are high on the list of sources of deaths, destruction and economic losses in the region.

فجیع، اسفبار، مصیبت‌بار

فاجعه، بلا، مصیبت

## **capacity**/ke'pasiti/n

Is the combination of all the strengths, attributes and resources available within an organization, community or society to manage and reduce disaster risks and strengthen resilience.

Capacity may include infrastructure, institutions, human knowledge and skills, and collective attributes such as social relationships, leadership and management.

ظرفیت

## **capacity assessment**/'kepasiti a'sesment/n

Is the process by which the capacity of a group, organization or society is reviewed against desired goals, where existing capacities are identified for maintenance or strengthening and capacity gaps are identified for further action.

ارزیابی ظرفیت

## **capacity development**/ke'pasiti di'volopment/n

Is the process by which people, organizations and society systematically stimulate and develop their capacities over time to achieve social and economic goals. It is a concept that extends the term of capacity-building to encompass all aspects of creating and sustaining capacity growth over time. It involves learning and various types of training, but also continuous efforts to develop institutions, political awareness, financial resources, technology systems and the wider enabling environment.

توسعه ظرفیت، ظرفیت‌سازی

**brief account**/brif e'kaont/n

شرح کوتاه، گزارش کوتاه

The chairperson invited the speakers whose names were included on the list to give a brief account of the activities of the organizations they represented before engaging in a dialogue with members of the committee.

**broach**/ broch/vt

مطرح کردن، عنوان کردن، در میان گذاشتن با

Its strategic role is enhanced by its well – developed focus on broaching disaster risk management.

**broker** /'broker/ n

کارگزار (اوراق بهادار)، واسطه، دلال

brokerage/'brokerij/ n

کارمزد، کمیسیون، حق العمل، حق دلالی، واسطه‌گری

The Joint unit (brokerage) can bring an affected country in direct contact with donor countries who are willing to assist and provide needed response resources.

**building code**/ bilding kod/ n

آیین‌نامه ساختمان، ضوابط ساختمان‌سازی

A set of ordinances or regulations and associated standards intended to regulate aspects of the design, construction, materials, alteration and occupancy of structures which are necessary to ensure human safety and welfare, including resistance to collapse and damage.

Building codes can include both technical and functional standards. They should incorporate the lessons of international experience and should be tailored to national and local circumstances. A systematic regime of enforcement is a critical supporting requirement for the effective implementation of building codes. .

**built-environment** /bilt-in'vâyrement/n

ساختمان‌ها و تاسیسات موجود در محیط

The built environment is the urban and technological infrastructure that we live in, as opposed to a naturally occurring environment, such as forest or grass plains. Managing the built environment is key to managing the risks of disasters and natural hazards.

**burden** /'berden /n, vt

بار، فشار، سنگین، مسوولیت سنگین، تحمیل کردن بر

burdened /'berdend /adj

تحت فشار، زیر بار

burdensom /'berdensâm /adj

خطیر، مهم، سنگین، شاق، طاقت فرسا

Disasters strike suddenly, often involve large groups of people, cause substantial personal and societal damage, and lay a considerable burden on economic and public health resources.

world's largest construction cranes unexpectedly buckled while performing a delicate operation on a baseball stadium in Wisconsin, USA; and a small fire suddenly erupted into a chaotic firestorm in the ticket hall of London's busy King's Cross Underground station. Relive these tragic stories as they unfold from minutes prior to calamity leading up to the end of the investigation. Each compelling episode features interviews with survivors and investigators, dramatic re-enactments and archival footage to reveal the disaster's root cause and the lessons learned as a result.

**body** /'bâdi/ n

نهاد، هیات

This is accomplished by assigning participation of suitable representatives from the ministry responsible for the environment and/or for renewable resources to the body established to implement the national disaster plan.

**bold** / bold/ adj

مشخص، واضح، آشکار، روشن

Bold action must be taken today to counter this trend and to develop effective, long term, sustainable strategies for building earthquake safe communities.

**bolt**/bolt/n,vi,vt

پیچ، چفت، پیچ شدن، پیچ کردن، قفل شدن

Ceiling lights and fans should be additionally supported with a cable bolted to the ceiling joist. The cable should have enough slack to allow it to sway. Framed pictures, especially glass-covered, should be hung from closed hooks so that they can't bounce off. Only soft art such as tapestries should be placed over beds and sofas.

**bottleneck** /'bâtelnek /n

آستانه، گلوگاه، تنگنا، تنگی، مزیغه، تنگ راه

Communication is a major bottleneck in case of any major disaster particularly when the traditional network system already in force breaks down. In order to strengthen communications, it has been decided that police network (POLNET) will also be used for disaster management.

**breakwater** /breykwoter /n

موج شکن

The concrete breakwater, nearly 207 feet deep, was designed to blunt an incoming tsunami. Its construction marked the culmination of decades of research on wave dynamics and dissipation. It stretches 6430 feet and was completed in 2009 after more than three decades of construction.

**breeding – ground/ briding graond** / n

محل مناسب، محل اشاعه، خاستگاه

The wet environment in the aftermath of a tropical wildfire, combined with the destruction of sanitation facilities and a warm tropical climate, is the perfect breeding-ground for epidemics of disease which claim lives long after the storm passes.

**bilateral**/bâylaterâl/adj

bilaterally/bâylaterâli/adv

Bilateral cooperation between the US and India on disaster management is supported by a \$2.7 million, five year effort of the US Agency for International Development (USAID) and Ministry of Home Affairs (MHA).

دو طرفه، دو جانبه  
به طور دوطرفه، از هر سو، از دو طرف

**binding** (on/upon sb.)/ 'bâynding/adj

The UN Copenhagen Summit fell short of a legally binding deal in December. At the summit, most nations signed up for an accord meant to limit a rise in temperatures to below 2 degree Celsius (3.6 Fahrenheit). But it didn't spell how.

الزام آور، تعهد آور، قابل اجرا، معتبر

**biological hazard**/bâyâlâjikâl hazerd/n

are of organic origin or conveyed by biological vectors, including pathogenic microorganisms, toxins and bioactive substances. Examples are bacteria, viruses or parasites, as well as venomous wildlife and insects, poisonous plants and mosquitoes carrying disease-causing agents.

Biological agents are living things, or products of living things, that can cause illness and disease in humans.

Biological agents include viruses, bacteria and fungi, as well as parasitic worms and some plants. Biological agents enter the body when they are inhaled, eaten (ingested) or absorbed. Most biological agents are inhaled. Once inside the body, these infectious agents can multiply quickly and may be passed from one person to another. Some can survive outside the body for a quite a long time if they have the right breeding ground, such as water or food. Others die quickly without the protection of the body.

خطر بیولوژیکی، خطر زیستی

**blizzard**/ 'blizard / n

A blizzard is a severe snowstorm characterized by strong winds. By definition, the difference between blizzard and a snowstorm is the strength of the wind. To be a blizzard, a snowstorm must have winds in excess of 56km/h(35 mph) with blowing or drifting snow which reduces visibility to 400 meters or ¼ mile or less and must last for a prolonged period of time – typically three hours or more.

بوران، کولاک

**blueprint**/'blooprint/n

Discovery Channel investigates six of the world's most disastrous malfunctions in 'Blueprint For Disaster'. Each episode takes viewers into the heart of the despair and destruction: from Seoul, in Korea, when all five floors of a luxury department store collapsed within a matter of seconds; the massive and seemingly unsinkable Derbyshire ship vanished without a trace; one of the

طرح، نقشه، برنامه کار، طرح اولیه

# B b

## **backstopping** / 'bak'stâping /n

The disaster management program provides support to national governments, local authorities, and communities by design, implementation and backstopping of projects at local, national, regional and global level.

حمایت، کمک، همکاری

## **baseline**/'beyslâyne/n

This document provides a baseline on which a strategy for Comprehensive Disaster Management (CDM) within the Caribbean will be designed. CDM has been defined under the DERMS project as including integrated management of all natural and human-induced hazards and involving management through all phases of the Disaster Management Cycle viz. Prevention and Mitigation, Preparedness, Response, Recovery, and Restoration. CDM engages the public and private sectors, civil society, urban and rural communities, and the general population in hazard prone areas. CDM is therefore multi-hazard, and multi-sectoral in its application and is concerned primarily with integrating vulnerability assessment and risk reduction into development planning and management.

پایه، مبنا، معیار

## **benchmark**/'benchmârk/n

The Millennium Declaration and the Hyogo Framework for Action point towards the need for methods to identify urban vulnerability to disaster risk as a pre-cursor for the development of benchmarks with which to track policy progress for urban sustainability and risk reduction

معیار، ملاک

## **best available technology** /best e'veylebel tek'nâlâji/ n

Best available technology (BAT) is a process that determines the criteria upon which BMSs will be proposed in conjunction with theoretical assessment and common sense.

بهترین فن‌آوری موجود

## **best management practice** / best 'manijment 'praktis/ n

Best management practice (BMP) is a common name for a variety of non-structural and low cost structural measures in mitigating the flooding and pollution effects in urban settings.

بهترین شیوه مدیریتی

There is a need for substantial augmentation of the present network by using emergency technologies such as Advanced Multi Parametric Satellite Systems from Geo-stationary as well as Polar Platforms, Automatic Weather Stations, GPS Sonde, Wind Profiler, Rain Radar, Doppler Weather Raders, Meteorological Towers, Agromet towers etc.

**autonomic**/otâ'nâmik/adj

autonomous/o'tânemes/adj

autonomy/o'tâ'nemi/n

The project is developing a system that will deliver alert to disaster management authorities with inputs from a range of autonomous sensors, agencies and citizens.

خودکار، غیرارادی  
مستقل، آزاد، خودگردان  
استقلال، آزادی عمل، خودگردانی

**avalanche**/'avalânc/n

An avalanche is a sudden rapid flow down a slope, occurring when either natural triggers or human activity causes a critical escalating transition from the slow equilibrium evolution of the snow pack.

Healthy ecosystems, such as intact forests, wetlands, mangroves, and coral reefs are beneficial to local populations for the many livelihood benefits and products that they provide: firewood, clean water, fibers, medicine and food, while acting as natural buffers to hazard events for flood abatement, slope stabilization, coastal protection and avalanche protection, in addition to other structural and disaster preparedness measures.

بهمن، آوار برف، نزول ناگهانی و عظیم هرچیزی

**aware**/e'wer/adj

awareness/e'wernis/n

Public awareness on Disaster Management is important as simple Do's and Don'ts of disaster can save many lives during disaster. It is important that the content of awareness messages should be consistent, lucid and context specific and it should be conducted at regular intervals so that the knowledge is kept alive in the community to pass on from generation to generation and ensure that the disaster risk reduction become an integral part of the culture and everyday life of the community.

باخبر، آگاه، مطلع، متوجه  
آگاهی، اطلاع، توجه

**assistive devices** /e'sistiv di'vâysez /n

وسایل کمک توان بخشی

Donating equipment and supplies can be more complicated. Before organizing collections of physical therapy equipment and assistive devices, it is important to confirm with the relief agencies that there is a need for the items.

**asthenosphere**/âstenos'fiyer /n

سست کره، لایه سنگ نرم استنوسفر

Under the crust is the mantle, which is composed of silicon, oxygen magnesium, iron, aluminum, and calcium. The mantle, together with the crust, is called the lithosphere. The asthenosphere is located below the lithosphere about 62 to 155 miles under the earth's crust. The asthenosphere is believed to be the zone upon which the tectonic plates move about.

**at the risk of** /at dhe risk âv /idioms

در معرض خطر (چیزی)

Such stress can place a widow and her children at the risk of bondage, prostitution, trafficking and other exploitative situations.

**atmospheric hazards**/ atmosferik hazardz/ n

خطرات جوی

Atmospheric hazards caused by atmospheric processes (storm, cyclone, nor'wester, tornado, hurrican, drought, etc).

**attain** / e'tyn/ vt,vi

رسیدن، دست یافتن به، به دست آوردن، کسب کردن

attainable / eteynebel / adj

دست یافتنی، قابل حصول

attainment / e'teynment / n

دستیابی، نیل، پیشرفت، موفقیت

We are firmly convinced that together with a shared vision, we can use ICTs as a catalyst towards the attainment of the Millennium Development Goals and the Pacific Islands Leaders Vision for free and worthwhile lives for all pacific peoples.

**attest**/attest/vt,vi

تصدیق کردن، گواهی کردن، تایید کردن

attestation/ate'steyshen/n

تصدیق، گواهی، تایید، استشهاد، شهادت نامه

Generally it is a government body that issues a completion certificate attesting that the building has been constructed per specification and requirements, and it is fit for occupancy.

**audit**/ 'odit/ n, vt

حسابرسی، حسابرسی کردن، ممیزی، ممیزی کردن

auditor / 'oditer/ n

حسابرس، ممیز

Auditors tend to view disaster recovery planning as a facet of an organization's efforts to guarantee the security and integrity of its data processing capability.

**augment** /og'ment/vi,vt

افزایش دادن، افزودن، بهبود بخشیدن، بهتر کردن

augmentation /ogmen'teyshen /n

افزایش، ازدیاد، فزونی، افزوده، اضافه

augmented /og'mentid /adj

[موسیقی] افزوده

**anomalous**/e'nâmeles/adj

anomaly/e'nâmeli/n

Appearance of anomalies in the atmosphere before earthquakes(EQs) has been verified, through observation of anomalous transmission of VHE electromagnetic(EM) waves beyond line-of-sight.

غیرعادی، نابهنجار، نامنظم، بی قاعده

بی قاعدگی، بی نظمی، نابهنجاری

**anthropogenic**/anthro'pogeniik/adj

Major natural disasters include occasional landslides and sand storms; magnified by on going anthropogenic processes of deforestation and desertification.

ایجاد شده توسط انسان، انسان آورد، مردمزاد

**approach**/ e'proch / n

approachable/ e'prochebel/ adj

approaching / e'proching / adj, adv

If development is to be protected and advanced in countries affected by climate risks, an integrated approach to climate risk management needs to be promoted.

رویکرد، نگرش، دید، روش، شیوه، برخورد

قابل دسترسی، در دسترس، دست یافتنی

قریب الوقوع، در شرف وقوع، در حال فرارسیدن، نزدیک به

**arc** /ârk/n

An arc is a chain of volcanoes (volcanic arc) that sometimes forms on the land when an oceanic plate collides with a continental plate and then slides down underneath it (subduction).

قوسی، قوس زنجیره‌ای

**articulate**/ âr'tikyulit/ adj

articulate/ âr'tikyuleyt/ vt

articulateness/ ârtikyu litnis/ n

articulation/ârtikyu'leyshen/ n

Ensure support to national platforms for disaster reduction including through the clear articulation of their role and value added, as well as regional coordination to support the different advocacy and policy needs.

فصیح، واضح، رسا، زبان آور، دارای قدرت بیان، روشن

گفتن، بیان کردن، باصراحت اظهار کردن

فصاحت، زبان آوری، قدرت بیان

بیان، تلفظ، [زبان‌شناسی] تولید آوا

**as per**/'az per/preposition

As per Article 3, the governments are obliged to ensure the equal right of men and women to the enjoyment of all economic, social and cultural rights set forth in the present convene.

مطابق با، طبق، بنابر، بر حسب

**asperity**/as'perity/n

An asperity is an area on a fault that is stuck or locked. In the Earth, tectonic earthquakes are caused by slip along a fault plane, where two rock bodies are in rigid contact. Asperities are the crustal volumes from where a maximum of seismic energy is radiated during an earthquake and from where the rupture often initiates. These are the highly stressed volumes along a fault zone and the recurrence time in them is the lowest. Therefore, it is important to identify asperities.

تکه‌های پایدار گسل

**alleviate**/ a'liiviyeyt / vt

alleviation/ aliivi'yeyshen / n

The Comprehensive Disaster Management Programme (CDMP) is a five year initiative from January, 2010 to December, 2014, with the overall aim of contributing to poverty alleviation in Bangladesh through disaster risk reduction.

کم کردن، کاستن از، تسکین دادن، آرام کردن  
کاهش، تخفیف، تسکین، وسیله تخفیف، مایه تسکین

**allocation of resources**/alo'keyshen âv risorsiz/ n

To ensure emergency physicians and nurses play a primary role in disaster planning and are considered in any national allocation of resources and protective measures, Congress should continue to include them in any definition regarding first responders to disasters.

تخصیص منابع

**alluvial**/a'looviyâl/adj

alluvium/a'looviyem/ n

The region has considerable area close to river basins and deltas that are characterized by Holocene alluvium deposits, which are likely to soften and hence are susceptible to liquefaction during an earthquake.

آبرفتی، رسوبی  
آبرفت، ته نشین، رسوب

**ambience**/ 'ambiyens/n

ambient/'ambiyent/ adj

By continuously monitoring the ambient vibration of the instrumented bridge, its global structural conditions of both super - and sub - structures can be evaluated with possible damage locations identified which will aid local non - destructive evaluation or visual inspection to further localize and access the damage.

محیط، جو، فضا، حال و هوا  
محیط، محیط اطراف، فراگیر

**amend**/ a'mend/vt,vi

amendable/a'mendebel/adj

amendment/a'mendment/n

amends/a'mendz/n

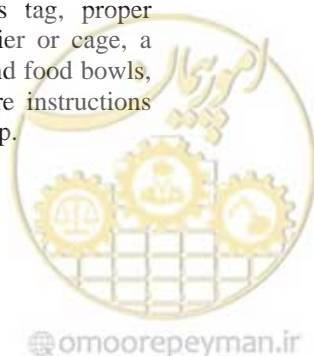

In addition, traditional flood modifying and against - flood protecting measures need to be amended with two new measures characteristic only for urban setting: small near - to- source detention structures and low cost protection techniques.

اصلاح کردن، ماده یا قانونی را اصلاح و تجدید نظر کردن  
قابل اصلاح، اصلاح پذیر  
تجدیدنظر، اصلاحیه، [قانون] متمم، صلاح، تصحیح  
جبران، پرداخت خسارت

**ample**/ 'ampel/ adj

Animal brought to a pet shelter are required to have proper identification collar and rabies tag, proper identification on all belongings, a carrier or cage, a leash, an ample supply of food, water and food bowls, any necessary medications, specific care instructions and newspapers or trash bags for clean up.

فراوان، زیاد، کافی، به اندازه

**aggravate** / 'agreveyt/ vt

aggravating / 'agreveyting / adj

aggravation / agre'veyshen/ n

Although war is a crucial factor in causing and aggravating risk and suffering, conflict does not feature in the Hyogo Framework for Action, and consequently the necessary policies and strategies are omitted.

بدتر کردن، وخیم‌تر کردن، تشدید کردن  
ناراحت کننده، آزار دهنده  
تشدید، وخامت، عامل تشدید، مایه عصبانیت

**aggregate**/'agrigit / n, adj

aggregate/'agregeyt/vt, vi

aggregation/ agri'geyshen/ n

Natural hazards are likely to (a) contribute to poverty by affecting human development indicators and assets directly, as well as indirectly through affecting their attributes of value and productivity; and (b) exacerbate the household's in ability to avoid or recover from poverty due to their aggregate nature, in combination with the absence or inadequate application of coping mechanisms.

جمعی، مجموعه، گروه، کلی، مجموعاً، حاصل جمع  
جمع کردن، جمع شدن، گروه‌بندی کردن  
اجتماع، تجمع، مجموعه، گروه، توده

**aid packages** / eyd pakijiz / n

Many Indian Ocean Tsunami aid packages supplied by various organizations in Tamil Nadu excluded culturally appropriate chudhidar sets that are worn by girls. Similarly, burkas were underprovided in areas with Muslim communities.

بسته‌های کمک‌های مردمی

**alarm**/'e'lârm/n,vt

alarmed/'e'lârm/d/adj

alarming /'e'lârm/ing/adj

alarmingly/'e'lârm/ingli/adv

**alarmist** /'e'lârmist/n,adj

In light of the alarming global trend of rising disaster losses, disaster and climate risk management (DRM) is increasingly at the core of World Bank business. Investments are helping to protect millions of lives and livelihoods and safeguard growth in key socio-economic sectors. The World Bank, with the UN and some bilateral donors, founded the Global Facility for Disaster Reduction and Recovery (GFDRR) in 2006 to leverage new investment, generate knowledge and expertise, and build a global partnership for mainstreaming DRM.

آژیر، اعلام خطر، هشدار، از خطر (چیزی) آگاهانیدن  
وحشت‌زده، مضطرب  
نگران کننده، اضطراب‌آور، وحشتناک  
به طور نگران کننده‌ای، به طرز وحشتناکی  
آدم اضطراب برانگیز، جنجالی، جنجال برانگیز، ترس‌آفرین،  
رعب‌آفرین

**all hazard approach**/'ol 'hazerd e'proach/n

In Canada, emergency management adopts an all hazard approach that addresses both natural and human-induced hazards and disasters. These are increasing in both number and frequency across the world, resulting in ever growing human suffering and economic cost.

رویکرد جامع بلایا و سوانح

**adverse effects**/'advɜrs i'fekets/n

Tropical cyclones and tornadoes uproot trees, telephone, telegraph and electricity line, destroy bridges, culverts, and houses, kill people and domestic animals, leaving serious and adverse effects on the economy as well as on the whole environment.

تأثیرات نامطلوب، تأثیرات مضر

**affected**/a'fektid/adj

People who are affected, either directly or indirectly, by a hazardous event. Directly affected are those who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets. Indirectly affected are people who have suffered consequences, other than or in addition to direct effects, over time, due to disruption or changes in economy, critical infrastructure, basic services, commerce or work, or social, health and psychological consequences.

People can be affected directly or indirectly. Affected people may experience short-term or long-term consequences to their lives, livelihoods or health and to their economic, physical, social, cultural and environmental assets. In addition, people who are missing or dead may be considered as directly affected.

آسیب دیده، متأثر از

**affix**/a'fiks /vt

The best preventive option for decreasing casualties in the event of a disaster is the construction of high – quality buildings; in some cases, affixing the furniture to the walls may also be helpful. In the absence of such measures, the incidence of disaster – related crush injuries of remains high.

چسباندن، نصب کردن، متصل کردن، زدن

**affordable**/e'fordebel/adj

afford/e'ford/vt

Since the Indian Ocean tsunami catastrophe on 26 December 2004, it has become ever clearer that such technical supporting services should be more available to all countries, and joint efforts by international communities should be initiated to make such services affordable to least developed countries.

قابل تهیه و خریداری

استطاعت داشتن، توانایی داشتن، از عهده بر آمدن

**aftermath**/âfter'math/n-The aftermath of the earthquake highlighted the extreme vulnerability of women with low socio- economic standing especially in terms of their access to resources.

نتیجه، عواقب، پیامد، دوره پس از

**aftershock**/'âfter'shâke/ n

Aftershocks usually occur within the next two days, but have also been recorded to happen for years. Their size, strength, and frequency usually diminish with time.

پس لرزه

**adapt**/a'dapt/vt

adaptability/adapti'biliti/n

adaptable/a'daptable/adj

adaptation/adap'teyshen/n

adapted/a'dapted/adj

The adjustment in natural or human systems in response to actual or expected climatic stimuli or their effects, which moderates harm or exploits beneficial opportunities. The border concept of adaptation also applies to non-climatic factors such as soil erosion or surface subsidence.

سازگار کردن، وفق دادن، تنظیم کردن

انطباق پذیری، انعطاف پذیری، سازگاری

انطباق پذیر، انعطاف پذیر، قابل تغییر

انطباق، سازگاری، تغییر

مناسب، سازگار، تنظیم شده

**address**/ad'res /n, vt

addressee/adre'sii/n

The disaster mitigation works mainly address the followings; (i) minimize the potential risks by developing disaster early warning strategies, (ii) prepare and implement developmental plans to provide resilience to such disasters, (iii) mobilize resources including communication and tele-medicinal services and (iv) to help in rehabilitation and post-disaster reduction.

مخاطب قرار دادن، عنوان کردن، سخنرانی، بیان

مخاطب، {نامه} گیرنده

**adequacy**/adikwisi/n

adequate/'adikwit/adj

adequately/'adikwitli/adv

Emergency response and management must explicitly target women as well as men in all areas of support, based on the recognition that women's involvement is essential to adequate recovery and potential for sustainable development and reduction of natural disasters.

کفایت، شایستگی، بسندگی، تکافو

مناسب، کافی، شایسته، به اندازه کافی

به اندازه کافی، به شایستگی، به طور شایسته

**adhere** / ad'hiyer / vi

adherence/ ad'hiyerens/ n

adherent/ ad'hiyerent/ n

adhension/ ad'hiizhen/ n

adhesive/ ad'hiisiv/ adj, n

None of the disaster management systems were ISO certified. Thus, most of the zonal and divisional plans were not comprehensive lacked uniformity and also did not adhere to the provisions of the Disaster Management Act 2005 and the recommendations of HLC.

پای بند بودن، رعایت کردن، اعتقاد داشتن، چسبیدن

پیروی، تبعیت، هواداری، پشتیبانی، وفاداری، پای بندی

هوادار، طرفدار، پیرو، مرید

حمایت، پشتیبانی، وفاداری، چسبیدگی، چسبندگی،

چسبنده، چسب دار، چسب، چسب، ماده چسبنده

**adjunct**/'ajānkt/ n

A national environmental contingency plan prepared with these guidelines should be a valuable adjunct to a national disaster plan.

ضمیمه، الحاقی، جزء، فرع، دستیار، کمک

**acculturation**/ a'kâlchereyshen/ n

فرهنگ پذیری

An interpreter's behavior may evoke certain feelings in the disasters survivor. Factors such as interpreter's gender, age, or level of acculturation may affect the survivor's willingness to speak openly.

**Achilles heel**/ ekiliiz 'hiil/ n

نقطه ضعف، پاشنه آشیل

It represents the Achilles Heel of traditional disaster recovery planning and can only be effectively addressed by DR coordinators who are willing to adopt new, proactive roles within the IT organization.

**act**/akt/n

قانون

acting/ 'akting/adj

موقت، جانشین، قائم مقام، کفیل

action/'akshen/ n

دعوای حقوقی

actionable/akshenebel/adj

قابل تعقیب، قابل پیگیری قانونی

action stations/'akshen steyshenz/ n

مواضع، مواضع عملیاتی

The reporting requirement for releases of hazardous materials and pollutants are established in legislation these include, but are not limited to the:

- a) National Clean Water Act,
- b) Clean Air Act,
- c) Environmental Conservation Act,
- d) Transportation of Hazardous Material Act.
- e) National Maritime Shipping Act, and
- f) Port Authorities Act.

**acute** / a'kyoot/adj

شدید، بحرانی، وخیم، مبرم

acutely/a'kyootli/adv

به شدت، عمیقاً، سخت، بسیار

The response to disasters is usually characterized by the urgent need for rapid decision accomplished by acute shortages of trained personnel, material, and time to carry out decisions effectively.

**ad hoc**/ad 'hâc/ adj,adv

موقتی، موردی، خاص، اختصاصی، برحسب ضرورت، موقتا

Ad hoc and wireless sensor networks have been proposed as an appealing communication method to deal with the unexpected conditions that emerge during and/or after a disaster. Communications among victims and crew members involved in rescue operations are crucial in order to alleviate the disaster consequences and save lives. In particular, at the peak of this i-phone era, people mostly communicate with each other using smartphones, making calls or sending text messages through internet and via applications such as WhatsApp, Facebook, and Line among others. However,cellular-based communications may not be possible after a disaster due to the damage caused to the telecommunication infrastructure, leaving many people isolated and unprotected.

# A a

**abate**/ e'beyt / vi, vt

abatement/e'beytment / n

The Ministry of Environment administers the Environment Conservation Act, numerous surveillance and abatement programs designed to maintain acceptable standards.

کاهش یافتن، کاستن، خاتمه یافتن، برطرف کردن، کاهش، جلوگیری

**acceptable risk**/ ak'septebel risk/n

Or tolerable risk, is therefore an important subterm; the extent to which a disaster risk is deemed acceptable or tolerable depends on existing social, economic, political, cultural, technical and environmental conditions. In engineering terms, acceptable risk is also used to assess and define the structural and non-structural measures that are needed in order to reduce possible harm to people, property, services and systems to a chosen tolerated level, according to codes or "accepted practice" which are based on known probabilities of hazards and other factors.

خطر پذیرفتنی، ریسک مجاز، خطرپذیری قابل قبول

**accidental release**/ aksi'dentâl ri'liis / n

Unauthorized and accidental releases (spills) of oils, chemicals and other hazardous or polluting substances may present an immediate threat to the nearby community.

نشت، ریزش پیش‌بینی نشده، ریزش تصادفی

**accommodate**/ e'kâmodeyt/vt

accommodation/ e'kâmo'deyshen/n

accommodating/ e'kâmo'deyting/ adj

Disaster management services are trying to arrange temporary accommodation for about 400 people left without a roof over their heads after a fire in Alexandria.

اسکان دادن، جا دادن، همراهی کردن، مساعدت کردن  
جا، منزل، محل سکونت، کمک، وسیله کمک  
منزل مناسب، سازگار، خوش برخورد، مهربان، همراه

**accretionary wedge** /a'kriisheneri wej /n

Sediments, the top layer of material on a tectonic plate, that accumulate and deform where oceanic and continental plates collide. These sediment are scraped off the top of the downgoing oceanic crustal plate and are appended to the edge of the continental plate.
